Soitec SA | Europe

There's room for plenty more PICs in a pod

Recent ecosystem announcements support a broader Photonics-SOI ramp from mid-2027, while consensus still misses a substantial mix benefit on profitability. We address three misperceptions that should close Soitec's valuation gap to optical peers. Reiterate Top Pick, €200 PT implies 50% upside.

Key Takeaways

- Multi-rack scale-up adds a third photonics growth vector and could triple Soitec's revenue per GPU versus a stand-alone 72-GPU rack.
- We model Photonics-SOI growth of 175% in FY27 and 70% in FY28, with our Edge & Cloud estimates 5%/19%/35% above consensus in FY27-29.
- Photonics contribution margin is c.15-20ppt above the group average, lifting group contribution margin from c.59% in FY26 to 67% in FY29.
- Photonics should reach c.55% of contribution profit next fiscal year, yet Soitec trades on 17x FY29/CY28 P/E versus peers at 25x CY28.
- Stay OW as the company trades at a substantial discount to optical peers despite recent confirmation of growth. Soitec is a top-pick in European semis.

Multi-rack scale-up creates a third, nearer-term photonics growth vector and could triple Soitec's revenue opportunity per GPU. Soitec supplies Photonics-SOI wafers used to manufacture silicon photonics dies that are increasingly used for datacentre interconnects. We expect continued growth for mainstream luggable optics, while the industry continues to develop CPO (co-packaged optics) to replace copper within racks (pods) in the medium term. Importantly, recent announcements add a third route, using NPO (near-packaged optics) to connect multiple racks within a scale-up domain is likely to start contributing meaningfully from mid-2027 with larger deployments into 2028. Our calculations suggest that connecting multiple racks over high speed, optical connections, could triple Soitec's revenue per GPU versus a stand-alone 72-GPU rack. Even a stepwise move to 30% adoption could lift revenue per GPU by c.50%, on our estimates.

Consensus still misses a gross profit benefit from the growth of higher-margin Photonics-SOI in the mix. Our revenue estimates remain 5%/16% above the Street for FY28/29 but our gross profit estimates are 10%/36% ahead for FY28/29, which implies that the Street is missing the higher profitability of Photonics-SOI. We estimate photonics' contribution margin at c.15-20ppt above the group average, helping lift the group contribution margin from c.59% in FY26 to 67% in FY29. Operating leverage on a high but largely stable fixed-cost base adds to the mix benefit, with earlier infrastructure investment largely complete.

Soitec is still valued as a mobile stock even though photonics should provide c.55% of earnings next fiscal year. RF-SOI represented 32% of FY26 revenue and Photonics-SOI 16%, so the historical end-market mix still shapes investor perception. Our estimates point to a different profit mix going forward as photonics grows faster and carries a higher contribution margin. This perception shift should help the share close the valuation gap to peers. The shares trade on 17x FY29e/CY28e P/E, versus c.x CY28e for optical peers. We keep our €200 PT, based on 25x FY29/CY28 earnings, implying 50% upside, and reiterate Top Pick.

There's room for plenty more PICs in a pod

Historically, optical networking was most visible in communications between rows, halls, buildings, or campuses. Growth here should continue, but more recently the big opportunity for Soitec, and the optical networking space in general, was perceived to be the replacement of copper by optical fibre within the rack. Although that remains a big prospective opportunity, recent developments have pointed to a new growth vector: high-speed (scale-up) connections between multiple racks, opening up significant deployment of silicon photonics chips where there are currently none. For Soitec, this results in an opportunity to potentially triple its revenue per GPU. For clarity, this is incremental to the ongoing growth in pluggables and developments towards CPO.

Optical networking can ease HBM adjustments ...

The catalyst seems to have been reports over the past few weeks suggesting NVIDIA may reduce Rubin Ultra's HBM capacity from 288GB to 192GB per GPU. Our Asia team's checks indicate that Rubin Ultra may indeed adopt a tiered HBM spec ([link](#)). This is not entirely unexpected as, after a recent NDR with NVIDIA, covering analyst Joe Moore wrote that NVIDIA had said that a memory shortage could indeed result in adjustments: *"compute, networking, and memory are all inter-related, and it is possible to use the other two to optimize a shortage of the third"*.

We believe NVIDIA can make this trade partly because its Vera Rubin Ultra NVL576 rack topology is well suited for the task. This multi-rack architecture allows model data to be partitioned across a larger, tightly connected group of processors that spans multiple racks. GPUs within the domain can map and access memory resident in other GPUs' HBM over NVLink. The larger domain therefore increases aggregate HBM capacity and provides greater flexibility in data placement and workload partitioning, partly offsetting lower HBM capacity per GPU.

The Vera Rubin POD (shown below) was introduced during the company's annual GTC conference in March 2026 and is the best-known example of a multi-rack set-up. NVL576 combines eight separate MGX NVL racks, each with 72 Rubin Ultra GPUs, all in a single 576-GPU NVLink domain with copper within the racks (no Soitec content) and direct optical connections between the racks (via either NPO or CPO, both of which are enabled by Soitec's silicon photonics wafers). However, NVIDIA is not the only company that has announced a multi-rack pod: our Asia team reported that AI "supernodes" enabled by scale-up are becoming the focus of China's AI computing landscape with companies like Biren and Huawei demonstrating scale-up domains of 1,024 accelerators ([link](#)).

Exhibit 1: NVIDIA Polyphe prototype, a fully functional GB200-based multirack NVL576 scale-up system

Source: NVIDIA

Connecting multiple racks within one scale-up domain increases the need for high-bandwidth links over distances where copper becomes less practical, supporting NPO/ CPO-based optical connectivity. This is not entirely new; we wrote about it in our coverage of GTC '26. At the time, though, our sense was that it was perceived as a smaller deployment, a test case on the path towards full intra-rack scale-up. This earnings season changed that perception as mentions of NPO and CPO enabling scale-up across multiple racks have picked up notably:

- Lumentum: *"What we're seeing now is an inflection in the ASICs and in the SerDes speed, and that's driving the need for NPO and CPO... as these new generations come online, really seeing silicon in mid-'27 toward the end of '27 and early '28."*
- Tower Semiconductor: *"The next frontier is enabling optical interconnects for scale up, either within a single rack or across multiple racks, and once again, [...], NPO deployments planned over the next year and many more in design. [...] I think it will be significant. The exact percent, I don't yet know. But I would think it will be in the — not in the single digits, but in the tens of the percentage of what we'll be shipping, especially in the second half of the year."*
- Coherent: *"we've seen, especially over the last 3 to 6 months a significant ramp-up in the engagement with customers on not just CPO, but now NPO."*
- Astera Labs: *"We expect that the first deployment will happen with NPO solution... we look at it as 2027 being the year where NPO is deployed and then 2028 and beyond is when CPO gets deployed."*

Lumentum and Coherent are covered by Meta Marshall, Astera Labs is covered by Joe Moore.

... resulting in more PICs in a pod.

Soitec said that most of its revenue for the current fiscal year is from pluggables, but also partly from NPO. The clearer timelines (mid '27, mentioned by several ecosystem partners) and the necessity (reducing HBM content per GPU) mean that this is likely a meaningful, relatively near-term catalyst for Soitec. Our calculations suggest that this could triple the company's revenue per GPU relative to a "standard" rack containing 72

GPUs with no direct connections to other racks. We don't expect the market to immediately switch to this type of rack topology, but even assuming a stepwise increase towards 30% over multiple years could see Soitec's revenue per GPU grow by c.50%. The replacement of copper inside a rack remains the larger opportunity (and comes on top of this development), but as timelines remain somewhat uncertain we currently don't explicitly model this out.

Exhibit 2: Soitec revenue per rack shows a sizeable content increase for multi-rack scale-up topologies

Source: Morgan Stanley Research estimates

Although we don't explicitly model Soitec's photonics revenue as a function of content per AI accelerator, the relatively near-term growth opportunity does make it easier to underwrite strong growth in this year and next. Our updated estimates point to growth of 175% for this year vs. company guidance of "more than double", followed by 70% in fiscal year 2028. Although this puts us 5%/19%/35% ahead of sell-side consensus for the Edge & Cloud division (which embeds photonics revenue), we note that this is actually somewhat behind the combined forecasts of Soitec's main silicon photonics customers, as shown below.

Exhibit 3: Cloud & Edge revenue, MSe vs. Css

Source: Visible Alpha, Morgan Stanley Research estimates

Exhibit 4: Soitec growth vs. SiPho customers

Source: Visible Alpha, Morgan Stanley Research estimates

The positive mix impact of Photonics is largely missed

We are ahead of the Street on revenue for fiscal '27e-'29e (1%/5%/16%) which is driven by a much more positive view on Soitec's photonics business, offset by some conservatism on Soitec's mobile and automotive divisions. To our surprise this gap widens meaningfully on the gross profit line, here we are 10% and 36% ahead of the Street, despite having seen consensus come up quite materially post earnings (19%/14% for FY27/28).

Exhibit 5: Soitec: MSe vs. consensus

	Mse			Css			Mse vs. Css

EPS	(1.46)	3.12	7.95	(0.04)	2.53	5.35	N/A	23%	49%

Source: Visible Alpha, Morgan Stanley Research estimates

Although there is a natural element of gross margin expansion with higher growth, we also believe that the market is not fully aware of the positive mix that comes with the outperformance of photonics.

Exhibit 6: Mix effect from Photonics results in meaningful (gross) profit expansion

Source: Morgan Stanley Research estimates

We estimate that the contribution margin of Silicon Photonics is c.15-20ppt above the group average and as it grows in the mix we see the contribution margin expanding from c.59% in FY26 to 67% in FY29. This comes on top of material operating leverage on a relatively high fixed cost base due to earlier, and now largely finished, infrastructure investments and significant recurring spending on R&D.

Exhibit 7: Photonics' contribution margin is 15-20ppt above the group average

Source: Morgan Stanley Research estimates

Valuation still held back by stale perceptions of the past end market mix

The market's perception of the company's execution is improving, with new management clearly on top of working capital while the early qualification of the Singapore fab shows that operations have started to improve as well. The more persistent bear argument is that Soitec's main end market is still mobile, and that soft conditions here are a material headwind for the company's performance. Although we understand this view, the troubled RF-SOI revenue within Mobile accounted for 32% of revenue in the most recent fiscal year while Photonics-SOI was limited to 16%, we believe it misses that through the combination of the drivers discussed above (growth and mix) Photonics' share of the contribution profit should be around 55% in the next fiscal year and growing from that level. As shown, the FY26 revenue split is very difficult what our forecasts suggest will be the FY28 profitability contribution of the respective end markets.

Exhibit 8: Mekko chart showing that RF-SOI still accounted for the majority of FY26 revenue

Source: Company data, Morgan Stanley Research

Exhibit 9: Mekko chart showing significant contribution of Photonics-SOI to FY28 earnings

Source: Morgan Stanley Research estimates

The market still values Soitec as a mobile play rather than for its opportunity in optical networking. The shares currently trade on 17x FY29/CY28 earnings which is more in line with a mobile/analog stock than a photonics company. As shown below this space trades on c.25x CY28 P/E multiples. Our price target stays at €200, providing 50% upside potential, on an unchanged 25x FY29/CY28 earnings multiple, in-line with the peer group.

Exhibit 10: Comp table: Soitec trades at a discount to optical peers

Source: Factset, Visible Alpha, Morgan Stanley Research estimates (e)

Estimates update. We tweak our estimates that were already updated after the company's pre-announcement. Our EPS estimates for next year (fiscal '28) move up by 5% and by 1% for FY29. Our estimates for the current fiscal year move lower due to one-off effects: we assume a €30m headwind in gross profit because of the potential end of the IPCEI subsidy project and a c.€60m impact from the settlement of a long-running tax issue with the French tax authorities which we discussed here.

Risk Reward – Soitec SA (SOIT.PA) Top Pick

Room for plenty more PICs in a POD

PRICE TARGET €200.00

We derive our €200 price target by applying a 25x multiple to our CY28e (fiscal '29 - March '29 year end) EPS estimate. We value Soitec on CY28e given increased visibility on the trajectory of growth for Photonics SOI, which we believe will be a multi-year growth story. Our multiple is in-line with sector peers.

Consensus Price Target Distribution

RISK REWARD CHART

Source: Refinitiv, Morgan Stanley Research

BULL CASE

€300.00

40x CY28e (March end 2029) bull case EPS

Our bull case fair value is derived by applying a 30x target P/E multiple to our bull case CY28 (FY29) earnings estimates. For our bull case we assume a stronger recovery in RFSOI and more aggressive growth in Photonics SOI that show a path to earnings power of €10.

BASE CASE

€200.00

25x CY28e EPS (March end 2029)

We model a meaningful, multi-year growth trajectory in Photonics SOI as well as a normalisation in RFSOI. We apply a 25x P/E multiple to CY28 (FY29) to capture Soitec's earnings potential in the multi-year optical networking opportunity.

BEAR CASE

€80.00

20x CY28e (March end 2029) bear-case EPS

Our bear case fair value is derived by applying a 20x target P/E multiple to our c.50% lower bear case CY28 (FY29) (discounted back by one year) EPS estimate. For our bear case we assume a slower recovery in RFSOI and more less growth in Photonics SOI.

OVERWEIGHT THESIS

Soitec is leveraged to silicon photonics (SiPho) through its leadership in photonics SOI substrates, a critical input for optical networking modules. As SiPho adoption scales in AI datacenters, Soitec's opportunity increases. With near term acceleration confirmed on both better demand visibility and execution we see Soitec as a core holding for investors that want exposure to optical networking.

Important Regulatory Disclosures on Subject Companies

As of July 31, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Aixtron SE, ASML Holding NV, Infineon Technologies AG, Nordic Semiconductor ASA, **Soitec SA**, STMicroelectronics NV.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Aixtron SE, STMicroelectronics NV.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Aixtron SE, ASM International NV, BE Semiconductor Industries NV, STMicroelectronics NV.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Aixtron SE, ASM International NV, ASML Holding NV, BE Semiconductor Industries NV, Infineon Technologies AG, Melexis N.V., Nordic Semiconductor ASA, **Soitec SA**, STMicroelectronics NV, VAT Group AG.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from ASM International NV, BE Semiconductor Industries NV, Infineon Technologies AG.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Aixtron SE, ASM International NV, ASML Holding NV, BE Semiconductor Industries NV, Infineon Technologies AG, Melexis N.V., Nordic Semiconductor ASA, **Soitec SA**, STMicroelectronics NV, VAT Group AG.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Aixtron SE, ASM International NV, BE Semiconductor Industries NV, Infineon Technologies AG.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1529	42%	442	47%	29%	750	43%
Equal-weight/Hold	1582	43%	396	42%	25%	773	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	560	15%	97	10%	17%	217	12%
Total	3,674		936			1741	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those

who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.
