Raimo's Roundup: Q2 On-Cycle Earnings Recap – Greater Differentiation

Q2, so far, is the first quarter in a while in which we are seeing a real differentiation within software. Several names had strong positive reactions to better numbers, but we also saw several with ongoing sharp declines. It seems growth acceleration or deceleration is the main factor to watch.

What Happened?

Dynatrace [announced](#) that it is acquiring Arize for \$915mn. We believe that DT is paying a premium to accelerate its transition from a traditional observability vendor into a broader AI platform, leveraging Arize's developer footprint and AI observability capabilities to improve its competitive position (see our note [here](#)).

Reuters [reported](#) on Thursday 8/13 that PE firm Silver Lake is in talks to acquire **Workday**, according to people familiar with the matter. According to the sources, the talks are ongoing and there is no guarantee a deal will materialize, but we note this news led to a positive share reaction across the enterprise software space.

IBM announced a partnership with OpenAI, which includes IBM embedding OpenAI's models into IBM Consulting Advantage, bringing FDEs trained through the OpenAI Partner Network to help accelerate AI implementations and launching a dedicated OpenAI Practice, with thousands of consultants and engineers obtaining certifications under the OpenAI Partner Network. Additionally, Bloomberg reported that IBM launched a C\$2.75bn two part senior unsecured debt offering (C\$1.75bn 4Y and C\$1bn 8Y) with expected settlement August 17, 2026.

S&P Global expanded collaboration with **Microsoft** to integrate the breadth of its AI-ready data and insights into Microsoft 365 Copilot workflows and agentic experiences.

Oracle announced the GA of Oracle Exadata Database Service on Exascale Infrastructure on Oracle AI Database@AWS, and also noted the solution is now available in 22 AWS regions and that the two companies signed an expanded, long-term strategic collaboration agreement focused on accelerating customer migration to Oracle AI Database@AWS. Additionally, BMC Helix announced an expanded partnership with **Oracle** to help enterprises modernize ServiceOps by deploying BMC Helix on Oracle Cloud Infrastructure, where BMC Helix customers can also leverage Oracle AI Database services on OCI. Besides, Business Insider [reported](#) that

Oracle has drawn up plans for a new round of job cuts with the intention of reducing payroll by the time ORCL's fiscal Q2 quarter begins on Sept 1st, according to insiders and a document.

Summit Partners, a large **Klaviyo** shareholder, filed a notice to sell 5 million KVYO shares through Goldman Sachs in a secondary offering transaction.

CoreWeave reported strong Q2 earnings highlighted by raised FY26 guidance, >\$25bn in new deals signed and mgmt commentary noting new deals signed in Q2 came with ~5-10pt higher contribution margins than what CRWV has observed in recent quarters (see our note [here](#)). Additionally, CoreWeave announced it closed its \$2.6bn DDTL 5.5 offering, which has a 5-year maturity and was priced at SOFR + 550bps.

Monday.com's unchanged FY26 guidance despite a \$10mn Q2 revenue beat reflects mgmt.'s prudent caution around organizational disruption and softer renewal behavior, though core enterprise growth is still encouraging for the LT story (see our note [here](#)).

Similarweb reported better-than-expected Q2 results and updated FY26 guide, and we believe that results suggest the company has moved beyond relying on sporadic large-deal wins, with improving sales productivity, accelerating enterprise momentum, and a growing pipeline of sizable opportunities (see our note [here](#)).

WhiteFiber reported an outsized top-line beat powered by Cloud Services outperformance that led to better than expected adj. EBITDA, and mgmt. also highlighted >\$540mn in new deals signed since last earnings and positive developments around its NC-1 and MTL-2 facilities (see our note [here](#)).

Q2 2026 Earnings Recap - Greater Differentiation

Compared to the last few quarters, we are seeing a slightly more favorable earnings season - not all names are going lower on earnings. Macro seems relatively stable, so that is not the factor. What seems to be happening though is that some players are starting to have enough AI success to start seeing better growth numbers (see [U.S Software: Raimo's Roundup: Acceleration Argument At Clear Display in Software](#), 8/7/26). However, we also can see that growth deceleration stories continue to suffer (KVYO, etc.), despite positive management commentary. It really feels like investors want to see proper numbers before being able to buy into the AI success of a company.

The Q2 earnings cycle showed slightly lower volatility on average compared to Q1, though still higher than the quarters before, where volatility continued to increase since 1Q24.

In the table below, we are adding median and standard deviation to normalize the data somewhat. We note that although average volatility decreased this quarter, the median actually jumped to 12.4% vs. 7.5% last quarter.

In the table below, we take a closer look at results from an individual stock perspective. The numbers in this quarter largely beat consensus for both revenue and profitability. Guidance is more mixed, where some companies guided more conservatively amid macro uncertainties. However, overall, we sense this is not really a macro story, but more a story of where the different companies are on their AI journey. Part of the differentiation here is that it is more difficult for application-focused companies to find fast success as their solution "solve real-life issues," which means though that they need to be thoroughly tested by buyers. Infrastructure products are more tools that have less risk on adoption, and hence progress is visible more quickly.

What Happened?

Dynatrace, Inc.: Accelerating AI Observability Roadmap w/ Arize Acquisition

DT is paying a premium to accelerate its transition from a traditional observability vendor into a broader AI platform, leveraging Arize's developer footprint and AI observability capabilities to improve its competitive position. We view DT's acquisition of Arize as an intentionally aggressive bet to establish itself as a category leader in AI observability. The acquisition accelerates DT's AI observability capabilities ahead of plan as well as expanding its reach into the developer ecosystem (a key area of focus for the company as of late). Given the relatively limited customer overlap (~20%-30%), Arize should also offer some natural cross-sell opportunities to its ~200 customers. While the acquisition looks expensive on NT ARR expectations (~23x) and is expected to be dilutive to margins in FY27, we view the transaction as a strategic move that should improve DT's competitive position in observability.

WhiteFiber, Inc.: 2Q26 Recap: Progress in Several Areas Strengthens Investment Case

Much better cloud revenue combined with good growth for colocation but also encouraging comments around managed services as a low-capital new revenue opportunity show the ongoing progress. Management needs to continue to execute, but Q2 was a strong data point. WYFI is a small player in the large and quickly evolving AI market. This creates risk and opportunities, especially as the company needs to be very thoughtful where it does and does not want to play in the space. Q2 improved the picture for investors with strong revenue numbers in all areas (see later), which also drove better profitability, but also encouraging news about the progress of its large projects like NC-1 (now in active customer deployment) and MTL-2 (now moving forward after an initial pause with ~5 MW of gross capacity). It seems that management's focus on repurposing existing sites is helping to bring new capacity online quicker, but also helps with the regulatory framework as many other large, new projects face headwinds.

Similarweb Ltd.: 2Q26 Recap: Data Asset, '25 Sales Investments Driving Pipeline Growth

We view SMWB's Q2 results and commentary somewhat as a narrative shift because it seems clear that the large enterprise deals are no longer one-time in nature. Mgmt repeatedly emphasized that pipeline is growing across a diversified base of customers. Many investors have continued to question the ROI from SMWB's heavy FY25 investment in its sales capacity expansion as mgmt had vocalized that the ramp in productivity fell short of internal expectations leaving the year. Another reason for caution was the variability / timing of landing enterprise deals (that drive volatility in its growth metrics). That said, SMWB's Q2 results pushed back on both of these issues. SMWB landed three of some of its largest deals in history, expanded its >\$100k ARR customer cohort by 12 (vs. 7 in Q1 and Q4), increased its average account value for >\$100k ARR cohort by 18% y/y, and emphasized that it expects to continue to win large enterprise deals in the coming quarters.

CoreWeave, Inc: 2Q26 Recap: Higher CapEx + Better Contribution Margins Create Good Set-up

Q2 included several positive milestones - incl. record active power added, record total contracted power, record CapEx for a quarter - which all speak to the growing momentum. Timing limited the revenue upside but better guidance and much better operating profitability more than balance this. Looking at Q2 from a classic ST-biased hedge fund lens that cares about revenue beat levels (only 0.5%), etc. is missing the point this quarter for CRWV. The company added a record \$9.4bn in adj. CapEx, which seems to be coming at 5-10pts of higher

contribution margin. Since CapEx speaks to future revenue (and now with a better margin profile), we think investors should be excited. The record active power added (500MW) and record total contracted power level (4.2GW) round out the picture of growing momentum. We liked management comments around growing enterprise wins and a shift in the market towards inferencing but also shorter duration contracts (but with better price points).

U.S. Software: rAlmo's AI Newsletter #122: Meta's Muse Glimmer and Letter on Key AI Developments

This week, we unpack Meta's new Muse Glimmer AI model and letter from Meta's Founder/CEO Mark Zuckerberg that details the company's view for AI democratization. We believe the two announcements highlight the growing open-source vs. proprietary model debate and other key developments. Muse Glimmer is a new LLM created by Meta Superintelligence Labs (META, covered by Ross Sandler) that features a slimmer profile at 30 billion parameters designed to be able to run on a single computer. The model was introduced today and is a distilled version of Meta's larger Muse Spark 1.2 model, optimized for always-on local agent workflows, such as schedule management and file organization. Meta discussed that a full precision 30 billion parameter model would require over 55 GB of memory, which is far more than any consumer GPU offers, and hence, the company used quantization techniques to compress the models weights to approximately 4-bit precision, and validated that this introduces minimal to no degradation on agentic tasks.

monday.com Ltd: 2Q26 Recap: Expansion / Downmarket Softness Limits FY Upside

We view MNDY's updated guide as prudent amidst near-term organizational disruption and softer-than-expected customer behavior at renewal. Enterprise momentum and accelerating AI adoption (thought still early) continue to be key drivers of its LT growth and monetization story. Investors generally viewed MNDY's FY26 guide as conservative post Q4 and post Q1, so a reiteration of its FY26 guide (after a \$10mn rev. beat in Q2) was a slight disappointment. The offset to this is that core growth drivers remain healthy, particularly its enterprise momentum (record q/q adds in >\$100k and >\$500k ARR customers) and AI product adoption (which will be a key LT growth driver and is showing promising signals). The combination of shifting GTM changes (away from paid search and into more upmarket, higher ROI channels) and a 20% RIF naturally drive some disruption in MNDY's growth algorithm, so we do view its updated guidance as prudent at this point in time.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

J: Barclays Bank PLC and/or an affiliate is a liquidity provider and/or trades regularly in the securities by CoreWeave, Inc and/or in any related derivatives.
L: CoreWeave, Inc is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

Valuation Methodology: We apply a ~33x CY27E EV/EBIT and our CY27E EBIT estimate of ~\$4.19bn to arrive at our PT of \$105. The multiple we apply reflects strong RPO growth and higher sentiment levels for AI infrastructure software peers.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Risks to our investment thesis include increasing competition across the AI-optimized IaaS space, inhibiting both existing customer growth as well as new customer contribution. With new players building out full functionality for AI-IaaS, CoreWeave's market leading position could be challenged. Additionally, critical customers like Microsoft, which are also building competing solutions, could bring more of their AI IaaS in house, which would have an impact on CoreWeave's growth outlook on a go forward. Lastly, any impact to the global supply chain as a result of uncertainty could result in timing delays for CoreWeave's CapEx, which would inhibit the company's ability to build out infrastructure for customers on a go forward.

Valuation Methodology: Our price target of \$60 is based on an EV/CY27E FCF multiple of ~25x and our CY27E FCF estimate of \$684mn.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Near-term macro headwinds and slower-than-expected adoption of the company's platform may impact growth. Longer-term competitive headwinds from other observability competitors could also hinder the company's ability to land and expand with APM and more nascent products like Log analytics and AppSec.

Valuation Methodology: Our PT of \$100 is based on a EV/CY27E FCF multiple of ~10x applied to CY27E FCF of ~\$356 mil.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Unproven ability to sell new products in competitive end-markets. MNDY's new products (Sales CRM, Dev, Service) will face intense competition against legacy incumbents and new players

emerging / expanding into these three markets. Broad-based seat compression could continue to drive NDR pressure. Barclays Data Science & Applied AI's data analysis suggests to us that total job postings have remained subdued relative to 2022 levels. Coupled with broad-based headcount reductions across all industries, these could drag on MNDY's seat-count and result in potentially weaker top-line growth and profitability metrics.

Valuation Methodology: Our \$11 price target is based on ~3x EV/CY27E Sales applied to \$351 mil in estimated CY27 revenue.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: SMWB could face increased competition from both SEO vendors and tech incumbents. Data regulation/changes could also continue to become a larger force and put pressure on SMWB's collection of data in the future. Uncertain macro impacts to top-line growth could cloud the stock, but management guidance of continued positive FCF could help provide some reassurance to investors.

L: WhiteFiber, Inc. is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

Valuation Methodology: We apply a ~13x P/E multiple on discounted CY29E adj. EPS estimate of \$3.30 back to CY27 (implying CY27E adj. EPS of \$2.54) to arrive at our PT of \$32.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Risks to our investment thesis include customer concentration, ability to attract favorable financing, and long useful life of equipment. WYFI remains concentrated with a small customer base, which increases the risk of revenue visibility into the future. This dynamic also can create upside risk to the stock upon announcements of customer deal signings. In addition, WYFI is still in its early stage of expansion, so it may face relatively higher funding costs. Data center development and equipment deployment is capital-intensive by its nature, and this creates the risk for WYFI to fall behind in the face of getting access to capacity. In

addition, data center equipment usually has long useful life, exposing the company to the risk of obsolescence if more modern and efficient equipment is introduced faster than expected.

The views in this publication are solely and exclusively those of the authoring analyst(s) and are subject to change, and Barclays Research has no obligation to update its opinions or the information in this publication. Unless otherwise disclosed herein, the analysts who authored this report have not received any compensation from the subject companies in the past 12 months. If this publication contains recommendations, they are general recommendations that were prepared independently of any other interests, including those of Barclays and/or its affiliates, and/or the subject companies. This publication does not contain personal investment recommendations or investment advice or take into account the individual financial circumstances or investment objectives of the clients who receive it. Barclays is not a fiduciary to any recipient of this publication. The securities and other investments discussed herein may not be suitable for all investors and may not be available for purchase in all jurisdictions. The United States imposed sanctions on certain Chinese companies (<https://ofac.treasury.gov/sanctions-programs-and-country-information/chinese-military-companies-sanctions>), which may restrict U.S. persons from purchasing securities issued by those companies. Investors must independently evaluate the merits and risks of the investments discussed herein, including any sanctions restrictions that may apply, consult any independent advisors they believe necessary, and exercise independent judgment with regard to any investment decision. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including changes in market liquidity). The information herein is not intended to predict actual results, which may differ substantially from those reflected. Past performance is not necessarily indicative of future results. The information provided does not constitute a financial benchmark and should not be used as a submission or contribution of input data for the purposes of determining a financial benchmark.

This publication is not investment company sales literature as defined by Section 270.24(b) of the US Investment Company Act of 1940, nor is it intended to constitute an offer, promotion or recommendation of, and should not be viewed as marketing (including, without limitation, for the purposes of the UK Alternative Investment Fund Managers Regulations 2013 (SI 2013/1773) or AIFMD (Directive 2011/61)) or pre-marketing (including, without limitation, for the purposes of Directive (EU) 2019/1160) of the securities, products or issuers that are the subject of this report.

This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a “Wholesale Client” as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom (PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly, (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, “Barrenjoey”), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC or (iii) such other non-affiliated third-party distributor(s) as may be clearly identified to you. Such non-affiliated third-party distributor(s) are not agents of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 (“FMCA”), and is not a disclosure document or “financial advice” under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited (“Barrenjoey”), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to “wholesale investors” that meet the “investment business”, “investment activity”, “large”, or “government agency” criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 (“Advisory Law”). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. If you are not a Qualified Investor according to the laws of the Russian Federation, please dispose of any copy of this material in your possession.

Sustainable Investing Related Research: There is currently no globally accepted framework or definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes a 'sustainable', 'ESG', 'green', 'climate-friendly' or an equivalent company, investment, strategy or consideration or what precise attributes are required to be eligible to be categorised by such terms. This means there are different ways to evaluate a company or an investment and so different values may be placed on certain sustainability credentials as well as adverse ESG-related impacts of companies and ESG controversies. The evolving nature of sustainable investing considerations, models and methodologies means it can be challenging to definitively and universally classify a company or investment under a sustainable investing label and there may be areas where such companies and investments could improve or where adverse ESG-related impacts or ESG controversies exist. The evolving nature of sustainable finance related regulations and the development of jurisdiction-specific regulatory criteria also means that there is likely to be a degree of divergence as to the interpretation of such terms in the market. We expect industry guidance, market practice, and regulations in this field to continue to evolve.

Any information, data, image, or other content including from a third party source contained, referred to herein or used for whatsoever purpose by Barclays or a third party ("Information"), in relation to any actual or potential 'ESG', 'sustainable' or equivalent objective, issue, factor or consideration is not intended to be relied upon for ESG or sustainability classification, regulatory regime or industry initiative purposes ("ESG Regimes"), unless otherwise stated. Nothing in these materials, including any images included therein, is intended to convey, suggest or indicate that Barclays considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG or sustainability classification, label or similar standards that may exist under ESG Regimes. Barclays has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

IRS Circular 230 Prepared Materials Disclaimer: Barclays does not provide tax advice and nothing contained herein should be construed to be tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties; and (ii) was written to support the promotion or marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.
