China AI Handbook #3: AI assistant launch wave, China read-through favors Tencent

Industry Overview

Following our [China AI Model Handbook #1](#) & [China AI Model Handbook #2](#), we provide our updated views on consumer/work AI agent latest development in China.

Consumer agents: “wall-garden” favors incumbents

The recent surge in US personal AI agents has naturally raised questions around the China read-through. We believe China’s app-centric (rather than browser-centric), walled-garden internet ecosystem is less friendly to computer-use agents and makes a single cross-platform “super-agent” less likely, instead favoring agents embedded within existing mobile ecosystems. With user context concentrated more in messaging apps than in email, conversational history, social graphs and service access should matter more than standalone model capabilities – an area where Tencent clearly stands out.

The curse of “already good experience”

However, China’s super-app experience is already highly optimized, meaning the hurdle for AI is higher: assistants need to deliver meaningful incremental utility through personalization, cross-service coordination and reliable task execution, rather than simply a better interface. Subscription monetization appears challenging, while ads and transaction monetization remain early. On a positive note, Chinese AI assistants could increasingly adopt a tiered, lightweight-model approach for everyday queries to minimize inference costs, bringing the economics closer to traditional internet services.

Work agents: distribution > model differentiation

We see AI work agents as the more tangible near-term opportunity, given clearer productivity benefits and willingness to pay. Competition is shifting from model capability toward the “harness/orchestration” layer that understands enterprise context, connects tools and executes workflows. In China, incumbent enterprise collaboration platforms should therefore be structurally advantaged by existing workflow distribution and user context. We see Tencent and Alibaba as both well-positioned, particularly with Tencent’s Weixin Work gaining share in enterprise collaboration market lately. Separately, we estimate c.95mn addressable private sector white-collar workers supporting an annual TAM of over RMB100bn potentially. Longer term, the c.RMB20trn white-collar wage pool points to much greater theoretical upside, although labor substitution and its potential impact on consumption could constrain adoption.

Tencent emerges as our top agent pick

We see **Tencent** best positioned across consumer & work agent, given the strongest combination of consumer context, engagement, service coverage and workplace distribution. **ByteDance** benefits from high user engagement, although time spent is concentrated more heavily on passive content consumption, which may provide less actionable context. **Alibaba** has strong access to products and commerce services, but user time spent is notably lower than on Tencent and ByteDance platforms.

Consumer AI agent: from model to context, monetization is still early

*“We believe the key way AI creates value today is by adding context, not just stronger model capability. **Many everyday need—like deciding what to eat—depend more on situational context than intelligence depth. For To-C users, most people rarely need top-tier intelligence, so model improvements often go unnoticed.** For To-B, higher intelligence directly boosts productivity and value, making the strongest models clearly more attractive. Over time, the gap between strong and weak models will only widen.”*

- Yao Shunyu, Tencent AI Chief Scientist, in a public sharing in January 2026

*“In terms of the to-C monetization, I would say it’s not easy. If you look at global standards in the Western market, paid service is well-penetrated and the living standard is very high... when you apply that to China, the subscription model is not going to be that big for the China market... at the same time, it’s necessary. **It’s not like internet services where you can have very low cost of scaling your services. Every single user costs something in terms of variable cost.***

The more important implication is that when you have payment to support a service, most likely the service is not going to be a winner-take-all business.... beyond that, when we look at eCommerce or advertising as a way to monetize, it’s also very early...”

- Martin Lau, President of Tencent, 1Q26 earnings call

Investor interest in consumer AI is rising, but product differentiation remains limited for now

The recent proliferation of personal AI agents in the US has prompted investors to draw parallels with China. China’s relatively walled-garden mobile internet ecosystem should favor established platforms, with Tencent arguably best positioned. However, given the already strong user experience within existing super-apps, the key question is whether AI assistants can deliver enough incremental utility to support meaningful monetization.

Exhibit 1: We observed a wave of AI assistant product launches recently, but product differentiation remains limited for now

Mainstream global consumer AI agent comparison

	Weixin Xiaowei	Muse	Grok Bot	Qwen consumer app	Doubao
Company	Tencent	Meta	xAI	Alibaba	ByteDance
Ecosystem	Weixin's ecosystem (messaging, payment, mini program, eCommerce, etc)	Meta ecosystem (Whatsapp, Instagram, Facebook, AI glasses, etc)	X/Twitter + xAI products, third party integration	Alibaba ecosystem (Taobao, AliPay, Fliggy, Amap, DingTalk, etc)	ByteDance ecosystem (Douyin, Toutiao, Soda Music, Xigua Video, etc)
Key Capability	AI assistant embedded inside Weixin, executes Mini Program services, and completes transactions via voice or text	Personal AI agent; operates virtual machine, executes multi-step tasks, long-running workflows, memory and planning	Autonomous AI teammate; persistent cloud computer; cross-app task execution; multi-agent collaboration	Consumer AI assistant agent; complete shopping, booking, payments, research, productivity tasks	AI assistant with strong content generation, search, productivity and agentic workflow; broad consumer adoption
Feature	Voice/text interaction; messages, set reminders, order food, hail rides, buy tickets, payment, etc	Email, travel booking, form filling, negotiation, background task execution, personal memory, proactive suggestions, AI glasses integration	Research, CRM updates, email drafting, workflow automation, browser/terminal execution, multi-bot coordination	Research, multimodal understanding, voice assistant, travel planning, food ordering, shopping and payments via Alibaba services, etc	Search, writing, multimodal image/video generation, document analysis, AI companions, eCommerce, etc
Monetization	In beta testing	Freemium model with premium subscription tiers (Power and Maximum)	Bundled subscription into standard xAI (SuperGrok) and Cursor subscriptions	Free + ecosystem transaction monetization	Freemium with subscription for advanced features + transaction commissions

Source: Company reports, BofA Global Research

BofA GLOBAL RESEARCH

We summarize our latest views on consumer AI agent evolution & monetization:

- **Model capability “good enough” – shift away from benchmark race:** AI model capability is already good enough to answer most consumer queries and in many cases is *smarter than the average user for daily tasks*. As such, the competitive focus is shifting away from benchmark rankings toward real-case adoption, service breadth, content coverage, and effective use of user context – **where Tencent currently has an edge**. “Good” AI services will increasingly be defined by DAU scale and monetization outcomes, rather than model scores alone.
- **Limited differentiation & data-flywheel at consumer chatbot level:** AI chatbot apps represent a new entrance for information discovery and user interaction, making them a key battleground for incumbents. ByteDance currently leads on user scale (app-only DAU), but we note limited product differentiation and weak data-flywheel effects, as reflected by similar daily time spent across apps.
- **Paid tier to expand, but limited subscription upside in China:** More AI chatbots will introduce paid-tier services, but paid subscriptions are unlikely to scale materially given fierce competition among chatbots and low proven pay-for-utility monetization model in China. Given most queries can be handled by low-cost base models, we expect a multi-tier model structure – basic models for high-frequency daily queries, and more advanced models selectively used for complex tasks.
- **Ads + transaction monetization to emerge gradually (early stage):** Consumer AI agent monetization is likely to shift toward ads and transaction conversion embedded within AI workflows, but remains at a very early stage. As chatbots increasingly intermediate discovery and decision-making, **incumbents (Tencent / Alibaba / ByteDance) are well-positioned** to monetize via closed-loop ecosystems, strong conversion capabilities, and first-party data advantages.

OS AI agent vs. APP agent: too early to tell the end game

Looking ahead, the core question is whether user behavior converges to one “super agent” or remains fragmented across multiple agents embedded in different ecosystems.

Latest OS-level agent developments suggest **fragmentation** risk is rising. ByteDance/ZTE's Doubao-powered phone prototype and Huawei's HarmonyOS agent framework both point to agents moving from standalone chatbot apps into the **operating-system layer**, enabling cross-app task execution and making the OS a potential new traffic-control point.

That said, we think a single super-agent outcome is unlikely in China. Incumbent platforms have strong incentives to protect traffic, data and transactions; early app restrictions on Doubao's OS-level agent highlight the pushback against broad agent permissions. Our base case remains **multiple agents co-existing**, with segregated data domains across Tencent, Alibaba, ByteDance and OEM ecosystems.

Edge AI migration could further support this structure. As more basic inference moves on-device, agents can handle normal daily queries with lower latency, better privacy positioning and lower token costs, while cloud models are reserved for complex tasks. This reinforces a tiered model architecture rather than one universal cloud-based agent.

Exhibit 6: ByteDance apps' share grew to 41% in Aug'26, up from 34% in Aug'25

China top 50 mobile internet apps' % share by total user time spent

AI work agent: why is AI Harness under the spotlight now?

*“In the world of AI, when you apply compute and the model to different use cases and applications, **you need to think about what is the high-value use case so that you have the best return on your limited compute to achieve the best result.**”*

- Martin Lau, President of Tencent, 1Q26 earnings call

Consumer AI is structurally shifting from a broad “serve everyone” model toward **high-value prosumers** – knowledge workers, creators, and operators who both consume and produce value using AI. These users exhibit significantly higher usage intensity, workflow complexity, and willingness-to-pay, as AI directly impacts their productivity and income generation.

This shift elevates the importance of a new “harness layer” (AI work agent), which abstracts fragmented tools into integrated, context-aware workflows. As models evolve from passive assistants to autonomous agents capable of multi-step task execution, the locus of value creation shifts from individual apps to orchestration layers that manage context, coordinate agents, and execute work end-to-end. This also suggests value may shift from foundation models to agents that manage user intent, data access, and task completion.

Exhibit 7: We view incumbent enterprise IM platforms as structurally advantaged given existing daily workflow distribution

Enterprise IM platforms summary

Product / platform	Owner	Distribution surface	Short description	Strategic relevance
ChatGPT Desktop	OpenAI	Consumer / desktop	Desktop app interacting with files, code, screenshots, and on-screen context.	Strong prosumer entry point into daily workflows
Claude Cowork	Anthropic	Desktop app	Desktop-integrated agent that can access files, run multi-step tasks, and schedule workflows locally.	Deep OS-level integration
Microsoft 365 Copilot	Microsoft	Office / Teams	AI embedded across M365 apps; supports third-party agents such as Moveworks.	Dominant enterprise distribution layer
Tencent WorkBuddy	Tencent	Desktop app / WeCom / IM	Desktop AI agent integrated with WeCom and other tools, supporting multiple LLMs.	Leverages Tencent’s IM/work ecosystem
Qwen Office	Alibaba	Desktop app / DingTalk	Consolidated enterprise AI agent platform (merged former Wukong stack). Native DingTalk integration and multi-agent orchestration.	Deep enterprise integration with DingTalk + cloud synergy
Doubao Work	ByteDance	Desktop / Doubao app / Lark	Productivity-focused AI agent integrated with Lark that can draft documents, analyze data, generate reports and access enterprise context.	Strong productivity positioning in collaboration stack

BofA GLOBAL RESEARCH

Wage-pool TAM supports long-term work agent revenue upside, despite a relatively small white-collar workforce in China

To assess the commercial opportunity, **we estimate China’s addressable private-sector white-collar workforce at c.95mn people** (see Exhibit 10). This represents only a small share of the country’s 725mn workforce, most of whom are blue-collar or rural workers. We also exclude an estimated 42mn public sector employees, as AI work-agent adoption across government entities and affiliates is likely to lag the private sector.

Under different adoption and ARPU assumptions, we estimate the annual enterprise AI-agent TAM ranges from RMB1bn to over RMB100bn, implying substantial upside if AI

agents become a mainstream workplace tool. Longer term, some investors see a much larger opportunity, as work agents could theoretically address China's entire white-collar wage pool – potentially a RMB20trn market, assuming 200mn white-collar workers and an average annual wage of RMB100,000. We would, however, highlight two constraints: 1) Chinese enterprises may face greater pressure to reduce headcount than their global peers; and 2) large-scale substitution of wages with AI-agent spending could weaken consumption demand, potentially constraining the pace of AI adoption.

Exhibit 8: We estimate c.95mn private sector white collar workers in China

China private sector white collar population estimate breakdown

Distribution over product differentiation: why incumbents could win the work agent competition in China

In China, **incumbent enterprise IM platforms (Tencent's WeChat Work, Alibaba's Dingding, ByteDance's Lark)** are structurally advantaged given their existing daily workflow distribution. Recent launches (e.g., Tencent WorkBuddy, Alibaba Qwen Office,

ByteDance Doubao Work) embed AI agents directly into collaboration environments, with integration across workflows and support for multiple model backends. We view this as a critical differentiator: competing on workflow control and enterprise context rather than pure model performance.

According to QuestMobile, while DingTalk (BABA) remains the largest enterprise collaboration app by monthly DAU, its use engagement has gradually softened, with DAU/total time spent declining to 74mn/23bn mins in Aug’26, from 81mn/26bn mins in Jan’26. In contrast, WeCom (Tencent) has demonstrated resilient user engagement, with stable DAU at c.70mn and time spent surpassing DingTalk since Dec’25 and further widening its lead. Lark remains at a smaller scale with DAU and total time spent steadily trending upward over the past two years.

Exhibit 10: DingTalk (Alibaba) DAU softened to 74mn in Aug’26

Price objective basis & risk**Alibaba Group (BABA / BABAF)**

We adopt an FY27E SOTP framework to reflect the differing growth, profitability & maturity of Alibaba's businesses, applying 8x P/E to e-commerce (in line with peers), 6x P/S to external Cloud revenue (in line with peers), 2x P/S to AI Labs & Applications and 1x sales to other businesses to reflect strong long-term strategic value but ongoing investments & near-term losses. We also add Alibaba's equity interest in Ant Group, public & private investments, and post-placement net cash. Our SOTP yields an equity value of RMB2.95tn, or US\$435bn, and a PO of US\$175, implying 27x/19x/15x FY27/28/29E adj. P/E. Our HK\$ PO of HK\$172 is derived by applying the ADR conversion ratio of 1 ADR = 8 HK shares & the prevailing USD/HKD FX rate.

Downside risks are: 1) weaker macro conditions & consumer spending, 2) slower AI adoption or cloud demand growth, 3) AI capex outpacing monetization & utilization, alongside slower n of PPU's, MaaS & AI applications, 4) tighter regulation covering data security, antitrust, trade, VAT, listings & US technology restrictions, 5) reputational risks related to regulatory compliance, platform governance or service quality, 6) intensified competition across e-commerce, short video, quick commerce & cloud, weighing on growth & profitability, 7) execution risks in deploying & scaling AI infrastructure, and 8) macroeconomic/geopolitical shocks, including public health crises, changes in economic systems or policies, sanctions & military conflicts.

Tencent Holdings (TCTZF)

Our PO of HK\$780 is based on 1) 15x PE to online game (in line with China game peers), 2) 20x PE on VAS (ex game, in line with China VAS peers such as TME and China Literature), 3) 20x PE on online ads (in line with global ads-based internet peers), 4) 20x PE on fintech (in line with global fintech/payment peers), 5) 5x PS on cloud (in line with global public cloud peers), 6) investment holding value plus net cash (HKD107 per share).

Downside risks: 1) competition from new traffic platforms and media formats, 2) regulation on fintech, collection, sharing and use of data, competition, online games, instant messaging, wireless services, app registration, minors protection. Intervention or ownership by the authority could also introduce uncertainty in business decisions. Game regulation turns out worse than expected, 3) weaker new games momentum, 4) expenses and investments for new game promotion and AI, 5) weak macro impacting ad and fintech business, 6) geopolitical risk, and risk if it is sanctioned, 7) profit impact from AI investments

Upside risks: 1) better and faster than expected macro recovery, 2) beat of new game performance, 3) synergy from ecosystem open-up with other internet platforms, 4) ecommerce business ramp up, 5) upside risk to investor sentiment if Co. can be removed from the 1260H list, 6) breakout of AI applications

Buy	2057	57.03%	Buy	1386	67.38%
Hold	806	22.35%	Hold	563	69.85%
Sell	744	20.63%	Sell	446	59.95%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

BofAS or one of its affiliates acts as a market maker for the equity securities recommended in the report: Alibaba.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Tencent Holdings.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Alibaba, Tencent Holdings.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Alibaba, Tencent Holdings.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Alibaba, Tencent Holdings.

In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: Tencent Holdings.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Tencent Holdings.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Alibaba, Tencent Holdings.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Alibaba.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Alibaba, Tencent Holdings.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

Refer to [BofA Global Research policies relating to conflicts of interest](#).

"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are not regulated in a manner similar to U.S. securities markets. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities or digital assets that may have been recommended or discussed in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments recommended or discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

BofA Global Research utilizes AI, including machine learning and other technologies, to enhance the services we provide to our clients. These technologies assist our analysts in various aspects of their work, including but not limited to data analysis, content extraction, content creation, data aggregation and summarization and identifying relevant information from diverse sources. All AI-driven processes are subject to review by BofA Global Research employees. BofA Global Research information is distributed simultaneously to internal and client websites and other portals by BofA Securities and is not publicly-available material. Any unauthorized use or disclosure is prohibited. Receipt and review of this information constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained herein (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Securities.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. None of BofAS any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to sustainability in this material is limited as discussed herein and is not intended to provide a comprehensive view on any sustainability claim with respect to any issuer or security.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
