3Q26 Preview: AI Progress on Track, but Punished for Investing

Reiterate Rating: BUY | PO: 780.00 HKD | Price: 420.60 HKD

Ads solid, game stable, higher AI investment

Tencent is due to report 3Q26 results in mid Nov. In 3Q26, we expect total revenue to grow 7.4% YoY (9.4% consensus) while adj. profit to decline 6% YoY (-3% consensus), considering low tax rate in 3Q25 & higher AI investment. For **game**, we expect domestic revenue to grow 11% YoY while international revenue to decline 7% YoY. We expect **ads** revenue growth of 18% YoY given Video Account ads ramp up. For **FBS**, we expect revenue growth of 9% YoY given weak fintech (3% YoY) but offset by accelerating cloud (26% YoY). We forecast 3Q26 AI-related opex investment to be RMB12.5bn (vs. 10.5bn in 3Q26). Excluding AI investment, we expect adj. OP to grow 10% YoY in 3Q26. **Our long-term view on Tencent:** AI is not a single-product battle, but a long-term strategic war won through ecosystem scale, execution and sustained investment. Tencent's rapid catch-up in models and compute YTD could represent a significant turnaround. While NT profit pressure is understandable, we think the market is overly discounting a scenario of perpetual spending with limited returns, inconsistent with Tencent's track record of ROI discipline. The shift from model capability toward AI products (both work agent & personal assistant) should increasingly play to Tencent's strengths.

Our key takes on AI progress & financials

1) We keep our **capex** forecasts at RMB210bn/260bn/270bn in 26/27/28E, and expect quarterly cash pressure from compute (including capex + prepayment) to peak in 2026; 2) While Tencent continues to prioritize internal use case over external, with more compute on hand and ramp-up of WorkBuddy, we expect Tencent **Cloud** revenue to accelerate to 37% in FY27 & 45% in FY28 from low-20% YoY in 2Q26; **3) We expect depreciation** and compute leasing cost to further weigh on margin (we continue to expect non-IFRS OP to be flat YoY in 27E); **4) For Hy model**, we expect Hy4 to launch soon, with Hy5 preview to potentially launch within 4Q26; **5) For Weixin AI agent (Xiaowei)**, we expect a gradual expansion to more users with full-scale roll-out as early as in 4Q26. All in, we cut our 2026-28E non-IFRS net profit by 1-3% to reflect higher AI investment (see pg 2 for details). Maintain SOTP-based PO of HKD780.

Tencent Holdings (TCTZF)

Our PO of HK\$780 is based on 1) 15x PE to online game (in line with China game peers), 2) 20x PE on VAS (ex game, in line with China VAS peers such as TME and China Literature), 3) 20x PE on online ads (in line with global ads-based internet peers), 4) 20x PE on fintech (in line with global fintech/payment peers), 5) 5x PS on cloud (in line with global public cloud peers), 6) investment holding value plus net cash (HKD107 per share).

Equity Investment Rating Distribution: Global Group (as of 30 Sep 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	2057	57.03%	Buy	1386	67.38%
Hold	806	22.35%	Hold	563	69.85%

For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.
