Higher-than-expected ASP Inflation on e-glass Fabric for Oct; Raise TP Slightly to HK\$96

CITI'S TAKE

Per F139, e-glass fabric ASP rose 13-16% mom in Oct-26 to Rmb18.3/m on 1080, Rmb17.7/m on 2116 and Rmb13.1/m on 7628. See Fig 1 for details. The absolute addition of Rmb1.50-2.50/m is comparable to Sep's Rmb1.6-2.5/m without any retreat despite a high base. This came in better than expected and implies the industry supply remains tighter. We thus lift our 2026-28E earnings estimates by 8-13% and raise our TP slightly to HK\$96. **Reiterate Buy/1H; we prefer KBL over KBH for KBL's higher degree of earnings upgrade on CCL ASP upcycle.**

Two reasons for our preference of KBL over KBH at current levels – 1) Moving into upper range of PE premium during industry upcycle – The premium of forward PE on KBL over KBH is now at 96%. However, historically, the upper range of premium in previous industry upcycles stayed at 110-140% (see Fig 1) during the last upcycles in 2016-17 and 2020-21. 2) Hallgain skews repurchase on KBL over KBH – Per HKEx, KBH (148.HK) placed out shares of KBL (1888.HK) on 17 Jun to raise US\$1.5bn at avg price HK\$76 per each. Meanwhile, Hallgain sold shares of KBH (148.HK) thru the market during 22 Jun – 7 Jul for a total US\$2.1bn at avg price HK\$122 each. After both stocks fell substantially by more than 50% during Jul-Aug, Hallgain (the largest shareholder of KBH) started repurchasing shares of both KBH and KBL but at US\$50m (avg price HK\$54.9) and US\$148m (at avg price HK\$47.1), respectively. See Fig 2. Thus Hallgain (the largest shareholder) also skews towards KBL versus KBH on repurchase.

Ample room for e-glass fabric price inflation – Per F139 (see Fig 3), the ASP of #2116 fabric has surged 2.6x to Rmb17.7/m YTD. But local distributors are selling it at a higher price, at over Rmb25/m. Some domestic prepreg (PP) producers still buy #2116 at Rmb25/m due to a severe shortage, along with other material fees like resin at Rmb5/m to manufacture #2116 grade PP. So, the total cost is Rmb30/m, but the PP #2116 is priced at over Rmb40/m. (Continued...)

In other words, those domestic PP producers can still gain gross profit of Rmb10/m or 25% GM. So, even if the cost of #2116 fabric did jump by over 40% to Rmb25/m, the whole supply chain remains heavily profitable.

Anticipation of further ASP hike on CCL by this month

Anticipation of KBL further increasing ASP on CCL by end of this month – KBL raised FR4 CCL by 10% to Rmb340+/sheet since end-Aug. We expect KBL will further lift ASP another 10% by this month and once more by another 10% to bring the ASP of CCL to ~Rmb420/ sheet compared with year-end ASP of Rmb150/sheet in end-2025. In other words, the spot ASP would surge by 1.8x to boost GM substantially from 19.6% in 2025 to 36.9% in 2026. Thus, we expect the GM to continue expanding sequentially from ~31% in 1H26 to ~40% in 2H26E. **See Fig 6.**

Implication of steeper price inflation YTD – The three grades of e-glass fabric (see Fig 3) have risen every month since Dec-25 but show a sharper increase of monthly ASP addition from 1Q (Rmb0.2–0.8/m), 2Q (Rmb0.2–1.0/m) and a greater degree in 3Q (Rmb1.2–2.5/m). The higher increase in 2Q than 1Q reflects the end of channel e-glass fabric inventory since Apr this year. The further acceleration in 3Q reflects the stronger AI-fabric demand along with AI-fabric products delivering a lower output efficiency for more technical knowhow. For instance, the AI-fabric output (low Dk gen 1&2) is about one-third of non-AI output (#7628) by using the same weaving loom.

Weaving is the key bottleneck – Most investors realise the key bottleneck is fiberglass fabric due to insufficient supply of weaving looms from Toyota, which owns more than 80% of global high-end weaving looms share. As such, many leading fabric players like China Jushi, KBL, and Grace Fabric solely source from Toyota Industries (6201.TYO).

Our expert luncheon points out 3 reasons why the industry will still depend on Toyota looms in coming 2 years

Reasons for Toyota loom dependence – We hosted an expert luncheon with the expert (Mr. Jason Cheung, Head of Global Marketing at KB Laminate (1888.HK) presented for “Upstream Fiberglass Fabric and Copperfoil Development on AI-CCL Supply Chain”) sharing that the Toyota-dominant position will last for at least the next 2 years, as 1) Toyota has not inflated the ASP of weaving looms at Rmb180–200k per unit over the past decade. The price point is comparable for textile weaving looms, so there is little incentive for them to switch into fiberglass fabric looms; 2) each loom employs >1,200 individual components, with more than half sourced in Japan as China still lacks those components; 3) the design of the looms shares the technology of an internal combustion engine for a gasoline car. China manufacturers still lack this technology.

Yield for domestic looms remains low – The expert pointed out China looms can weave #7628 fabric (mainly for home appliances), but the production yield is still well below that of Toyota, so the technology curve cannot be upgraded into weaving AI-fabric any time soon.

KBL holds a stronger advantage in securing Toyota looms in the next 2 years – Recall that KBL will receive 2,500 looms from Toyota in the next 2 years, which means it will take about half of Toyota’s production. KBL’s number of looms will then rise from 3,333 units in Apr 2026 to 5,833 units in 2028. We see that this will enable KBL to keep a stronger competitive advantage over rivals for the delivery of 100m meters of AI-fabric (low Dk gen 1, gen 2, T-glass etc.) in 2028.

Positive implication of raising annual cap for connected party transaction – According to HKEx, KBL’s circular raises the 2026 annual cap on its sales of

laminates and related upstream materials to parent **KBH (148.HK)** to HK\$6.94bn from HK\$4.77bn, and sets caps of HK\$8.33bn / HK\$10.0bn for 2027E / 28E under the renewed three-year framework (EGM on 30 Oct); the cap on KBL's chemical purchases from KBH rises to HK\$1.17bn from HK\$0.85bn, then HK\$1.41bn / HK\$1.69bn. **See Fig 7.** The disclosure behind the caps matters more than the caps themselves: 8M26 sales to KBH of HK\$3.70bn annualise to HK\$5.55bn, +46% vs 2025, against only ~3% growth in KBH's PCB capacity (600k sq ft/month added in Vietnam from 4Q26) — so the increase is essentially ASP-driven, and the circular confirms the Sep ASP of laminates and upstream materials exceeded the 8M26 average, **supporting another round of CCL price hikes into 4Q.** These intragroup sales equal ~19% of KBL's 2025 revenue (our calc). The new caps are set at the annualised run-rate plus a 25% buffer, growing 20% p.a. — compliance ceilings rather than guidance — but the disclosed run-rate corroborates the price-led earnings momentum at KBL, and at KBH, where the laminate division is now the largest EBITDA contributor (63% of EBITDA in 1H26).

Slightly raise TP to HK\$96 from HK\$95 — though we revise up 2026-28E earnings estimates by 8-13%. This is because we base on +1.25SD over mean from prior +1.5SD as we have passed the mid-cycle of the CCL price upcycle since the current ASPs of CCL and fiberglass fabric have recently surpassed their last peaks. Having said that, we see there is still ample room for KBL for multiple re-rating on higher penetration into NVDA or ASIC ecosystem, as the company would likely win the NVDA certification on AI-CCL and copperfoil HVLP4 next year.

Kingboard Laminates Holdings

Company description

Kingboard Laminates (KBL) was spun off from Kingboard Chemicals in December 2006. The Kingboard Group first began laminates production in 1989, and has facilities in Guangdong and Jiangsu provinces. Laminate is the primary feedstock to produce printed circuit boards. KBL is an integrated producer with a focus on rigid laminates, which are used in a wide range of electronic products. It also produces copper foil, glass yarn and fabric, kraft bleached paper, and epoxy resin, mainly for internal use. In 2024, glass epoxy laminates and upstream materials accounted for 91% of group revenue, property sales for 1% and others for 8%. According to Prismark, a market research company, KBL has a ~15% global market share in rigid laminates, and >30% in the PRC. Kingboard Holdings owns 67% of KBL.

Investment strategy

We rate KBL shares as Buy/High Risk given the start of an earnings upcycle from 2024 after the downcycle in 2022-23. We project a three-year EPS CAGR of 99% through 2028E after 72% / 27% earnings declines in 2022 / 2023 during the last industry downcycle. The economic slowdown in China adversely impacted discretionary consumption items such as autos, home appliances, smartphones and PC/notebooks in 2022-23 which altogether account for >80% of KBL's total sales. However, KBL has started penetrating into Nvidia and ASIC chips supply chains via high-end fabric (low Dk, low CTE and Q-glass). The company's revenues and earnings are being buoyed by surging ASPs of e-glass fabric, AI fabric, and CCL that have boosted the growth trajectory.

Valuation

Our target price for KBL shares of HK\$96 is based on a ~18-19x P/E for 2027E, at +1.25SD over mean. We employ a premium +1.25SD over mean from prior +1.5SD as we have passed thru the mid-cycle of current CCL price upcycle. That said, the premium remains warranted by KBL's rising % of AI related businesses from CCL, fiberglass fabric and copperfoil. This would lead to earnings upgrade potential from higher-than-expected GM expansion on more favourable mix. KBL would continue to expand its customer base for AI material under the NVDA and ASIC ecosystem during 2026-28E. We think a PE methodology appropriately captures the company's medium-term operating performance. Our target price translates to 0.2x PEG (regional comp around 0.6x) backed by strong three-year earnings CAGR of 99% thru 2028E. We think this appears undemanding compared with regional CCL comps.

Risks

Our quant model gives a High Risk rating on the stock due to high stock price volatility. In terms of fundamentals, upside/downside risks that could cause the stock to exceed/underperform our target price include: 1) faster/ slower-than-expected demand on upstream materials such as glass fabric and copper foil on AI-related products; 2) China macro growth performs

faster/slower-than-expected; 3) stronger/weaker-than-expected stimulus policies in China; or 4) recovery/weakness in end-demand of electronic goods.

Analysts' compensation is determined by Citi Research management and Citigroup's senior management and is based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates (the "Firm"). Compensation is not linked to specific transactions or recommendations. Like all Firm employees, analysts receive compensation that is impacted by overall Firm profitability which includes investment banking, sales and trading, and principal trading revenues. One factor in equity research analyst compensation is arranging corporate access events between institutional clients and the management teams of covered companies. Typically, company management is more likely to participate when the analyst has a positive view of the company.

For financial instruments recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in such financial instruments (and any underlying instruments) and may act as principal in connection with transactions in such instruments. Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "—" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch/Short Term Views ("STV") Ratings Disclosure:

Catalyst Watch and STV Upside/Downside calls: Citi Research may also include a Catalyst Watch or STV Upside or Downside call to indicate the analyst expects the share price to rise (fall) in absolute terms over a specified period of 30 or 90 days in reaction to one or more specific near-term catalysts or events impacting the company or the market. A Catalyst Watch will be published when Analyst confidence is high that an impact to share price will occur; it will be a STV when confidence level is moderate. A Catalyst Watch or STV Upside/Downside call will automatically expire at the end of the specified 30/90 day period. The Catalyst Watch will also be automatically removed if share price performance (calculated at market close) exceeds 15% against the direction of the call (unless over-ridden by the analyst). The analyst may also remove a Catalyst Watch or STV call prior to the end of the specified period in a published research note. A Catalyst Watch/STV Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch/STV Upside call corresponds to a buy recommendation and a Catalyst Watch/STV Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside, Catalyst Watch Downside, STV Upside, or STV Downside call is considered Catalyst Watch/STV No View. For purposes of FINRA ratings distribution-disclosure rules, we correspond Catalyst Watch/STV No View to Hold in our ratings distribution table for our Catalyst Watch/STV Upside/Downside rating system. However, we reiterate that we do not consider No View to be a recommendation. For all Catalyst Watch/STV Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

Privately held companies:

The legal entities through which Citi conducts its business do not permit investment research recommendations, ratings, target prices, or estimates on any privately held companies ("private companies") referenced herein. Citi Research does not utilize a rating system for private companies. Any information on private companies in this report is based on generally available information and, although obtained from sources believed by Citi to be reliable, its accuracy and completeness are not guaranteed. Private companies are generally not subject to reporting obligations, which may result in less publicly available information. OTHER DISCLOSURES

Any price(s) of instruments mentioned in recommendations are as of the prior day's market close on the primary market for the instrument, unless otherwise stated.

The completion and first dissemination of any recommendations made within this research report are as of the Eastern date-time displayed at the top of the Product. If the Product references views of other analysts then please refer to the price chart or rating history table for the date/time of completion and first dissemination with respect to that view.

Regulations in various jurisdictions require that where a recommendation differs from any of the author's previous recommendations concerning the same financial instrument or issuer that has been published during the preceding 12-month period that the change(s) and the date of that previous recommendation are indicated. For fundamental coverage please refer to the price chart or rating change history within this disclosure appendix or the issuer disclosure summary at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Citi Research has implemented policies for identifying, considering and managing potential conflicts of interest arising as a result of publication or distribution of investment research. A description of these policies can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

The proportion of all Citi Research research recommendations that were the equivalent to "Buy", "Hold", "Sell" at the end of each quarter over the prior 12 months (with the % of these that had received investment firm services from Citi in the prior 12 months shown in brackets) is as follows; Q2 2026 Buy 33%(63%), Hold 44% (51%), Sell 23% (49%), RV 0.5% (87%); Q1 2026 Buy 33% (63%), Hold 44% (52%), Sell 23% (46%), RV 0.5% (89%); Q4 2025 Buy 33% (63%), Hold 44% (50%), Sell 23% (46%), RV 0.4% (91%); Q3 2025 Buy 33%(61%), Hold 44% (52%), Sell 23% (50%), RV 0.4% (80%). For the purposes of disclosing recommendations other than for equity (whose definitions can be found in the corresponding disclosure sections), "Buy" means a positive directional trade idea; "Sell" means a negative directional trade idea; and "Relative Value" means any trade idea which does not have a clear direction to the investment strategy.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm.
