

Energy, Utilities & Mining Pulse: Investors Asking: Where Do We See Positive Momentum on Q3 Earnings and Q4 Guidance?

As we get closer to 3Q26 earnings season, our conversations with investors continue to center around the uncertainty in the macro environment that has driven volatility in broader energy markets this year. While the XLE has outperformed the S&P 500 year-to-date (XLE +46% vs S&P 500 +14%), we have seen significant sub-sector dispersion with Refining and Oil E&P outperforming while the Utility and Clean Tech sectors have lagged. This week in the Pulse, we ask our senior analyst team to highlight one stock in focus with momentum on 3Q26 earnings and 4Q26 guidance ahead of this upcoming earnings season.

Stocks and topics discussed include:

Canadian Oils: CVE

Refining: DINO

Energy Services: PWR

Midstream: VG

E&P: PR

Utilities: TLN

Clean Tech: SHLS

Metals & Mining: STLD

Canadian Oils:

We see positive earnings momentum for **Cenovus Energy (CVE)** heading into Q3 results, with support from strong oil sands production and elevated US refining margins. First oil is approaching at West White Rose, which should contribute higher volumes through 4Q and into 2027, reduce a multi-year capital overhang, and drive a free cash flow inflection. Downstream fundamentals remain constructive, with elevated crack spreads and fewer of the temporary headwinds from 2Q, despite slightly lower throughput due to turnaround at Lima. Looking ahead, we expect the C\$5.7 bn acquisition of Athabasca to close around year-end, adding ~45 MBOE/d of production, including thermal assets adjacent to existing positions at Christina Lake, May River, and Thornbury and clearing a path to accelerate thermal production to 115 kbd by 2032 through the application of SAGD expertise. Per management, the acquisition should be accretive to adjusted funds flow per share in 2027, with C\$85

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

mn in annual corporate and commercial synergies. While net debt should increase temporarily from around C\$3 bn to C\$5.0–C\$5.5 bn by year-end, high sustained commodity prices should accelerate deleveraging toward a long-term target of C\$4 bn, at which point management expects to return 100% of excess free funds flow to shareholders.

Refining:

Within the US refining complex, we continue to see positive earnings momentum into Q3 results and Q4 guidance as global capacity disruptions, tight inventory levels, growing heavy sour crude supply, and resilient global demand continue to support elevated refining margins. Within that context, we highlight **HF Sinclair (DINO, Buy)** where we believe the company's commitment to enhancing its crude slate optionality, clean product yield, and utilization rates should contribute to improved margin realizations going forward. In addition, we also highlight the company's SRE optionality and balance sheet strength, which we expect should enable attractive capital returns in the near and medium term. Finally, we see the Mid-Con operating environment for Q4 as having the potential for stronger profitability than anticipated due to (a) incremental Venezuelan crude which is driving wider WCS differentials, and (b) elevated global freight rates which have been maintaining a higher floor for refined product prices. For DINO, we note that following our recent report, we currently see a ~19% total return from current levels.

Energy Services:

We remain constructive on **PWR** into Q3 earnings and subsequent Q4 guidance, as we see strong momentum across its multiple high growth end markets. In 2026, PWR beat consensus estimates in Q1 and Q2, while also raising FY guide. With PWR's exposure to themes such as the build out of the grid and construction and connection of data centers, we anticipate continued positive momentum through Q3 earnings for the stock, particularly as the market has seen the approval of multiple 765 kV lines, which we see as a growth driver for PWR over the next several years. Given the company's continued strategy of M&A to bolster their vertically integrated solution offerings for customers, we see positive earnings momentum, supported by the integration of recent acquisitions into the company portfolio. Further, we believe PWR's increasing scope for utility and hyperscaler customers, should drive continued revenue growth and margin expansion. In other words, we believe PWR will be able to capture incremental value from large projects. We also see potential margin expansion over the long-term as the company focuses on increasing offsite manufacturing capabilities, which we anticipate will aid in the ability to manage costs more effectively. We remain constructive on PWR as a stock in our coverage with positive earnings momentum as we continue to see multiple avenues of long-term growth for the company.

Midstream:

We highlight **Venture Global (VG)** with positive earnings momentum heading into 3Q26 results and 4Q26 guidance. For 3Q26, while the EBITDA profile (net of any O&M surprises) is largely known following this week's volume and margin pre-release, we see the set-up into 3Q26 as constructive. We see the potential for 1) positive operational updates on Plaquemines Phase 1 which we expect to achieve commercial operations by the end of October, 2) positive contracting updates as VG continues to outpace peers on medium and long-term contracting activity, and 3) a potential positive revision to the

2026 guidance range given the improvement in spot LNG margins for the balance of 2026. Looking forward, we see a constructive set-up into 4Q26 earnings and 2027 guidance for VG, as VG's uncontracted liquefaction capacity (~27% of 2027 production is uncontracted, on our math) is poised to benefit from improved global LNG spot margins (we see 2027 margins of ~\$15/mmbtu, up meaningfully from Cal27 margins at the end of August of ~\$11/mmbtu). Specifically, we note VG's 2027 EBITDA profile on today's spot LNG margins could imply ~37% upside to consensus 2027 EBITDA estimates, on our math. Elsewhere, we see additional growth and operating catalysts heading into 4Q26 guidance, coinciding with the scheduled CP2 expansion FID, Plaquemines Phase 2 COD (set for mid-2027), and continued commercial momentum.

E&P:

While our Oil E&P coverage has seen positive momentum with +41% year-to-date gains through this elevated oil pricing environment, PR has outperformed within our coverage trading +59% given strong oil production growth and the execution of ground game M&A. We see momentum for **Permian Resources (PR)** continuing into 3Q26 earnings and 4Q26 guidance driven by three key catalysts: 1) extended duration of the currently elevated oil pricing environment, 2) improvement to regional Waha gas pricing during 3Q26 and a positive outlook for 4Q26+ and 3) execution of incremental ground game transactions. For PR, we have seen the market respond positively to the company's oil production growth and execution of \$1.05 bn in bolt-on transactions this year. PR beat and raised oil production alongside 1Q and 2Q earnings, and given the fact that oil prices have remained elevated throughout 3Q26, we see the potential for continued strength of operations for PR. Additionally, the business is well-positioned to benefit from the current gas pricing environment, as benchmark Waha pricing meaningful improved to >\$1.25/MMBtu during the quarter relative to ~(\$3.95)/MMBtu in 2Q26. We seek incremental clarity on the potential uplift PR could generate from sustainably improved Waha pricing as additional Permian egress capacity comes online. Finally, the company has executed on its ground game strategy with \$1.05 bn transacted as of 2Q26 earnings, we see PR continuing to pursue incremental bolt-on activity, and we seek clarity on the potential accretion from future any activity.

Utilities:

Within our power/utilities coverage, we see positive momentum around the IPPs into 3Q results, particularly **TLN**, given the continued strength in PJM power prices, positive momentum on capital returns, and potential signs of data center PPA opportunities in PJM. We have seen increased inbounds on the IPPs over the past two weeks following the sharp underperformance of the IPPs over the LTM, and this past week, we have seen two PPAs with CEG and hyperscalers announced, that have highlighted potential for deals to move forward even in the face of regulatory/policy uncertainty in PJM. Generalist sentiment has improved on the space following these announcements, though specialist sentiment remains more mixed. On the 3Q call, we expect TLN to provide a roll forward of its financial guidance, providing a FCF/sh outlook through 2029 and providing 2027 guidance, which we think should be positive as forward curves for PJM power prices continue to strengthen, and following the company's announced accelerated share repurchase program. We see attractive fundamentals, alongside discounted valuation where the stock is trading at a 10%/11% FCF yield on our 2027/2028 estimates, and potential for momentum around data center PPAs into year end/early 2027.

Clean Tech:

We see **SHLS** as one of the more compelling positive earnings-momentum stories into Q3 results and Q4 guidance. Management continues to discuss resilient demand trends despite investor concerns around policy and project timing, which we anticipate will support backlog conversion as well as backlog growth, improving visibility into future revenue. As a result, we believe current 2026 guidance remains conservative and see upside to at least the low-end of current revenue range of \$600mn-\$640mn. Importantly, backlog visibility appears to exceed what is currently embedded in consensus forecasts, with management indicating as of 2Q26 that \$700mn of its \$801mn backlog and awarded orders are expected to be realized over the subsequent four quarters, which compares to a FactSet consensus view of \$656mn. We believe investors are increasingly focused on how much of this backlog converts into revenue versus current consensus expectations, particularly as SHLS continues to post bookings above a 1.0x book-to-bill and further expanding its backlog. Looking ahead, we believe a more important catalyst is the company's expected update to its long-term guidance framework. We note that SHLS previously provided long-term guidance during its September 2024 Investor Day, where it outlined FY2027 revenue of \$540mn-\$630mn, gross margins of ~42%, and adj. EBITDA margins of ~30%. While the company is tracking well ahead of the revenue expectations, margins have been trending below the company's targets. That said, we believe management remains confident in utility-scale solar demand, while outperforming market growth through share gains, including incremental opportunities across storage, data centers, and newer product categories. As a result, we see potential for a new three-year outlook to support revenue expectations above current consensus forecasts. While margins and cash flow remain important areas of debate, we believe the near-term investor focus will be whether backlog conversion and forward guidance demonstrate a revenue growth trajectory that is stronger than currently reflected in estimates.

Metals & Mining:

We see **STLD** as one of the names with positive earnings momentum into 3Q26 results and 4Q26 guidance. We continue to see positive momentum behind the aluminum ramp, with management recently noting all three cold mill lines are operational, the first CASH line is operating with commercial shipments expected in 4Q26, and the second CASH line expected to begin qualification activity before year-end. As a result, we see higher alloy and automotive shipments with initial automotive shipments expected to begin in 4Q26, which we expect will drive higher aluminum ASPs, which we believe the Street remains conservative on. We expect this to be a driver for the upcoming quarters as higher aluminum revenues combined with lagging realizations of higher HRC prices will lead to higher EBITDA and FCF generation and continue to support returns to shareholders. Furthermore, as a result of our expectations of increased earnings potential and FCF, we believe the stock is cheap currently trading at a 10.7% forward FCF yield vs. historical averages of 8.5%.

Conversations we are having with investors

E&P – Neil Mehta

OXY. Conversations have centered around OXY this week following our recent upgrade, as well as being included to the most recent iteration of the America's Conviction List compiled by the Investment Review Committee. Conversations have focused on OXY's return of capital program as investors weigh the 2030 free cash flow improvement plan of \$4.0 bn. However, while investors note an expectation for a meaningful shareholder returns inflection following the redemption of the preferred equity expected in August 2029, those more cautious on the stock remain mixed on the near-term shareholder returns while OXY continues its focus on strengthening the balance sheet. Those more constructive on OXY also highlight the company's positioning on advanced recovery and the depth of the company's existing CO2 infrastructure. We see OXY trading at a discount at 13% on an average 2027/2028 FCF yield vs large cap oil E&P peers at an 11% average 2027/2028 FCF yield (peers include DVN, FANG, EOG, and COP).

MGY. MGY has been a stock in focus following the closing of Wildfire, as investors conversations have centered on the recent pro-forma operations update, where MGY guided to 4Q26 pro forma total production of 159-161 Mboe/d with a 49%-50% oil cut. Those more constructive on the name highlight the legacy Wildfire assets' positive impact on MGY's pro-forma oil cut to ~50% from ~40% prior to the acquisition. While those more cautious highlight the higher debt and issued shares associated with the deal, investors have noted that given elevated strip pricing, the company's 2027E net debt-to-EBITDA ratio of <1.0x is more than a year ahead of schedule. Investors have also remained focused on MGY's valuation following the recent pullback, and we see MGY trading at a significant discount at a 17% FCF yield on average 2027/2028 estimates versus peers at 13% (peers include FANG, DVN, PR, EOG and OVV).

Majors & Refining - Neil Mehta & Alexa Petrick Breno

Canadian Oils. While Canada oils have performed well this year, the sharp widening of WCS differentials has drawn some incremental caution to the sector. In particular, we have seen investors express a preference for Suncor over Canadian Natural. Moreover, it was a busy week for Canadian energy M&A as investors drew attention to two strategic announcements by CVE and SU. On Monday morning, CVE announced a definitive agreement to acquire ATH for C\$5.7 bn. Many investors highlight a strong, geographic fit with adjacent thermal assets, and significant growth potential, pushing thermal production to 115 kbd by 2032, while leveraging SAGD expertise. Prior to this on Sunday evening, SU announced the divestiture of non-core East Coast offshore assets, namely Terra Nova, White Rose, and West White Rose. Investor feedback was generally positive, as the transaction focuses on streamlining core integrated oil sands operations and enables higher monthly share repurchases of C\$750 mn beginning in October 2026. While earlier management changes at SU generated some debate, shares continue to rebound as many investors favor strong relative refining and distillate exposure.

SMID Cap Refining. This week across the SMID cap refining complex, investor conversations have centered around the outlook for mid-cycle margins amid tighter global refining fundamentals and ongoing supply disruptions. Within that context, Delek US Holdings (DK), Par Pacific Holdings (PARR), CVR Energy (CVI) and PBF Energy (PBF) remain top of mind for investors. For DK, bullish investors highlight the company's SRE optionality across the asset base and SOTP unlock opportunities though Delek Logistics (DKL). Those less constructive on the stock view the stock as less exposed to the structural tailwinds in refining given the lack of coastal exposure versus peers. For PARR, while some investors see value in the company's leverage to the Hawaii refining margin environment and attractive PADD 5 exposure, more cautious investors remain mindful of lack of buybacks at these levels & potential inorganic growth efforts. At CVI, conversations have been largely focused on positive 3Q revisions as well as the outlook for capital allocation. Lastly, for PBF, investor discussions are focused on the elevated beta to refining margins and the use of cash flow.

Energy Services - Neil Mehta & Alexa Petrick Breno

Middle East Activity. Inbounds from investors this week focused on activity expectations in the Middle East, as the region continues to experience disruption from the conflict. Conversations are focused on how continued lower activity levels may impact near-term earnings for OFS companies with higher Middle East exposure, as certain fields continue to experience lower activity. In-focus is the potential long-term implications of a continued disruption, as investors focus on what work will be needed to aid and restart wells that have experienced lower production since the start of the conflict. Investors view the potential work and ramp up to prior activity levels after the resolution of the conflict as a catalyst for OFS stocks with Middle East exposure, but remain on the sidelines given the uncertainty on timing of an end to the conflict. Many are focusing on 3Q earnings commentary from OFS companies as they evaluate activity opportunities in the Middle East.

US land. This week, conversations with investors centered on the outlook for US land activity and pricing dynamics, specifically on the setup heading into 3Q earnings and early 2027. The primary point of discussion has been whether OFS companies can capture incremental pricing in the current environment, or whether a more significant move in activity levels will be required. More specifically, investor inbounds have been around the setup for contract drillers vs pressure pumpers and where pricing could be most evident. On the contract drillers, sentiment around high-spec rigs remains constructive with investors seeing potential for improving dayrates. Heading into 3Q, views on pressure pumping pricing have been more mixed with investor sentiment more constructive on PTEN's ability to see price increases relative to LBRT given their customer exposure. In addition, we note incremental inbounds on HP given the company's Technology Day in Tulsa, Oklahoma this week that we attended. In addition to the US land outlook, conversations around HP have been focused on opportunities in Latin America and the outlook for Middle East rig count.

Midstream - John Mackay & Olivia Foster

HESM feedback. We received considerable inbounds this week following HESM's multi-step restructuring with sponsor CVX, under which HESM will meaningfully cut rates on its legacy Bakken assets, acquire CVX's Rockies assets, and take back CVX's ownership (among other steps). Most questions focused on the go-forward outlook for HESM with regard to growth, the balance sheet, and capital returns - with most investors looking for more detail still. Previously, investors questioned how a full HESM acquisition scenario would affect CVX's Bakken cost structure, should management had considered that option. More bullish comments focused that blend-and-extend contract adjustments could have been more challenging, with HESM having received both new assets and a large share cancellation as meaningful offsets.

MPLX outlook. Following this week's update from MPLX management on their growth outlook and the Permian value chain opportunity, investor questions focused on the EBITDA cadence from here. 2026 was generally lower than our initial expectations - and that of many investors we speak with - primarily on project timing (with growth being very 4Q-weighted per more recent guidance). Views on 2027 are more positive as considerable capital comes into service, and most investors we speak with are relatively comfortable with the view that 2027 growth will be much higher than that of 2025 and 2026. That said, there is less certainty on the drivers of 2028+ growth. Management this week outlined a number of potential larger-scale Permian value chain projects, while continuing to highlight M&A as well. Investor questions focused on how much of the latter could be needed to backfill slower organic growth than expected, and how returns could therefore be lower. We look for updates over the coming quarters on producer activity levels that could provide new volumes to backstop processing, pipeline, and frac exports. We also continue to see the potential for MPLX to push more into power projects, potentially with sponsor MPC, which would add to the growth pace.

Utilities - Carly Davenport

IPPs. This week, CEG dominated headlines with announcing two data center PPAs with hyperscalers over the past week. Feedback on the PPAs was positive, largely due to two things (1) that the deals involved existing assets in addition to new capacity, though it was not matched 1x1, and (2) that the PPAs were finalized and announced despite the policy uncertainty in PJM and optics around the upcoming November elections. While conversations across the board highlighted a positive view on the deals themselves, there remains debate on the readthrough to other deals or the other IPPs. Generalist investors have been more open to following through post the headlines, given the main concern was that PPAs cannot get announced due to the policy uncertainty/elections. With that said, specialists have been more lukewarm on sentiment. Some have pushed back that the deals were unique because they involved new nuclear volumes, and the IPPs are largely out of uprate capacity in PJM at this point (at least from what has been announced publicly). This has weighed on specialist investors' willingness to read through that other PPAs involving gas from TLN/VST/NRG could come to market in PJM in the near term given hyperscaler preference for nuclear, though management teams continue to message constructive discussions with customers ongoing. That said, PEG is one company that has come up given management has discussed uprates at the Salem nuclear plant in New Jersey as a potential beneficiary.

Regulated utes. Texas has been topical this week given continued tightness in the polling for the Governor race in the state, with views that the outcome of the election could have implications both for data center development and the potential pace of transmission investment in Texas. Inbounds on Texas utilities like Sempra have been elevated in recent weeks for this reason as well as continued debate on the 765 kv transmission lines proposed in the state. Some investors see potential for a relief rally in SRE shares post election, but others are more focused on the outcome of the 2027 legislative session in the state, where officials have discussed potential for changes to data center policy as well as transmission. Sempra remains a debate stock, while despite discounted valuation, some investors see rising regulatory risk across both Texas and California, and were concerned to see the delayed timeline to close the proposed SIP stake sale, where the company has extended the right to terminate the deal to November 27 if it is not completed by then. That said, sentiment appears constructive into 3Q results where investors expect warmer than normal weather in Texas to be supportive of Oncor results.

Clean Technology - Brian Lee

Nuclear. Investor interest in nuclear remained elevated this week, but the conversation is increasingly shifting from headline announcements toward evidence of commercial adoption. In particular, there has been a focus on recent power uprate activity, including agreements to expand output from existing reactor fleets, which reinforces our view that utilities increasingly view nuclear as one of the most attractive solutions to meet accelerating power demand. At the same time, investors continue to follow developments regarding the proposed South Korean investments, including potential timing of when first long-lead time items could be ordered in the near-term, as engagement across the nuclear value chain provides incremental validation of the long-term growth opportunity. Additionally, we see these proposed investments as improving project execution and financing confidence for future incremental reactors, within the broader government framework. Looking ahead, we believe another important indicator remains contracting activity. While SMR and advanced reactor timelines continue to receive significant attention, investors are increasingly focused on the pace of customer commitments, utility procurement activity, and power agreements tied to growing electricity demand from data centers and industrial customers. We continue to see industry conversations moving in a constructive direction and believe incremental contracting momentum remains the key catalyst for the sector.

Utility-scale solar. Within utility-scale solar, investor focus has largely shifted from policy uncertainty toward underlying demand trends. Following the Section 232 outcome, recent conversations have centered on whether developers are looking to accelerate purchasing activity or whether contracting activity could moderate to properly assess supply chain implications. To date, demand discussions across the sector remain constructive, with backlog levels and booking activity generally pointing to continued project development. The primary debate into earnings is whether healthy demand can remain resilient in the face of higher interest rates. While financing costs remain a headwind for project economics, investors are increasingly focused on backlog conversion, bookings trends, and management commentary around 2027 demand. As companies report results over the coming weeks, we expect demand visibility and forward outlooks to ease concerns around potential policy impacts and improve overall sentiment, particularly for companies with strong backlog support and improving revenue visibility. Lastly, midterms are becoming an increasing part of the discussion, including questions on whether we could see any policy items changed in the near-term if Democrats were to sweep the House and Senate, including potential extensions to the 45X tax credits in that scenario.

Metals & Mining - Nick Cash

CLF. Investor inbounds increased this week on CLF as investors are trying to gauge near-term catalysts for the equity. More bullish investors have called out increased Canadian HRC prices which could drive an incremental ~\$1bn in EBITDA from CLF's Canadian operations per our estimates. Furthermore, we believe the repricing of 2-3mn tons of fixed price steel contracts which begins in 1Q27 is set to be another upside lever for the stock. That said, investors continue to await the results of ongoing union labor contract negotiations which will likely be a cost headwind for the high fixed cost steel maker.

Valuation and Key Risks

CVE. We are Buy rated on CVE, and our 12-month, DCF/SOTP-based price target is US\$40. Key risks relate to commodity prices, refining margins, capital spend, and operational execution. Closing Price: \$31.49.

DINO. We are Buy rated on DINO, and our 6-month, P/E (12.0x normalized EPS) and SOTP-based price target is \$142. Key risks relate to refining margins, non-refining earnings, and operational execution. Closing Price: \$115.63.

PWR. We are Buy-rated with a 12-month price target is \$902, which reflects our target 30.0x NTM EV/EBITDA multiple. Key Risks: 1) slower revenue CAGR across segments from loss in project volume momentum, 2) delays in project deliverables from supply chain related challenges, and 3) slower margin progression across the three segments from cost inflation or other operational challenges. Closing Price: \$701.07

VG. We are Buy rated with a 12-month price target of \$18 based on a DCF of our free cash flow to equity estimates at an 10.25% discount rate and 3% terminal growth rate. Downside risks include: 1) arbitration on CP1 is still pending, 2) execution risk outstanding on signing incremental contracts needed for future projects, 3) downside risk to global gas prices in the near term in the event of a Russia/Ukraine peace agreement and in the medium term from the upcoming wave of liquefaction projects weighing on global gas pricing, 4) reduction in long term global LNG demand, 5) project funding requirements could require significant equity and/or debt raises, 6) permitting approvals and construction timing, 7) risks associated with higher input costs weighing on margins, and 8) risks for higher unit costs weighing on execution on excess LNG production volume realization. Closing Price: \$13.05

PR. We are Buy rated on PR with a 12-month price target of \$27 is based on a target FCF yield of 12.5% on 2027/2028 estimates with \$80/\$75 per bbl Brent oil price and \$3.50/\$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock

with an 85% weight to a fundamental valuation of ~\$26 and a 15% weight to an M&A theoretical valuation of ~\$30 based on \$80/\$80 per bbl Brent oil price and \$3.75/\$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key risks include costs, well results, commodity price volatility and government pronouncements. Closing Price: \$22.17.

TLN. We are Buy rated on TLN with a blended EV/EBITDA and FCF yield based valuation, and our 12-month price target of \$509 reflects a target EV/EBITDA multiple of 9.5x and FCF yield of 7.5% on Q5-Q8 estimates. Key downside risks for TLN include 1) Regulatory and interconnection risk, 2) lower than anticipated power prices, 3) slowdown in data center demand. Closing Price: \$378.32.

SHLS. We are Buy rated with a 12-month price target of \$13 is based on an 20X P/E multiple on our Q5-Q8 EPS forecasts. Key risks include competition, customer attrition, patent protection, market demand, policy, and supplier product availability/pricing. Closing Price: \$8.39.

STLD. We are Buy rated with a 12-month price target of \$299 based on a 10x EV/EBITDA multiple on average FY2026E-FY2028E EBITDA. Key risks include 1) Higher than expected scrap costs; 2) Slower than expected ramp of aluminum business; 3) Reduction in tariffs; 4) Increases in domestic capacity could drive downward pressure on prices; 5) Slower-than-anticipated economic growth could drive a deceleration in US steel demand. Closing Price: \$234.09.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: HF SINCLAIR CORPORATION

The rating(s) for Venture Global is/are relative to the other companies in its/their coverage universe: Antero Midstream Corp., Cheniere Energy Inc., Cheniere Energy Partners, DT Midstream Inc., EagleRock Land, Enbridge Inc., Energy Transfer LP, Enterprise Products Partners LP, Excelerate Energy Inc, Golar LNG, Hess Midstream LP, Kinder Morgan Inc., Kinetik Holdings, Kodiak Gas Services Inc., LandBridge, MPLX LP, NextDecade Corp., ONEOK Inc., Plains All American Pipeline LP, Plains GP Holdings, South Bow Corp., TC Energy Corp., Targa Resources Corp., Venture Global, WaterBridge Infrastructure, Williams Cos.

The rating(s) for Talen Energy Corp. is/are relative to the other companies in its/their coverage universe: Ameren Corp., American Electric Power, Consolidated Edison Inc., Constellation Energy Corp., Duke Energy Corp., Edison International, Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., PG&E Corp., Public Service Enterprise Group, Sempra, Southern Co., Talen Energy Corp., Vistra Corp., WEC Energy Group, Xcel Energy Inc.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in

related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or

other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
