

MORTGAGE & STRUCTURED PRODUCTS TRADER

The risks to CRE from higher rates

- The roughly 50bp increase in 10-year Treasury yields since late August could create renewed pressure for CRE valuations, since already compressed cap rate spreads (to the 10-year Treasury) leave limited cushion to absorb the headwind. Although cap rates may initially lag the backup in Treasury yields, pushing cap rate spreads tighter, we do not expect such tight spreads to be sustainable. We expect cap rate spreads to eventually widen; however, the adjustment could lag by a few months given the relative illiquidity of CRE compared with U.S. Treasuries. As a result, persistently elevated Treasury yields could drive an increase in cap rates, which could cause a decline in property prices.
- The impact is likely to vary by sector – lodging looks most resilient, supported by wide cap rate spreads, benign supply, and improving occupancy and operating fundamentals. Data centers should benefit from strong hyperscaler demand, although longer-term oversupply remains a risk. Fundamentals for industrial properties have softened due to rising supply and vacancy rates, thereby limiting the potential for cap rate spread compression. The office sector remains the most stressed, with lower valuations and higher interest rates likely to further impede maturity refinances (extending the trend of the past few years). Retail and multifamily cap rate spreads are already tight. Multifamily's defensive demand drivers (poor affordability for homeownership and a housing shortage) are offset by a sizeable looming loan maturity wall.
- For conduit CMBS deals, the key concern is the increasing likelihood of deals extending past their maturity date. Historically, 20–25% of loans that are outstanding six months prior to maturity have failed to pay off on schedule and had to extend. These loans generally exhibited weaker credit metrics. Based on recent behavior and expectations for DSCR to decline slightly, we expect a slight uptick in the share of 2026–27 maturities that are likely to extend vs. 2025 levels.
- Credit fundamentals for floating-rate Single Asset Single Borrower (SASB) CMBS may react the quickest to rising Fed Funds rates, given they absorb the increased debt servicing burden almost immediately. With much of the new rate regime likely already in the price, investors willing to express a view on the Fed may find opportunities. Lower-rated tranches may offer value under a more dovish rate outlook, while a hawkish view favors higher-quality tranches as well as deals with stronger DSCR cushions.

CMBS

Impact of rate sell-off on the commercial real estate (CRE) market: Industrial sector could soften going forward, while hospitality is the bright spot

10-year Treasury yields have climbed sharply in recent weeks, rising by roughly 50bp since the end of August. As discussed below, we believe this sharp increase in Treasury yields could create a near-term headwind for CRE property values.

A commonly used valuation metric in CRE is the 'cap rate,' which represents the expected annual unlevered return on a property and is calculated as the property's Net Operating Income (NOI) divided by its current market value. Investors also closely monitor the 'cap rate spread,' defined as the difference between a property's cap rate and the 10-year Treasury yield, as an indicator of relative value. The attractiveness of this spread is typically considered alongside property and sector fundamentals, expected NOI growth, and the broader interest-rate environment.

While cap rates have already risen across most property types from their post-COVID lows, the recent sharp increase in 10-year Treasury yields could put further upward pressure on cap rates in the near term, particularly if yields remain elevated ([Exhibit 1](#)). Although cap rates may initially lag the back-up in Treasury yields, pushing cap rate spreads to levels tighter than those observed in 2006, we do not expect such tight spreads to be sustainable. We expect spreads to eventually widen; however, the adjustment could lag by a few months given the relative illiquidity of CRE compared with U.S. Treasuries. A rapid increase in cap rates would, all else equal, put downward pressure on property values.

Exhibit 1: Cap rates have climbed from the post-COVID lows across most property types; however, cap rate spreads remain near recent tights

Cap rates by property sector (left panel) and spread between cap rates and 10-year Treasury yields (right panel)

Source: Real Capital Analytics, Bloomberg, Goldman Sachs Global Investment Research

The key question is whether certain CRE sectors are likely to prove more resilient to higher Treasury yields, while others face greater pressure.

- First, the hospitality sector (lodging) appears to be a relative bright spot despite continued year-over-year declines in international tourist arrivals. Industry forecasts point to a benign supply outlook, rising occupancy and healthy average daily rate growth. Moreover, lodging cap rates remain among the highest across CRE sectors, and relatively wide cap rate spreads provide a larger cushion to absorb the recent

backup in 10-year Treasury yields.

- Second, data centers could also perform relatively well in the near term, supported by strong demand from hyperscalers. However, the prospect of eventual oversupply remains a longer-term risk.
- Third, industrial/warehouse cap rates have risen steadily over the past year, diverging from the trend in multifamily. We attribute this increase to softer fundamentals in the industrial sector and therefore see limited scope for meaningful cap rate spread compression ([Exhibit 2](#)). Strong demand for industrial properties in recent years has encouraged significant new supply, which could continue to weigh on fundamentals as that capacity is absorbed.
- Fourth, the office sector has been the most challenged major CRE sector for some time, particularly for older properties. Higher interest rates and lower property values make refinancing maturing office loans more difficult, which could keep delinquency rates elevated.

Exhibit 2: Industrial property fundamentals remain weak, with vacancy rates above and rent growth below 5-year averages

Property sector	Cap rate (% CoStar) 2026 Q3	Cap rate spread (bp) 2026 Q3	Asking rent growth (12M)		Net delivered sq. ft (12m avg) 2026 Q3 vs 2019 Q3	Vacancy rate	
			2026 Q3	5-year avg		2026 Q3	5-year avg
Office	7.8	308	1.9%	1.9%	-126%	13.7%	13.2%
Industrial	6.8	207	1.3%	6.2%	-2%	7.4%	5.7%
Retail	6.7	200	1.6%	3.4%	-39%	4.3%	4.2%
Multifamily	6.5	174	1.4%	3.0%	20%	7.8%	7.3%
Hospitality**	9.3	454	2.6%	9.5%	-39%	62.9%	61.7%

Note: Data for Hospitality property type is as of August 2026

** daily asking rate for hospitality

** measures unit and room deliveries for multifamily and hospitality respectively

**Occupancy rate for hospitality

Source: CoStar, Goldman Sachs Global Investment Research

Finally, cap rate spreads in retail and multifamily are already quite tight, leaving limited room for further compression. Multifamily continues to enjoy the lowest cap rate across major CRE sectors, reflecting in part its relatively defensive characteristics. Poor housing affordability continues to make homeownership challenging as the U.S. faces a housing shortage, supporting rental demand. Nevertheless, the large multifamily loan maturity wall remains a key risk ([Exhibit 3](#)). Elevated interest rates, combined with a steady supply of multifamily debt, should limit the potential for further cap rate spread compression.

Exhibit 3: Multifamily and office properties dominate the maturity wall in the next few years

Note- As of Q4 2025.

Source: Mortgage Bankers Association, Goldman Sachs Global Investment Research

Conduit CMBS maturity extensions could tick slightly higher in 2026 and 2027 versus 2025

Conduit CMBS remains the largest sector within the CMBS market and remains a widely tracked benchmark for commercial real estate debt. Conduit CMBS deals are typically backed by a diversified pool of collateral that spans several income-producing property types. Institutional investors track the rate of conduit CMBS loans extending past maturity as a barometer of broader credit health and refinancing frictions. Because conduit-backed mortgages with a fixed maturity generally lack embedded borrower extension options—in contrast to SASBs and CRE CLOs—a maturity extension is usually executed via loans entering special servicing following a maturity default or as loans approach their balloon maturity. When market interest rates at loan maturity are significantly higher than the existing mortgage rate, borrowers may face challenges refinancing unless property fundamentals have improved meaningfully. In many cases, borrowers may need to contribute additional equity to refinance. Alternatively, some borrowers may seek maturity extensions while waiting for a more favorable interest rate environment.

Based on outstanding loan balances six-months prior to their stated maturity, we find that about 20–25% of remaining loans within conduit CMBS fail to pay off on schedule and are extended past the original maturity ([Exhibit 4](#)). When comparing the loans that paid off on time against those that did not, the loans that paid off exhibited noticeably better average credit metrics based on recent reporting (again, measured six months prior to maturity) ([Exhibit 5](#)), indicating that weakening property fundamentals are an important driver of loan extensions. Looking at the distribution of loan outcomes by changes in DSCR, the likelihood of an extension tracks closely with how much a loan's DSCR has shifted between origination through maturity ([Exhibit 6](#)). Applying these observable historical patterns to the 2026 and 2027 maturity cohorts, along with our expectations for where DSCRs could be at maturity, we project roughly 28% and 25% of 2026 and 2027 maturing volumes to extend, respectively (again, [Exhibit 4](#)).

Exhibit 4: If interest rates remain elevated, the share of conduit CMBS loans with maturity extensions could rise from 2025's level

For conduit CMBS loans by original maturity year.; share of balances past maturity computed as the share of balances that are still outstanding six months post-maturity date, as a share of total outstanding balances six months before the stated maturity date; balances for 2027 reflect currently outstanding balances for stated 2027-maturing loans, as of September 2026

Source: Trepp, Goldman Sachs Global Investment Research

Exhibit 5: Loans that paid off as scheduled exhibit stronger credit metrics on average than loans that received extensions

Change in reported metrics for conduit CMBS loans by original maturity year; changes calculated between the time of securitization to six-months prior to maturity; maturing loans are defined as those that have paid off no more than five months past maturity; loans that extended past stated maturity reflect loans that are still outstanding six months post-original stated maturity

	Maturity Year	Loans that matured	Loans that extended past stated maturity
Change in Net Operating Income	2018	11%	-17%
	2019	7%	-19%
	2020	13%	-4%
	2021	4%	-11%
	2022	-3%	-31%
	2023	3%	-30%
	2024	10%	-18%
	2025	10%	-20%
Change in DSCR	2018	0.12	(0.04)
	2019	0.09	(0.31)
	2020	0.22	(0.05)
	2021	0.13	(0.27)
	2022	(0.04)	(0.66)
	2023	0.01	(0.44)

The impact of higher rates on SASB floaters

DSCRs of floating-rate Single Asset Single Borrower (SASB) CMBS deals are impacted almost immediately when the Fed hikes policy rates. The concentrated nature of SASB collateral could exacerbate any payment troubles if DSCRs drop below 1. SASB floaters gained a large market share during 2020 – 2022 ([Exhibit 7](#)) and now represent just over \$175bn in balances outstanding.

Exhibit 7: Floating rate SASB balances grew rapidly during the pandemic, and currently represent just over \$175bn in balances outstanding

Balances outstanding of floating rate SASB deals

Source: Trepp, Goldman Sachs Global Investment Research

The sharp increase in interest rates comes at an inopportune time for the CRE/CMBS market, as many borrowers and investors were hoping that lower rates would help alleviate the sector's ongoing maturity-related refinancing stress. Within the floating rate SASB market, the share of deals reporting a debt service coverage ratio (DSCR) below 1 was gradually drifting downwards after peaking in mid 2025 ([Exhibit 8](#), note that DSCR values are typically updated annually, so it is a lagging metric). While the impact will vary deal by deal, it appears likely that DSCR's would decline 5-7% for a cumulative of 50bp of hikes in 2026. DSCR could decline by 7-10% if there are a total of three hikes (75bp).

Exhibit 8: The share of SASB floaters with a DSCR below 1x has been declining since mid-2025

Share of SASB floater balances with a DSCR below 1x; note that DSCR values are updated annually, making this measure somewhat backward looking

Source: Trepp, Goldman Sachs Global Investment Research

Prices of SASB floaters appear to be moving in response to Fed expectations and property level fundamentals, with aggregate pricing on B-rated tranches falling significantly from an average of 90 cents on the dollar in January to 85 cents on the dollar at the end of September ([Exhibit 9](#)). Focusing on the most cuspy deals (i.e., deals with a DSCR below 1.25x), we find that prices have declined across ratings buckets. For instance, the 25th percentile trade price has moved an average of 3 points lower across

rating buckets since the end of last year as concerns around higher rates/macro impact dominated the narrative ([Exhibit 10](#)). Investors willing to express a more dovish view on Fed pricing may find value in owning some of the lower rated floating rate SASB, while investors concerned about a more hawkish Fed should prefer the certainty of higher credit quality tranches as well as owning deals with DSCRs that are well above 1.25.

Exhibit 9: While most rating tranches of SASB floaters appear resilient in aggregate, single B's have repriced significantly so far in 2026

Average trading prices of SASB floaters by rating bucket

Relative Value Views

Exhibit 12: Relative value views

Relative Value views by sector		
Agency MBS and CMBS	MBS Basis	Modest overweight: OAS near 2024–25 average levels could attract real-money demand, while further rate sell-offs and the seasonal slowdown should constrain MBS supply in the coming months. Current coupon yields are at the 95th percentile of recent history, providing attractive carry. Key risks are continued correlation with 10-year Treasury yields and fixed-income fund outflows. Longer-term: We expect current coupon MBS OAS to end 2026 near its long-term average, supported by de-escalation of the Iran conflict and normalization in inflation.
	Coupon stack	Coupon performance is likely to remain highly rate-dependent: FN 5.0s-5.5s are attractive; In a further sharp rate back-up, FN 6.0s-6.5s could underperform due to increased extension risk; in a steady rate environment FN 6.0s could outperform on carry, while a rate rally would likely favor belly coupons such as FN 5.0s.
	Specified pools	TBAs likely to outperform spec pools near-term, although specified pools could outperform longer-term due to worsening convexity profile of TBA and scarcity value from GSE retention. Prefer middle loan-balance (175k-275k) stories as they are most insulated from prepay/policy risks.
	GNs	Production and higher coupon GNs have entered 'cheap territory' and appear relatively more attractive now, however they may not snap tighter until bank demand re-emerges. Prefer GN II/FN 4.0s swap over the GN II/FN 4.5s swap
	CMO floaters	As a result of the market-implied increase in cap risk and recent DM widening across the sector, we prefer owning 7.0% cap CMO floaters
	Agency CMBS	Recent spread widening makes agency MBS attractive vs. low coupon MBS. Spreads could remain volatile during the coming months, driven by negative supply seasonals.
	Agency MBS vs. IG	Prefer MBS vs IG: MBS offers attractive diversification benefits
Non- agency RMBS	Non-QM	Spread pick-up of non-QM AAAs versus MBS basis is in line with its long-term average. While non-QM convexity profile is better and investor appetite remains strong, concerns around extension are starting to emerge especially for early-2026 issued deals. For fixed-rate exposure, we prefer non-QM over prime RMBS. Prefer up-in-quality exposure: BBB-B spreads are tight vs. AAA
	Prime	AAA-rated floating rate tranches of prime investor-property RMBS remain the cheapest RMBS floating-rate sector, with wider spreads likely compensating investors for the longer average life
	CES	With CES spreads trading on top or through that of non-QM across most tranches, we maintain a neutral stance on the sector. The value of better convexity profile would be offset by slightly worse liquidity vs. non-QM
	HELOC	Fixed rate: TPMT deals (across AAA-A ratings) - flatter delinquency ramps and sequential principal waterfall Floating rate: OBX and GRADE offer spread pick-up vs. JPMMT deals
	SFR	Fundamentals remain supportive for SFR with rent growth inflecting upwards in recent months. Prefer SFR over CMBS, as SF rent growth continues to outperform MF.
ABS	Prime Auto	Neutral: Spreads are largely insulated from geopolitical and commodities induced volatility, and outperform during such events. The BBB tranches offer compelling spreads with thick enough credit enhancement.
	Subprime Auto	Underweight at a sector level: High interest rates and inflated auto prices have increased delinquencies and losses. We advocate an up-in-quality positioning with careful manager selection. Underweight vs. A-rated corporate spreads: Spread pick-up of A-rated subprime auto ABS vs. A-rated corporate bonds near the tight of the past few years
	Consumer Unsecured	Overweight vs. subprime auto: We recommend that investors lower in the ratings stack favor issuers with high coupon-to-loss ratios (like SoFi and Affirm) for greater downside protection. Conversely, investors higher in the capital structure may prefer issuers with lower coupon-to-loss ratios (like Pagaya or Upstart), as these offer wider spreads while still benefiting from substantial credit enhancement.
	Home Improvement	Overweight vs. consumer unsecured: Home improvement bonds have historically priced similarly to consumer unsecured deals while reporting significantly better collateral performance. Key risk is around the lending practices as the sector expands.
	Solar	Underweight the sector on performance concerns.
	Aircraft	Overweight aircraft ABS relative to subprime auto ABS at the A-rated tranches. Strong travel demand and favorable supply and demand imbalances keep aircraft valuations well supported.
	Digital infrastructure ABS/CMBS	Neutral at a sector level. In general, prefer hyperscaler exposure. Datacenter ABS: Among the widest A-rated spread in ABS, with wide dispersion across trusts. We favor trusts with long track record, high DSCRs and long lease terms. Fiber ABS: Less exposed to AI risk, lower dispersion across issuers - trades tighter than datacenter ABS. Datacenter CMBS: Wider spreads vs. datacenter ABS, although smaller market and less diversification. Diversification is the best way to hedge maturity default risk.

Disclosure Appendix

Reg AC

We, Arun Manohar, Ben Shumway and Neth Karunamuni, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Arun Manohar Goldman Sachs & Co. LLC, Ben Shumway Goldman Sachs & Co. LLC, Neth Karunamuni Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are

available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
