Component Data Deposition: Electronic component shipment statistics for June 2026: Further strong capacitor demand and gradual recovery in connectors

We analyzed global electronic component shipment data for Japanese makers in June 2026 announced by the Japan Electronics and Information Technology Industries Association (JEITA) on August 31. In June 2026, total electronic component shipment value rose MoM and was above the seasonal average. By trend line, electronic components overall were broadly flat. By product, capacitor shipments grew strongly even when excluding the impact of the weak yen, by +20% YoY and +12% MoM, and remained on a growth trend. Connectors continued to stage a gradual recovery. Other products were generally flat, and we identify no notable, big changes. Meanwhile, the production volume of dielectric ceramic electrode materials for MLCCs rose both YoY and MoM in June, and production remained at a high level versus the past 10 years. Our four top picks in the electronic components sector are Ibiden, TDK and Rohm based on April-June quarter results, and either Murata Manufacturing or Taiyo Yuden among MLCC related.

- June overview:** JEITA announced that global electronic component shipments by 60 Japanese companies totaled ¥399.4 billion (+25% YoY, +13% MoM) or \$2.483 billion (+12%, +11%); within the total, shipment value was ¥245.8 billion (+30%, +13%) or \$1.528 billion (+17%, +11%) for passive components, ¥74.6 billion (+19%, +13%) or \$464 million (+7%, +11%) for connection components, ¥42.3 billion (+17%, +10%) or \$263 million (+5%, +9%) for conversion components, and ¥36.6 billion (+18%, +20%) or \$228 million (+6%, +18%) for other electronic components. Overall, all products were generally above the seasonal average in MoM terms. By product, capacitors saw strong MoM growth of 12% on a dollar basis as growth continued in both yen and dollar terms. Connector shipments also continued to grow. Demand for other products was buoyant in June, but trend lines were broadly flat and with no notable big changes (it is difficult to compare the total amount with past data since we cannot reflect retroactive adjustments to past results, so please refer to YoY trends).
- Shipments by major product:** Among passive components, shipment value was ¥180.9 billion (+34% YoY, +14% MoM) or \$1.125 billion (+20%, +12%) for capacitors, ¥17.5 billion (+26%, +9%) or \$109 million (+13%, +7%) for resistors, ¥36.1 billion (+18%, +10%) or \$224 million (+6%, +8%) for inductors, ¥66.6 billion (+21%, +13%) or \$414 million (+9%, +12%) for connectors, and ¥15.9 billion (+7%, +14%) or \$99 million (-4%, +12%) for high-frequency components. YoY growth was strongest in capacitors, resistors, connectors, and power supply components, while MoM growth was strongest in capacitors, transformers, connectors, audio components, sensors, power supply components, and high-frequency components.
- Shipments by region:** Japan ¥69.90 billion (+19% YoY, +14% MoM) or \$435 million (+7%, +12%), US ¥44.40 billion (+26%, +20%) or \$276 million (+13%, +18%), Europe ¥39.30 billion (+26%, +18%) or \$244 million (+13%, +16%), China ¥148.10 billion (+26%, +11%) or \$921 million (+13%, +9%), other Asia ¥96.50 billion (+28%, +11%) or \$600.0 million (+15%, +9%). regions were above the seasonal average. YoY growth was particularly notable in the Asian region (Japan, China, and other Asian countries).

- JEITA also announced that global production volume of dielectric ceramic electrode materials for MLCCs rose 1% YoY and 9% MoM in June 2026. Production volume thus rose both YoY and MoM in June and remained at a high level versus the past 10 years.

Global electronic components shipment value trends by major industry

Global electronic components shipment statistics: Data used is the sum of shipment values from 60 member companies of the electronic components division of JEITA. Although the data lags by two months, we think it provides a good sense of market conditions for Japanese electronic components and is useful for identifying trends.

Note: In electronic components shipment statistics, retrospective revisions are made as needed. As a result, the most recently published YoY figures may not match YoY figures calculated from accessible historical data. Because revised historical data is not accessible, please note that actual trends and YoY trends may diverge. In such cases, please refer primarily to the YoY data that reflects the retrospective revisions. For this report, YoY figures for data from September 2025 onward use the YoY data published at the time of each monthly release.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives,

or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
