

Huaming (002270.SZ): 2Q26 revenue/net profit beat from overseas growth; Buy

Huaming reported 2Q26 results that came above our expectations, with revenue/gross profit/operating profit/net profit coming in at Rmb751mn/429mn/265mn/227mn, +23%/+26%/+17%/+15% yoy, +20%/+26%/+23%/+19% vs GSe, mainly due to better-than-expected overseas growth in the quarter. Overseas revenue already accounted for more than 40% of 1H26 revenue and is expected to remain at 40%+ for the full year, with Europe, particularly Turkey, continuing to drive overseas growth and Western/Northern Europe and the Middle East providing additional medium-term share opportunities. While the 40%+ yoy overseas growth seen in 1H26 is likely to moderate, management remains confident in achieving double-digit firmwide revenue growth, while we project potentially faster net profit growth given the margin-accretive overseas mix and improving operating leverage. Management noted that the 1H26 expense ratio was elevated by share-based compensation and front-loaded overseas investments, including the new European subsidiary, overseas team buildout, product testing, channel development, trade shows and H-share issuance costs, many of which they said are one-off or front-loaded; management therefore expects the expense ratio to improve in 2H26 and into 2027. The 2026 operating target remains unchanged, with the company still aiming to meet its employee share-ownership plan target of Rmb811mn net profit (GSe: Rmb827mn). We stay Buy-rated, with the stock trading at 21.7x/18.7x 2026E/27E P/E against 15% earnings CAGR in 2026-30E.

2Q26 performance by segments:

Electricity equipment (OLTC revenue) delivered 15% yoy in 1H26, implying 2Q26 growth acceleration to 29% yoy (vs 1Q26 at -1% yoy growth). In particular, we note:

- Domestic demand revenue was Rmb650mn in 1H26, roughly flat yoy-wise vs Rmb648mn in 1H25.
- Overseas demand was Rmb449mn in 1H26, +44% yoy, with half from direct export, at 43% yoy growth and half from indirect export, at 46% yoy growth.

CNC equipment revenue delivered 38% yoy in 1H26, implying 2Q26 growth of 12% yoy.

Detailed takeaways from earnings briefing conference:

Overseas growth remains the key earnings driver: Overseas revenue accounted for

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

more than 40% of total revenue in 1H26, and the mix is expected to remain at 40%+ by end-2026. The company does not expect the 40%+yoy overseas growth seen in 1H26 to persist. Longer term, it targets overseas revenue to contribute double-digit growth to total revenue, implying overseas revenue growth should moderate as the mix increases. The company indicated that the majority of overseas growth continues to reflect industry beta, with moderate share gains globally. Even among Chinese transformer manufacturers exporting overseas (41% yoy growth in July vs. 51% yoy in Jan-Jun), Huaming's growth has been in line with industry, where market share was relatively stable.

Europe remains the core overseas market, with Turkey the largest incremental contributor:

The regional mix of overseas revenue has not changed materially versus 2025, with Europe still accounting for the majority of overseas sales. Turkey was the largest contributor to overseas growth in 1H26, supported by both a new domestic grid-upgrade cycle and its role as a major transformer manufacturing and re-export hub supplying Eastern and Southern Europe. As such, strong Turkish demand also partly reflects continued strength in underlying European transformer demand. Asia remains the second-largest overseas region, with Central Asia and Southeast Asia also contributing meaningfully to growth. Huaming's existing European strength remains concentrated in Southern and Eastern Europe, while penetration in Western and Northern Europe is still relatively low. The company has recently established a new European subsidiary and local sales/service platform to expand further into these markets. We see this as a longer-term share opportunity, although competitive intensity should increase as Huaming moves further into incumbent suppliers' core markets.

Domestic demand remains subdued, with grid investment providing the main support:

Domestic revenue was broadly flat in 1H26, with grid revenue growing, while off-grid revenue declined, due to the high 1H25 base, particularly the solar installation rush during Jan-Apr 2025 (new energy accounts for roughly 10% of domestic revenue). Domestic revenue performance is expected to improve modestly in 2H26 as the comparison base normalizes.

UHV remains strategically important but small: The company sees a high probability of continuing to receive UHV orders in 2026-27, with additional State Grid projects currently under discussion following previous deliveries. However, volumes are expected to remain small over the next 2-3 years.

Margin remains resilient despite raw-material inflation: Copper, tungsten and other raw-material costs increased in 1H26, but GPM improved slightly to 47.2% in 2Q26 (+1.4ppt yoy), because cost inflation was partially offset by localization of components such as vacuum interrupters, lower costs for some control-system software, and a rising overseas mix, which also supported better profitability.

Huaming has not implemented a broad-based price increase, but the pricing trend remains favorable because: 1) overseas tap changers are customized and typically quoted on a project-by-project basis, allowing product configuration and cost changes to be incorporated into individual bids; 2) as Huaming expands overseas, it is also entering higher-ASP products and projects, supporting mix-driven ASP and margin improvement even without a formal price increase.

Competitor capacity expansion and disputes do not appear to be changing the

competitive landscape: Huaming's competitor, Maschinenfabrik Reinhausen (MR), has announced plans to double its capacity by 2030E, with the first phase completed in Oct 2025 and further assembly expansion scheduled to start operations in 2028, which has been a common investor concern. Huaming does not currently see overseas competitor capacity expansion as a material risk because overseas new-order growth remains broadly consistent with last year, and management believes that aggressive capacity expansion by incumbents could itself indicate expectations for sustained global demand growth.

Regarding the patent dispute with MR at CWIEME Berlin in May 2026, Huaming responded that the dispute is limited to specific product variants. Huaming subsequently presented an alternative product route at the CIGRE Paris exhibition and highlighted that it has second and third technical solutions available. Management noted that the disputed product had not entered mass production or generated revenue, and existing products and 1H26 operations were unaffected.

US policy remains a manageable uncertainty given limited current exposure:

Huaming's direct and indirect US revenue was only c.Rmb30–40mn in 2025, representing less than 2% of total revenue, and the contribution remains very small in 2026. Current US exposure is mainly to localized renewable-energy/data-center applications rather than large transmission-grid projects. Even if direct US access becomes more challenging, Huaming highlighted that strong US equipment demand is already absorbing capacity from European and Asian transformer manufacturers, indirectly creating supply gaps in other markets that Chinese suppliers can serve.

Opex should improve as front-loaded overseas investment normalizes: The increase in the 1H26 expense ratio was driven in large part by share-based compensation, as well as the new European subsidiary, overseas team buildout, product testing, channel development, trade shows and H-share issuance costs. Many of these expenses are one-off or front-loaded, and management expects a lower expense ratio in 2H26 and into 2027.

Overall, the 2026 operating target remains unchanged, with the company still aiming to meet its employee share-ownership plan performance target of Rmb811mn net profit in 2026E (GSe: Rmb827mn).

TP/EPS change: We revise up 2026–30E EPS by 1–6% to reflect the result. Our 12-m TP is now at Rmb24.2, still based on 22x 2028E P/E, discounted back to 2027E at a 9.5% cost of equity.

Investment thesis, valuation methodology, and risks

Investment thesis: Huaming is China's dominant supplier of on-load tap changers, with an estimated 90% domestic market share by volume, and is increasingly expanding

overseas, where margins are structurally higher. We believe Huaming can leverage product quality broadly comparable with Maschinenfabrik Reinhausen, and we expect its materially lower pricing, faster delivery and new production capacity in Turkey and Indonesia to increase its global market share from around 13% in 2026E to 16% by 2030E, lifting overseas revenue to more than half of OLTC sales. This should support approximately 14% revenue CAGR and 15% net profit CAGR over 2026E–30E, alongside strong cash conversion, first-quartile ROE and CROCI among China Industrial Tech sector, and a 3% dividend yield. Its competitive moat is reinforced by the mission-critical nature of tap changers, long customer qualification cycles, high switching costs and a structurally duopolistic global market. We therefore view Huaming as a high-quality beneficiary of the multi-year global grid upgrade cycle. We have a Buy rating on Huaming as we view valuation as attractive with compelling risk-reward against an EPS CAGR of 15% in 2026E–30E.

Valuation methodology: Our 12-month target price of Rmb24.2 is based on 22x 2028E P/E, discounted back to 2027E at a 9.5% cost of equity.

Key downside risks: 1) Slower-than-expected overseas market-share gains; 2) Weaker-than-expected margin profile; 3) Weaker-than-expected domestic revenue growth

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International (“GSI”), authorised by the Prudential Regulation Authority (“PRA”) and regulated by the Financial Conduct Authority (“FCA”) and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE (“GSBE”) is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial

Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
