

Yingliu (603308.SS): 2Q26 net profit miss, earnings capped by capacity expansion progress though orders robust

Yingliu reported 2Q26 results, with revenue/gross profit/operating profit/net profit at Rmb941mn/Rmb323mn/Rmb130mn/Rmb101mn, +30%/+25%/+18%/+5% yoy and +3%/+2%/+3%/-14% vs. GSe. Net profit was below our estimate mainly due to Rmb14mn of FX loss and Rmb25mn of credit impairment. We see the key takeaways as: 1) order intake remains broadly on track, with roughly Rmb1.5bn of two-engine new orders in 1H26 versus the full-year target of Rmb3bn, while two-engine revenue of Rmb887mn in 1H26 should accelerate with new furnaces coming online to reach c.Rmb2bn in 2026E; 2) GPM and NPM should continue to improve into 2H26E, supported by easing raw-material pressure, pricing pass-through, better capacity utilization and lower convertible-bond-related financial expenses; and 3) recent turbine-blade investments by SpaceX further suggest, per management, that industry supply constraints could persist over the next 3-5 years. We revise down 2026-30E EPS by 12%-13% to reflect the 2Q26 result as well as more limited near-term capacity expansion visibility. Based on current equipment lead times, furnace orders placed now would only translate into effective capacity additions from 2H27E, implying a slower capacity ramp than previously expected. On our revised estimates, our new 12-month TP is Rmb72.2 (vs. Rmb82.4 prior).

Company Limited

Detailed takeaways:

Two-engine revenue: 1H26 two-engine revenue reached Rmb887mn. Full-year two-engine revenue is expected at c.Rmb2.0bn, while total company revenue remains targeted at c.Rmb4.0bn. Two-engine monthly output reached Rmb140mn in April and May, and Rmb150mn in June, more than Rmb150mn in July and c.Rmb160mn in August. At the company level, July-September monthly revenue is expected to average no less than Rmb360mn and October-December is targeted at no less than Rmb380mn per month.

Two-engine orders: 1H26 two-engine new orders reached roughly Rmb1.5bn, including c.Rmb800mn in 1Q26 and c.Rmb700mn in 2Q26, while backlog stood at c.Rmb2.2bn. Full-year new orders of more than Rmb3.0bn remain achievable per management.

Margin recovery into 2H26E: 1H26 two-engine GPM was slightly above 40%, below c.42% in 2025, mainly due to raw-material inflation as well as higher labor and social-security costs. 2Q26 GPM improved sequentially from 1Q26 as raw-material costs stabilized and pricing pass-through started to take effect. GPM and NPM are expected to continue recovering in 3Q26 and 4Q26, also supported by higher

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

capacity utilization as revenue scales against the existing asset base.

Temporary expense headwinds should ease: 1H26 included c.Rmb20mn of incremental convertible-bond-related financial expenses, but most of the convertible bonds have now been redeemed, implying limited related financial expenses from 2H26 into 2027. R&D expenses (11.7% of sales in 2Q26) increased due to raw materials price hikes for new-product development as well as social security costs, which are still aimed at 8% of sales in the long term. Social-security payments were concentrated in June, with the impact distributed across administrative, financial and R&D expenses as well as production costs, which management expects to be c.Rmb10mn per quarter in 3Q26 and 4Q26.

Capacity remains the key near-term bottleneck: Three new pieces of equipment are scheduled to begin production progressively during August-October. Two additional large furnaces are planned for 1H27, with deposits already paid, followed by further equipment additions in 2H27. If additional capacity is ordered now, most new equipment could be completed by 3Q-4Q27. Capacity expansion is largely incremental investment on existing production lines rather than full greenfield replication, with annual capex expected at c.Rmb300-500mn.

GE Vernova and Mitsubishi Heavy Industries provide further optionality. GE Vernova is expected to visit the company in September, per Yingliu mgmt, while the two sides are also exploring potential cooperation around a European manufacturing facility. The company has also established a cooperative relationship with Mitsubishi Heavy Industries, with further orders pending.

SpaceX's move into turbine blades reinforces, rather than weakens, the industry supply-tightness thesis: In response to news ([link](#)) that SpaceX will explore in-house production of turbine blades, Yingliu mgmt said it believes SpaceX investments appear more likely aimed at securing power supply for its own AI endeavors rather than supplying competitors. The development further supports mgmt's view that heavy-duty gas-turbine blade supply could remain tight over the next 3-5 years.

Investment thesis, valuation methodology and risks

Yingliu is a leading domestic high-end cast component supplier with <1% global share, leaving a long runway for growth. We expect U.S. AIDC to source up to ~60% of power from gas turbines, while global OEMs (Siemens Energy, GE Vernova, MHI) face severe capacity constraints, with turbine blades a key bottleneck due to stringent metallurgical requirements and supply concentration among Western suppliers (e.g., PCC, Howmet), who prioritize aerospace and face labor shortages. Yingliu is well positioned to capture demand spillover given available capacity, lower ASPs, comparable quality, and strong R&D and customer relationships, reinforced by expanded product development for Siemens Energy and long-term contracts with Baker Hughes, Ansaldo, and GE Aerospace. While still a complementary supplier relative to Western incumbents with single-digit global share by 2030E, improving product mix, scale, and asset turnover should drive GPM, NPM, and ROE expansion through the cycle. We forecast 26%/41% total sales/earnings CAGR in 2026E-30E and derive a 12m TP of Rmb72.2. We are Buy rated.

Valuation methodology: Our 12m target price of Rmb72.2 is based on 2030E P/E of 30x discounted back to 2027E at 10% CoE.

Key downside risks: (1) Capacity ramp-up comes in below expectations due to failure to improve yield rate or recruit skilled technicians; (2) Order intake growth below our

expectations, potentially due to the long cycle to develop new SKU; (3) AIDC demand weakens with hyperscalers canceling orders for gas turbine manufacturers.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
