New wave of cold plate upgrades with double-sided design + diamond and copper; AVC the biggest winner; assume coverage at OW with PT of NT\$5,200

A new wave of cold-plate upgrades is setting up a multi-year content step-up in AI server liquid cooling, and we see AVC as the clearest winner. We assume coverage at Overweight with a Street-high December 2027 price target of NT\$5,200, based on a 22x 2028E P/E, which implies ~55% upside from the current share price. Our 2026/27/28 estimates are 3%/16%/16% higher than Bloomberg consensus, driven by the four tangible earnings levers we expect: (1) ASP increases on select switch-tray cold plates that lift 2H26 revenue and gross margin via a better mix/yield; (2) double-sided cold-plate designs plus diamond and copper adoption that raises content in Nvidia VR Ultra (VRU) systems from 2Q/2H27; (3) broader ASIC cooling complexity into 2H27/2028 (Google TPU v9, AWS Trn4, etc.), and (4) rising liquid cooling adoption in OSFP (Octal Small Form-factor Pluggable)/ELSFP (External Laser Small Form-Factor Pluggable) optical modules. We expect AVC's share price to continue outperforming with faster earnings upgrades over the next 6-12 months. With this note, we transfer coverage of Asia Vital Components to Megan Hsueh.

- Double-sided cold plate design potentially for Nvidia VRU and Google TPU v9, in addition to AWS Trn3 and AMD MI450; diamond copper to add value.** We believe the double-sided cold plate design is already set to be adopted in Trn3 and MI450 compute trays from 4Q26 onwards and will likely be adopted in VRU compute trays as well from 2Q/2H27 onwards, suggesting incremental cold plates for backside cooling. In addition, we believe VRU cold plates may start adopting the diamond and copper material. Both the additional cold plate units and the new material adoption would increase the cooling content meaningfully for VRU compute trays (US\$3k-3.5k per tray, 50% higher vs the previous generation). TPU v8 also creates decent cooling content, due to its gold-plating design for TPU cold plates as well as additional cold plate units for surrounding ICs. As for TPU v9, we believe a larger die size and higher TDP will increase the likelihood of double-sided cold plate adoption. In our view, AVC has secured major shares in these GPU and ASIC projects with meaningful spec upgrades, making it the main beneficiary of higher content growth than market expectations.
- More GM upside on enhanced mix and yield, along with a successful ASP increase for certain cold plate projects.** We expect AVC to deliver further GM upside into 3Q and 4Q26 by reaching the 34% and 35% level (vs consensus at ~33% and 34%), suggesting solid growth vs 1Q/2Q GM of 30% and 33%, driven by a better product mix (more ASIC contribution) and increasing yield/automation. Also, we believe AVC has successfully raised ASP for some of its cold plate products (mainly for Nvidia/Mellanox switch trays, in our view) to reflect higher costs from materials and labor overtime pay, helping to maintain its margin while benefiting its revenue growth momentum. Coupled with the mass production of VR200 and the liquid-cooled ASICs (Trn3 and TPU v8) in 3Q and 4Q26, we model AVC's revenue to grow 18% QoQ and another 19%, growth rates which are above consensus by 1% and 5%.

Summary Investment Thesis and Valuation

Investment Thesis

We are OW on AVC for its strong earnings growth potential, which we think is supported by the content increase in AI servers. We expect AVC to see increasing upside from more liquid cooling opportunities, with much higher ASP and margin, while its competitive advantages vs. peers could give it further market share gains as the industry's structural trends develop.

Valuation

Our Dec-27 PT of NT\$5,200 is based on 22x 2028E P/E. The target multiple is at the mid to high end of AVC's historical average trading range of 15-25x P/E since the start of the AI server boom, as we expect an earnings upgrade cycle (based on our above-consensus estimates in 2027-28) to support this valuation.

- **Undemanding valuation as the key winner in the stronger-than-expected cold plate upgrades.** AVC is now trading at ~20x 12-month forward P/E, largely in line with its past trading average since the start of the AI server boom. We apply a 22x 2028E P/E valuation to reflect a multi-quarter earnings upgrade path tied to both Nvidia VRU and multiple ASIC-driven content expansions. The upside case strengthens if TPU v9 adopts double-sided designs and Trn4 adds incremental cold plates for NPO/CPO. Key investment risks include slower-than-expected spec upgrades, market share loss from the current leading position (~50% in each AI project), and pricing pressure.

Earnings estimates

JPM's above-consensus forecasts

Our 2026/27/28 EPS forecasts are 3%/16%/16% above Bloomberg consensus, reflecting (1) **ASP increases** of select switch-tray cold plates, (2) **double-sided cold-plate designs** plus **'diamond copper'** adoption potentially in Nvidia VRU, (3) broader **ASIC cooling complexity** into **2H27/2028**, and (4) structural margin expansion.

Key risks to ourestimates, price target and rating

- **Slower-than-expected spec upgrades in future AI systems:** We believe AI GPU and ASIC customers' new product generation launches will be the main driver of continued cooling spec upgrades. However, if the launch timing of next-gen products is delayed or spec improvement is limited, AVC's growth estimates may have to be slightly moderated.
- **Market share loss:** We regard share loss as a milder risk, as the entry barrier for cold plate modules has become higher, especially because the AI server migration cadence remains at the short 1-2 year cycle. Coupled with customers' preference for a limited numbers of suppliers (usually 2-3), we do not think there will be a major market share shift.
- **ASP/margin pressure:** As Nvidia has put cold plates into its "Group A" components, meaning standardization, from the VR200 generation, investors may be worried about the potential ASP and GM pressure, given less differentiation among peers. However, we believe AVC's 2Q26 and potentially 2H26 GM may continue to beat investor expectations with stronger expansion, thanks to its continued yield enhancement, better-than-expected cooling content growth with its stable market share and rising ASIC contribution (with higher content and margin vs GPU projects).

Performance and Valuation

Share price performance

Figure 1: AVC's share price vs the Taiex

Source: Bloomberg Finance L.P.

- In 2025, AVC's share price underperformed in 1H given market concerns about cold plate ASP/margin decline when Nvidia added cold plates to its Group A components for VR200 (implying standardization). However, the share price outperformed in 2H given the confirmation of a total content value increase of "tray level" thanks to the fanless design of VR200 with an additional number of cold plates being adopted per tray.
- In 1H26, AVC's share price continued to outperform the Taiex with new TAM expansion opportunities from both ASICs and Nvidia's new rack solutions, such as LPX rack, Vera CPU rack and CPO-related solutions.
- In 3Q26, AVC's share price corrected meaningfully (even more than other AI sub-sectors) in July, given the overall market pullback from de-leveraging and incrementally from the delay of VR200. However, it has rebounded rapidly since August thanks to 1) a reported GM/EPS numbers beat, 2) a smoother VR200 ramp in late 3Q26, and 3) the higher-content ASIC projects being expected to enter mass production in 4Q26 to drive further revenue and margin expansion.

Valuation

We derive our Dec-27 price target of NT\$5,200 based on a 22x 2028E P/E. The target multiple is at the mid to high end of AVC's historical average trading range of 15-25x P/E since the start of the AI server boom, as we expect an earnings upgrade cycle (based on our above-consensus estimates in 2027-28) to support this valuation.

Financial Analysis

We forecast AVC's revenue to increase 61%/57%/22% YoY in 2026/27/28, supported by the stronger-than-expected cold plate spec upgrades and content growth in both GPU and ASIC systems, with the company's continued leading share in these high-spec projects.

AVC's 2Q26 gross margin expanded to 33% thanks to continued yield enhancement of liquid cooling products. We believe the company's margin will continue to surprise to the upside in 2H26-2028, driven by the near-term favorable product mix from VR200 and multiple new ASIC project ramp, along with longer-term continued spec upgrades, which support our gross margin forecast of 33%/36%/37% in 2026/27/28. The stronger GM growth also serves as the key driver of our bottom-line EPS growth forecasts of 120%/73%/27% in 2026/27/28.

Investment Thesis, Valuation and Risks

Asia Vital Components *(Overweight; Price Target: NT\$5,200.00)*

Investment Thesis

We are OW on AVC for its strong earnings growth potential, which we think is supported by the content increase in AI servers. We expect AVC to see increasing upside from more liquid cooling opportunities, with much higher ASP and margin, while its competitive advantages vs. peers could give it further market share gains as the industry's structural trends develop.

Valuation

Our Dec-27 PT of NT\$5,200 is based on 22x 2028E P/E. The target multiple is at the mid to high end of AVC's historical average trading range of 15-25x P/E since the start of the AI server boom, as we expect an earnings upgrade cycle (based on our above-consensus estimates in 2027-28) to support this valuation.

Risks to Rating and Price Target

Key downside risks are: (1) slower-than-expected spec upgrades to future AI systems; (2) market share losses; and (3) ASP/margin pressure from the competition.

Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Asia Vital Components (3017.TW, 3017 TT) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Aug 26, 2004. All share prices are as of market close on the previous business day.
Break in coverage Feb 27, 2006 - Jan 11, 2024.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject

to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
