Bloom has now raised 2026 full year guidance two consecutive quarters in a row and offered positive updates on demand, pricing, customer/project diversification and protections, and scandium supply. This reinforces our confidence in the growth outlook and BE's ability to execute

Our takeaways on key investor debates: Continued confidence in scandium availability - we didn't hear new information but think this concern will diminish given confident messaging around supply chain not being a limiting factor at all on the growth outlook. On the risk of project delays (i.e. Project Jupiter in NM), the guidance raise should lower concerns around near-term financial impacts and the company offered multiple assurances (portfolios of other projects to deploy fuel cells, contractual obligations from customer/financing provider, diversification of customer backlog). On capacity expansions, no firm guidance as expected but continue to emphasize that manufacturing capacity will not be a constraint in delivering against the backlog and growth outlook. We think overall will be well received as incremental reassurance on these issues.

Strong 2Q beat, surprise 2026 guidance raise. Bloom notched its first-ever quarter of >\$1b in revenue in 2Q and achieved higher than expected profitability ([Exhibit 1](#)), driven by greater operating leverage from higher shipment levels. For the full year, Bloom raised its full year revenue target by ~\$450m at the midpoint (roughly ~100 MW of shipments, by our math), reaffirmed margin guidance ([Exhibit 2](#)), and profit guidance increased by \$175m (26%) as a result. This comes on the company's second beat and raise result for the year.

Addressing several investor concerns. Management reaffirmed it does not see any scandium supply issues and pointed to prior disclosures that stated the company had line of sight within its current supply chain to support 25 GW of annual output. We didn't hear new disclosures here but continued confidence in the availability of supply and highlighting that the company's supply chain overall is not a constraint on growth. The company also noted that no single project (i.e. Project Jupiter) represents risk to its raised guidance level for 2026. In addition, in a scenario where Project Jupiter is delayed into 2027, we think ORCL could deploy fuel cells to other

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

sites in its portfolio of data centers to fulfil its contractual obligation to accept any required volumes (and Bloom's relationship with Oracle already contemplates multiple project sites), such that BE should be well insulated from individual project delays. More generally, BE's financing partners have an obligation to purchase fuel cells in a set amount of time after an order is signed and therefore BE could still ship, even if other components of a project have been delayed.

Other items from the call worth noting:

- Backlog is growing faster than revenue, implying that Bloom's current equipment backlog would be at least ~\$8b as of the end of 2Q (we think likely well above this level).
- Bloom fuel cells are now validated with all major hyperscalers and more than a dozen neoclouds, AI labs, and colocation data center operators.
- Potentially positive indications on price trends: management noted that it would expect customers to be amenable to Bloom "capturing value" given the value it offers to data center projects.
- As Bloom is expanding capacity, it is reserving some capacity to serve book-and-ship customers who need fuel cells on a short timeline, underpinning the time-to-power advantage.

We've refreshed our model and remain OW; \$310 PT (unchanged). We've adjusted our model to reflect the top end of BE's revised guidance, embedding an incremental ~100 MW of shipments in 2H. Our model is slightly more 4Q weighted, in-line with management commentary and we are modeling positive OCF and FCF for the remainder of the year. We've kept our deployment forecasts largely unchanged, ramping from 1.8 GW in 2027 to 4.8 GW in 2028. We wait for incremental announcement of large data center customers and a potential commitment to expand manufacturing beyond 5 GW with a new facility as next catalysts to potentially revise our forecasts higher.

Risk Reward – Bloom Energy Corp. (BE.N)

Time-to-Power Constraints Drives Adoption; AI Enabler

PRICE TARGET \$310.00

Derived from an unlevered DCF analysis with 10.8% discount rate, based on a 4.0% risk-free rate, 1.75 Beta and 4.29% equity risk premium.

Consensus Price Target Distribution

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 28 Jul 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

We see BE as a key beneficiary of several key themes including: (i) time-to-power for large load customers, (ii) the growing "economic wedge" or value proposition of distributed energy (i.e., fuel cells for C&I customers), (iii) rising grid instability, and (iv) 30% fuel cell tax credit through the 2030s. In the near-term we see a strong growth outlook for its core fuel cell business, particularly for AI power demand, with longer-term tailwinds arising from the OBBB and its hydrogen electrolyzer business, supporting a robust multi-year growth and margin improvement outlook.

Risk Reward Themes

Disruption: *Positive*
 Secular Growth: *Positive*
 Renewable Energy: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE \$520.00

Broader adoption of SOFCs for BTM power generation

59% revenue CAGR through 2030 and 11% annual revenue growth from 2030-2050 given low market penetration rates and a growing time-to-power constraint across global power markets. Gross margins expand to 45% by 2030, driven by consistent cost-cutting and resilient pricing. Operating margin reaches 38% by 2030 (same as base case).

BASE CASE \$310.00

Time-to-Power Constraint Accelerates Adoption

Continued escalation in utility bills and time-to-power constraints drives 53% revenue CAGR from 2025-2030 and 11% annual revenue growth from 2030-2050. Cost reductions and opex leverage drives expanding operating margins from 10% in 2025 to 35% in 2030.

BEAR CASE \$115.00

Growth and margins below expectations

Competition and an inability to reach its cost-down targets limits revenue growth (40% CAGR through 2030 vs. 53% in the base case) and margin expansion (33% EBIT margins by 2030 vs. 35% in the base case).

Risk Reward – Bloom Energy Corp. (BE.N)

KEY EARNINGS INPUTS

Drivers	Dec 2025	Dec 2026e	Dec 2027e	Dec 2028e
Volume Growth (%)	49.2	140.2	60.0	68.0
Total Product & Install ASP (\$/kW) (\$)	3,221	3,197	3,085	3,008
Total Installed System Cost-TISC (\$/kW) (\$)	2,043	1,910	1,815	1,724

INVESTMENT DRIVERS

- Increased penetration with existing customers and/or new customer relationships.
- Ability to decrease product and install cost (improving product economics).
- Increased demand for micro-grid solutions that offer 24x7 power.

GLOBAL REVENUE EXPOSURE

View explanation of regional hierarchies [here](#)

MS ALPHA MODELS

5/5 BEST	24 Month Horizon	2/5 MOST	3 Month Horizon
-------------	---------------------	-------------	--------------------

Source: Refinitiv, FactSet, Morgan Stanley Research; 1 is the highest favored Quintile and 5 is the least favored Quintile

RISKS TO PT/RATING

RISKS TO UPSIDE

- Higher revenue growth through '35, given current low market penetration rates
- Cost reduction initiatives outpace expectations
- Customer adoption increase in light of de-energization in CA.

RISKS TO DOWNSIDE

- Regulators impose charges on C&I customers that use distributed generation.
- Stricter emissions regulation.
- New entrants / technologies emerge with cost-competitive products.
- Cost reductions don't materialize.

Important Regulatory Disclosures on Subject Companies

As of June 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Array Technologies Inc, **Bloom Energy Corp.**, Enphase Energy Inc, EVgo Inc, First Solar Inc, Fluence Energy Inc, GE Vernova, Shoals Technologies Group, Solaredge Technologies Inc, Sunrun Inc.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of **Bloom Energy Corp.**, Fluence Energy Inc, GE Vernova, Innio N.V., Sunrun Inc, X-Energy Inc.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Array Technologies Inc, **Bloom Energy Corp.**, EVgo Inc, GE Vernova, Innio N.V., Sunrun Inc, X-Energy Inc.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Array Technologies Inc, **Bloom Energy Corp.**, EVgo Inc, First Solar Inc, Fluence Energy Inc, GE Vernova, Innio N.V., Plug Power Inc, Solaredge Technologies Inc, Sunrun Inc, X-Energy Inc.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Array Technologies Inc, **Bloom Energy Corp.**, First Solar Inc, Fluence Energy Inc, GE Vernova, Innio N.V., Shoals Technologies Group, Sunrun Inc.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Array Technologies Inc, **Bloom Energy Corp.**, EVgo Inc, First Solar Inc, Fluence Energy Inc, GE Vernova, Innio N.V., Plug Power Inc, Solaredge Technologies Inc, Sunrun Inc, X-Energy Inc.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Array Technologies Inc, **Bloom Energy Corp.**, First Solar Inc, Fluence Energy Inc, GE Vernova, Innio N.V., Plug Power Inc, Shoals Technologies Group, Sunrun Inc.

Morgan Stanley & Co. LLC makes a market in the securities of Array Technologies Inc, Shoals Technologies Group.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1544	42%	453	49%	29%	757	44%
Equal-weight/Hold	1577	43%	390	42%	25%	769	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	544	15%	89	10%	16%	204	12%
Total	3,668		933			1731	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.
