- We forecast US GDP will grow 2.0% (q4/q4) in 2026, while core PCE remains firm at 3.5% (q4/q4). The unemployment rate should remain stable over 2026, at 4.1% (%q/q, saar) in 4Q26.
- We expect the Fed to deliver a single 25bp rate hike in December 2026, raising the funds rate target range to 3.75-4.00%, as damage to the Fed's credibility add some urgency for the rest of the Committee to act to defend the institution's inflation mandate.
- Against this backdrop, we see 2-year Treasury yields reaching 4.30% by YE26. Meanwhile 10-year yields should rise to 4.85% by YE26.
- We see the intermediate section of the curve underperforming, with 2s/10s steeper over the period.

Oil Markets: Miraculous recovery

Non-OPEC oil supply growth (mbd ex Qatar)

Source: J.P. Morgan Commodities Research, Rystad, EIA, ANP, S&P Global

- The largest supply shock on record produced only average price outcomes, as inventory draws were much smaller than anticipated and the loss of demand proved far greater than expected, creating an equally strong offset.
- Non-OPEC oil supply growth reached 2.44 mbd year-on-year—the strongest pace recorded so far this decade—with supply responding faster and at a larger scale than expected, led by the US, Brazil, Canada, and Guyana, helping cap prices and cushion balances.
- China surprised the market by cutting crude imports and adjusting refinery operations to an extent few thought possible, with tentative signs that other parts of the world may be moving in the same direction, implying demand could be more flexible than conventional models assume.

Metal Markets: While market awaits tariff update, China keeps buying copper

Consumption weighted end-use indicators for Chinese copper demand growth

Source: China National Energy Administration, China Automotive Tech and Research Center, Tianjin, NBS, China Customs, Bloomberg Finance L.P., J.P. Morgan Commodities Research. Note: This indicator applies consumption-weights to underlying reported end-use production/installation/export growth figures to derive an estimate for monthly aggregate Chinese copper demand growth. It covers construction, grid, solar, wind, EVs, other transport, consumer durables, ACs/refrigeration, machinery and product and cable exports which, combined, roughly account for 90% of Chinese end use demand. Data through May 2026.

China copper apparent demand growth

Source: China National Energy Administration, China Automotive Tech and Research Center, Tianjin, NBS, China Customs, Bloomberg Finance L.P., J.P. Morgan Commodities Research. Note: Apparent demand is calculated as (Imports-Exports)+Production-Monthly stock changes on the SHFE. Data through May 2026.

- Our consumption-weighted end-use indicator for Chinese copper demand declined sharply in May to now register at -5% yoy YTD through 5M26. Significant weakness was maintained across construction while renewable installations faced a final month in May of an extremely elevated base level last year given the rush to install capacity before June 2025 when the tariff rate for wind and solar installations moved off the more advantageous fixed-price tariff system.
- Adding to the outsized yoy weakness in May, grid investment also came in well below a uniquely strong May 2025 base level, likely tied in with the massive renewable rush last year. Nonetheless, YTD grid investment is still around +13% yoy through May and the particularly strong base level effects in renewables and grid will largely fade from June onwards.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.
