Starlink and Tesla... Connective Tissue for Robot Swarm

Tesla Cybercab + Starlink integration is another sign of ‘mission’ overlap between robotics and space. SpaceX at 22x 2028 EV/EBIT (MSe) does not discount the opportunity. Reiterate OW.

What Happened? On the 2Q26 earnings call, Elon Musk confirmed that Starlink is being integrated into the Cybercab and will eventually roll out across all Tesla vehicles in markets where Starlink is active, framing it as essential to robotaxi operations given the persistent gaps in cellular coverage that could otherwise leave autonomous vehicles stranded in connectivity "dead zones."

Significance to SpaceX Stock:

- Robots impact SpaceX in 2 main ways: (1) accounts for the single largest cohort of Starlink 'clients' in our long-term forecasts; and (2) represents potentially the largest and most valuable end market within the Enterprise AI business.
- By integrating Starlink, Cybercab gains a redundant, high-bandwidth connectivity solution that improves network availability and enables a consistent broadband experience for passengers.
- Robots as a Service (RaaS) may represent a \$75tn long-term TAM on our calculations by 2050 (\$25tn original equipment with approx. \$50bn in downstream adjacent services).
- We expect the robotaxi market to be an obvious and early adopter for mobile satellite connectivity. Even if primarily served by terrestrial 5G, we see the need for redundancy and resiliency in comms for critical network infrastructure including transport networks.
- In our model, we estimate a peak Starlink penetration on AVs of 40% in 2040, or 83 million connected cars. We forecast Starlink revenues from autonomous vehicles to reach \$6bn by 2035 and \$31bn by 2040.
- Beyond robotaxis, our Starlink forecasts include multiple other robotic client stratum including large and small drones/eVTOLs, industrial robots, humanoids, etc.

7 Years ago on Tesla's 4Q19 Earnings Call:

- **Adam Jonas:** "So, Elon, do you see potential for Tesla vehicles to be fitted with user terminals that are compatible with the Starlink constellation in the near- or medium-term future"
- **Elon Musk:** "Well, it's certainly something that could be happening in the coming years. If there's no plans throughout this year, the folks of Starlink is really for high-bandwidth, low-latency connectivity for homes and businesses, and I guess, aircraft and boats and that kind of thing. But the antenna for that high-bandwidth, low-latency thing is sort of about the size of a medium pizza, which you could put on a car, but I think is more bandwidth than you would really need. Technically, you could buy one and just stick it on the car. Yeah, it will work space for antenna."
- **Adam Jonas:** "How would – assuming that we get the antenna form factor and cost down to a point where that could be integrated into the roof of a car, for example, cost effectively and aerodynamically, etc. How would compatibility with the Starlink architecture theoretically improve the Tesla customer experience or the capability of the network?"
- **Elon Musk:** "Well, I think it actually is most possible that we just use the cellular connectivity, just use 5G would be a recommendation, certainly, in like any cities or something like that. But if you're out in the countryside and there's not good cell connectivity, then you could connect with Starlink antenna. And you wouldn't need – you don't need to like have like gigabit level or level of connectivity. You can – probably like 20, 30 megabits is probably fine. And then you can have much more antenna. So, yes, I guess, it could be good for – yes, making sure there is connectivity and – outside of major cities and that kind of thing. But, I mean, that's a – yes, sort of, I'd say, relatively obtuse. It's not – we're not thinking about it very much, to be honest."

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.
