While Amphenol shares have been relatively resilient compared to the broader coverage universe since the recent AI sell-off, they are still only up +17% YTD (vs. +40% for the coverage universe and +12% for the S&P 500). That said, the stock has outperformed the group through 2H26 to date, as it continues to play catch-up on positive demand momentum for AI interconnect, where Amphenol boasts a broad portfolio spanning high-speed data connectors across active and passive copper, an underappreciated optics position, and power connectors. That breadth positions Amphenol as a sustained beneficiary of the expanding AI interconnect TAM, where we see demand strength supported by our latest estimates for cloud data center capex from the top four U.S. hyperscalers to expand +85% y/y in 2026 and another +70% y/y in 2027 (vs. +80% and +50% prior, respectively) and is also supported by increasingly relevant Tier 2 CSPs, where the cohort we track is expected to expand data center capex by +85% y/y to $370 bn+ in 2027 (see report here). We believe continued demand strength in the core business, along with unmatched execution, particularly within CCS, should support better-than-expected IT & Datacom revenue trends through 2H26. In CCS, we expect further upside to the 2026 revenue guide of $4.6 bn, as the acquired company continues to see better customer traction, supported by improving execution as well as benefiting from a strong balance sheet. Additionally, we continue to expect strong double-digit organic growth across the rest of the business outside IT & Datacom, including the potential for upside surprises in Defense, given a robust funding environment, as well as continued strength in Industrial. On top of a healthy demand environment supporting robust revenue growth, we expect strong operating margins, with incremental margins tracking to 30%+ y/y. This drives our expectation for EPS to track ahead of consensus for both 3Q26 results and 4Q26 guidance as we continue to rate Amphenol shares Overweight, given robust demand tailwinds across the AI portion of the business, as well as strong organic growth trends across the non-AI portion, and reiterate our Dec-27 price target of $107.

- **3Q26 (Sep-end): Expect better than consensus revenues and margins to support continuation of typical EPS beat.** We forecast revenues of $9.6 bn, modestly above consensus estimate of $9.5 bn as well as higher than company guidance of $9.3 bn -$9.4 bn, driven by better than guided revenue performance across IT & Datacom (*growth of ~20% q/q vs. guide of mid-teens*) as well as Defense (*growth of mid-teens q/q vs. guide of low-double digit*), along with relatively modest upside across other end-markets as well. We forecast operating margins of 29.8% (vs. consensus of 29.1%) supported by continuation of 30%+ y/y incremental margins, driving our EPS forecast of $0.75 vs. consensus estimate of $0.72.
- **4Q26 (Dec-end): Expect revenues and earnings to track ahead of consensus expectations.** We forecast revenue of $9.8 bn, modestly ahead of consensus of $9.7 bn, supported by continuation of 30%+ organic growth, further supported by robust growth across IT & Datacom, Defense and

Summary Investment Thesis and Valuation

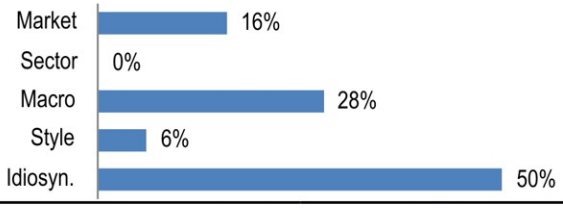

Investment Thesis

We rate Amphenol Overweight with a high-quality and impressive execution track record now combining with the company's favorable positioning within AI data centers, which is expected to ramp significantly with robust increases in capital spending from hyperscalers as well as data center companies. We expect the company's organic growth rate to track well ahead of its historical industry-leading growth, driven by its favorable positioning in AI data centers, supporting an accelerated pace of earnings growth as well as a higher valuation multiple that is at a premium to its already high end valuation multiple historically.

Valuation

Our December 2027 price target of $107 is based on valuing our CY28E EPS at a 27x P/E target multiple, which we believe is justified given: 1) significant premium to industry peers on account of APH's track record of higher organic growth; 2) medium-term setup of even stronger organic revenue growth relative to the long-term historical rate, given leverage to AI; 3) higher operating margin and ROIC relative to peers.

Risks to Rating and Price Target
Industry Downside Risks

Deterioration of global macroeconomic performance may result in revenue and earnings headwind. While Amphenol has a track record of outperforming global GDP and underlying interconnect industry growth, significant deterioration in global macroeconomic performance increases the risk of demand deterioration, especially in shorter-cycle end markets such as mobile devices, and other consumer-driven markets such as automotive.

Company-Specific Downside Risks

Failure to integrate recent acquisitions could be a headwind on earnings. Amphenol relies on acquisitions to be a meaningful driver of top-line growth. Execution risks related to the integration of multiple acquisitions in any year could drive higher costs and depress margins, impacting earnings and our price target.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
