GLW Q3 26 Preview: Can Corning beat consensus against a softening smartphone market?

Corning will report its fiscal Q3 26 earnings on Tuesday, October 27th, before the open.

We tweak our numbers for the quarter, most notably revising down Glass Innovations estimates. We land at $4.95B in revenue and $0.81, slightly below consensus at $5.02B and $0.88. We are particularly concerned about softening data points for the smartphone market, including for Apple (which has historically been more insulated from market weakness), pointing to downside to expectations for Glass Innovations.

We don't expect Corning to update the guided growth framework for 2027 and beyond. Corning also appears on track to hit its target of $20B in run-rate revenue ($5B in the quarter) for Q4 of 2026. However, we would encourage investors to watch for shifts in tone on AI scale-up upside for Optical Communications as well as the trajectory of the non-AI businesses.

Longer-term, we think material AI content upside exists, but we lack conviction on the adoption timelines for optical in scale-up. Smartphones and Automotive are also dragging growth. We expect Corning to beat its 2026 full-year guide, but we are more cautious on the longer term view.

Investment Implications

We remain neutral on Corning, and are cautious about the upside in the near and long-term. Short term, we see limited upside to consensus numbers, especially given more muted expectations for optical scale-up. Long term, struggle to underwrite management's growth framework through 2028. While we believe expectations have come in with the recent sell-off, we still lack conviction in material upside for Corning stock. Overall, we maintain our Market Perform rating, and we maintain our $140 price target.

DETAILS

Corning will report its fiscal Q3 26 earnings on Tuesday, October 27th, before the open.

For the quarter, we tweak our numbers slightly, most notably taking down numbers in Glass Innovations. We now expect $4.95B in total revenue and $0.81 in EPS, below consensus at $5.02B in revenue and $0.88 in EPS (Exhibit 1).

- **Glass Innovations.** We take down our Glass Innovations estimates for the quarter from $1.56B to $1.53B. Corning's Glass Innovations revenue growth is significantly correlated with smartphone shipment growth (Exhibit 2). Consensus expects iPhone and Samsung[1] smartphone shipment growth to fall by -2.9% and -3.6% respectively, and supply data points and our China smartphone tracker both also point to downside to estimates (see: China Smartphone Tracker (August): Further deceleration and AAPL: Credible supply chain warnings - What does it mean?) . Accordingly, we are incrementally cautious about Glass Innovations estimates (Exhibit 3), and take down our forecasts to be closer to consensus. Our margins are also generally in line with consensus expectations.

- **Optical Communications.** For optical communications, we expect $2.18B in revenue, below consensus at $2.21B. Even with below-consensus expectations, our model still implies Corning Optical Communications will outgrow the comparable segments of Corning's peers (Exhibit 4). This is especially notable given that Corning has not consistently outgrown the optical fiber peer group, pointing to downside to estimates. We also expect segment net profit margins of 20.5%, in line with consensus at 21.3%. If we bridge from Corning segment net margins to estimated operating margins, this also implies margins generally in line with peers, which is perhaps more constructive compared to the bear argument that Corning is taking price relative to peers and over-earning (Exhibit 5).

- **Automotive.** We expect automotive revenue to hit $468M, in line with consensus at $464M. Our profit margin expectations are 15%, compared to consensus at 17%.

- **Solar.** Our expectations for solar are more muted than consensus: $479M in revenue and 3.0%, below consensus at $500M revenue and 3.6% margin.

- **Life Sciences & Emerging Growth.** We expect $296M in revenue from Life Sciences & Emerging Growth, compared to consensus at $294M. Our profit margins are -8%, in line with consensus at -7%.

We don't expect Corning to update the guided growth framework for 2027 and beyond. Corning also appears on track to hit its target of $20B in run-rate revenue ($5B in the quarter) for Q4 of 2026. However, we would encourage investors to watch for shifts in tone on AI scale-up upside for Optical Communications as well as the trajectory of the non-AI businesses.

- **We don't expect Corning to update the guided growth framework for 2027 and beyond**, largely based on the fact that Corning didn't update former 2026 guidance on the Q3 2025 call.

- **Corning seems likely to achieve its $20B in annualized sales by end of 2026 goal.** Current guidance implies Corning will successfully hit $5B in revenue by Q4 to achieve an annualized sales rate of $20B. We generally see this guidance as credible, as does consensus, with some upside to the implied Q4 guidance likely already priced in.

- **Investors are also watching visibility to upside for scale-up.** The biggest risk to upside that we're monitoring is the possibility that Corning is able to capture more upside from optical scale-up than anticipated. However, at OCP, Nvidia pointed to a design for Rubin Ultra which would restrict optical scale-up to the second spine layer connecting the different racks within a multi-rack pod. We also increasingly expect that optical scale-up adoption for scale-up may be similarly limited even for the Feynman cycle, given that the passive copper likely remains sufficient for within-rack connections on the 1.6T cycle. We also see some potential for AEC to expand the lifespan of copper further. Accordingly, while a material acceleration in optical scale-up revenues could offer significant upside to Corning, we lack visibility to that happening in the near-term.

- **Despite an exciting AI story in optical communications, Corning remains highly exposed to slower growing end markets, and its growth framework depends on outpacing market growth.** While Optical Communications is both Corning's largest segment and its fastest growing, Corning remains exposed to segments with softening end markets, particularly Glass Innovations and Automotive. Even with optical communications, service provider exposure is also a

[1] Apple is covered by Mark Newman at Bernstein. Samsung is covered by Mark Li at Bernstein

headwind as this segment has slowed (Exhibit 6). Investors should monitor growth rates and commentary in these areas and see how Corning plans to shape its investments to increase growth.

Longer-term, we think material AI content upside exists, but we lack conviction on the adoption timelines for optical in scale-up. Smartphones and Automotive are also dragging growth. We expect Corning to beat its 2026 full-year guide, but we are more cautious on the longer term view.

- **We agree that Corning has material content upside from AI accelerators, and model Enterprise Optical Communications revenue up 51% CAGR from 2026-28E.** Corning has guided to optical content in AI accelerators increasing 1.3-1.5x. We model 1.5x, at the high end of that range, and net out at 51% CAGR from 2026-2028E (Exhibit 7). Coupled with low single-digits growth in the Carrier sub-segment, we believe that optical communications can grow 34.91% 2026-28 CAGR (Exhibit 8).

- **However, the Automotive and Glass Innovations segments are a drag on growth.** Corning has acknowledged that both segments are likely to grow in the mid-single digits; given pressure on end customers for both segments, even with content increases, mid-single digit growth is not a slam dunk.

- **On net, we see Corning's long-term growth framework as aggressive, although we still land fractionally above consensus at $28.0B for 2028 vs. consensus at $27.8B.** Aggregating our views on the sector, we model Corning reaching $28B in 2028, which is somewhat below what Corning's growth framework implies. Accordingly, we see the growth framework as aggressive, and content upside in optical communications as largely priced in, unless Corning can achieve a further step up in content from scale-up before 2028. For more on our long term view, see our recent initiation: US Networking: Scaling the bandwidth wall. Initiating with a positive view and feedback: US Networking: Numbers going up, multiples going down - Top questions and feedback on our initiation.

Corning is down -11.5% in the past month after its summer highs (Exhibit 9). The AI selloff may reduce potential upside for the quarter, but longer-term, we still see some upside.

- **Corning has come down in the past month during a general AI downturn. While a negative macro environment may harm near-term numbers, we don't see a shift in our long term thesis.** Corning has sold off during a broader AI drawdown. The catalysts we've heard include: 1) softer AI lab revenues, 2) CoreWeave's financing woes, 3) sell the news on OCP 4) previews not showing upside to numbers 5) negative macro environment.

- **We believe softer AI lab revenues stem from incremental competition at the frontier and from open-weight models…** If we zoom out, we have gone from a world in which there was a clear leader at the model frontier to having arguably four players at the frontier, especially with Google returning to the frontier after a pre-training cold streak and Meta reaching it for the first time. Coupled with increasing adoption of open-weight models, we believe that this is driving increasing competitive intensity at the model layer. We see very strong token volume growth (for more details, see the Bernstein software team's note: Datadog (DDOG): Upgrading on AI-driven tailwind strength) coupled with token price deflation, resulting in anemic spend growth. However, we see this as more a function of increasing competitive intensity and margin compression at the model layer, as opposed to being driven by softening end-user demand.

- **…which is not necessarily negative for the infrastructure layer.** We observe that all else equal, narrower model layer margins is not necessarily negative for the infrastructure names, given that it implies higher token demand and thus higher infrastructure layer requirements for the same level of end user demand. More broadly, while this is clearly directionally negative in terms of overall ecosystem health, and four labs at the frontier may not be sustainable, we observe that the AI infrastructure names had healthy economics when there were just 1-2 labs at the frontier; one of the frontier labs falling behind is likely not fatal to AI infrastructure economics.

- **The bigger concern is whether training spend is sustainable in a scenario where value does not accrue to the model layer.** The glib answer is that this question has been around since DeepSeek and the conviction in frontier labs to continue training models appears unwavering. But more broadly, we continue to believe that the key leading indicators are AI model scaling and adoption; as long as AI models continue to improve and adoption continues to look healthy, tech leaders will likely continue to believe that training new models will unlock new use cases and the expanding TAM will see enough adoption to drive revenue, in turn leading them to underwrite continue investments, and in turn supporting the AI infrastructure ecosystem. Moreover, leaders at the AI labs appear to continue to believe that AGI is feasible and even short of AI, there is incremental willingness by end users to pay for frontier performance, and accordingly also believe it is possible to underwrite continued investments in training new frontier models, as opposed to simply letting others train those models

and then distilling them. With that said, we acknowledge that Wall Street panic can be self-fulfilling, and that even if the AI labs have conviction, if they are unable to secure funding, that could still spark a digestion cycle. While this would be worrying for all of the AI infrastructure capex exposed names, it arguably improves economics for companies which already own AI infrastructure, given that they can capture incremental demand against more muted supply growth. On net, we continue to be constructive on the theme, and do not see the recent shift in momentum as reflecting a structural change.

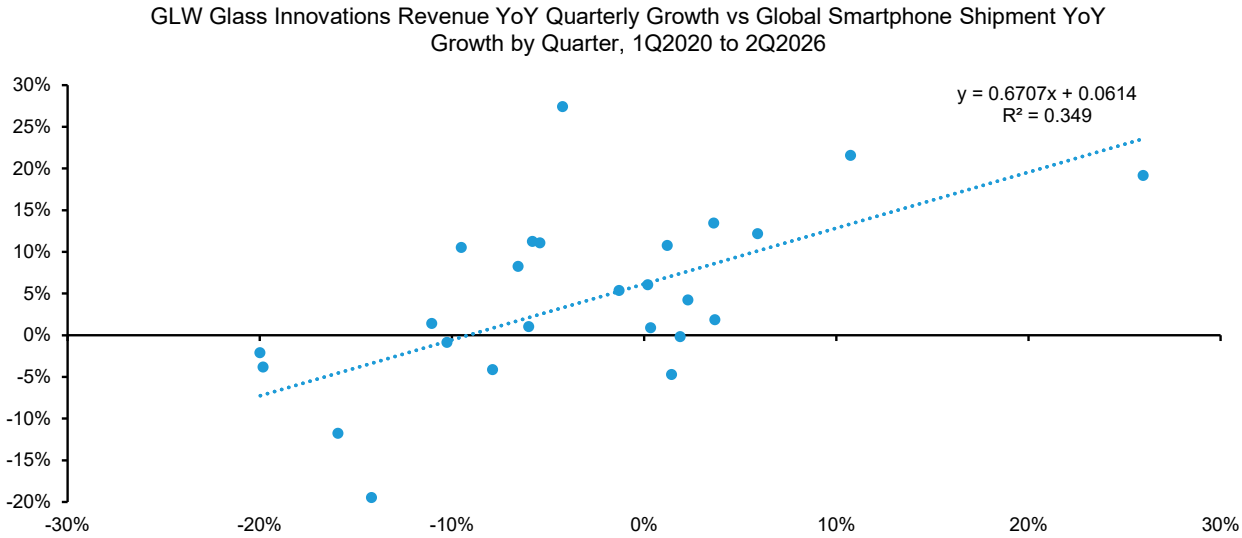

We maintain our Market Perform rating, and our price target of $140.

VALUATION METHODOLOGY

Corning Inc

We apply a ~25x multiple to our estimate of $5.7 in FY 28 EPS, and set our price target at $140.

RISKS

Corning Inc

Our price target for Corning could see upside if Optical adoption accelerates as CPO yield improves, driving upside to 2027-2028 numbers

Our price target for Corning could see upside if Reacceleration in the smartphone or autos markets supports a stronger growth outlook for Corning

Our price target for Corning could see downside if AI adoption decelerates, in turn leading to reduced investment in AI infrastructure

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/-15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors

on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH
