Yesterday we hosted the second installation of Talking Shop with Smilek with Zettler Digital, a Shopify Platinum Partner that has helped 400+ e-commerce brands scale their businesses & specializes in performance marketing, retention, & website optimizations. **Zettler's core merchants range in ~$1M-$30M annualized sales, though the agency services various customers in the $40-$60M+ range. Zettler believes AI-driven traffic remains in the early innings, with most AI channels driving ~2-3% of observed traffic — and similar share across GMV — across the company's merchant portfolio, with variance across merchant type and end-markets. Zettler believes that AI channels could power 10%+ of traffic over the next 1-2 years as LLM adoption & AI-based search queries continue to capture share, better attribution, and improved agentic commerce transaction flows.** The agency also believes that Sidekick engagement continues to improve and that analytics comprises a meaningful higher share of usage vs. the ~40%+ share of consumption that SHOP cited across more tenured merchants at 2Q earnings. **Sidekick adoption should expand beyond analytics into merchants' operational workflows** over time, while continued engagement with Shopify Payments reinforces merchant retention and platform monetization. Beyond agentic, **Zettler remains constructive on SHOP's Enterprise opportunity,** citing the platform's ease of use, broad functionality, lower total cost, and growing presence among larger merchants, while continuing to view SHOP's product depth and ecosystem as key competitive advantages. **The firm also highlighted SHOP's strong SMB moat, supported by Shop Pay, merchant ownership of customer relationships, and increasing trust advantages as commerce becomes more agentic.** More near-term, Zettler noted that demand trends remain solid, w/most brands continuing to perform in line with their existing growth trajectories. Overall, we come away incrementally positive on the broader agentic commerce industry, along with SHOP's AI strategy, competitive positioning, Enterprise roadmap, Payments moat, and expanding product ecosystem. **SHOP remains our Top Pick & on the JPM Analyst Focus List as a Growth Idea. Our December 2027 PT of $200 is based on ~23x 2028E Gross Profit of $10.9B, further supported by our DCF model.** We summarize key discussion topics & our takeaways below — a replay of this expert zoom will not be available.

- **AI Traffic Could Exceed 10%+ of Total Traffic Over Time.** Zettler believes AI-driven traffic remains in the early innings, with most AI channels driving ~2-3% of observed traffic — and similar share across GMV — across the company's merchant portfolio, with variance across merchant type and end-markets. Zettler believes that AI channels could power 10%+ of traffic over the next 1-2 years as LLM adoption & AI-based search queries continue to capture share, better attribution, and improved agentic commerce transaction flows. However, Zettler continues to believe that Shopify-powered storefronts will remain the primary source of traffic acquisition & GMV generation for SMBs over time considering SHOP's breadth of solutions, Shop Pay & Payments

Summary Investment Thesis and Valuation

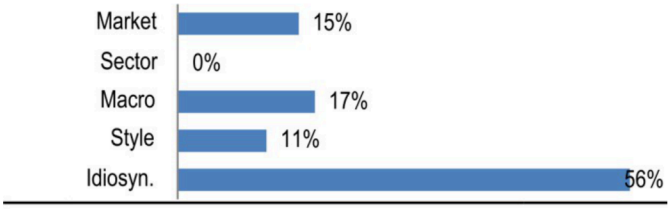

Investment Thesis

Shopify is a leading commerce enablement and infrastructure platform providing 2M+ merchants across 175+ countries tools to establish, scale, and manage their businesses. Shopify serves as a unified operating system for commerce across channels, verticals, and geographies while providing support across each step of the merchant journey. We believe SHOP is well positioned to deliver 25%+ GMV and revenue growth supported by 1) e-commerce secular shift and product optimizations; 2) core SMB merchant adoption, along with the shift upmarket toward enterprises; 3) growth channels including Shop Pay, offline, and B2B; 4) international expansion; 5) deeper Payments penetration; and 6) continued strong MRR growth, led by ramping Plus adoption. We project solid operating margin and FCF margin expansion supported by GMV and Revenue growth along with continued cost discipline/efficiencies.

Valuation

Our December 2027 PT of $200 is based on ~23x 2028E gross profit of $10.9B. Our DCF model further supports an implied $200 estimated value and employs a ~16% WACC and a +15% terminal growth rate.

moat, and expansive distribution.

- **Sidekick Usage Should Expand Beyond Analytics Into Merchant Operations.** Zettler believes that Sidekick engagement continues to improve and that analytics comprises a meaningful higher share of usage vs. the ~40%+ share of consumption that SHOP cited across more tenured merchants at 2Q earnings. With Sidekick continuing to improve, Zettler expects merchants to expand use cases over time, including for operational workflows, catalog management, bulk actions, and product information updates. Zettler also highlighted Sidekick's growing utility alongside MCPs and LLMs, helping merchants automate historically manual tasks and improve day-to-day efficiency across storefront operations.
- **SHOP's Core SMB Moat Remains Intact Through Shop Pay, Trust & Merchant Ownership.** While AI and agentic commerce may alter how consumers discover products, Zettler believes SHOP remains well positioned to retain ownership of the underlying commerce relationship. The firm noted that merchants continue to view SHOP as the preferred destination for operating online storefronts, supported by Shop Pay's seamless checkout experience, strong conversion benefits, and broad merchant adoption. Zettler also emphasized that trust and customer ownership remain critical considerations as new AI-driven shopping experiences emerge, with merchants likely preferring to maintain control of their storefront, payments, and customer relationships through SHOP rather than relying on third-party platforms.
- **Enterprise Adoption Continues To Benefit From Product Depth, Simplicity & Lower Costs.** Zettler remains constructive on SHOP's Enterprise opportunity, citing the platform's ease of use, broad functionality, and lower total cost relative to many legacy commerce platforms. While certain merchants may remain on incumbent solutions for specialized B2B needs, Zettler sees few functional reasons for brands to avoid SHOP and continues to view the platform as an attractive destination for larger merchants.
- **Stable Demand Trends Continue Despite Macro Uncertainty.** Zettler noted that demand trends remain solid, w/most brands continuing to perform in line with their existing growth trajectories. While acknowledging a more challenging macro & consumer environment, the firm has not observed meaningful signs of demand weakening. Zettler continues to see healthy growth across its book of business, supporting the view that SHOP's core merchant base remains resilient despite broader macro concerns.
- **High Merchant Retention Supports Continued Pricing Power.** Given the platform's strong value proposition and high merchant retention rates, Zettler believes SHOP retains meaningful pricing power. The firm noted that merchants typically don't revisit platform decisions once established on SHOP, particularly as they scale, making modest price increases unlikely to drive meaningful churn. While smaller merchants could opt for lower-tier plans if pricing were to increase further over time, Zettler sees limited risk of merchants migrating to competing platforms and continues to view SHOP as the superior commerce solution for most brands.

Investment Thesis, Valuation and Risks

Shopify *(Overweight; Price Target: $200.00)*

Investment Thesis
Shopify is a leading commerce enablement and infrastructure platform providing 2M+ merchants across 175+ countries tools to establish, scale, and manage their businesses. Shopify serves as a unified operating system for commerce across channels, verticals, and geographies while providing support across each step of the merchant journey. We believe SHOP is well positioned to deliver 25%+ GMV and revenue growth supported by 1) e-commerce secular shift and product optimizations; 2) core SMB merchant adoption, along with the shift upmarket toward enterprises; 3) growth channels including Shop Pay, offline, and B2B; 4) international expansion; 5) deeper Payments penetration; and 6) continued strong MRR growth, led by ramping Plus adoption. We project solid operating margin and FCF margin expansion supported by GMV and revenue growth along with continued cost discipline/efficiencies.

Valuation
Our December 2027 PT of $200 is based on ~23x 2028E gross profit of $10.9B. This multiple is in line with large-cap internet peers currently trading around ~23x, reflecting SHOP's stronger growth and margin profile, offset by its smaller absolute financial scale. Our DCF model further supports an implied $200 estimated value and employs a ~16% WACC and a +15% terminal growth rate.

Risks to Rating and Price Target
Risks to downside include: **1)** Secular shift toward e-commerce slows, limiting GMV, GPV, and revenue growth; **2)** GMV and revenue growth decelerate faster than expected; **3)** agentic commerce and AI/LLM platforms disrupt the e-commerce industry; **4)** product velocity slows and SHOP cannot drive greater merchant acquisition and adoption of solutions; **5)** softer consumer spending and sentiment weigh on e-commerce demand and merchant budgets; and **6)** SHOP is balancing margin expansion with growth investments, limiting operating and FCF margins.

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

Coverage Universe: Smilek, Bryan M: Angi Inc. (ANGI), AppLovin (APP), Clear (YOU), Coursera (COUR), Duolingo (DUOL), Etsy (ETSY), EverQuote (EVER), Frontdoor (FTDR), Hims & Hers Health (HIMS), Match Group (MTCH), MediaAlpha (MAX), Oddity (ODD), People (PPLI), Roblox (RBLX), Roku (ROKU), Shopify (SHOP), Take-Two Interactive (TTWO), Xometry (XMTR), Yelp Inc. (YELP), Ziff Davis (ZD)

J.P. Morgan Equity Research Ratings Distribution, as of October 03, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
