Asia Pacific Monthly Wrap

July 2026: De-leveraging in AI stocks drives sector/market/factor rotation

- MSCI Asia Pacific and MXASJ fell only 1.3% and 3.2% over the month, respectively**, but this hides substantial intra-month and sector/market/factor variation driven by a pullback in AI stocks. Not for the first time, concerns had surfaced in late June about the sustainability of AI capex due to hyperscalers' financing and monetization challenges and competition from China. But the resultant wobble in AI stocks was amplified by an intense positioning unwind (including from equity hedge funds and leveraged ETFs in Korea) in July. This de-leveraging of positions triggered rotations in all aspects: from North Asia to ASEAN/India, from Tech/Industrials to Discretionary/Financials, from Momentum/Growth to Low Vol/Value. Towards the end of the month, it appeared that the [de-leveraging in Korea had run its course](#), resulting in a sharp rally on the last day (AxJ Tech recovering almost half its July losses). This was also helped by positive indications on AI monetization from MSFT and AMZN as well as JPY strength (reportedly due to joint intervention by Japanese and US authorities). Overall, Tech and tech-heavy markets (APAC IT: -13.5%; Korea: -17.9%; Taiwan: -5.3%) still underperformed. China's tech sector also suffered, but the overall market (China: +9.0%) was buoyed by a strong rebound in heavyweight internet stocks (e.g., Baba: +26%). ASEAN (+7.4%) and India (+1.6%) delivered gains in July and attracted renewed foreign inflows. Fundamentally, major Asian tech firms reported upbeat earnings, signaled increased capex, and expressed confidence in future demand, mirroring the ambitious investment plans of US hyperscalers. Analysts continue to revise earnings forecasts upward in Asia, especially in Korea and Taiwan.
- FTM EPS forecasts were revised upward in Korea and Taiwan, but downward in India and Indonesia, both broad-based.** China also saw upgrades in IT and Discretionary sectors. Korea is expected to deliver the largest EPS CAGR in 2026 and 2027 (+138.1%).
- Korea (-2.9z) and Indonesia (-2.8z) are trading well below their historical averages, while China and India are trading close to their historical averages.** Korea still has the lowest FTM PE in the region (FTM PE: 5.1x).
- FII's sold Taiwan and Korea but turned to India.** India saw foreign equity inflows (\$2.3bn) after four months of selling even as Taiwan saw large outflows (\$23bn). In China, Southbound flows accelerated from US\$3.5bn in June to US\$8bn in July.
- Style factors.** Momentum unwound significantly in July (with 12m Price Momentum L/S factor down -40% in AxJ from the peak – the biggest correction since 2009). Growth also posted negative returns. Low Vol and Value significantly outperformed.
- Global macro.** The US 10yr Treasury yield rose by 27bps to 4.7, but US dollar declined by 3%. Most Asian currencies except TWD appreciated vs the US dollar (TWD: -4%), with KRW (+7.1%) and JPY (+3.2%) leading the gains. Commodities also rallied, supported by the weaker dollar and renewed geopolitical uncertainty in the Middle East driving energy prices higher.

Equity review: July 2026

China/Hong Kong SAR

- **Market beta:** China saw upward FTM EPS revisions in Tech and Discretionary. The market is trading slightly below 10-yr historical average PE.
- **Sector/Security alpha:** JPM expects [BABA](#)'s 1QFY27 results to exceed expectations, driven by narrowing losses in quick commerce and food delivery, strong cloud revenue growth with margin improvement, and reduced losses from "All Others" after Qwen app user acquisition. The FY27 adjusted EPS forecast is raised by 2%, while total revenue is lowered by 1% due to macro weakness. Cloud revenue is projected to grow 45% YoY, fueled by AI demand. FY28 revenue is raised by 3% on robust cloud outlook, with price targets unchanged at US\$205/HK \$200. Overall, Alibaba's outlook is resilient, with cloud growth and faster loss reduction supporting a positive stance ahead of earnings.
- **Notable policy/data/events:** 1) [CPI/core CPI](#) softened to 1.0%oya and PPI momentum faded despite a 4.1%oya headline, suggesting narrow upstream price support and weak domestic absorption. Food remained the main inflation drag. 2) 2Q [GDP](#) slowed to 4.3%oya, even as June IP rebounded to 5.3%oya on high-tech, electronics and trade-linked output. Retail sales rose only 1.0%oya, investment and housing stayed weak, and exports remained resilient but were still a cushion rather than a growth engine. JPM lowered the 2026 GDP forecast to 4.6% from 4.7% on weaker domestic demand, soft credit and external risks.

India

- **Market beta:** Performance was driven by a rotation into India due to the global AI de-risking phase, pockets of better-than-feared earnings delivery and upbeat economic indicators. However, the drag on performance came from uncertainty around Fed communication, which kept global risk appetite choppy, crude staying elevated and volatile (with Middle East tensions flaring up again), and INR staying near the weaker end, which kept imported-inflation and margin concerns alive.
- **Notable policy/data/events:** (1) Headline CPI surprised to the upside, at 4.4%oya in June (J.P. Morgan and consensus: 4.2%), up from 4.0% in May; (2) WPI inflation printed at 9.9% oya in June, higher than 9.7% in May; (3) May's current account swung to a \$2.0bn deficit from a \$4.7bn surplus in April; (4) June's trade deficit widened to \$30.4bn, up from \$28.2bn in May, with the miss driven largely by higher oil imports; and (5) Industrial production (IP) surprised to the upside in June, rising 7.3%oya (J.P. Morgan: 5.8%, consensus: 6.0%), following a reading above 5.0% in May.

Taiwan

- **Market beta:** Taiwan saw strong foreign outflows in July, albeit with a significant upward revision on FTM EPS. The market is trading 1.7 standard deviations above the historical FTM P/E ratio.
- **Sector/Security alpha:** [TSMC](#)'s 2Q26 earnings exceeded expectations, driven by strong operating leverage and robust demand for leading-edge technologies, with revenue and gross margins at the top of guidance and operating margins surpassing 60% for the first time. The company raised its FY26 revenue growth guidance to over 40% YoY and capex to \$60–64bn, with further upside expected in 2027–28,

reflecting confidence in sustained AI demand through 2029–30. While near-term gross margins fell short of some bullish forecasts due to early N2 depreciation and overseas fab dilution, TSMC expects margins to stabilize in the high-60% range as N3 profitability improves and utilization remains high. Management emphasized its competitive strength in leading-edge processes, ongoing \$100bn US investment, and expansion of mature node and advanced packaging capacity, welcoming new entrants like Intel EMIB to address acute supply shortages. Despite some softness in consumer and smartphone demand and slack in non-AI mature foundry segments, TSMC remains optimistic about datacenter AI growth, agentic AI adoption, and its ability to maintain pricing power and operational efficiency.

- **Notable policy/data/events:** 1) Tech [exports](#) slipped a modest 2.8%/m/m sa, with the trend pace cooling to 34.7%/3m/3m saar after May's jump to over 100%. Within tech, telecom products continued to rise, led by AI-tech (automatic data processing machines, parts & accessories) and storage media (e.g. memory units, optical discs, etc). The main drag was electronic components (including integrated circuits), down 9.4%/m/m sa. 2) Taiwan's June [IP](#) (4.6% m/m sa) significantly outperformed expectations, with broad-based gains across both tech and non-tech sectors, echoing recent import data and consistent with a semiconductor capex upswing driven by the ongoing AI cycle.

Korea

- **Market beta:** KOSPI slumped 22% in July, making it the worst-performing market for the month, but it remains the best-performing market year-to-date. Tech and Industrials were hit hardest in July, while Energy and Staples led the way. However, Tech is still the best-performing sector year-to-date, followed by Financials. Momentum unwound significantly in July. Growth also posted negative returns. Low Vol and Value reported positive returns in this turbulent month.
- **Sector/Security alpha:** [SEC](#)'s 2Q26 call was viewed positively on clearer LTAs and improved confidence in HBM/foundry execution, despite no immediate capital return announcement (seen as a near-term catalyst once clarified). Management said AI demand remains solid and LTAs should dampen volatility, highlighting 60–70% of future DRAM/NAND capacity under multi-year (five-year base) contracts with floor pricing, meaningful prepayments, and more CSP/AI contracts coming. They pointed to a smooth HBM4 ramp and 2nm foundry wins, pushed back on NAND bear fears given low inventory and AI/storage demand, and reiterated a 50% cumulative FCF payout policy (special dividend possible but FCF path uncertain).
- **Notable policy/data/events:** 1) The [BoK](#) started the growth-led tightening cycle with 25bp at the July MPC meeting. The BoK signaled that upcoming meetings should be live, with the reaction function increasingly focused on whether strong income and activity momentum spills over into demand-side inflation. 2) [IP](#) jumped 6.4% m/m, sa in June, coming in stronger than consensus at 2.9%. Beyond a mechanical rebound after consecutive declines in April and May, the June upside reflected a rebound in domestic demand and a partial move past the crude-import disruptions seen early in 2Q. The three-month trend in tech output turned negative at -2.9% 3m/3m, saar, but JPM sees this as an adjustment phase after peaking at 71.7% in April.

ASEAN

- **Market beta:** ASEAN market rebounded sharply in July, rising by 7% y/y, significantly outperforming MSCI AxJ as foreign flows reversed back to the region

while North Asia equities were dragged down by the AI-driven sell off. Indonesia rebounded by 10% in the month after a period of decline. Singapore remains the clear outperformer of the region, rising by 9% m/m. Rest of the region is up by 2-3% m/m with Vietnam as an exception (-6% m/m).

- **Sector/Security alpha:** Flows reversal to ASEAN was notable as investors diversified away from crowded AI positioning. Strongest inflows were seen in Thailand (+\$1.3bn), while Indonesia, Philippines and Malaysia saw slight inflows (~US\$50-100mn) after months of outflows. Banks were the sector to benefit from these flows and improvement in liquidity. Thus, bank stocks were the strongest performer, followed by energy stocks (oil price rebound). J.P. Morgan upgraded Thailand equities from UW to Neutral and downgraded Philippine equities from Neutral to UW.
- **Notable policy/data/events:** Indonesia continued to dominate the headlines with the BI governor unexpectedly resigning. However, there are signs of a rollback in large government expenditure, supporting fiscal discipline. The Malaysia state election result in Johor might lead to a delay of the general election to early 2028. Thailand and Vietnam reported significant trade deficits, driven by an upcycle of domestic investment and semiconductor price surges. MAS unexpectedly tightened its FX policy by raising the slope of the policy band. Philippines' State of the Nation highlighted continuing anti-corruption, reforms, and long-term investment in public infrastructure.

Japan

- **Market beta:** Since late June, semiconductor stocks have corrected by 30-40% globally. Earnings were solid, but the main factor was the unwinding of accumulated positions. Deleveraging is nearing its end, but rebuilding leverage may take time due to market sentiment and tighter regulations
- **Sector/security alpha:** [JPM](#) believes a strategy of selectively buying on weakness in high-quality AI semiconductor stocks while increasing investments in non-AI sectors is effective. JPM suggests Financials as a core holding, along with IT services and Internet (which have been sold off as the polar opposite of AI semiconductors), foods (where cost pass-throughs are expected), and laggard sectors such as automakers and defense (where upward earnings revisions are anticipated).
- **Notable policy/data/events:** Japan's June [CPI](#) rose 0.2% month-on-month, with core CPI up 1.6% year-on-year, ending the disinflation trend since late 2025. While subsidies still suppress energy inflation, broader price increases are expected as companies respond to global energy shocks. Despite temporary relief from upcoming electricity subsidies, strong demand, wage growth, and yen depreciation will likely drive inflation higher.

Australia

- **Market beta:** Australia rose +4.8% in July, with Energy and Financials leading the way, while Real Estate lagged. Analysts raised up their FTM EPS forecasts on Australia Financials in July.
- **Notable policy/data/events:** CPI was 3.8%/y/y in June, lower than the consensus estimate and prior (4.0%). The unemployment rate was 4.4% in June, the same as the prior (4.4%).

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Research excerpts: This material may include excerpts from previously published reports. For access to the full reports, including analyst certification and important disclosures, please contact your sales representative or the covering analyst’s team, or visit <https://www.jpmorganmarkets.com>.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/performance in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Notification for Credit Ratings: If this material includes credit ratings, such credit ratings provided by Japan Credit Rating Agency, Ltd. (JCR) and Rating and Investment Information, Inc. (R&I), are credit ratings provided by Registered Credit Rating Agencies (credit rating agencies registered under the Financial Instruments and Exchange Law of Japan (FIEL)). With respect to credit ratings that are provided by credit rating agencies other than JCR and R&I and have no stipulation that such credit ratings are provided by Registered Credit Rating Agencies, this means that such credit ratings are Non Registered Ratings (credit ratings provided by credit rating agencies not registered under the FIEL). Among the Non Registered Ratings, with respect to those credit ratings provided by S&P Global Ratings (S&P), Moody's Investors Service (Moody's), or Fitch Ratings (Fitch), prior to making investment decision based on such Non Registered Ratings, please carefully read the "Explanation Letter regarding Non Registered Ratings" for the corresponding credit rating agency, which we separately have sent or will send.

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan,

including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
