Datadog (DDOG) Q2'26: Q2 growth peak, H2 modest decel?

Datadog's Q2'26 earnings was another strong showing, with YoY growth accelerating to 35.6% (up 340bps QoQ) for their strongest growth since 2022 as they beat guidance by \$46MM. This was passed through to the full year by more than 3x with midpoint +\$140. But this exuberant in-period showing was offset by implicitly slowing revenue growth guided through the end of year — even if they continue to beat and raise at the recent peak levels (the best since mid-COVID) the growth would stabilize.

In H2'26 we anticipate growth rates decelerate ~200bps to low-to-mid 33% (Exhibit 4). The company reported their largest AI customer (we think it's OpenAI) renewed their 9-figure contract with lower levels of consumption early in Q3. In our model, we rebase the contracted revenue to ~\$115MM ACV (~\$100MM vs. the prior contract in our model) and from there have overage start growing rapidly (we see initial signal supporting 50% QoQ in the near term due to recent model releases), but then assume growth moderates again into next year. We also anticipate their 2nd largest AI customer (we think Anthropic) growing in Q3 and 4 at 10-15% QoQ (no recent major releases, and in between we see signals this is a common growth rate). While all the rest of their AI customers are growing well north of 100% YoY. Finally, we think the AWS web metric work to estimate non-AI customers continued to be a good signal this quarter, and the trends there suggest an air pocket is possible in Q4 (Exhibit 2), but we treat this as a one-off issue and have growth rates bounce back in 2027-28 (net new ARR growth in the low-to-mid teens).

We continue to think Datadog is in a very strong position (post DASH note). Our Market-Perform rating is not fundamental on business strength, and instead relates to current valuation and deep crowding (note, Exhibit 10). We worry some investors anticipate growth would continue to accelerate, and that when it stabilizes or even regresses over the coming quarters that it will be a disappointment and crowding will alleviate.

Investment Implications

We add an incremental \$200MM+ '27-28 ARR bump assuming continued stronger AI and ex-AI growth. Applying our unchanged 50/50 multiples (~16x NTM Revenue) and DCF (11% WACC, 3% terminal growth) we raise our PT to \$237 and maintain a Market-Perform rating.

DETAILS

NOTES FROM CALLBACK

The company called out a decline in the usage pattern from its largest AI-native customer, but does not have visibility on if it was a result of competitive displacement. The company emphasized that the customer remains a large, long-standing account and continues to use 17 Datadog products. The company stressed that it only has visibility into usage on its own platform and cannot determine what customers may be doing with competing, open-source, or internally developed tools. Importantly, management noted that the renewed contract this time remains largely unchanged versus prior agreements and reiterated that revenue is driven by actual consumption rather than committed spend.

The company has fully de-risked the largest customer in Q4 guidance by assuming only contractual minimums. Management clarified that the "fully de-risked" language applies specifically to out-quarter assumptions, particularly Q4, where guidance now includes only the minimum revenue the customer is contractually obligated to deliver. This differs from near-term quarters (i.e. Q3), where Datadog has better visibility into the actual usage pattern of this customer and incorporates it into its guidance. The company highlighted that it has taken a more conservative stance toward this customer for several quarters and noted that prior periods ultimately saw usage outperform those cautious expectations.

Training-related AI workloads are becoming a more meaningful contributor, although inference remains the larger long-term opportunity. Management highlighted that recent customer wins, including neo cloud providers and AI-focused customers, increasingly involve model training workloads rather than solely inference and production applications. While the company previously expected AI demand to be concentrated around production environments, the emergence of training use cases over the last several quarters has been a notable development. That said, management cautioned against assuming training will become the primary AI revenue driver and continues to view inference workloads as the more significant long-term opportunity.

BYOC and flexible telemetry architectures are expanding Datadog's addressable market among customers with massive data volumes. Management highlighted BYOC as a way to support organizations whose log volumes are too large, expensive, or sensitive to move into a traditional SaaS environment. Rather than requiring customers to centralize all telemetry within Datadog, the company can provide analytics and control-plane capabilities while data remains in customer-controlled environments. Leadership sees this as an important opportunity to win large-scale deployments and emphasized that BYOC complements, rather than cannibalizes, existing deployment models such as traditional log management and federated observability architectures.

Security strategy increasingly centers on combining observability, security, and AI-driven automation within a unified platform. Management argued that traditional security workflows relying on manual investigations are becoming less effective as AI accelerates both attack sophistication and response requirements. The company highlighted growing demand for security products that leverage real-time observability context and discussed strong early reception to AI-powered security analyst capabilities. Datadog continues to view the convergence of DevOps and security teams as a long-term trend that strengthens the value proposition of its unified platform, although management acknowledged that organizational adoption remains in the early stages across most enterprises.

EXHIBIT 1: AWS web metrics were tracing well above prior year levels in April but began to level off in May, with the relative softness persisting through June. After the July 4th holiday, the consumption trend started to pick up again, following a similar trajectory to prior years. Because 2025 was even weaker, this signals that acceleration will continue modestly into Q3. [reminder: current quarter web metrics are similar to ARR add, and signal +1 quarter revenue recognition]

EXHIBIT 2: Because of the weak end of Q2'26, the starting point for Q3 is behind prior years. BUT! Week over week trends are quite good. If it follows the same pattern as 2025, then we'd anticipate QoQ growth would be weaker because of the starting point, causing YoY headwinds. But that strong trajectory would be a good starting point for next quarter, and could signal the headwinds will be a single-quarter air pocket with Q1'27 recovering to recent trends.

EXHIBIT 3: Based on the company's disclosure of non-AI revenue grew high-20% in Q2, we estimate the revenue from "born-in-AI" companies had another strong quarter and contributed to the continued revenue growth acceleration this quarter.

Source: Company reports, Bernstein estimates and analysis

EXHIBIT 4: While revenue from AI-native customers is expanding rapidly and driving the overall revenue growth to over 30%, the ex. AI revenue growth has also been accelerating since Q3'25, but slowed down a bit this quarter

Source: Company reports, Bernstein estimates and analysis

EXHIBIT 5: While we think OpenAI may have had a flatter demand profile in Q2, that started to turn around mid-June with friction on Claude and then Fable 5 being pulled from the market. Then with the release of GPT-5.6 Terra / Luna / Sol we saw further uptick in mid-July, with July effectively up ~50% over the May to mid-June run rate. But the recent MASSIVE move is over the last week to start August after prices were discounted. We will be watching this closely to feel out how large of a tailwind it could be for Datadog.

Open router data is not a comprehensive representation of the total token usage as it only tracks the usage routed through its platform, while a big portion of the usage is likely directly through OpenAI's own APIs or through hyperscalers. But we think this could still serve as a useful signal for any change in consumption trends.

EXHIBIT 6: The number of net adds in the number of customers using multiple products has been accelerating since Q1'25, with strong net adds across all segments this quarter

Source: Company reports, Bernstein analysis

EXHIBIT 7: Our estimated NRR has been improving since the bottom in Q2'23 with the cloud optimization stabilizing for the initial cohort of customers, but will see a one-time step-down in Q3'26 as OpenAI reduces its Datadog usage.

EXHIBIT 8: The number of net new customers with \$100K+ ARR had another strong quarter, adding 170 customers this quarter

Source: Company reports, Bernstein analysis

EXHIBIT 9: The implied average ARR per customer in the \$100K+ group has been growing strongly since Q2'23, and the result for each quarter may not be the most accurate due to roundings in the company's reporting, causing some fluctuations in the YoY growth trend

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Datadog Inc**

Our price target of \$237 is an average of DCF (with 11% WACC and 3% terminal growth) and P / Sales (Next 5-8Q) comp multiple. P / Sales (Next 5-8Q) comp multiple of 16x is based on a peer-SaaS regression in their relevant >10% OpM Cloud SaaS cohort from our "Rule-of-40" based valuation framework analysis. We assume current Cloud SaaS multiples regression line remains consistent for 1+ year.

RISKS**Datadog Inc**

Downside risks beyond the macroeconomic risks include: increased competition from well-funded competitors in the industry; margin expansion slower than expected due to worse scale leverage in operating costs items; execution missteps or missed earnings expectations could lead to significant downside given the current valuation. Upside risks include: better product traction than expected, better than anticipated pace of new cloud workloads going into production, more major AI-customer wins, more upside in "Born-in-AI" customer growth.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors

on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/- 10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH
