MXAPJ fell 2.3%, with Indonesia (+7%), Australia and Malaysia (both flat) outperformed offshore China and India (both -4%) and Taiwan (-2%). Software & Services, Telecom Services and Banks led, while Internet/Media, Retail and Materials lagged. EM Asia ex-China saw US$8.9bn of outflows, led by Taiwan (-US$7.6bn) and Korea (-US$1.0bn). Brent rose to its highest since May as Middle East tensions escalated, while concerns over AI durability drove a global Tech sell-off and pushed credit spreads to 17-month highs. China's 3Q GDP modestly beat expectations, and the PBOC outlined monetary-policy framework reforms. Korea's early October exports and Taiwan's IP softened. The BOK held with a hawkish bias, BSP unexpectedly hiked 50bp, and BI remained on hold amid equity volatility. Key upcoming events are summarized within.

Charts of the Week

Korea: Attractive risk/reward despite a lower target. KOSPI has fallen 40%, bringing forward P/E to 4x (-3 s.d.). We cut our target to 9,000 from 12,000 on deeper valuation discounts reflecting elevated volatility and slower earnings momentum, but see >60% upside as fundamentals appear overly discounted. Memory valuations imply a 65% decline in 2027 earnings, while non-memory sectors, half the index, remain >30% undervalued. Beyond memory, we favor power, industrials, corporate governance, reflation beneficiaries, K-culture, and risk reversal strategies.

Asia Strategy Baskets: Against a backdrop of elevated rates and greater market differentiation, we favor lower duration, value, quality, shareholder yield and fundamental momentum over broad beta. We retain our preference for global over domestic exposure, while becoming more selective across our preferred structural themes, including AI infrastructure, Power Up Asia, and HALO.

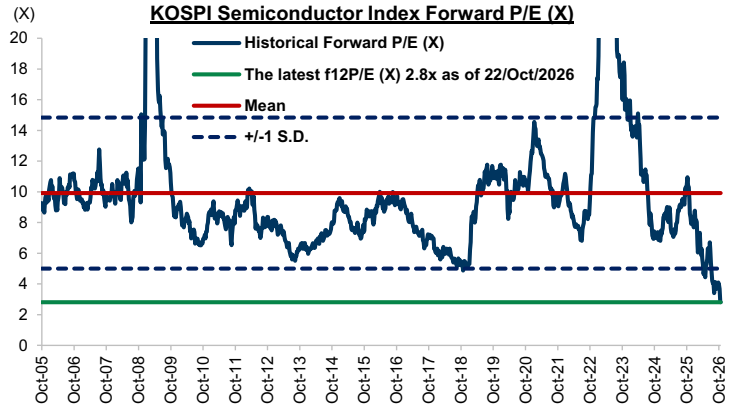

Tech Risk-Off: Asia's October weakness was concentrated in Tech and Industrials, while several other sectors gained. Foreign investors, particularly hedge funds, continued to sell Taiwan and Korea aggressively, while retail added leveraged ETF exposure. GS Global Prime Asia Tech positioning has fallen toward July lows, comparable with early-April levels.

2026Q3 Earnings Season Begins: Most Asian companies report from mid-October to late November, refocusing attention on the earnings outlook.

Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html.
