East Money reported 2Q26 total revenue/net profit of Rmb6.5bn/4.3bn, representing yoy growth of +49%/+52%, and 17%/20% above GSe, respectively. Core revenue (excluding other revenue) reached Rmb5.5bn, up 62% yoy and 10% above GSe. We believe the stronger-than-expected results were primarily driven by higher market activity, stronger fund sales volume, investment income and operating leverage, while brokerage revenue remained modestly below our expectations.

1. Fee and commission income (primarily brokerage commissions) increased 8% qoq and 63% yoy to Rmb 3.1bn (-4% vs. GSe) in 2Q26. Despite continued strong market activity, the result modestly missed expectations. We estimate this likely reflects ongoing pressure on trading commission rates and a higher proportion of ETF trading, partially offset by significantly stronger market turnover. Securities trading commission rate remained at approximately 1.82bps in 1H26, slightly lower than 1.95bps in 2H25. Going forward, market share trends and commission-rate sustainability remain key variables to monitor.

2. Net interest income reached Rmb 1.17bn (+6% qoq, +64% yoy, +6% vs. GSe) in 2Q26. Margin finance activity continued to benefit from stronger market sentiment and higher leverage utilization. However, margin finance NIM declined to 1.76% in 1H26, compared with 1.84% in 2H25, although remaining above 1.47% in 1H25. In our view, balance-sheet growth rather than margin expansion is increasingly driving earnings growth within this business.

3. Online services revenue (primarily fund distribution income) increased 14% qoq and 59% yoy to Rmb 1.22bn (+89% vs. GSe) in 2Q26, representing the largest positive surprise in the quarter. We believe the beat was primarily volume-driven rather than reflecting any improvement in the underlying economics of the business. Strong market performance, improving investor risk appetite and

stronger equity fund sales likely supported distribution volume during the quarter.

Importantly, the fund distribution take rate further decreased to 11.0bps in 1H26, vs. 11.4bps/13.4bps in 2H25/1H25, in line with GSe, suggesting the revenue upside was driven mainly by higher sales volume rather than improved monetization. In our view, this remains consistent with the industry's structural fee-pressure trend following mutual fund fee reforms and the increasing contribution from lower-fee ETF products.

Given **East Money's** historical investment case has largely been built around its leading online fund distribution franchise, we believe investors should continue to focus on both market-share trends and take-rate sustainability. While stronger capital markets can support near-term revenue growth through higher sales volumes, the absence of take-rate improvement suggests the franchise's edge on active fund sales may continue to narrow over time. We continue to believe this remains the most important long-term debate for the stock.

4. Other revenue (primarily investment income) increased 60% qoq to Rmb 1.06bn (+73% vs. GSe). Following the weak 4Q25 comparison base, we believe stronger market conditions and improved investment performance supported the rebound.

5. Operating expenses were broadly in line with expectations at Rmb 1.44bn (+9% qoq, +33% yoy), while the cost-to-income ratio improved further to 22%, compared with 23%/25% in 1Q26/2Q25, and 26% GSe. As a result, annualized ROE improved to 17.8%, versus 14.8% GSe and 13.5% in 2Q25, while total leverage increased to 5.1x from 4.2x in 2Q25.

Incorporating the 2Q26 results, we revise our forecasts to reflect stronger fund sales activity, higher market turnover and improved operating leverage. The primary driver is a stronger outlook for online services revenue, where we increase our fund distribution revenue forecasts by 30%/20%/20% for 2026E-28E, reflecting higher fund sales volume in a more supportive capital market environment. Importantly, we do not revise our fund distribution take-rate assumptions, which remain at approximately ~10bps for 2026E-28E. In our view, industry-wide fee reform and rising ETF penetration continue to constrain monetization, implying the upgrade is largely volume-driven rather than reflecting any improvement in underlying pricing power. Partially offsetting the stronger fund distribution outlook, we lower our brokerage commission forecasts by 3%/5%/9% for 2026E-28E, reflecting continued pressure on retail trading monetization and market-share dynamics. We also reduce our net interest income forecasts by 1%/11%/12%, primarily reflecting lower margin finance spreads.

Following these revisions, we forecast revenue growth of 28%/-11%/-2% and net profit growth of 29%/-14%/-3% for 2026E-28E, respectively. Despite raising our near-term earnings forecasts, we continue to believe that the longer-term investment debate is less about volume growth and more about the sustainability of **East Money's** monetization advantage. The latest results suggest that stronger market activity can drive meaningful revenue upside, but the absence of take-rate improvement indicates that structural pressures on the company's core fund distribution franchise remain largely unchanged. We maintain Sell rated on East Money with a new 12-month target price of Rmb17.01 (vs. Rmb17.42 prior), based on an unchanged 20x 2027E P/E.

Looking ahead, we expect investor attention to center on: 1) fund distribution market share and take-rate trends, 2) retail trading market share and monetization, 3)

sustainability of margin finance growth amid moderating NIM, 4) operating leverage and cost discipline, and 5) the durability of investment income should market conditions normalize.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
