Stronger EPS and new growth chapter; capital allocation and shareholder returns emerge as the next catalyst; hike PT to NT\$850 and maintain OW

NYT reported robust monthly revenue growth in July following solid 2Q26 results ([note](#)), indicating accelerating pricing momentum that could be read as a stronger pricing tailwind ahead. The company also disclosed additional investment plans details within the US\$15bn capex announcement, including a 45k wspm capacity expansion plan by 2029E. We reflect key business changes and update our PT/estimates. While we lower our valuation multiple (using forward-12-month EPS and a 7x P/E multiple), the EPS upward revision is greater; net-net, our PT is revised up to NT\$850, implying 85% potential upside. Under our higher-for-longer multi-year earnings durability thesis (FY26E-28E EPS CAGR at +52%), we maintain our OW view and recommend investors accumulate the stock.

- **Greater ambition and opportunity surrounding AI and server compute in the long term.** NYT's series of new capacity expansions and investment announcements indicate a commitment to strengthen its position from a cyclical price-taker to a secular niche price-maker. This will result in substantial capacity expansion (from 60k to over 100k in the next three years), and we believe the company is assigning greater resources (higher R&D, EUV machine purchases and multiple AI projects) to high-performance compute applications. The first phase of the 30k wspm expansion will begin mid-2027, and we estimate bit production output will be limited, at +6% y-y next year. We expect meaningful B/G acceleration to a 30-40% y-y increase heading into 2028E/29E.
- **DDR4 S-D tighter for longer, rising LTA supports price visibility.** The 55% m-m monthly revenue surge in July implies a substantial price hike in NYT's mainstream memory solution, DDR4/3 and LPDDR. We believe this is driven by multiple factors: (1) the renewal of bi-annual and annual contracts from an extremely low base 6/12 months ago; and (2) a stronger order appetite for mainstream DDR4 (16Gb die) products from various edge application customers. A surge in DDR4 demand for enterprise SSDs (a rising number of SSD modules and various density products) is also likely to be the reason for the extended S-D shortage, and we expect it to continue for another 9-12 months. While management has not communicated a specific LTA coverage mix publicly, we note that rising LTA discussions could support the price downside risk at a higher level.
- **Technology optionality thesis still valid.** Our [12 July report](#) highlighted that the NYT team would be able to quickly shift its existing DDR4 capacity to DDR5 within three to six months after the initial new fab installation. As discussed earlier, the DDR4 EOL is anticipated to be pushed back due to stronger follow-up orders, and we continue to see NYT getting involved in multiple AI-grade projects. Strong Vera CPU customer orders are one of the potential growth areas where NYT can compensate for its capacity conversion via a bit supply share gain (targeting LPDDR5X stacked solution). In our view, this product mix shift will be based on the NYT team's multi-year end market quality share improvement initiatives.

Summary Investment Thesis and Valuation

Investment Thesis

We are OW on NYT, given the resilient legacy DRAM pricing, coupled with leading memory makers phasing out DDR4 to drive pricing leverage higher in 2H26E and 2027E. NYT's entry into the NVIDIA supply chain will help it to extend its server industry exposure well beyond the 20% level, in our view, while simultaneously reducing its large CE exposure, making its pricing trend less volatile and more stable. While we expect quarterly earnings y-y momentum to decelerate slightly as we head into 2H26, we see NYT as having a relatively favorable risk/reward in the near to midterm, as we expect all memory stocks to move up together during an up-cycle.

Valuation

Our Jun-27 PT of NT\$850 is based on 7x F12M EPS (vs. 8x previously), on par with Korean DRAM makers, driven by our higher-for-longer thesis (vs. diverging pricing momentum expectations between DDR4 and DDR5 previously).

- **Capital allocation and shareholder return upside the next catalyst.** The US\$15bn capex plan through 2029E is surprisingly higher than most investor expectations, especially given the greater capital intensity relative to the amount of capacity expansion. Investors are likely to focus on the extra cash spending rationale and NYT's product transition plan afterward as a part of capital allocation. Nevertheless, as hinted at by the strong July result beat, we forecast a >50% EPS CAGR over the next two years after record-breaking FY26E earnings. Three years of accumulated EBITDA are estimated to be NT\$1,824bn, and distributable FCF after capex is expected to be around NT\$1,502bn. NYT has historically guided to a dividend payout ratio of 45-55% of annual net income when profitable and paid 52% of net income (of 2025) in 2026, translating into a >50% FCF payout. We estimate the total shareholder return at close to NT\$750bn (47% of total market cap as of today) if NYT keeps the same payout policy.
- **Key risks.** NYT's previous business strategy involved lower cyclical risk (taking smaller bets vs. peers, capex discipline and high shareholder returns) in the past (i.e., favorable risk/reward to shareholders). Under the new NYT team's business strategy (priority on growth), absolute business risk is greater (even the upside opportunity is higher), and this is likely to be a key investor focus on all the relevant capacity ramp, as well as product mix improvement initiatives. After CHN's memory peer IPO, we are witnessing an increase in headline noise surrounding intensifying market competition. As the overall DRAM industry S-D is likely to be in shortage for multiple years, we do not view the noise as a material driver; rather, an unexpected faster technology migration success or a substantial yield improvement by a Chinese DRAM peer could be taken as negative for NYT's share price.

Investment Thesis, Valuation and Risks

Nanya Technology (*Overweight; Price Target: NT\$850.00*)

Investment Thesis

We are OW on NYT, given the resilient legacy DRAM pricing, coupled with leading memory makers phasing out DDR4 to drive pricing leverage higher in 2H26E and 2027E. NYT's entry into the NVIDIA supply chain will help it to extend its server industry exposure well beyond the 20% level, in our view, while simultaneously reducing its large CE exposure, making its pricing trend less volatile and more stable. While we expect quarterly earnings y-y momentum to decelerate slightly as we head into 2H26, we see NYT as having a relatively favorable risk/reward in the near to midterm, as we expect all memory stocks to move up together during an up-cycle.

Valuation

Our Jun-27 PT of NT\$850 is based on 7x F12M EPS, on par with Korean DRAM makers, driven by our higher-for-longer thesis.

Risks to Rating and Price Target

Downside risks include:

- Shorter-than-expected legacy DRAM spot price momentum into 2H26.
- A shorter-than-expected D4 16Gb die shelf cycle from the consumer market (i.e., customers' willingness to transition from D4 to D5 could result in weaker-than-expected D4/LPD4 pricing from 2026-end to 2027 onward).
- Unsuccessful AI-related memory product development, allowing the company to de-rate (a failure in next-gen technology migration, creating room for competitors to catch up).
- Faster-than-expected DDR5 yield improvement from CXMT.

Initiated coverage Jun 11, 2018. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the

Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a

manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
