Japan Customs released August 2026 trade statistics at 09:30 JST on September 29. We believe MLCC export trends by nation and region visible in the data shed some light on trends by application. From this month, we also include MLCC trade statistics for Thailand, Singapore, the Philippines, mainland China, Malaysia, Taiwan, and South Korea. MLCC export value (US dollar basis) declined 12% MoM overall in August, but this appears to reflect a pullback from strong growth through July and the impact of summer holidays. YoY growth remained in the double digits, and we believe the uptrend in export value is unchanged. For IT applications, although there was a MoM decline in August, strong YoY growth continued overall, and the underlying trend remains solid. Exports to Taiwan in particular continued to show strong growth of 44% YoY, with export levels in July and August reaching unprecedented highs. The average selling price (ASP) for exports to Taiwan also continued to rise, confirming strong demand in AI applications. Meanwhile, exports to Europe and the US, which have a high weighting for automotive applications, remained broadly flat overall. By region, exports to Europe continued to show a somewhat weak trend. Our top picks among MLCC names are Murata Manufacturing and Taiyo Yuden.

Our view

- August 2026 trade statistics showed a MoM decline due to the Obon holidays and a pullback from the sharp MoM increase in July, falling below seasonal norms, but YoY growth remained strong, with ASP continuing to rise, particularly for exports to Taiwan. The average export value (US dollar basis) for July-August exceeded the April-June average by about 12%, and we believe strong QoQ sales growth continued in July-September. We think that progress in price negotiations by overseas MLCC manufacturers increases the likelihood that Japanese MLCC manufacturers will also begin to raise prices, and we maintain our positive stance on Murata Manufacturing, Taiyo Yuden, and TDK.

Summary of Japan trade statistics (overseas MLCC trade statistics from Figure 69 onward)

- In August 2026, total export volume was 88.198 billion units (-6.1% YoY, -16.5% MoM), export value was US$461 million (+15.5% YoY, -12.3% MoM), and ASP was US$0.52 (+23.0% YoY, +4.9% MoM) (Figure 2). Over the past 10 years, seasonality has typically seen export volume rise 4.0% MoM and export value rise 4.8% MoM, but in August 2026, both volume and value were well below seasonal trends, likely due to a pullback from the sharp increase in July and the impact of summer holidays. Meanwhile, YoY growth in export

See page 18 for analyst certification and important disclosures, including non-US analyst disclosures.

value stayed in the double digits, and ASP also rose. Trend lines show that export value continues to increase in both yen and dollar terms, and our overall view remains unchanged.

- Automotive applications have a high weighting within exports to Europe (Germany, the Netherlands) and the US, and for these destinations, export volume was 8.853 billion units (-3.1% YoY, -15.2% MoM), export value was US$64.5 million (-13.2%, -14.8%), and ASP was US$0.73 (-10.4%, flat). Seasonal patterns over the past 10 years show MoM increases of 7.4% in export volume and 7.6% in export value, but both volume and value underperformed these seasonal trends in August. Looking at the trend line, export value (US dollar basis) has remained flat, with no significant changes observed. By region, exports to the US declined MoM but have stayed in a flat range as an underlying trend. Meanwhile, exports to Europe show a slight downtrend, and there is a slight divergence in trend lines by region.
- For major Asian markets with a high weighting of IT applications (China, Hong Kong, Taiwan, South Korea, Vietnam, the Philippines, and India), export volume was 73.090 billion units (-7.2% YoY, -16.2% MoM), export value was US$354.4 million (+24.4%, -10.1%), and ASP was US$0.48 (+34.0%, +7.2%). Over the past 10 years, seasonality has typically seen export volume rise 4.2% MoM and export value rise 5.2% MoM, but in August, both volume and value underperformed these seasonal trends. Looking at export value (US dollar basis), although there was a MoM decline in August, the trend line continues to show a strong growth trajectory. By region, exports to South Korea were up 10% YoY but down 8% MoM, exports to China increased 13% YoY but decreased 10% MoM, exports to Taiwan grew 44% YoY but declined 9% MoM, exports to Hong Kong expanded 42% YoY but fell 10% MoM, and exports to Vietnam increased 21% YoY but decreased 25% MoM. Although there were MoM declines in each region from July, overall YoY growth remains strong. In particular, exports to Taiwan have continued at unprecedented levels in July and August, showing rapid expansion. In addition, ASP for Taiwan continues to trend upward.

Overseas MLCC trade statistics

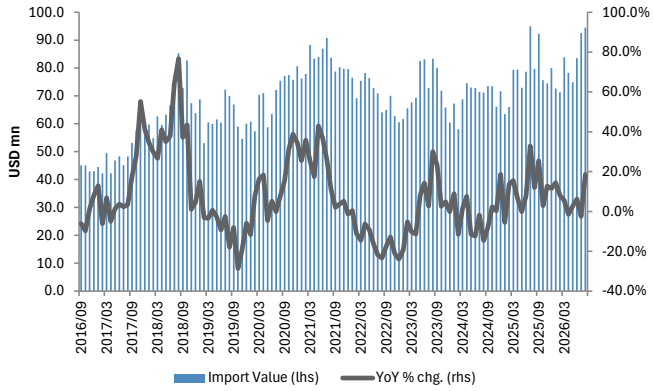

Exports from South Korea may mainly reflect trends at SEMCO's domestic plants in South Korea. We believe that imports to China are an important indicator for understanding overall MLCC demand trends, and that imports to Taiwan are useful for gauging IT-related demand, particularly AI demand. Exports from Thailand are likely to provide useful reference for confirming production trends at Murata Manufacturing's Thailand plant. Exports from Malaysia are a useful reference for confirming production trends at Taiyo Yuden's Malaysia plant. Exports from Singapore are likely to provide useful reference for confirming production conditions at Murata Manufacturing's Singapore plant.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
