Summary of the week

TOPIX: 4,091.00 (-0.9%) / NK225: 68,309.46 (2.9%)

- Top sectors: Non-Ferrous Metals, Electrical Machinery
- Bottom sectors: Other Financials, Iron & Steel

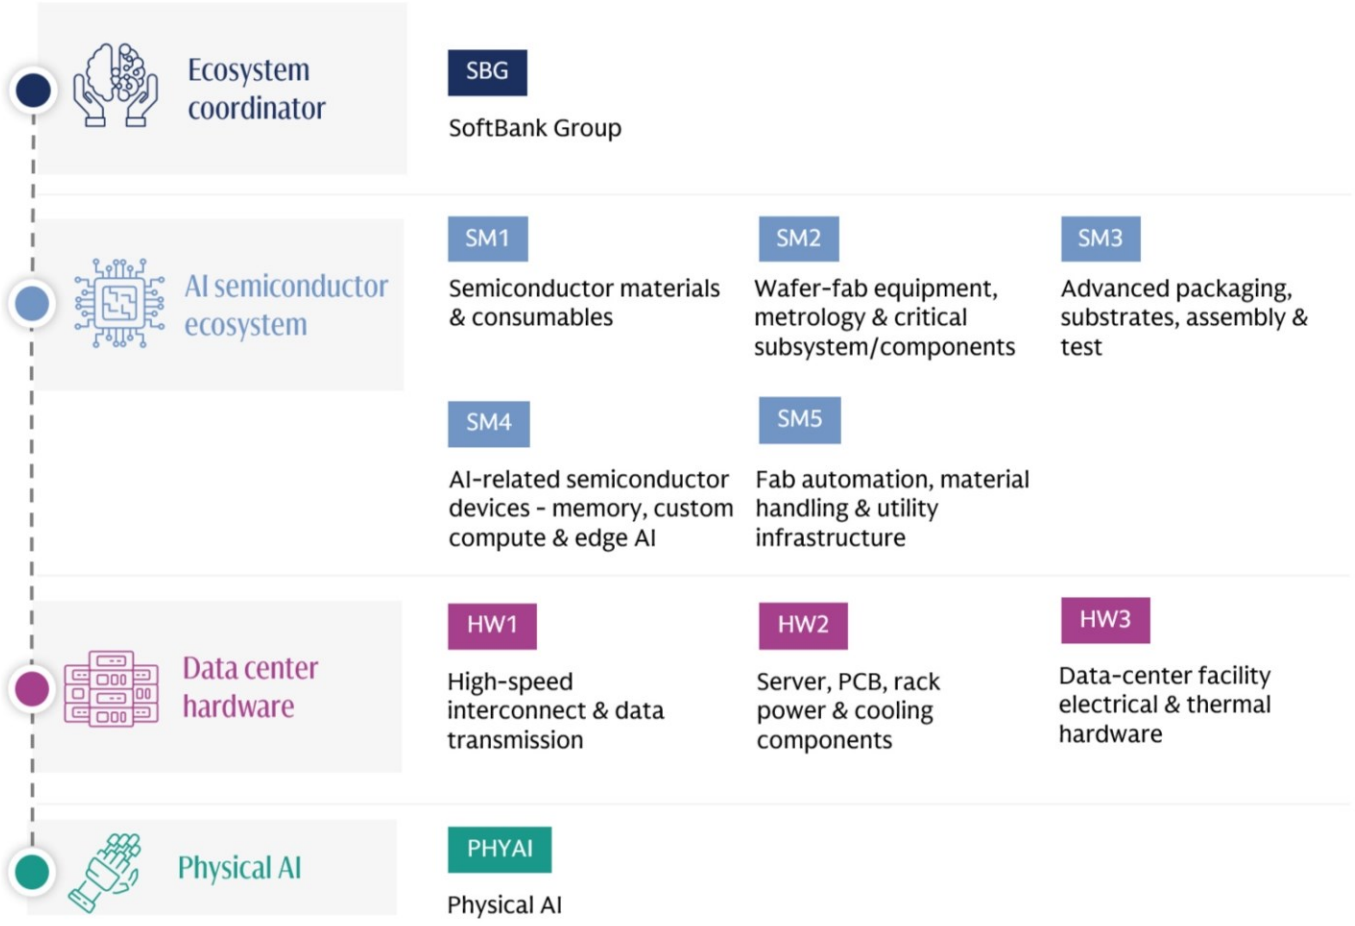

In this week's **Japan Weekly Kickstart**, we highlight the key points from our latest report on the Japan AI thematic: More than meets the AI: a new framework for Japan's expanding AI universe. AI-related stocks are expected to contribute to one-third of FY26/FY27 TOPIX EPS growth, and they now account for 48% of the weighting in Nikkei and 25% in TOPIX. Given the contribution to index-level growth and price performance (Exhibit 4), the risks of not being exposed to the AI thematic in Japan are likely to persist. However, higher levels of positioning concentration could also increase the frequency and impact of AI-driven market corrections.

- **Mapping Japan's AI Value Chain:** We establish a framework to categorize Japan's AI-exposed stocks based on each company's position within the broader AI value chain. The two core groupings of AI Semiconductor Ecosystem (SM) and AI Data-Center Hardware (HW), are further broken down into eight sub layers (SM1-5, HW1-3). We also identify SoftBank Group as a stand-alone *AI ecosystem coordinator*, and highlight Physical AI as a complementary thematic (Exhibit 1).
- **A more attractive risk/reward:** Since the correction in late June, valuations look more attractive across all layers. Fwd-24m PE 3Y z-scores are close to 0, whilst past 1Y z-scores are deeply negative (Exhibit 6). From a PEG ratio perspective valuations also look attractive (Exhibit 7).
- **Introducing GSJPAISM and GSJPAIHW:** We introduce two new GIR baskets that focus on stocks with high AI-related exposure and liquidity cutoffs within the AI semiconductor (GSJPAISM) and Data center hardware (GSJPAIHW) thematic (Exhibit 8,Exhibit 9)
- **Domestic Institutions, Foreigners, and Individuals were all net sellers:** According to the latest data from the TSE, for the two weeks between Sep 14-25, Domestic Institutions Foreigners and Individuals net sold -¥1tn, -¥745bn, of TSE Prime cash equities respectively net bought ¥302bn.

Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html.

Appendix One - Methodology

Our original analysis which has now been integrated into the Japan Weekly Kickstart format focuses on sector and thematic performance of the more liquid portion of the Japanese equities market. This is defined as any Japanese stocks that trade over US$20mn adtv. We believe that a significant number of our clients have liquidity constraints which require them to limit their stand-alone positions to this particular universe. By our calculations, there are 271 stocks in Japan that trade above this liquidity threshold as of Dec 17 2025.

We have sub-divided this universe into 45 equal weighted indices that focus on either MSCI-defined sectors and sub-sectors, or areas of thematic focus that stretch across multiple sectors (such as High Dividend Yield or Gaming). For these thematic indices, we have relied either on quantitative measures and/or GS Equity analyst input on component selection. We hope to expand the number of indices over time and would welcome client feedback on any areas of thematic interest we should focus on.

We track the performance of the equal-weighted sector, sub-sector and thematic indices over time and also measure the spread between the best-performing and the worst-performing stocks within the index. For example, Exhibit 39 illustrates both the volatility of the mean weekly performance in the liquid SPE index (the dark blue line), and the weekly Best-Worst spreads within the index (the light blue cloud).

Exhibit 39: SPE index 52 week equal-weighted cumulative weekly performance and best-worst spreads

Source: FactSet, Data compiled by Goldman Sachs Global Investment Research

The criteria we have used in our analysis of the liquid Japanese equities market can be summarized as follows:

- Total universe consists of Japanese stocks with a 6-month adtv of over US$20mn (271 stocks as of Dec 17 2025).
- The universe will be refreshed every year.
- Indices are all equal-weighted.
- Index component selection is based on MSCI sector and sub-sector definitions, quantitative factors and/or GS single-stock Equity Analyst guidance.
- The same stock can appear in multiple indices.
- The Best-Worst spread is based on the difference between the best performing and worst performing component within each index.
- The first 12 months of trading of any new listing are not included in the index performance.

We anticipate that the number of indices will be adjusted over time and would welcome any client feedback on other areas within the liquid Japan equities universe we should be focused on.

We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
