

Asian Semis

June WSTS: YoY growth accelerates to new record on surging memory ASPs and logic price hikes

Overall semi revenues rose 134% YoY in June (vs 128% YoY in May), with logic semis increasing 38% YoY (vs 34% YoY in May) and memory increasing 369% YoY (vs 353% YoY in May). Semis marked the tenth consecutive month of acceleration and a new record for YoY growth, driven primarily by: 1) sustained AI compute demand, with TSMC visibility now extending into 2029-30, 2) memory ASP strength amid structurally tight supply-demand, and 3) strengthening mature foundry pricing power driven by surging AI peripheral demand.

Logic semi revenue rose 38% YoY (vs 34% in May), marking 34 consecutive months of YoY growth. We believe the primary driver remains leading-edge demand intensity, with TSMC accelerating capacity expansion plans further. We now expect TSMC capex to reach \$62/\$81/\$90bn in FY26/27/28 (vs. prior \$58/\$78/\$84bn), with leading-edge capacity (N5 and below) expected to grow at a 24% CAGR over 2026-28. At mature logic foundries, pricing momentum is accelerating, driven by rising utilization rates and tight capacity for AI peripheral applications. PSMC saw 10–15% price hikes across both 8" and 12" in 1H, while we believe VIS also implemented 5–15% price hikes for 8" in 1H26. We expect a further round of mature foundry price hikes in 2H26 and 2027.

Overall semi units increased 8% YoY (vs 13% YoY in May). Memory units increased 44% YoY (vs 41% YoY in May), and logic semi units rose 6% YoY (vs 11% YoY in May). Within memory, we expect DRAM wafer allocation to HBM to continue to increase, reaching 32% capacity mix by 2028E-end, with AI CPU unit TAM expected to grow at a 155% CAGR. Memory demand broadening out from GPU to CPU appears to have been underestimated by investors and remains a key source of potential upward revisions. We forecast DRAM WSPM to reach 2.85M by 2028 end from 1.9M at 2025 end, still below the expected demand due to 2-2.5 years of lead time from groundbreaking to production ramp. Logic unit growth was mainly supported by AI demand alongside pockets of strength in industrials, with resilient iPhone 17 demand helping to offset weakness in mid-to-low-end smartphones.

Overall semi ASPs were up 117% YoY (vs 102% YoY in May), with memory ASPs rising 225% YoY (vs 222% YoY in May) driven by structurally tight supply-demand. LTAs in 2Q26 showed favorable terms for memory makers, with prepayment mix (20-25% of LTA value) and large volume contribution (50-70%) indicating strong supplier bargaining power. The majority of LTAs are centered around AI/server compute, carrying a 30-40% price premium over the rest. We see DRAM ASP rising 29%/7% in 2027/28E after a 235% rally in 2026E as flexible pricing structures allow memory makers to leverage the current shortage market. Logic semi ASPs rose 30% YoY (vs 20% in May), supported by continued mix shift towards advanced nodes (higher N3/N5 mix) and accelerating pricing hikes from mature foundries.

Looking ahead, we expect the AI-driven semiconductor upcycle to continue, supported by strong hyperscaler capex growth (aggregate CSP capex is forecast to grow 65% in 2027, sustaining the strong 100%+ pace in 2026) and extended demand visibility. On the logic side, we believe TSMC is likely to raise its

Datacenter AI CAGR expectations (JPMe 69% from 2024-29), driven by stronger accelerator demand and likely inclusion of new categories like agentic AI CPUs. We believe mature foundries will also see continued benefit from ASP improvement and sustained strong AI-peripheral demand. On memory, we continue to see upward revisions to memory TAM forecasts and expect supply-demand shortage to continue, with the degree of shortage worsening in 2027E followed by a slight improvement into 2028E.

Stock picks: We reiterate our top picks among major AI beneficiaries: TSMC, MediaTek, Unimicron, ASMPT, ASE, Alchip, VIS, Tokyo Electron, SEC, AMEC, Naura, Hon Precision, Chroma, Accton and Delta.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report,

the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
