

Jentech Precision Industrial Co.

2Q GM beat with stronger 3Q outlook; solid content growth in Rubin Ultra; OW

Jentech reported its 2Q26 earnings with a strong beat on GM. Looking into 3Q26, we believe the company will continue to deliver better-than-expected earnings growth, driven by the uplifted revenue outlook with Rubin GPU lid ramp along with solid GM given better mix. For the longer-term outlook, we are more constructive on the company's 2027 and 2028 growth potential, as the heat spreader content growth of Rubin Ultra GPU (with the potential design of stiffener + disposable lid + additional screws) could be >100% vs the current Rubin 1-piece lid design. Also, we believe the continued heat spreader spec upgrade of both AMD GPU and each CSP ASIC will support structural growth for Jentech as well. OW.

- 2Q26 results beat on stronger GM growth.** EPS of NT\$15.8 was above both JPMe and BBGe by 15% and 17%, mainly due to more meaningful GM growth. GM of 46.8% was a strong beat vs consensus estimate of 44-45%, thanks to the higher ASP of Rubin GPU's 1-piece lid given rush orders. Coupled with the robust revenue growth and lower opex ratio from better operating leverage, the company's operating profit was a 13% beat vs BBGe consensus.
- Stronger 3Q26 growth outlook driven by Rubin GPU shipment ramp.** Post the solid revenue growth in 2Q26, the company's reported July revenue also came in higher than Street's expectations with 21% MoM and 91% YoY growth to NT\$3.2bn (already tracking ~40% of BBGe consensus). We believe the strong revenue momentum will continue into August and September, driven by Rubin GPU lid shipment ramp. Hence, we revise up our 3Q26 revenue estimate to NT\$9.7bn, suggesting 33% QoQ and 91% YoY growth. Also, our GM estimate is lifted to 47.5% from 45.2 previously, reflecting better product mix towards more AI chip contribution.
- Solid content growth in Rubin Ultra GPU.** We continue to believe the heat spreader design of Rubin Ultra GPU will be "stiffener + disposable lid" (highlighted multiple times since our Jan note, [link](#)), which should drive further content growth for Jentech. In addition, we believe the heat spreader design will require some screws to attach a lid during chip packaging, and after the packaging and testing process, the screws and lid will then be removed by the ODM vendors to place cold plates on top of the chip with a stiffener and a TIM1.5. The screws will also add content for Jentech, in our view. Therefore, we maintain our view that Rubin Ultra GPU's content will see >100% increase.
- Implications.** We lift our 2026E and 2027E EPS by 13% and 3% to NT\$68 and NT\$125, respectively, to factor in a stronger GM outlook, while keeping our 2028E EPS largely unchanged at NT\$189. Hence, our Dec-27 PT remains at NT\$5,650, based on an unchanged 30x 2028E P/E, which is largely in line with Jentech's 3yr avg P/E when the AI server boom started.

Summary Investment Thesis and Valuation

Investment Thesis

Jentech (OW) is the largest packaging-level cooling component maker worldwide, with leading production capabilities across heat spreader products (including stiffener and all kinds of lids). We expect the company to grow EPS at a ~70% CAGR over 2024-28, driven by solid heat spreader content growth in future-gen AI chips and increasing TAM into new solutions (e.g., CPO switch ASIC). In addition, the company is reinforcing its product portfolio with new offerings in cold plate and CPU server sockets for chip customers. We believe Jentech's technology leadership in the structural cooling upgrade trend and its new TAM expansion will continue to support its superior earnings power in the long term.

Valuation

Our Dec-27 PT of NT\$5,650 is based on 30x 2028E P/E, largely in line with Jentech's three-year average P/E when the AI server boom started.

Investment Thesis, Valuation and Risks

Jentech Precision Industrial Co. (Overweight; Price Target: NT\$5,650.00)

Investment Thesis

Jentech (OW) is the largest packaging-level cooling component maker worldwide, with leading production capabilities across heat spreader products (including stiffener and all kinds of lids). We expect the company to grow EPS at a ~70% CAGR over 2024-28, driven by solid heat spreader content growth in future-gen AI chips and increasing TAM into new solutions (e.g. CPO switch ASIC). In addition, the company is reinforcing its product portfolio with new offerings in cold plate and CPU server sockets for chip customers. We believe Jentech's technology leadership in the structural cooling upgrade trend and its new TAM expansion will continue to support its superior earnings power in the long term.

Valuation

Our Dec-27 PT of NT\$5,650 is based on 30x 2028E P/E, largely in line with Jentech's three-year average P/E when the AI server boom started.

Risks to Rating and Price Target

Downside risks to our rating and price target include: 1) slower micro-channel lid adoption; 2) new competition in the high-end heat spreader market; and 3) other new cooling technologies that may lead to heat spreader removal or de-spec (silicon-integrated micro-cooler, CoWoP, etc.).

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will

outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
