

BYD CO. (002594.SZ/1211.HK)

Flash charging technology driving domestic market share recovery and sustainable overseas strength; Buy on CL

We remain Buy rated (on CL) on BYD post an in-line 2Q26 result (First Take). We believe BYD's flash charging technology & ecosystem has created a strong moat for the company vs. peers, which will support the company to regain domestic market share as well as deliver sustainable overseas expansion, at the same time leading to profit and cash flow recovery. **Looking ahead, we expect BYD to deliver volume growth recovery to +30% yoy in 2H26E (from -18% yoy in 1H26)** driven by second-generation blade battery capacity ramp-up as well as continuous strong overseas sales. **At the same time, we expect operating margin to improve to 5.5% in 2H26E from 4.2% in 1H26** thanks to growing scale and better product mix.

We expect both volume and net profit to sequentially improve going into 3Q/4Q (Exhibit 1 & Exhibit 2). For **2026E full year**, we model **(1) revenue** growth of 10% mainly driven by +93% volume growth in overseas markets with higher ASP. We forecast sales volume of 4.73mn units in 2026E, +8% yoy, with domestic delivery -19% in a challenging market and +93% volume growth overseas to reach 2.02mn units in 2026E; **(2) Gross margin** to improve to 18.9% in 2026E (from 17.7% in 2025) from higher overseas proportion as well as higher blended ASP driven by new models; **(3) R&D expenses** to stabilize at Rmb57bn in 2026E (vs. Rmb58bn in 2025) on continued R&D in technology for new energy ecosystem but higher capitalization ratio; **(4) Net income** of Rmb38.2bn in 2026E (+17% yoy, vs. Rmb32.6bn in 2025) and **free cash flow** of Rmb29bn (vs. -98bn in 2025).

Estimate changes: Post 2Q26 result, we revise earnings estimates in 2026E-30E by -3% to +3% mainly reflecting higher FX /impairment losses mitigated by lower R&D expenses. We maintain our Buy rating with 12-month DCF-based target prices unchanged at Rmb137/HK\$134, implying +57%/+56% upside.

Key takeaways

- Sustained overseas expansion anchored by localization and technology:** BYD's overseas business continues to demonstrate robust growth, with monthly sales at 180k-190k units and full-year targets set at around 80-90% yoy growth (from 1mn in 2025). Meanwhile, the company continues to dedicate to its localization strategy to mitigate trade barriers and logistics constraints, with Indonesia plant already operational, Brazil targeting 300k units of capacity, and Hungary commencing production in Nov-Dec this year with an initial focus on PHEVs. Despite currently higher manufacturing costs compared to domestic production, the company sees long-term localized manufacturing to achieve cost advantages by eliminating freight (c.Rmb10k per vehicle) and tariff expenses (c.Rmb40k per vehicle). Furthermore, BYD is elevating its global brand equity through premium model introductions and plans to deploy 6k overseas flash-charging stations, reinforcing its technological moat and supporting a projected overseas volume exceeding 2.5mn units next year.
- Domestic market recovery fueled by capacity ramp-up:** The company managed to increase its domestic share despite intensifying competition, supported by a planned capacity ramp-up for second-generation blade batteries. At the same time, the company targets 20k flash charging stations in China by this year, and 50k/90k by 2027/28 (from 10k stations currently). The company targets to enable all BEV models to feature flash-charging capabilities by next year, support long-term domestic PV market share target of 25% and facilitating a favorable product mix shift toward premium brands like Denza, Fangchengbao, and Yangwang. Consequently, blended ASP and profitability improved in Q2 despite sector-wide price pressure. The company sees clear visibility for domestic NEV penetration to reach 80%-90%, and BYD to maintain domestic leadership driven by sustained R&D investment and deep moat in ecosystem.
- Strategic diversification into AI, energy storage, and physical AI:** BYD has elevated energy storage and AI solutions to strategic priorities, projecting 60-70 GWh in energy storage shipments this year (from 40-50GWh last year) driven largely by data center demand, while leveraging its semiconductor capabilities for comprehensive AI infrastructure. In autonomous driving, the company is preparing for L3 regulations with significant investments in both proprietary and external

algorithms and chip ecosystems. Additionally, BYD views humanoid robotics as a future growth synergistic with its automotive data and R&D across business segments.

- **Disciplined capital allocation and resilient profitability outlook:** The company sees lower capex following years of aggressive expansion, with future focuses on next-gen batteries and charging networks while prioritizing stable operating cash flow. Overseas unit profitability remains resilient at over Rmb20k per vehicle excluding FX impacts, with near-term focuses on channel and capacity investments overseas. Regarding policy risks such as export tax rebate adjustments, management believes cost increase can be passed through given its higher overseas pricing structure relative to Chinese peers.
- **Balance sheet and cash flow:** We see net cash position in 2Q26 compared to net debt in 1Q26 on lower short-term debt and current portion of long-term debt at Rmb41bn in 2Q26 (vs. Rmb70bn in 1Q26). BYD ended 2Q26 with Rmb11.4bn in net cash (vs. Rmb6.3bn net debt/116bn net cash in 1Q26/2Q25). Receivable days were shorter qoq/longer yoy (24 in 2Q26, vs. 27/20 in 1Q26/2Q25), payable days were shorter qoq/longer yoy (133 in 2Q26, vs. 159/128 in 1Q26/2Q25), and inventory days were shorter qoq/longer yoy (110 in 2Q26, vs. 120/76 in 1Q26/2Q25). Total debt to equity ratio was 43% (vs. 52%/13% in 1Q26/2Q25) and total liabilities to asset ratio was stable at 71% (vs. 71%/71% in 1Q26/2Q25) in 2Q26.

Investment Thesis

BYD is a leading NEV maker both in China and globally. We believe the company is well-positioned both at home and abroad, capturing the largest mass-market demand and building up premium brands in the domestic market. At the same time, BYD has tapped into the overseas market with compelling (highly competitive, innovative) products, which we expect could become a second growth driver for the company, contributing 75% of incremental vehicle sales volume in 2026E-2030E and overseas profit contribution to increase from 64% in 2025 to 88% by 2030E. With a

comprehensive product portfolio and strong in-house capabilities enabling continued vehicle technology innovation, we expect BYD to grow its total vehicle sales volume from 4.4mn in 2025 to 7.1mn in 2030E. BYD A/H shares are trading below their historical average 12m forward P/Es, which we view as attractive. We are Buy rated. Catalysts include strong sales, breakthrough in overseas markets, and quarterly results. Downside risks: (1) intensifying electric vehicle competition; (2) slower-than-expected overseas expansion progress; (3) lower-than-expected external battery sales.

Price Target Risks & Methodology

We are Buy rated (on CL) with 12m DCF-based (WACC 10.8%, TGR 2.0%) TPs of Rmb137/HK\$134 for the A/H shares (applying a 10% discount for the H-share). Key downside risks: (1) Intensifying electric vehicle competition; (2) Slower-than-expected overseas expansion progress; (3) Lower-than-expected external battery sales.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
