AI adds new leg of growth; risk-reward still balanced

WHAT'S CHANGED

SG Micro Corp. (300661.SZ)	From	To
Price Target	Rmb82.00	Rmb100.00

Analog recovery is broadening and AI optionality is rising, supporting a stronger growth outlook. We raise our price target to Rmb100, but demanding valuation and consumer weakness keep us EW.

Analog cycle broadening with improving visibility: We are incrementally more constructive on analog with 2Q26 results pointing to a demand-led up-cycle broadening beyond AI into industrial and automotive. (See [Analog recap: Margins overshadow data center commentary](#).) Channel inventories have largely normalized, book-to-bill ratios are generally above 1x, backlog visibility extends through 2026, and pricing has likely troughed with selective increases emerging.

Revenue guidance raised in view of stronger-than-expected broad-based growth: SG Micro raised its 2026 Y/Y revenue growth guidance to 45% from 40%, while maintaining 2027 growth guidance at 35%, implying higher revenue into 2027. The upgrade reflects stronger momentum across pan-industrial applications – particularly industrial & energy, automotive, and networking & computing – which grew >80%, ~100%, and 104% Y/Y, respectively, in 2Q26. Management also expects 3Q revenue to grow >10% Q/Q. Though underlying demand improvement remains uneven, the company attributes much of the growth to continued market share gains, supported by broad product coverage, ongoing new product launches, and increasing contribution from AI-related networking and server applications.

Core analog portfolio still gaining share: Beyond AI-related networking, SG Micro is seeing broad-based strength across its core analog portfolio, with industrial & energy revenue up >80% Y/Y and automotive ~100% Y/Y in 2Q26, driven mainly by market share gains rather than underlying demand improvement. Portfolio expansion remains central to its strategy: the company has 600+ automotive-grade products, and >80% of its 38 major product categories already offer automotive-qualified products. Storage and sensor portfolios are expanding after recent acquisitions. Management is still prioritizing scale over peak margins, reinvesting product mix benefits into midrange/low-end share gains. GM target is ~50%.

Raise price target to Rmb100 from Rmb82... We cite stronger earnings momentum, analog recovery, and AI optionality.

...but maintain EW: Valuation remains demanding at ~75x 2026e P/E. Moreover, consumer analog remains soft, with SG Micro's 2Q consumer revenue down ~8% Y/Y, including handsets down 11%. We see balanced risk-reward as stronger industrial/AI growth is offset by consumer weakness and limited room for multiple expansion.

China's analog market has passed the cyclical trough

We reiterate our view that China's analog IC market has passed its cyclical trough, with the 2Q26 reporting season providing stronger evidence of a demand-led up-cycle. Channel conditions have improved materially, with distributor/customer inventories now at, below, or near normalized levels, while China's analog inventory and lead times have normalized to c. 8-10 weeks. Pricing pressure is easing as global vendors act with more discipline, although we have yet to see a broad-based price up-cycle. Book-to-bill ratios above 1x and backlog extending through 2026 support improving visibility and suggest that the recovery is increasingly driven by end-demand rather than aggressive restocking.

That said, the recovery remains bifurcated. Industrial/energy, automotive, and AI-related networking show stronger momentum, while consumer remains relatively weak. SG Micro provides a useful read-through: its 2Q26 industrial & energy, automotive, and networking & computing revenue grew >80%, c. 100%, and 104% YoY, respectively, versus a c. 8% YoY decline in consumer, including handsets down 11%. Encouragingly, management noted that industrial demand remains robust and consumer pressure has started to ease, while guiding 3Q revenue to grow >10% QoQ. We therefore see a more durable analog recovery versus our prior view, although the pace should remain uneven, particularly given lingering weakness in consumer applications.

SG Micro: Estimate revisions

We raise our EPS estimates 6% for 2026, 8% for 2027, and 14% for 2028: We see stronger-than-anticipated revenue momentum, driven by industrial, automotive, and networking/computing, alongside increasing AI-related contribution. Following management's increase to its 2026 revenue growth guidance, we raise our revenue forecasts 15% for 2026, 28% for 2027, and 36% for 2028. We expect continued market-share gains and product portfolio expansion to support growth, while improving product mix drives modest gross margin expansion. That said, continued R&D investment and management's strategy of reinvesting margin upside into market share gains should limit operating leverage. We now forecast gross margins of 51.8%, 52.1%, and 52.6% and net margins of 17.1%, 19.8%, and 21.1% in 2026, 2027, and 2028, respectively.

SG Micro: Valuation methodology

We raise our price target to Rmb100 from Rmb82: We factor in our EPS estimate changes in 2026 through 2028. We also roll our model forward from 2026 to 2H26-1H27.

We continue to derive our price target (which is our base case scenario value) from a residual income model. Our key assumptions are unchanged, including a cost of equity of 9.4% (2.0% risk-free rate, 5.9% risk premium, beta of 1.25), intermediate growth rate of 15%, and terminal growth rate of 5%.

We also raise our bull and bear case values to Rmb168 (from Rmb138) and Rmb58 (from Rmb48) respectively, implying 116x and 40x 2026e EPS.

Risk Reward – SG Micro Corp. (300661.SZ)

AI adds a new leg of growth; risk-reward still balanced

PRICE TARGET Rmb100.00

Base case, derived from a residual income model, which we believe best captures the stock's long-term value. We assume a 9.4% cost of equity (beta 1.25, risk-free rate 2.0%, and risk premium 5.9%), a medium-term growth rate of 15.0%, and a terminal growth rate of 5.0%. Our medium-term growth rate reflects SG Micro's position as one of the leading analog IC designers in China.

EQUAL-WEIGHT THESIS

- China's analog cycle has passed the trough, with recovery broadening into industrial and automotive, though consumer demand remains relatively soft.
- SG Micro should sustain strong top-line growth, supported by continued market share gains, broad product coverage, and upgraded 2026 revenue growth guidance - now 45% Y/Y.
- The long-term GM outlook should be stable, ranging from 48% to 52%, thanks to improvement in product mix and aggressive market share gains.
- SG Micro is actively engaging in optical networking business. It can supply 800G/1.6T optical modules.
- P/E is ~75x our new 2026 EPS estimate, which is not compelling to us - it stands over its historical average since 2017.

BULL CASE

Rmb168.00

116x 2026e EPS

SG Micro successfully ramps up its analog products and gains even greater market share in China. Our assumptions include: 1) revenue CAGR of >40% in 2025-28; 2) gross margin of >55% in 2026 vs. 51% in 2025; 3) operating margin over 25% in 2026.

BASE CASE

Rmb100.00

69x 2026e EPS

SG Micro successfully ramps up its analog products and gains market share in China. Our assumptions include: 1) revenue CAGR of 33% in 2025-28; 2) gross margin of 51.8% in 2026, up 1ppt from 2025, given easing pricing competition from foreign peers; 3) operating margin of 18% in 2026, up 4ppts vs. 2025.

BEAR CASE

Rmb58.00

40x 2026e EPS

Global economy heads into recession, resulting in slower analog product rollouts and weaker end demand. This leads to slower product upgrades and, hence, intensified competition from vendors. We also assume major customers find alternative partners with similar technologies, while new customer demand misses our base case assumptions significantly. Our assumptions include: 1) revenue CAGR of <10% in 2025-28; 2) gross margin of <45% in 2026; 3) operating margin of 10% in 2026.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality

of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of August 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1555	42%	450	48%	29%	767	44%
Equal-weight/Hold	1577	43%	395	42%	25%	770	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	559	15%	93	10%	17%	216	12%
Total	3,694		939			1754	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
