

NPO / CPO uptrend is coming...

... and the company appears well positioned in the supply chain, despite more competition risks

Action: Upgrade to Buy with higher TP of CNY231.5; implying 16.2% upside

Shenzhen T&S recorded mixed 2Q26 results, in our view, with top-line growth accelerating but GPM still under pressure, driven by an increase in costs and product mix changes. However, we see stronger momentum in the MPO (Multi Push-On) connector market in the next few years, driven by shipment growth in high-end optical transceivers, and the rising adoption of NPO (near-field packing optics) / CPO (co-packaged optics) in scale-up networks. T&S recently announced a new investment project of CNY720mn in Shenzhen, and we think its capacity expansion will accelerate, addressing one of our key concerns about the company's lack of capacity. Despite our concerns about more competition in the future, we think undersupply in the high-end optical connector market could lead to sequential growth opportunities in 2H26F and 2027F. In addition, we believe the stock also looks more attractive after the recent pullback. We upgrade the stock to Buy from Neutral and raise our FY26-28F revenue forecasts by 19.6%-39.6% to reflect the stronger market demand and faster shipments in the optical component sector. After resetting our GPM expectations, our FY26-28F earnings forecasts rise by 18.5-40.8%. Our new TP of CNY231.5 (CNY138 earlier) is based on 58x (previously: 45x) FY27F EPS of CNY3.99, in line with an FY26-28F earnings CAGR of 58%. The stock is trading at 49.9x FY27F EPS.

NPO / CPO in scale-up networks to drive demand for high-end MPO / MMC connectors, as well as shuffle box products

On 14 August, NVIDIA (NVDA US, Not rated) announced that its Spectrum-X CPO switches have entered full mass production (*news*). We believe rising demand from the CPO / NPO solutions should bode well for T&S's high-end connectors (i.e., MMC, or Miniature Multi-Fiber Connector) and shuffle box products, through a partnership with its major AI customer [i.e., Corning (GLW US, Not rated)]. Despite the overhang of more intensified competition, the company is still one of the leading suppliers of high-end optical connectors and components. We expect its shuffle box revenue to clock a 167% CAGR in FY26-28F, albeit from a low base. We also estimate the AI related revenue (including MPO / MMC / ferrule / shuffle box) would deliver an 82% CAGR in FY26-28F and contribute to 58% of its total sales in FY28F.

Company profile

Shenzhen T&S Communication is a China-based company mainly engaged in optical communication products, including ferrule, connectors, and other passive / active components. The company supplies optical component products to cloud computing data center and telecom customers.

Valuation Methodology

Our TP of CNY231.50 is based on 58x 2027F EPS of CNY3.99, in line with FY26-28F earnings CAGR of 58%. The benchmark index is CSI300.

Risks that may impede the achievement of the target price

Downside risks include: (1) weaker-than-expected demand for optical component market; (2) weaker-than-expected CPO penetration; (3) top customer's supply chain diversification; and (4) geopolitical risks.

ESG

Shenzhen T&S Communication provides optical communication products to telecom network and data center customers. The manufacturing of optical components requires land, equipment and other materials, which may impact the environment, while factory automation may help to improve its environmental friendliness.

Earnings forecast revisions

We raise our FY26-28F revenue forecasts by 19.6%-39.6% to reflect stronger market demand for MPO connectors and faster shipments. We also lower our FY26-27F GPM forecasts by 2.4-2.9pp to reflect the margin dilution due to cost increases and product mix changes. As a result, we raise our FY26-28F earnings estimates by 18.5%-40.8% led by the accelerating topline growth.

Our FY26F revenue/earnings forecasts are 7%/3% lower than WIND consensus, as we are more cautious on this year's shipment volume growth and margin dilution. Our FY27-28F revenue/earnings forecasts are 3-18%/-3-16% higher, as we are more positive on the CPO market penetration and MPO connector demand over the next two years.

Definition of Nomura Group's equity research rating system and sectors

The rating system is a relative system, indicating expected performance against a specific benchmark identified for each individual stock, subject to limited management discretion. An analyst's target price is an assessment of the current intrinsic fair value of the stock based on an appropriate valuation methodology determined by the analyst. Valuation methodologies include, but are not limited to, discounted cash flow analysis, expected return on equity and multiple analysis. Analysts may also indicate expected absolute upside/downside relative to the stated target price, defined as (target price - current price)/current price.

STOCKS

A rating of '**Buy**', indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months. A rating of '**Neutral**', indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months. A rating of '**Reduce**', indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months. A rating of '**Suspended**', indicates that the rating, target price and estimates have been suspended temporarily to comply with applicable regulations and/or firm policies. Securities and/or companies that are labelled as '**Not rated**' or shown as '**No rating**' are not in regular research coverage. Investors should not expect continuing or additional information from Nomura relating to such securities and/or companies. Benchmarks are as follows: **United States/Europe/Asia ex-Japan**: please see valuation methodologies for explanations of relevant benchmarks for stocks, which can be accessed at:

<http://go.nomuranow.com/research/m/Disclosures>; **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia, unless otherwise stated in the valuation methodology; **Japan**: Russell/Nomura Large Cap.

SECTORS

A '**Bullish**' stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months. A '**Neutral**' stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months. A '**Bearish**' stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months. Sectors that are labelled as '**Not rated**' or shown as '**N/A**' are not assigned ratings. Benchmarks are as follows: **United States**: S&P 500; **Europe**: Dow Jones STOXX 600; **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia. **Japan/Asia ex-Japan**: Sector ratings are not assigned.

Target Price

A Target Price, if discussed, indicates the analyst's forecast for the share price with a 12-month time horizon, reflecting in part the analyst's estimates for the company's earnings. The achievement of any target price may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for "use" as a "benchmark" as defined by the European Benchmark Regulation. Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. 'Stop loss' levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

The securities described herein may not have been registered under the US Securities Act of 1933 (the '1933 Act'), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act. Unless governing law permits otherwise, any transaction should be executed via a Nomura entity in your home jurisdiction.
