## Near-Term Trajectory Tempered on Softer Comms/ Consumer and Non-Linear Compute Ramp, But Long-Term Growth Levers Intact With Capex Funding Profile Better Than It Appears; Reit OW

**Overweight**

**AMKR, AMKR US**
Price (26 Oct 26):$36.81
**Price Target (Dec-27):$85.00**

AMKR delivered record Computing and Auto/Industrial revenue for the second consecutive quarter, with GM continuing to expand, but the composition of the Dec-Q guide and a materially stepped-up capex trajectory into CY27-28 drive our forward estimates lower even as the longer-term AI advanced packaging story remains intact. Sep-Q itself came in roughly in line with expectations - Computing grew +25% Q/Q (below mgmt's prior "~30% Q/Q" framing, attributed to WIP loading time rather than demand), Auto/Industrial grew +7% Q/Q to another record, and GM expanded +150bps Q/Q to 18.3% despite ~60bps of unfavorable FX plus residual Kumamoto earthquake impact, but the setup from here is more mixed. Our key takeaways: (1) the Dec-Q revenue guide of $1.9-2.0B (midpt flat Q/Q) came in below Street, with Comms guided down HSD% Q/Q on the SiP migration to Vietnam compounded by component shortages affecting both iOS and Android, and Consumer guided down mid-teens% Q/Q (worse than seasonal) on the same drag, though in our view this is more of a 1-2 quarter blip than a structural overhang given component tightness appears concentrated rather than broad-based; (2) Computing remains the key bull-case lever (Q4 guided up low-double-digits Q/Q, implying >50% Y/Y growth, with the flagship HDFO CPU scaling, an additional hyperscaler HDFO program ramping to full run-rate by 1H27, and two 2.5D networking/datacenter switch programs coming online), but the Q3 miss vs. the prior +30% framing points to the ramp cadence being less linear than previously assumed, and we are modestly tempering our near-term trajectory; (3) capex is stepping up materially, with CY27 facilities-only capex now framed at >$2B (Arizona ~$1.8B, Korea $400-450M, Vietnam $50M) plus incremental equipment capex, and CY28-29 as the Arizona Phase 1 ramp + Phase 2 construction overlap peak, but notably the capex funding profile is better than might be immediately apparent: we believe both Arizona Phase 1 and Phase 2 will qualify for the CHIPS Act 48D ITC on the vast majority of spend (a material multi-year FCF offset), the full ~$3B of NVDA prepayments is expected in CY27, and ~$500M of broader customer prepayments is already on the balance sheet across the 12-customer framework (with several more agreements under discussion at mid ($100s of millions) to larger scale ($billions)); (4) depreciation is stepping up materially - mid-teens% in CY26 with further acceleration in CY27 - a near-term GM headwind that will partially offset the Compute mix benefit; (5) the long-term AI advanced packaging story remains intact and we think AMKR remains uniquely positioned as the US/Korea geopolitically-dependable OSAT alternative, with Arizona Phase 2 customer allocation already pretty far advanced and broadening customer prepayment commitments supporting a durable multi-year growth trajectory. We lower our estimates but maintain our Dec-27 PT of $85. We maintain our Overweight rating on AMKR.

## Summary Investment Thesis and Valuation

### Investment Thesis

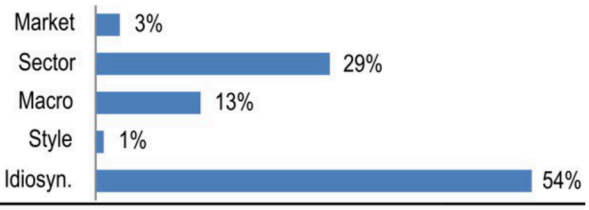

Our Overweight thesis is based on Amkor's strong market position in the outsourced assembly and test manufacturing market and its differentiated portfolio of advanced packaging solutions. We believe the company is well-positioned to intercept the strong underlying demand trends in semiconductor and the technology transition towards more advanced packaging. We see Amkor capturing more value in the manufacturing supply chain over time on new packaging innovation/complexities.

We see Amkor's revenue growth outpacing industry growth on 1) Amkor's strong technology/product differentiation in advanced packaging solutions, which are leveraged to the fast growing AI market; 2) increased emphasis by customers to diversify their manufacturing away from Taiwan/China; 3) continued strong share gains at its largest customers; and 4) continued trend to outsource manufacturing capacity (due to increasing manufacturing complexities).

### Valuation

Our Dec-27 price target of $85 (unchanged) is based on a ~25x P/E multiple (vs ~23x peer-group average) applied to our CY28 EPS estimate of $3.45. We believe Amkor should garner a premium multiple to its peer group given its broad manufacturing footprint/geographical positioning, strong leadership profile in advanced packaging solutions (85-90% of sales), and increasing exposure to the fast growing AI demand trends.

- **Record Computing and Auto/Industrial revenue for the second consecutive quarter; GM expansion continues despite ~60bps of FX and Kumamoto earthquake headwinds.** Sep-Qtr revenue of $1.99B (+5% Q/Q, ~flat Y/Y) came in roughly in line with Street $2.04B, with the composition of the quarter notably skewed toward the structural AI compute mix shift. Computing revenue grew +25% Q/Q to a new quarterly record (though below mgmt's prior "+30% Q/Q" framing, with the team attributing the shortfall to WIP loading time rather than demand or supply constraints) on continued ramp of the flagship HDFO CPU program plus initial contribution from an additional HDFO CPU program for a hyperscaler that began ramping in Q3. Auto/Industrial grew +7% Q/Q to another record on ADAS, in-car compute, and industrial strength (both end-markets +37% Y/Y in aggregate), while Comms declined -8% Q/Q on the strategic SiP migration to Vietnam, continued memory supply constraints, and build pattern changes, and Consumer grew +10% Q/Q on IoT and home electronics strength (though partially offset by premium-tier component shortages). GM of 18.3% was +150bps Q/Q (vs Street 19.0%), driven primarily by richer advanced packaging mix despite ~60bps of unfavorable FX and residual Kumamoto earthquake impact.
- **Dec-Q guide softer than expected on broadening Comms/Consumer weakness; capex trajectory stepping up materially with CY27 facilities-only capex now pegged above $2B.** Dec-Q revenue guidance of $1.9-2.0B (midpt $1.95B, roughly flat Q/Q) came in below Street ($2.05B) given deeper and broader end-market weakness than previously modeled. Comms is expected to decline HSD% Q/Q (worse-than-seasonal) on the SiP migration to Vietnam compounded by component shortages affecting both iOS and Android, Consumer is forecast to slip by mid-teens % Q/Q (also worse-than-seasonal) on the same premium-tier component drag, Computing is projected to grow LDD% Q/Q (implying >50% Y/Y growth and providing the key offset), and Auto/Industrial is expected +LSD% Q/Q on continued ADAS/industrial strength. GM guidance of 18.0-19.0% (midpt 18.5%) remains roughly flat Q/Q, as the Compute mix tailwind + lower SiP drag more than offset by continued unfavorable FX. EPS guidance of $0.65-$0.75 (midpt $0.70) came in below Street ($0.70).

# Investment Thesis, Valuation and Risks

## Amkor Technology *(Overweight; Price Target: $85.00)*

**Investment Thesis**
Our Overweight thesis is based on Amkor's strong market position in the outsourced assembly and test manufacturing market and its differentiated portfolio of advanced packaging solutions. We believe the team is well-positioned to intercept the strong underlying demand trends in semiconductor and the technology transition towards more advanced packaging. We see Amkor capturing more value in the manufacturing supply chain over time on new packaging innovation/complexities.

We see Amkor's revenue growth outpacing industry growth on 1) the company's strong technology/product differentiation in advanced packaging solutions, which are leveraged to the fast growing AI market; 2) an increased emphasis by customers to diversify their manufacturing away from Taiwan/China; 3) continued strong share gains at its largest customers; and 4) continued trend to outsource manufacturing capacity (due to increasing manufacturing complexities).

**Valuation**
Our Dec-27 price target of $85 (unchanged) is based on a ~25x P/E multiple (vs ~23x peer-group average) applied to our CY28 EPS estimate of $3.45. We believe Amkor should garner a premium multiple to its peer group given its broad manufacturing footprint/ geographical positioning, strong leadership profile in advanced packaging solutions (85-90% of sales), and increasing exposure to the fast growing AI demand trends.

**Risks to Rating and Price Target**
Downside risks include: (1) the global economy or any regional end market could suffer unexpected negative shocks or stop growing and push out the semiconductor recovery; (2) failure for AMKR to execute on its 2.5D advanced packaging capacity expansion or if AI infrastructure build-out slows; (3) disruption by its suppliers or disruption in its manufacturing facilities could affect its ability to provide manufacturing service; strong customer concentration and significant changes in customer demand could impact revenue; (4) an increase competition could limit revenue growth potential; and (5) the large stock ownership by the Kim family and selling of shares in the future could adversely affect the stock price.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

**Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:**
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

**General:** Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results.

Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
