Post market close on Oct 26, 2026, Envicool announced **3Q26 results with accelerating sales growth and surging order intakes and inventories. Net profit missed GSe and Visible Alpha Consensus Data** on FX losses and higher minority interest mostly driven by the Smart Connection subsidiary (e.g. quick disconnects and tubes & pipes), despite sequential firmwide GPM improvement on higher overseas sales mix. 3Q26 sales/GP/EBIT/NP were Rmb1,933mn/538mn/233mn/184mn (+33%/+26%/+18%/0% yoy), -1%/+2%/-4%/-13% vs. GSe, -21%/-22%/-34%/-30% vs. VA Consensus. 3Q26 GPM/OPM/NPM were 28%/12%/10% (-2pp/-2pp/-3pp yoy, +2pp/+1pp/0pp qoq), +1pp/0pp/-1pp vs. GSe, -3pp/-4pp/-1pp vs. VA Consensus. **The accelerating sales growth was mainly driven by the data center room cooling and server cooling businesses, while ESS cooling sales growth was stable with segment GPM under pressure by product mix change and domestic competition.** On the positive side, **contract liabilities** (i.e. advances from customers) and **inventories** (incl. raw materials, finished goods, and goods shipped but revenue unrecognized) surged to **record high levels** at Rmb665mn (+104% yoy/+106% qoq) and Rmb 2,507mn (+103% yoy/+62% qoq), indicating strong order intake and revenue recognition in the upcoming 1~2 quarters, in our view. Management also noted there are no severe bottlenecks in terms of supply chain availability, alongside ongoing capacity additions.

Key takeaways from the earnings call on Oct 26

Robust contract liabilities and inventories growth with increasing NPIs: Contract liabilities (i.e. advances from customers) reached a record high at Rmb665mn (+104% yoy/+106% qoq) by 3Q26, backed by company commentary that order growth accelerated during the quarter (likely including orders from large customers in North America, per GSe). Meanwhile, **inventories surged to Rmb 2,507mn (+103% yoy/+62% qoq)** due to a buildup

of raw materials, work-in-progress goods, and goods shipped but revenue unrecognized. In our view, this sets the stage for strong revenue recognition over the next 1~2 quarters. Per management, goods shipped but revenue unrecognized typically account for ~40% of total inventories, This bucket is mainly driven by data center room cooling projects that require onsite installation and customer acceptance, leading to a revenue recognition lag of 1 quarter or longer post-shipment. In contrast, the export-oriented businesses, including ESS cooling and certain product-focused data center cooling lines (e.g. the Google CDU project, based on our understanding) usually do not require Envicool's onsite installation and deployment and hence have limited impact to this inventory segment. Overall, company continues to see strong momentum in NPIs (new product introduction), supported by an expanding customer base across diverse liquid cooling product categories and applications.

Exhibit 1: Envicool contract liabilities and inventories were up 104% and 103% yoy respectively by 3Q26, signaling robust order intake and strong revenue recognition in the coming 1~2 quarters, in our view

Source: Company data, Data compiled by Goldman Sachs Global Investment Research

Continued capacity expansion and optimization: Capex were Rmb114mn in 3Q26, +15% yoy/+23% qoq as company continues to build new capacity for liquid cooling (with new facility in Zhongshan entering into production around late 3Q26 - early 4Q26) and optimize its manufacturing processes based on customer demand. So far, management does not see any severe choke points regarding its supply chain and production. That said, product shipment and revenue recognition timelines depend heavily on shifting customer requirements and product pacing.

Stable ESS cooling sales growth with GPM pressure: ESS cooling sales growth was stable in 3Q26 supported by solid order growth in 2026YTD, but segment GPM were under pressure mainly due to (1) product mix change in overseas markets, i.e. selling more integrated solutions with high content value and yet lower GPM, and (2) intense competition in the Chinese market although company remains selective on domestic

projects and focuses on those with relatively better profitability.

Sequential GPM improvement with higher overseas mix: Firmwide GPM rose by 2.5pp qoq to 27.8% in 3Q26 driven by increasing overseas sales mix. That said, NPM was -3.1pp yoy and -0.1pp qoq at 9.5%, mainly impacted by higher R&D expenses, FX losses of RMB 17mn, and higher minority interest related to better performance at Envicool Smart Connection Technology, a 55%-owned subsidiary specializing in quick disconnects and tubes & pipes.

Better operating cash flows: Operating cash flows were Rmb+152mn in 3Q26 (vs. Rmb-85mn in 3Q25). Total operating cash flows in 1-3Q26 were Rmb+214mn, improving vs. Rmb-319mn in 1-3Q25 and Rmb+156mn in 1-3Q24, which we believe was driven by increasing overseas business mix.

Investment thesis, valuation and risks

We are Buy-rated on Envicool. The company specializes in precision cooling technology, helping critical loads (e.g., data centers, servers, and energy storage systems) to operate in a highly controlled temperature/humidity environment, thereby enhancing their power usage efficiency (PUE) and reducing the total cost of ownership. We believe the digital economy and carbon reduction are long-term global focuses, and technologies – such as precision cooling – that enable and improve energy utilization efficiency will be increasingly adopted to achieve these development goals. Envicool's data center technology and products have been widely adopted by Chinese hyperscalers and telco customers. It is also a major supplier of cooling systems in the global energy storage market. With increasing attention on and investment in generative AI, we believe liquid cooling adoption will see a rapid pick-up, driving strong revenue growth in data center room cooling and server cooling for Envicool. We view current stock valuation as undemanding (on a current P/E basis) compared to our sector average, with a strong growth trajectory and an improvement in its margins/return profile.

Valuation: Our 12-month target price of Rmb79.0 is based on a 42x 2028E P/E discounted back to 2027E with a 10% cost of equity.

Downside risks: (1) Slow R&D/business progress with key customers; (2) tougher liquid cooling competition and margin risks; (3) ESS demand growth hiccups; (4) geopolitical changes impacting the global server/data center and ESS supply chain.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this

company.
