

Asia Network Quality 12.1

Country / City / Operator / Technology Stats

- Published every month, this report provides network quality statistics, by operator, across 15 Asian markets. Our previous report is [here](#).
- In this report, we discuss the growing importance of localized network performance in shaping the competitive dynamics across India's telecom market. We also discuss the transition from 5G standalone deployment to commercial adoption.
- Telcos with potential for market share gains due to network quality leadership are: **CSL, CMHK, Bharti Airtel, CelcomDigi, PLDT (Smart), Umobile, CHT**. The operators at risk of market share loss or capex upside due to network quality gaps are: **3HK, SIMBA, Hutch, Rakuten, IDEA, TPG (Vodafone)**.
- Korea:** SKT now leads over KT Corp and LGU+ in both 5G and 4G speeds.
- Philippines:** PLDT (Smart) remains superior in LTE speeds, but DITO has the lead when it comes to 5G speeds. PLDT has scope for share gains. However, it has struggled to gain share and reflate ARPUs. (our latest thoughts [here](#)).
- India:** Bharti Airtel continues to lead its peers on 4G speeds, but trails India's largest telecom operator on 5G speeds and availability. We expect 10–15% tariff hikes over CY26–28E as highlighted by the increase in floor prices by BHARTI (see latest thoughts [here](#)).
- Japan:** NTT Docomo continues to lead on both 4G and 5G speeds, but its network availability remains materially lower. We have changed our preference to Softbank > KDDI > NTT (from KDDI > Softbank > NTT) from the perspective of the business environment and medium-term EPS growth potential and watch for impact of revision of KDDI's roaming agreement with Rakuten (our latest thoughts [here](#)).
- Taiwan:** Chunghwa significantly outperforms FET and TWM on both LTE and 5G speeds. Beyond wireless, ICT continues to be an important earnings growth driver for FET and Chunghwa (check out our recent thoughts [here](#)).
- Singapore:** Singtel and Starhub lead on LTE speeds, while Simba lags. M1 leads on 5G speeds, while Simba lags materially behind. High LTE speeds limit upside from upselling 5G tariffs (our latest thoughts [here](#) and [here](#)).
- Thailand:** DTAC now leads in both LTE and 5G speeds over AIS and TRUE. We continue to expect price repair and value-based competition in Thailand keeping us optimistic on ADVANC and TRUE (latest thoughts [here](#) and [here](#)).
- Malaysia:** CelcomDigi delivers the fastest 4G speeds nationwide, while U Mobile offers Malaysia's fastest 5G network. In a tough competitive environment, we expect CDB and Maxis to improve Divs from FY27 and prefer them over Axiata (see [here](#)).
- Indonesia:** TLKM maintains its lead over XL and ISAT in LTE download speeds. ISAT is our top pick amongst Indonesian Telcos. While wireless competitive intensity is now lower, we believe TLKM continues to face competitive risks in wireless and broadband businesses. (our latest thoughts [here](#))
- Australia:** Optus displays the fastest LTE and 5G speeds. We are concerned about challenges from satellite and postpaid subscriber churn across the

industry, keeping us neutral on both TLS and TPG, with a preference for TLS. (our latest thoughts [here](#)).

- **HK SAR:** CSL (6823 HK) enjoys the fastest LTE speeds. In terms of 5G speeds, CMHK is at the top spot in HK.

Navigating India's Localized 5G Landscape

India's telecom market is transitioning from a phase dominated by pricing and nationwide 5G rollouts to one increasingly defined by customer experience and local market execution. As network coverage converges and tariff increases reduce pricing differentiation, operators are finding that subscriber gains and losses are increasingly determined at the city level rather than by national market leadership alone.

The evidence suggests that operators that are able to align network quality, capex, and commercial execution in strategically important markets are generating stronger subscriber outcomes. This dynamic is creating increasing divergence in performance across regions and highlighting the growing importance of localized competitive advantages.

Key Findings:

- Network quality is becoming a more important driver of subscriber acquisition and retention as India's telecom market matures.
- Market share gains are increasingly concentrated in cities where operators combine superior network performance with targeted commercial execution.
- Regional performance is emerging as a leading indicator of competitive positioning, creating growing divergence between national and local market trends.

Vodafone Idea: Defending strategic markets through targeted investment

Vodafone Idea remains under pressure at the national level, with the country's leader accounting for approximately **59% of Vi's net subscriber losses during 4Q25**. However, the company's performance in Mumbai demonstrates how focused investments can help defend strategically important markets despite broader competitive challenges.

The operator has committed to a [Rs.45,000 crore capex](#) plan that targets 17 priority circles, including Maharashtra. Alongside network upgrades, Vodafone Idea has implemented localized customer value management initiatives, digital bundles, and targeted promotional activities aimed at improving customer retention and strengthening its competitive position.

Figure 3: Vodafone Idea has network superiority in Mumbai, a leading metro area in India

Vi Mobile Market Share vs CQ Indexed to Competitors

Airtel: Converting network leadership into market share gains

Airtel has displayed a strong ability to translate network performance into subscriber growth. Since early 2024, the operator has increased its market share by approximately 1 percentage point, with around 73% of the gains attributable to switching activity from India's largest telecom player.

The gains have been concentrated in markets including Agra, Kota and Jhansi, where Airtel demonstrated strong network performance. This has been supported by sustained investment with [quarterly capex](#) exceeding Rs.110bn, alongside premium offerings such as Airtel Black.

Figure 4: Airtel has a network advantage compared to its competitors in Agra, Kota and Jhansi

Airtel Mobile Market Share vs CQ Indexed to Competitors

In conclusion, India's telecom market is moving into a phase where execution is likely to matter more than scale. As the industry shifts beyond network rollout and price competition, operators that effectively deploy capital, strengthen customer experience, and build positions in strategically important markets are likely to emerge as the key beneficiaries of the next phase of market share evolution.

The device ecosystem has matured alongside network deployment. [GSA](#) reports over 2,750 announced SA-capable devices, a 30% y-y increase. Early constraints related to chipset availability and handset support have largely been resolved, removing one of the key structural barriers that slowed initial SA adoption.

Figure 6: SA availability across markets

The share of populated geohash7 areas (~153x153m) where users observed 5G SA. A location is considered populated if its population is greater than zero. Results are based on crowdsourced data and reflect only areas with Opensignal's users' recorded measurements. Data collection period: Oct 2025-Dec 2025
Source: Opensignal

Strong networks deliver the largest performance gains

SA architecture alone does not guarantee better network performance. Unsurprisingly, operators with strong spectrum assets and denser network infrastructure continue to deliver the greatest improvements in latency, responsiveness, and overall user experience. In contrast, operators with weaker network foundations have seen more modest gains despite deploying SA.

Figure 7: 5G SA delivers download uplift over NSA in most markets

Data collection period: Oct 2025-Dec 2025
Source: Opensignal

Singapore illustrates a disciplined, centrally coordinated approach. Under the oversight of IMDA, the telecom regulator, SA was positioned early as the foundation of the country's Smart Nation strategy. With strong spectrum depth and high cellsite density, standalone deployment was integrated into performance objectives from the outset rather than layered onto an existing NSA footprint.

South Korea is a particularly interesting example. Absolute download speeds on SA exceed 600 Mbps, yet the uplift versus NSA is only +29%. This reflects a mature and highly optimised NSA baseline. South Korea also combines substantial mid-band spectrum, dense site deployment and strong backhaul. [Regulatory policy](#) is now reinforcing this architectural shift: the government has mandated that 5G base stations be connected to standalone core equipment by 2026, aligning network evolution with national AI and 6G ambitions.

Figure 8: Network consistency improves with 5G SA, but not everywhere

Data collection period: Oct 2025-Dec 2025
Source: Opensignal

Figure 9: 5G SA typically reduces latency, but not uniformly

Data collection period: Oct 2025-Dec 2025
Source: Opensignal

Monetization is still evolving

Although SA enables capabilities such as network slicing, private wireless networks, ultra-low latency connectivity, and network APIs, commercial adoption remains limited. Consumer revenues continue to be driven largely by traditional connectivity services, while enterprise use cases are still in the early stages of adoption. Future growth is expected to come from enterprise applications where SA provides differentiated network capabilities and service quality.

In conclusion, the rollout of 5G standalone has established the technical foundation for the next generation of mobile networks. The focus is now shifting towards increasing adoption and expanding enterprise use cases, which will determine the extent to which operators are able to realize the full commercial potential of SA.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Manager or Co-manager:** J.P. Morgan acted as manager or co-manager in a public offering of securities or financial instruments (as such term is defined in Directive 2014/65/EU) of/for NTT (9432), SoftBank (9434) or related entities within the past 12 months.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Client/Investment Banking:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as investment banking clients: NTT (9432), SoftBank (9434) or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Client/Non-Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-securities-related: KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Investment Banking Compensation Received:** J.P. Morgan has received in the past 12 months compensation for investment banking services from NTT (9432), SoftBank (9434) or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of KDDI Corp (9433), NTT (9432), SoftBank (9434) or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss

arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
