

Iron Mountain Inc. (IRM)

Data centers powering the next phase of IRM's growth

IRM

12m Price Target: **\$155.00**Price: **\$112.33**Upside: **38.0%**

IRM's expanding data center platform is accelerating its transformation into a faster-growing information management and digital infrastructure company. Data centers, ALM and digital solutions increased from 15% of revenue in 2021 to 34% in 2026E, with data centers nearly doubling their contribution from 7% to 13% and benefiting from durable AI and cloud infrastructure demand. Our deep dive finds that IRM has built a scaled global platform with 529 MW of operational capacity, 160 MW under construction and 684 MW held for development, representing nearly 1.4 GW of total capacity potential. Leasing regained momentum in 2026, pricing remains favorable and 71% of capacity under construction is pre-leased, providing substantial visibility as IRM targets ~325 MW of energizations over the next 18-24 months. We believe industry conditions remain supportive, with record-low vacancy, elevated pre-leasing and power constraints limiting the availability of completed and powered capacity despite record construction. We raise our 2026-2028 data center revenue estimates by 2%, 13% and 12%, increasing our 2027E and 2028E AFFO per share estimates by 3% and 4%, respectively. IRM trades at 17.1x 2027E P/AFFO, below the self storage and industrial peer REIT median of 20.9x despite superior long-term AFFO growth, supporting re-rating potential as the growth portfolio scales and leverage declines.

Iron Mountain Investment Thesis

Growth portfolio transforms IRM's business mix, growth outlook and terminal value. IRM is transforming from a legacy records management provider into a broader information management and digital infrastructure company through the expansion of its growth portfolio. Data centers, asset lifecycle management and digital solutions increased from 15% of revenue in 2021 to 34% in 2026, as total company revenue grew from \$4.5bn to \$8.0bn. The growth

Source: Company data, Goldman Sachs Research estimates.

portfolio includes data centers, which provide secure digital infrastructure, ALM, which provides secure data erasure and disposition of retired IT equipment, and digital solutions, which digitizes physical information and automates content-intensive workflows. These businesses collectively grew more than 50% y/y in 2Q 2026 and should sustain 20%+ organic growth, by our estimates, supporting high-single-digit to low-double-digit organic revenue growth for IRM compared with mid-single-digit growth in legacy RIM. Data centers are central to this transformation, having nearly doubled their revenue contribution from 7% in 2021 to 13% in 2026 and providing IRM with exposure to durable AI and cloud infrastructure demand. As the growth portfolio becomes a larger share of the company, IRM should sustain faster consolidated revenue growth and generate a higher terminal value since a greater share of future revenue and cash flow will come from businesses with stronger long-term growth prospects.

Legacy RIM provides a resilient financial foundation. IRM's legacy records information management business, representing ~65% of revenue, provides the stable revenue and cash flow foundation supporting the company's growth transformation. Physical storage volumes remain stable to modestly positive, supported by long retention periods, continued outsourcing, customer consolidation and international adoption. The business also has durable pricing power, with annual price increases generally in the 5-6% range reflecting the importance of security, regulatory compliance, chain of custody and global service consistency. Low customer churn and the operational complexity of relocating physical records reinforce the recurring nature and visibility of storage revenue. RIM generates strong margins and substantial cash flow, supporting IRM's dividend and providing a stable earnings base that increases the company's capacity to use debt to fund data center development.

Exhibit 3: Revenue growth has been driven by price increases while volumes have remained stable

RIM price and organic volume growth

Growth investment supports gradual deleveraging. IRM's leverage profile continues to improve even as the company invests heavily in data center development, demonstrating that its growth capex is generating attractive incremental earnings. As a REIT, IRM must distribute at least 90% of taxable income, limiting retained capital and increasing its reliance on debt and other external funding to finance expansion. The vast majority of growth capex is directed toward data centers, where IRM generally secures long-duration customer commitments before construction and targets low-teens development yields. These investments are driving rapid revenue and EBITDA growth, allowing earnings to expand faster than debt despite elevated absolute capital spending. Net lease-adjusted leverage declined to 4.8x in 2Q 2026, the lowest level since before IRM's 2014 REIT conversion and below the 5.0x midpoint of the company's 4.5-5.5x target range. Continued EBITDA growth and a rising contribution from energized data center capacity should support further balance sheet deleveraging over time.

Exhibit 4: IRM is within its lease adjusted net leverage ratio target

IRM lease adjusted net leverage ratio

Iron Mountain Expansion into Data Centers**IRM has built a scaled global data center platform with an increasing wholesale**

focus. IRM entered the data center market in 2017 and accelerated its expansion through the 2018 acquisitions of IO Data Centers for \$1.4bn and EvoSwitch for \$237mn, establishing an initial presence across key US and European markets. The company has since expanded to 529 MW of operational capacity across 13 markets, with 97.4% of stabilized capacity leased, plus 160 MW under construction and 684 MW held for development as of 2Q 2026. IRM's nearly 1.4 GW capacity portfolio spans major data center markets across North America, Europe and Asia, allowing the company to support hyperscale, cloud and enterprise customers across multiple regions. IRM initially focused on retail colocation for enterprise customers but has increasingly oriented new development toward wholesale colocation, where customers lease multi-megawatt capacity under long-duration contracts. Wholesale deployments have become the primary driver of incremental capacity and growth, enabling IRM to secure larger commitments before construction is completed and increasing visibility into future utilization and development returns.

Northern Virginia and Arizona form the core of IRM's operational portfolio and provide exposure to two large, power-constrained US data center markets.

Northern Virginia represents ~44% of IRM's operational capacity, with 232 MW across seven facilities that are nearly fully leased. As North America's largest data center market, Northern Virginia benefits from dense fiber connectivity and an established ecosystem of cloud, network and enterprise customers. Market inventory reached 4,497 MW in 1H 2026, yet vacancy declined to 0.2% and 80.4% of capacity under construction was pre-leased, reflecting strong demand despite land, permitting and power constraints. IRM has another 255 MW of planned capacity in Northern Virginia, including 60 MW under construction that is fully pre-leased and 195 MW held for development. Arizona represents another ~24% of operational capacity, with 129 MW across four fully

leased facilities in Phoenix and Scottsdale, where campus-scale sites and proximity to West Coast demand have attracted hyperscale development. Power delivery restrictions in both markets increase the strategic value of IRM's operational capacity and land and power positions.

Exhibit 5: ~70% of operational capacity is in Northern Virginia and Arizona

IRM's development pipeline provides a multi-year runway for capacity and revenue growth. IRM has expanded its total capacity portfolio from ~100 MW in 2017 to nearly 1.4 GW as of 2Q 2026, including 529 MW operational and 844 MW of additional development capacity. The company plans to energize ~325 MW over the next 18-24 months, representing a substantial increase relative to its current operational footprint. For context, 325 MW could support up to ~\$650mn of annualized revenue based on the current portfolio average of ~\$2mn per operational MW, although the ultimate contribution will depend on retail versus wholesale mix, pricing, power density and customer ramp timing. High pre-leasing and long-duration contracts provide visibility into utilization and reduce lease-up risk as this capacity enters service. The timing of revenue growth will depend primarily on construction completion, power delivery, lease commencements and customer ramping.

Exhibit 7: IRM's data center capacity has increased to 1.4 GW

IRM data center capacity

Source: Company data, Goldman Sachs Global Investment Research

Data center leasing has regained momentum in 2026 following a temporary slowdown in 2025. IRM signed 139 MW, 124 MW and 116 MW of new leases in 2022, 2023 and 2024, respectively, significantly above historical levels and reflecting strong enterprise and hyperscaler demand. Leasing moderated to 62 MW in 2025 as hyperscalers prioritized larger AI training campuses outside IRM's traditional focus and ~98% occupancy limited immediately available capacity. Activity began to recover in 2H 2025 as customer demand broadened toward cloud and AI inference deployments that better align with IRM's footprint and development pipeline. IRM signed 110 MW through July 2026, including a 75 MW lease announced in July, already exceeding the company's original target of more than 100 MW for the full year. Continued hyperscaler investment in cloud and AI infrastructure, together with IRM's expanding development pipeline, should support leasing above 2025 levels. Annual leasing will likely remain uneven given the size and timing of individual wholesale contracts, but the 2026 rebound demonstrates IRM's ability to participate in larger-scale cloud and AI deployments.

Exhibit 8: New leases signed have exceeded IRM's original 2026 target
IRM new leases signed, in megawatts

Source: Company data

Lease pricing remains favorable across new, commenced and renewed contracts.

New lease pricing increased from \$122/kW/month in 2023 to \$173 in 2024 and \$181 in 2025, reflecting strong demand for powered capacity. Commenced lease pricing similarly increased from \$99/kW/month in 2023 to \$121 in 2024 and \$150 in 2025 as previously signed contracts moved into revenue. Renewal pricing remained materially higher at \$262/kW/month in 2025, despite moderating from \$285 in 2024, with annual pricing influenced by customer, geography, power density and contract mix. In 2Q 2026, favorable pricing and lease commencements contributed to 39% y/y data center revenue growth, and renewal spreads remained strong at 12% on a cash basis and 14% on a GAAP basis. We believe higher new and commenced lease rates, together with continued positive renewal spreads, should support data center revenue growth as contracted capacity commences and existing leases renew.

Exhibit 9: Lease pricing remains favorable across contract types

IRM lease prices, \$/kW/month

Source: Company data

Long-duration contracts provide revenue visibility with gradual mark-to-market upside. IRM's data center portfolio has a weighted average lease expiry of 10.2 years, reflecting its exposure to hyperscalers and large enterprise customers that typically sign long-duration contracts. Only 6.7% of leased MW and 13.5% of annualized GAAP rent expire through 2027, limiting near-term rollover risk and providing strong revenue visibility. Expirations remain manageable through 2033, with no single year accounting for more than 10.2% of leased MW or 11.0% of annualized GAAP rent. Another 60.1% of leased MW and 51.5% of annualized GAAP rent expire after 2033, extending the duration of IRM's contracted revenue base. The staggered expiration schedule limits rollover concentration and reinforces the durability of contracted revenue, with positive renewal spreads supporting gradual mark-to-market upside and incremental organic growth as leases renew.

Exhibit 10: IRM has a weighted average lease expiry of 10.2 years with ~52% of annualized rent expiring after 2033

IRM data center lease expiration, 2Q 2026

Data Center Customer Lease Expiration					
Year	Number of Leases Expiring	Total MW Expiring	Pct of Total MW	Annualized GAAP TCV Rent Expiring	Pct of TCV Annualized Rent

Source: Company data

Lease commencements and new capacity are accelerating data center revenue growth and expanding EBITDA margins. IRM has generated organic data center revenue growth of more than 20% annually since 2022, including 37% y/y growth in 2Q 2026, supported by capacity commencements, higher lease pricing and faster-than-anticipated customer ramping. Current growth largely reflects the conversion of prior leasing into revenue, including 125 MW signed in 2023 and 115 MW in 2024, as IRM completes facilities and contracted capacity enters service. Demand is increasingly coming from hyperscalers, cloud providers and AI infrastructure customers signing multi-megawatt leases under long-duration contracts, increasing revenue visibility and accelerating the utilization of newly developed facilities. Pricing has also moved higher, with new and commenced lease rates increasing meaningfully over the past several years. IRM offers these customers faster access to land, power and operational infrastructure through hyperscale-ready campuses, established power agreements and a global platform with security, compliance and sustainability capabilities. Strong revenue growth, positive renewal spreads and operating leverage expanded data center EBITDA margins from 42.0% in 2021 to 51.8% in 2025, with revenue increasing at a 22.0% CAGR from 2019 to 2028E based on our forecasts.

Data Center Industry Trends

AI and cloud investment are driving a multi-year expansion in global data center capacity. Our data center analysts forecast global capacity will increase from ~101 GW in 2025 to 217 GW by 2030, representing a 17% CAGR and 116 GW of incremental capacity. Hyperscaler-owned facilities and cloud, neocloud, wholesale and retail providers should account for 70–90% of annual additions, with the US representing 60–70% of global additions. At ~\$50bn of infrastructure investment per GW, this buildout could require nearly \$6tn of cumulative capital across servers, networking equipment, power infrastructure and physical data center facilities. Visible Alpha consensus forecasts for hyperscaler capital spending of ~\$1tn annually on average support this investment outlook and exclude additional spending by private AI companies and data center platforms. Capacity forecasts also continue to increase, with our data center team's latest 2026–2030 estimates ~5% above its 4Q 2025 forecasts and 13% above its 3Q 2025 forecasts. The scale and continued upward revision of capacity requirements support a multi-year investment cycle and expanding demand for third-party data center capacity, benefiting providers such as IRM.

Exhibit 13: Global data center capacity should scale to ~217 GW by 2030

Global data center capacity

Source: 451 Research, Goldman Sachs Global Investment Research

Demand continues to absorb new capacity before completion despite record industry construction.

According to CBRE, North American primary market inventory increased 34% y/y to 10,903 MW at the end of 1H 2026, and capacity under construction increased 25% to a record 7,481 MW. Vacancy nevertheless declined 20 bps y/y to a record-low 1.4%, leaving only ~148 MW of available operational capacity across the eight primary markets. Net absorption increased 11.7% y/y to 1,456 MW in 1H, led by Northern Virginia, Dallas-Fort Worth, Atlanta and Phoenix. Furthermore, 80.4% of capacity under construction was already pre-leased, up from 74.3% one year earlier, leaving less than 1,500 MW of uncommitted future capacity, equivalent to only ~six months of demand at the prevailing absorption rate. Strong absorption, record-low vacancy and elevated pre-leasing suggest that demand should continue to absorb new capacity and limit the risk of industry oversupply, particularly given the scarcity of completed, powered and uncommitted capacity. For IRM, these favorable supply-demand conditions reduce the risk that its development pipeline enters an oversupplied market and increase the likelihood of contracting capacity before completion.

Exhibit 14: Vacancy rates are low across most primary data center markets

Data center wholesale primary market fundamentals, 1H 2026

Market	Inventory (MW)	Y/Y Change (MW)	Available MW	Vacancy Rate	H1 2026 Net Absorption	Rental Rates (kW/mo)
Northern Virginia	4,497	+1,016	10.8	0.2%	468	\$190-235
Atlanta	1,803	+524	29.5	1.6%	33	\$185-200
Dallas-Ft. Worth	1,433	+563	39.6	2.8%	352	\$160-185
Phoenix	1,069	+384	12.1	1.1%	260	\$175-215
Chicago	911	+219	20.0	2.2%	(3)	\$195-225

Source: CBRE

Power access has become the primary constraint on deliverable data center capacity. Our Sustain team expects global data center power demand to increase 170% from 2025 to 2030, with more than 60% of incremental demand coming from the US. The team expects this growth in electricity demand to be met primarily through additional natural gas generation and meaningful growth in renewable power. Physical delivery remains constrained by generation, transmission, substations, electrical equipment, permitting, skilled labor and community approvals, creating a meaningful gap between announced and deliverable capacity. CBRE's 2026 Data Center Outlook notes that power cost and delivery speed increasingly outweigh connectivity in site-selection decisions, particularly for large projects requiring contiguous power blocks. These constraints are increasing the value of operational capacity and development sites with credible access to power. For IRM, industry power scarcity should strengthen its competitive position since its development pipeline is supported by secured land and power commitments, and the company indicated in our discussions that it remains confident in its ability to procure and deliver the power required for planned development.

Exhibit 15: GS sees 170% global data center power demand growth in 2030 vs. 2025 levels, more than 60% of which comes from the US

Data center (AI + non-AI) power demand in US and rest of world, TWh

Estimate Changes, Valuation and Risks

Raising data center revenue estimates. We raise our 2026–2028 data center revenue estimates by 1.9%, 13.1% and 11.7%, respectively, reflecting stronger leasing activity, favorable pricing and a greater contribution from capacity commencements. The revisions increase our total revenue forecasts by 0.2% in 2026 and 1.7% in both 2027 and 2028, representing growth of 15.8%, 9.6% and 8.4%, respectively. Our 2026–2028 EBITDA margins are unchanged at 37.1%, 37.2% and 37.3%. We raise our 2026–2028 AFFO per share estimates by 0.1%, 2.9% and 3.5% to \$5.91, \$6.55 and \$7.21, representing growth of 14.2%, 10.9% and 10.0%, respectively. The larger revisions in 2027 and 2028 reflect a greater contribution from capacity commencements as IRM completes facilities and customers begin occupying and using the contracted capacity.

Superior growth supports our higher price target and re-rating potential. We raise our 12-month price target from \$153 to \$155 based on 22.5x (23.0x prior) our NTM + 1YR AFFO per share estimate of \$6.87, up from \$6.65. We lower our target multiple to reflect REIT peer group multiple compression in light of higher interest rates. IRM currently trades at 17.1x 2027E P/AFFO, representing a premium to the self-storage median of 16.4x but discounts to the industrial REIT median of 21.9x and combined peer median of 20.9x. IRM's long-term AFFO growth outlook of ~11% exceeds the combined peer median of 6.2%, including 2.6% for self-storage REITs and 8.4% for industrial REITs. Our target multiple comes above the peer group median to reflect IRM's superior growth outlook and rising contribution from data centers, ALM and digital solutions, partially offset by execution risk associated with the company's transformation and capital-intensive data center expansion. Continued data center leasing and capacity energization, growth in ALM and digital solutions, and further deleveraging are drivers of valuation multiple expansion.

Key risks include data center execution, financial leverage and pressure on legacy RIM. Power delivery or construction delays, weaker leasing, slower customer commencements and hyperscaler self-build activity could defer data center revenue or reduce development returns. IRM's capital-intensive growth strategy and REIT distribution requirements increase reliance on external funding, making investment capacity and deleveraging sensitive to financing conditions. Weaker pricing, declining storage volumes or accelerated digitization could pressure legacy RIM's recurring revenue and cash flow. Additional risks include acquisition integration, FX, cybersecurity and data privacy.

Disclosure Appendix

Reg AC

We, George K. Tong, CFA, Sami Nasir, CFA and Alex Lakritz, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: George K. Tong, CFA Goldman Sachs & Co. LLC, Sami Nasir, CFA Goldman Sachs & Co. LLC, Alex Lakritz Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Iron Mountain Inc. is/are relative to the other companies in its/their coverage universe: ADT Inc., Bright Horizons Family, BrightView Holdings, Cintas Corp., Clarivate, CoStar Group, Equifax Inc., FactSet Research Systems Inc., Fair Isaac Corp., Gartner Inc., H&R Block Inc., Iron Mountain Inc., KinderCare Learning Cos., Korn Ferry, MSCI Inc., Manpower Group, McGraw Hill, Moody's Corp., Phoenix Education Partners, Pitney Bowes, Robert Half International Inc., Rollins Inc., S&P Global Inc., The Brink's Co., Thomson Reuters Corp., TransUnion, UL Solutions, Verisk Analytics Inc., Vestis Corp.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in

part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst – SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
