Goldman Sachs & Co. LLC

This week in the Pulse, we ask our senior analyst team to summarize investor feedback received on the names included in our Ten Stock Ideas note from last week. Our senior analysts share their responses to the feedback we have received, as well as the underlying data that drives our conviction in these ten stock ideas.

Our Ten Energy Ideas consist of the following stocks:

Majors: COP

Energy Services: PWR, BKR

Midstream: TRP, GLNG

E&P: PR, AR, OXY

Refining: DINO

Utilities: DUK

Majors:

ConocoPhillips (COP)

Investor sentiment on ConocoPhillips (COP) continues to lean positive, with shares experiencing a strong August, softer September, and solid start to October again. Despite a constructive commodity price backdrop, key areas of pushback relate to execution risk across major growth projects, geopolitical uncertainty in the Middle East, and expectations for long-term capital spend. First, investors focus on operational execution at the Willow project, keeping a close eye on construction work this winter and the sea lift of processing modules next summer, after a significant revision to capital guidance last year. With this said, we note the project is over 50% complete and remains on track for first oil in early 2029. Second, investors look for updates on NFE and NFS amid ongoing supply disruptions in the Middle East. We expect a gradual recovery in regional production and note management remains confident in Qatar LNG projects, with the first train at NFE tracking for the early part of next year. Third, investors raise questions around the magnitude of a capital spend step-down as growth projects come online. We continue to highlight a $7 bn free cash flow inflection as NFE, NFS, Port Arthur, and Willow ramp up, driving a 20%-25% free cash flow per share CAGR at a long-term Brent price of $75/b. This should support a strong return of capital program that targets 45% of cash from

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

operations to shareholders through the cycle. In a challenging geopolitical environment, we also prefer advantaged OECD exposure, particularly in the Lower 48, where management guides to steady, low-single digit production growth.

Energy Services:

Quanta Services (PWR)

Investor pushback for PWR and our Specialty Contractor coverage continues to focus on the regulatory environment for large transmission and data center projects and the earnings impact from potential project push outs by state legislators. While we are mindful of cautiousness around the space, remain constructive on PWR as we view the majority of the company's current earnings driven by non-data center related revenue as PWR remains the largest within the Transmission & Distribution build-out space. We have also seen multiple 765 kV lines receive approval recently, which we view as a positive indicator for future 765 kV lines that are in the permitting process. We do not anticipate PWR to see revenues from 765 kV lines until late 2027/2028 as many of the projects are still going through the permitting process. Due to this, we view PWR's near-term earnings as insulated from potential project push out amid the current regulatory environment, and continue to see the permitting of large projects as a positive for PWR's long-term earnings profile.

Baker Hughes (BKR)

We continue to receive inbounds on BKR after our re-instatement on the stock, as many investors look to 3Q results as an indicator for the integration of Chart into the business. Following the softer than anticipated Chart update, particularly around backlog, pushback has been largely focused on the forward earnings progression of the legacy Chart business. We view the integration of Chart as one of the drivers of earnings over the long-term, where we believe the incremental products and services should drive market share. We also see a strong orders outlook for BKR as the company is exposed to both power and LNG markets. Notably, the company has seen increasing orders for small turbines for Behind-the-Meter power applications, signing agreements with KGS and, more recently, VG to provide the equipment. As BKR remains one of the key OEMs within this space, we estimate the ability for the company to maintain strong orders growth over the next several years within the IET segment. Lastly, we note some conversations have been around the company's leverage profile following the Chart transaction. That said, we are constructive on the cash flow generation of the company which we believe should drive deleveraging efforts.

Midstream:

TC Energy (TRP)

Sentiment on TRP has been broadly supportive, though pushback has generally focused on: 1) higher rates, which have historically weighed on TRP's multiple; 2) ongoing questions around the pace of natural gas pipeline growth announcements given the broader perceived pause in power-related project FIDs; and 3) some investors more focused on Canadian G&Ps given their higher torque to in-basin growth. On a more micro front, some investors were more bearish on the potential for growth on TRP's regulated Canada gas pipeline business (NGTL), where underlying activity (gas supply growth) remains strong but lower regulated return frameworks leave new projects

relatively less attractive. While acknowledging the latter should put some ceiling on segment growth, we still see opportunities for creative structuring by TRP to drive upside above recent EBITDA growth levels. Some also focused on funding requirements, though any need for other capital raises (hybrids, equities, or otherwise) in our view would still only come alongside material increases to the project backlog.

Golar LNG (GLNG)

Sentiment has also been supportive for GLNG given investor views of hard upcoming catalysts on projects, unchallenging valuation, and the ongoing strategic review. Most pushback centers on broader views around the long-term global LNG outlook, with investors concerned around the potential for a mismatch in supply/demand emerging in 2028+ - which could, all else equal, reduce the need for future projects by GLNG. Pushback on the company-specific side: 1) the still-on-the-come cash flow profile, with more meaningful cash from operations not expected until ~mid-2027 when their second FLNG vessel comes into service; 2) the geographic mix of GLNG's currently-contracted EBITDA and perceived relatively high EM exposure; 3) a historically high implied discount rate in the market relative to perceived growth potential; 4) funding flexibility as it looks to roll cash flow from one project to the next; and 5) broader execution risk given the size of the company relative to the large set of projects underway.

E&P:

Occidental Petroleum (OXY)

Following our recent upgrade note on September 30, and subsequently, OXY's addition to the America's Conviction List compiled by our Investment Review Committee, we have received positive feedback on the stock given the visibility management has provided on the mechanics of OXY's targeted $4.0 bn in cash flow improvement by 2030, as well as a broadly constructive view on OXY's ability to achieve these sustainable improvements. We have also received constructive inbounds on OXY's differentiated approach to advanced recovery and the 4 BBOE EOR opportunity, as the company maintains extensive CO2 infrastructure that supplements onshore advanced recovery opportunities. Investors broadly seek more clarity on the extent to which management allocates incremental capital to these projects in the context of OXY's increased focus on driving efficiencies. Much of the pushback we have received on OXY has centered around the company's more limited outlook for return of capital relative to other large cap E&P peers, although investors generally seek clarity on the potential for additional shareholder returns. As strip oil pricing has remained supportive, we continue to see a constructive outlook for shareholder returns growth beyond the near-term focus on deleveraging, and we seek clarity on management's deleveraging goals beyond the $10 bn principal debt target, which we see strong line of sight for OXY to achieve by early 2027.

Permian Resources (PR)

We continue to receive positive feedback on PR and continue to see valuation as compelling at attractive levels despite meaningful YTD outperformance of +71% relative to the XLE at +51%. Much of the positive feedback for PR has focused on the company's clear strategy of compounding FCF per share growth over time, and we continue to hold a constructive view on PR's opportunity for organic growth as we see a 13% year-over-year increase in FCF per share for the company in 2027E, with additional

inorganic upside potential driven by PR's success with its ground game strategy. Additionally, we see momentum for PR heading into 3Q26 earnings, as the company beat and raised on oil production during 1Q26 and 2Q26 earnings, and as pricing for oil and Waha gas stayed at supportive levels during 3Q26, we seek more clarity on PR's ability to optimize oil production from existing operations during the quarter. Investors have seen PR as a notable beneficiary of an elevated Waha pricing outlook, as we see PR generating $470 mn in natural gas sales in 2027E relative to $132 mn in 2025. We also see valuation as compelling relative to peers, with PR shares trading at a 15% FCF yield on average 2027/2028 estimates relative to peer average of 12% (peers include FANG, EOG, MGY, DVN, OVV).

Antero Resources (AR)

Sentiment on AR has been bifurcated as investors see compelling valuation for AR at current levels relative to peers while remaining cautious on the outlook for 3Q26 earnings results given softer in-basin gas pricing late in 3Q26. More broadly, investors have remained constructive on AR's idiosyncratic cost savings story given the strong visibility into the timing and mechanics of the $0.35/Mcfe EBITDAX margin enhancement by YE2028 relative to 2025. In the near-term, investor conversations have centered around AR's increased dry gas development on the back of the HG Energy transaction, particularly AR's outlook on the option for an incremental $200 mn in growth capital spending within the 2026 capital program and the implications on 2027 volume growth. Additionally, conversations have centered around AR's competitive positioning to capture new demand from commercial natural gas supply agreements with power supply end markets linked to emerging data center developments. We see AR's self-help initiative and organic growth opportunity as compelling in the context of valuation screening as cheap at current levels, as we see AR trading at a 14% FCF yield relative to Appalachian peers at 10% (peers include EXE, EQT, RRC).

Refining:

HF Sinclair (DINO)

Investor feedback on HF Sinclair (DINO) has largely been mixed following our *Q4 Ten Stock Ideas* note, with key areas of pushback centering around (1) sector-wide refining outperformance YTD, and (2) demand, particularly given we are approaching a seasonally weak period for PADD 2 margins. While we remain mindful of refining equities' YTD outperformance relative to the broader XLE alongside seasonal softness in PADD 2, we continue to see room for positive consensus estimate revision potential over the near and medium term. We continue to believe margins should remain elevated given tight supply/demand fundamentals amid ongoing capacity disruptions, and we also expect elevated freight costs to provide sustained support for pipeline-dependent crude differentials such as WTI/WCS, ultimately positioning our estimates ~9% above DINO FactSet consensus for 2026 EBITDA. Lastly, while select investors continue to seek clarity on the executive succession, recent leadership changes such as the promotion of Mr. Steven Ledbetter to President and COO, indicate the process is moving forward in-line with management commentary. Taken together, we believe DINO maintains an attractive risk/reward profile, driven by the company's ongoing commitment to improving refining operations in niche markets, robust non-refining earnings contributions, and attractive capital returns profile.

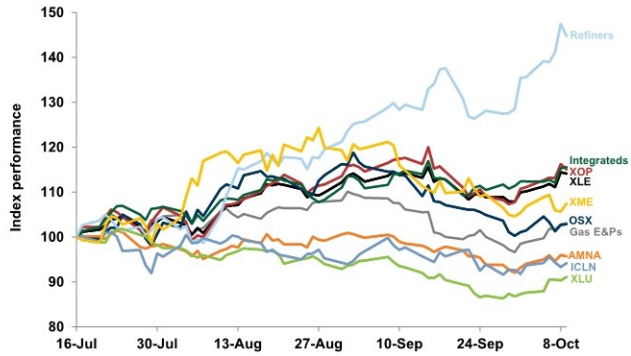

Utilities:

Duke Energy (DUK)

The main areas of pushback we receive on our constructive DUK view are (1) EPS growth, (2) nuclear, and (3) regulatory lag. On EPS growth, DUK currently guides to 5%-7% long term EPS growth, which is towards the lower end of peers. That said, we believe the guidance is conservative and we see potential for the company to grow earnings at an 8% average rate through 2030, with an opportunity for DUK to raise their earnings guidance on the 4Q earnings call with constructive settlements in North Carolina and conversion of the remaining large load pipeline. On nuclear, given DUK operates the largest regulated nuclear fleet in the US, some investors are concerned they will be a first mover in building new nuclear. We do not expect DUK to move forward with a new nuclear power plant build unless the risk around cost overrun is adequately addressed. On regulatory lag, some investors have expressed concern into the quarter that earned ROEs are trending lower, and that is a reason to be tactically less positive. In our view, while D&A will likely be higher as the North Carolina MYPs are nearing their end, it will be made up for with favorable weather and resolve when new rates go into effect Jan 1, 2027, supporting earnings execution. We continue to also see DUK as well positioned to navigate election/affordability noise in the near term.

Conversations we are having with investors

E&P - Neil Mehta

NFG. Conversations have centered around NFG this week following the announcement that the company is planning to separate into two independent publicly traded companies. Investors have focused on the Integrated Upstream and Gathering (IUG) business having 25+ years of inventory below a $2.25/MMBtu breakeven per NFG. Investors also noted the clarity NFG provided in the release around the continuity in leadership positions post separation of IUG. Additionally, investor conversations have noted NFG's expectations for IUG to have a strong balance sheet providing flexibility for the optimization of capital allocation. On National Fuel, investors have noted NFG's expectations for a strong balance sheet and investment-grade credit metric targets.

MUR. We have received inbounds on MUR following the company's recent press release on updates across its global exploration and development portfolio. Investors have highlighted the oil discoveries at Bubale West-1X well and Lac Da Trang North-1X well enable future appraisal activity and the longer-term potential for development opportunities. Additionally, investors note the first oil at Lac Da Vang in Vietnam and Chinook #8 in GOA show strong execution on key operational milestones. Investors remain focused on the ramp of Lac Da Vang through 2028 as MUR drills incremental development wells. Those more cautious on the stock highlight that the company lagged this week following the announcement (+1% MUR vs +4% oily peers vs +4% XLE) as investors seek more clarity on the total resource potential of the Bubale prospect in Cote d'Ivoire from the remaining wells of the 3-5 well appraisal program MUR expects to run through YE2027. Those more constructive on MUR see mean-reversion potential given year-to-date underperformance (+25% vs oily peers +49% vs +51% XLE) as the broader macro backdrop and elevated pricing levels remain supportive of further exploration within MUR's capital program.

Majors & Refining - Neil Mehta & Alexa Petrick Breno

Refining. This week within the refining complex, we have received incremental investor inbounds around Par Pacific Holdings (PARR) following our recent note. For those who are bullish on the stock from here, investors highlight the company's near-term cash flow tailwinds from SREs and Laramie transaction which they expect to support balance sheet strength and a balance of capital returns and growth initiatives. Those more constructive on the equity also see potential for fourth quarter estimates to surprise to the upside and continue to see attractive value supported by the underlying refining business. With this said, more cautious investors have been more mindful of the elevated crude freight rate environment and the potential implications for 1H27 estimates. Broadly, conversations have also been around uses of cash and the magnitude of buybacks vs peers. During earnings season, investors we speak to are looking for additional color around real-time demand trends, management's efforts to manage crude volatility and freight rates, and any updates around capital allocation priorities.

US Majors. Investors debate the outlook for US Majors with the XOM 8-K release tomorrow, looking for color on the magnitude of timing effects after several trading updates from European peers. Most investors expect XOM to benefit from positive refining revisions but remain mindful of slightly lower Guyana volumes and greater Middle East exposure, where roughly 20% of total production sits. Management estimates a full closure of the Strait of Hormuz could lower production by 750 kbd relative to 2025 levels, leaving investors focused on future volume risks and the path forward for Qatar despite improving flows through Hormuz. Other questions on XOM pertain to Permian productivity, LNG strategy, and potential M&A opportunities. With CVX, investors look for operational updates across key international assets including Kazakhstan, Guyana, Venezuela, Iraq, and Argentina, which support attractive free cash flow growth through the end of the decade. They also focus on Bakken production following the announcement to divest full ownership in both HESM and DJ Basin crude midstream assets by year-end. Management expects this transaction to unlock financial and operating upside, deconsolidate debt, and lower Bakken unit midstream costs, despite a one-time earnings loss.

Energy Services - Neil Mehta & Alexa Petrick Breno

3Q Earnings. Into 3Q earnings we continue to receive inbounds on our expectations for quarterly results, particularly for companies within our oilfield services coverage with exposure to the Middle East. Many investors view the impacts of continued disruption into 3Q as well understood, with most conversations focusing on the impact to 2027 estimates, and the potential magnitude of negative revisions. With this in mind, conversations center on SLB and WFRD as the stocks have higher exposure to the region, as well as HP as the company has ~22 rigs in Saudi Arabia. Investors are focused on how a re-escalation of the conflict may impact longer-term earnings, as increased conflict directly impacts producing wells in the region. Into 3Q, investors are most focused on company commentary on the potential forward impacts, and how each country in the Middle East may be impacted, as well as which oilfield services will continue to see the largest headwinds amid the continued disruption.

WFRD. We continue to receive inbounds on WFRD into 3Q, as investors look to potential 2027 earnings revisions for the stock. With the company's Middle East exposure, investors are evaluating how the timing of an end of the conflict will the impact the stock, and the magnitude of 2027 revisions in a re-escalation scenario, as well as a scenario where the conflict ends. With this in-focus for the company, inbounds center on forward EBITDA margin expectations, and how WFRD's regional portfolio outside of the Middle East will contribute to margin expansion over the long-term. Investors are particularly looking to the company's footprint in Latin America as the region continues to be an area of growth for OFS companies, and how WFRD's future earnings may be impacted by activity levels in the region.

Midstream - John Mackay & Olivia Foster

Evaluating Permian land cash flow quality. Recent investor conversations across our Permian land management coverage - LandBridge (LB) and EagleRock Land (EROK) – have centered on the underlying quality and durability of cash flows heading into 3Q26 earnings prints. For LB, client focus remains on data center commercialization and power project optionality amid shifting power sentiment, while base fundamentals for the quarter are expected to be underpinned by resilient produced water volume growth at WaterBridge (WBI). Overall, investors expressed confidence in management achieving FY26 guidance (strengthened by recent acreage integration) with more visible line sight into sequential EBITDA expansion. Conversely, inbound inquiries for EROK have focused on the inherent lumpiness of its resource sales and) and higher vulnerability to upstream activity shifts following earlier pull-forwards in 1H26. Debates continue to evaluate the predictability of EROK's revenue mix and the pace at which the platform can shift toward surface use royalties. Across both operators, institutional investors are seeking tangible proof points around ongoing acreage consolidation, with heightened focus on EROK as it delivers its second quarterly report post-IPO, where fee-acreage acquisitions could help dilute exposure to leased land that carries more constrained commercial upside and limits revenue-per-acre realization.

AM investor sentiment. We fielded several inbounds on AM this week, with conversations centered AM's growth outlook as peers evaluate egress in the northeast. As example, with KMI's TGP open season, investors asked which producer could be better positioned in the basin to capture incremental growth and therefore which G&P could benefit, with AR/AM mentioned as potential beneficiaries. Relatedly, inbounds centered on the intra-basin opportunity set, with several investors asking whether the $200-300m East Side Express project is a pre-cursor to the broader ~15-project WV backlog management referenced last quarter. Others looked for more color on the pace of conversion from backlog to announce project here, particularly given the softer than expected share buyback activity ($53m YTD26 vs $87m YTD 25) even after the $371m Veolia proceeds received in 3Q26. The most frequent question among investors is what the building cash balance will ultimately be earmarked, given their lower leverage profile vs peers (2.5x vs midstream coverage average of 3.6x 2027E). Meanwhile, AM has slightly underperformed gassy peers by -4% over the past month against a roughly flat group. From here, focus remains on the TGP open season outcome and any AR commitment, the timing of the next regional project announcement, and AM's ultimate capital allocation strategy going forward.

Utilities – Carly Davenport

Regulated Utilities. This week investor conversations have shifted focus to 3Q results, where investors are weighing if there are potential for positive surprises around results related to capex, load growth, or earnings growth outlook upgrades. In most conversations, investors see potential for XEL, AEE, and AEP to raise the EPS growth outlook on the back of full five year plan updates this quarter. Many investors view the likely growth upgrade as priced into AEE shares at current level, but there is more debate around AEP and XEL. For XEL, shorter term oriented investors are constructive on the fundamentals, but there is concern that longer term oriented investors will not reengage with the stock until potential wildfire liability reform legislation is passed in Colorado in 2027. For AEP, there has been a positive view on the update in general, particularly following the Bloom announcement this week that confirms the agreement with Google, but there remains debate on (1) if the company will raise growth again given they have recently adjusted the growth rate higher, and (2) how the company will message the large load outlook, particularly in Texas given the batch zero delays, and how much load is reflected in the capital plan/earnings growth outlook. WEC also provides the five year update on the 3Q earnings call, and sentiment on the update is more mixed given uncertainty on the People's Gas rate case proposed decision and what it could mean for pace of investment into the pipeline replacement program, and how much new generation investment would be needed with the extension of the Point Beach PPA with NEE. Offsetting that is the continued Microsoft expansion in Wisconsin and how much of that WEC will build into the capital plan.

IPPs. Sentiment on the IPPs remains mixed this week with two main focus areas in conversations including (1) FERC's rejection of most of the proposed IRAS framework and (2) NRG given underperformance over the last month. On IRAS, sentiment on the fundamentals was generally positive given support for capacity prices and continued market tightness, though there were some more generalist investors that were disappointed that the regulatory uncertainty in PJM is not more resolved. That said, the CEG PPAs announced last week could be proof points that PPAs can be signed without clarity on IRAS or the RBP. On NRG, in our conversations have been focused on two key items. First is the 3Q earnings update, when the company is expected to refresh the earnings guidance outlook, and the main debate is on if the company will be able to offset the weakness in Texas pricing with the strength in PJM. More investors seem to believe the answer to that question is yes, but some still worry that because NRG's sensitivities do not show the full extent of how far ERCOT prices have sold off, that there could still be downside risk. Second is the possibility that the company delivers on its target to have 1 GW of data center PPAs finalized by year end. Investor confidence appears to be falling on that prospect given we are nearing the end of the year and there is still uncertainty in Texas around pricing and the Batch Zero process. That said, some investors see potential for announcements to pick up following elections or the release of the data center audit study in December, both of which still could point to an announcement before year end.

Clean Technology - Brian Lee

Solar. Investor interest remained elevated across solar this week, with the broader setup into 3Q26 earnings and company-specific debates driving conversations. Sector questions continue to center on utility-scale and residential demand, including potential implications from the Section 232 outcome and higher interest rates. Ahead of earnings, investors are increasingly focused on sentiment and buy-side expectations for larger-cap names including FSLR and NXT, while ARRY's recent underperformance has driven more stock-specific inquiries. In resi, conversations remain focused on the demand trajectory through year-end and how differing safe-harbor strategies could shape volumes and positioning into 2027.

Rare Earths. Inbounds across rare earths picked up this week, with investors primarily focused on pricing, recent sector weakness, and the evolving policy backdrop. Pricing discussions have centered on limited movement in NdPr versus stronger Western pricing for Tb and Dy. At the same time, investors are increasingly asking what has driven the recent weakness across the group and whether the trend could reverse. Policy remains another key area of focus following the two-month extension of relaxed Chinese export restrictions, which adds some near-term uncertainty to the setup. Finally, we are also fielding questions around sentiment and positioning ahead of 3Q26 earnings.

Metals & Mining - Nick Cash

Steel. Investor discussions this week showed renewed optimism across the steel sector ahead of earnings. Conversations acknowledged multiple compression across the group over recent months driven by upward estimate revisions. As a result, investors are beginning to note that multiples look attractive. Furthermore, on the commodity price, investors note that there is no significant foreseeable pricing pressure, absent demand destruction, to point to in 2027 and believe HRC prices climb or hold higher levels for longer. Investors view NUE as the favorite large cap to own within the space while there has been a lack of interest in STLD given potential Canadian tariff risk and aluminum price movements. Despite these arguments we believe that STLD (Buy, $242.92 closing price) remains attractive at these levels given our views on the aluminum business where we see upside to consensus.

Key GS Energy Research Reports

GS Energy Research for the Week

Americas Energy: Oil - Refining: Still Positive Refining, But Lower PARR to Neutral Given Downside to 2027 Consensus Estimates Amid Elevated Freight Rates; Highlight DK as Preferred SMID

National Fuel Gas Co. (NFG): Announced Plans to Separate its Integrated Upstream and Gathering Business

Asia Energy Tour: Takeaways on Global LNG: Tight in Near-Term, but Long-Term Outlook Looser on Supply Additions and Soft Demand Trends

Valuation and Key Risks

COP. We are Buy-rated on COP, and our 12-month P/E, EV/DACF, and DCF-based price target is $146. Our valuation blends an 85% fundamental value of $142 (based on $80/$75 Brent and $3.50/$3.50 Henry Hub in 2027/2028) and a 15% M&A theoretical value of $166, derived by applying increased oil and natural gas price estimates of $85/$80 Brent and $3.75/$3.75 Henry Hub in 2027/2028. Key risks relate to commodity prices, capital spend, and operational execution. Closing Price $142.34.

PWR. Our 12-month price target is $902, which reflects our target 30.0x NTM EV/EBITDA multiple. We are Buy-rated on PWR. Key Risks: 1) slower revenue CAGR across segments from loss in project volume momentum, 2) delays in project deliverables from supply chain related challenges, and 3) slower margin progression across the three segments from cost inflation or other operational challenges. Closing Price $660.63.

BKR. Our 12-month PT of $71 is based on an average of two methodologies. We apply an 11.0x through cycle EV/EBITDA multiple and an 5.5% through cycle free cash flow yield. Key risks: 1) Slower pace of LNG FIDs, 2) slower turbine orders, 3) lower oilfield activity, and 4) lower margins in OFSE. Closing Price $55.37.

TRP/TRP.TO. We are Buy rated with a 12-month C$101/US$71 price targets based on 14.75x EV/EBITDA. Downside risks to our thesis include: Higher regulatory hurdles for natural gas pipeline projects, slower than expected execution on new gas transmission projects, lower than expected returns on gas transmission projects, higher than expected capex on sanctioned projects, high-multiple bolt-on M&A, lower than expected rate case outcomes, and higher interest rates. Closing Price: $61.12.

GLNG. We are Buy rated with a 12-month $67 price target based on an unlevered DCF discounted at a 9.25% WACC with a 10.5x terminal year EBITDA multiple. Our price target is based on a fundamental valuation at an 85% weight based on an unlevered DCF (with a 25% risking of a fifth FLNG Mark II vessel) discounted at a 9.5% WACC with a 10.5x terminal year EBITDA multiple, and an M&A theoretical value at a 15% weight based on an unlevered DCF (with a 100% inclusion of a fifth FLNG Mark II vessel) discounted at a 9.0% WACC with a 10.5x exit year terminal value EBITDA multiple. Downside risks to our thesis include: Lower global gas pricing, counterparty concentration and geopolitical risk, higher than expected conversion costs, longer than expected conversion timelines, early contract termination, complex and/or atypical financing arrangements weighing on perceived transparency for investors, and lower than guaranteed operational capacity. Closing Price: $46.03.

OXY. We are Buy rated on OXY with a 12-month price target of $69 using a target free cash flow yield of 11.0% on average 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock with an 85% weight to a fundamental valuation of ~$67 and a 15% weight to an M&A theoretical valuation of ~$78 based on $85/$80 per bbl Brent oil price and $3.75/$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key downside risks include higher operating costs, negative well results, weak production/capex execution, higher commodity prices and government pronouncements. Closing Price $61.41.

PR. We are Buy rated on PR with a 12-month price target of $27 based on a target FCF

yield of 12.5% on 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock with an 85% weight to a fundamental valuation of ~$26 and a 15% weight to an M&A theoretical valuation of ~$30 based on $80/$80 per bbl Brent oil price and $3.75/$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key risks include costs, well results, commodity price volatility and government pronouncements. Closing Price $24.06.

AR. Our 12-month price target of $46 is based on a target FCF yield of 11.0% on 2027/2028 estimates with $80/$75 per bbl Brent oil price and $3.50/$3.50 per MMBtu Henry Hub gas price. Key risks include lower commodity prices (particularly natural gas/NGLs), higher costs, well results and government pronouncements. Closing Price $36.63.

DINO. We are Buy rated on DINO, and our 6-month, P/E (12.0x normalized EPS) and SOTP-based price target is $142. Key risks relate to refining margins, non-refining earnings, and operational execution. Closing Price $127.74.

DUK. We are Buy rated on DUK with a 12-month, $143 price target, which is based on a P/E multiple of 19.0x on our Q5-Q8 estimates to capture the upside opportunities around generation capex and improved regulatory position. Key downside risks include: DUK's balance sheet not improving; regulatory uncertainty from recently filed rate case; and any decline in the strong load growth forecast impacting expected earnings growth. Closing Price $119.66.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: GOLAR LNG LIMITED

The rating(s) for Golar LNG and TC Energy Corp. is/are relative to the other companies in its/their coverage universe: Antero Midstream Corp., Cheniere Energy Inc., Cheniere Energy Partners, DT Midstream Inc., EagleRock Land, Enbridge Inc., Energy Transfer LP, Enterprise Products Partners LP, Excelerate Energy Inc, Golar LNG, Hess Midstream LP, Kinder Morgan Inc., Kinetik Holdings, Kodiak Gas Services Inc., LandBridge, MPLX LP, NextDecade Corp., ONEOK Inc., Plains All American Pipeline LP, Plains GP Holdings, South Bow Corp., TC Energy Corp., Targa Resources Corp., Venture Global, WaterBridge Infrastructure, Williams Cos.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain

Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities

and portfolio strategy. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
