

August 10, 2026 04:01 AM GMT

Semiconductors | North America

Weekly: Earnings Week 4 (QNT, CBRS, ADI); June SIA

We preview several upcoming results, and report on a strong report on June monthly revenues from the semiconductor industry association.

QNT (EW, reporting after the market close on Tuesday, August 11th): For Quantinuum’s first quarter as a public company, we think technical and commercial progress matter more than the quarterly numbers. The company remains in the early stages of commercialization. We are more focused on execution against the technology roadmap, conversion of customer relationships into committed commercial engagements, and further third party validation. That being said, near term revenue visibility is also relatively good for a company at this stage. Roughly 90% of our 2026 revenue estimate of \$27 million is supported by backlog, while approximately half of our 2027 revenue estimate of \$44 million is supported by backlog and committed programs today. We also estimate approximately \$120 million of bookings in 2026. We model 2Q revenue of \$7.8 million, gross margin of 26.0%, and non GAAP EPS of (\$0.27). However, we would not read too much into modest quarterly upside or downside given variability in project timing and revenue recognition.

Technical roadmap progress remains the most important thing we are watching. Quantinuum is targeting Sol in 2027 with 192 physical qubits and approximately 100 logical qubits, roughly double Helios, and we would look for any update around development milestones or confidence in the timing. Commercial progress is also important, particularly given a pipeline exceeding \$5 billion. We would be interested in whether any advanced stage opportunities have moved into bookings or backlog and whether existing relationships are becoming more committed. Since our initiation, Quantinuum has also announced a new collaboration with Rolls Royce and the UK Government and entered into a letter of intent with the US Department of Commerce, and we would look for more color on how these and other relationships are progressing toward broader commercial adoption.

Cash burn is the other key area to monitor as Quantinuum continues investing well ahead of revenue. We model approximately \$1.65 billion of pro forma cash following the IPO and roughly \$240 million of free cash flow burn in 2H26 as the company funds substantial R&D, cloud infrastructure and next generation hardware development. We expect operating metrics to remain quite variable quarter to quarter, so our focus is less on the exact level of spending in any one period and more on whether investment remains consistent with roadmap execution and whether the current capital base remains sufficient to fund the company through its next major technical and commercial milestones.

CBRS (OW, reporting after the market close on Wednesday, August 12th): We are constructive on the earnings outlook, with execution on the capacity ramp the

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

key determinant and meaningful upside over time if Cerebras can bring compute online faster.

The bar across AI infrastructure names remains high this earnings period, but we see significant revenue upside if Cerebras can execute ahead of schedule, particularly given how compute constrained customers remain and their likely willingness to absorb additional capacity as it becomes available. We model 2Q core revenue of \$194 million, up 2% q/q, followed by 3Q core revenue of \$206 million, up 6% q/q. Our forecast assumes roughly 25MW of capacity comes online in June and another 16MW in September, bringing Cerebras to approximately 75 active MW by quarter end. Deployment timing remains the key swing factor to these estimates, as even relatively small operational issues can push revenue out by months. While we see upside if capacity comes online ahead of our current schedule, we still have limited visibility into how consistently the company can execute against its buildout plans. With the next lockup release approaching on September 16, we think the near term setup leaves relatively little room for execution misses.

Gross margin is also an area to watch following significant upside versus expectations last quarter. We model core gross margin of 36.8% in June, declining 100bps to 35.8% in the September quarter. The primary headwind remains the G42 rent back arrangements supporting the initial capacity ramp. We expect Cerebras to begin gradually reducing its reliance on these arrangements later this year and transition fully to its own capacity in 2027. If capacity deployment comes in ahead of our expectations, we would expect some of that upside to show through in cloud gross margins as well.

Ultimately, we are confident the demand is there, while the supply side comes down to operational execution, where we still need to build confidence over time. We remain constructive on the architecture and long term opportunity, but for now the investment debate remains centered on execution, where we are cautiously optimistic.

ADI (OW, reporting before market open on Wednesday, August 19th - previewing early due to travel schedules): We expect ADI to follow overall strong peer earnings results with another beat-and-raise and above-seasonal quarter, which would mark the 9th consecutive above-seasonal quarter. We continue to prefer ADI as our favored name in analog - the company is both a cyclical and secular story, with an underappreciated rate-of-change story, in our view, as the Industrial business is essentially at or above prior-cycle peaks in its leading sub-markets (ATE, A&D), while the remaining ~60% of Industrial sits ~20% below prior peaks, leaving meaningful room to run as the broader recovery continues. **What we are focused on for earnings:**

1. Broadening Industrial strength beyond ATE/A&D. Prior to last quarter, Industrial strength across the analog group had remained relatively concentrated in A&D and AI-exposed areas such as ATE and Energy. In the MarQ, however, the group began to highlight a broader Industrial recovery, also reflected in our Disti survey, with that momentum continuing this quarter and providing a favorable setup for ADI given that ATE and A&D together represent ~1/3 of Industrial and continue to reach new highs following record results from Advantest and Teradyne. More importantly, the remaining ~2/3 of the segment still sits ~20% below prior-cycle peaks, leaving

meaningful room for the recovery to broaden and drive Industrial above last-cycle highs.

2. Channel inventory. ADI's channel inventory has remained at the low end of its 6-7-week target range for several quarters - having structurally moved away from the historical 7-8-week. With peers including STMicro (distribution inventory now below its standard target with book-to-bills close to 2 overall), and MCHP (distribution inventory correction now complete), the read-through is that channel health across the analog group is constructive and that any incremental restocking represents upside rather than a risk.

Overall SIA data for June was stronger than expected, driven by both broad markets and memory. June Semiconductor Industry Association billings data reported on Thursday, August 6th, came in above our estimates and seasonality for broad markets and memory:

- **Overall:** Sales increased 10.5% month over month, above our estimate of 6.2% and the 10-year average increase of 7.5%. Three-month year-over-year growth accelerated to 124.2% from 104.2% in May, while one-month year-over-year growth reached 135.4%.
- **Trend by geography (y/y):** The Americas led growth at 157.9%, followed by China at 144.6%, Asia Pacific at 133.7%, Europe at 76.3%, and Japan at 49.9%.

Broad markets rebounded strongly following a weak May:

- **Discrete (beat):** +13.1% m/m vs our estimate of +9.0% and 10-yr average change of +10.0%. Units were in-line with the 10-yr average (+10.3% vs +10.4%) while ASP was above (+2.5% vs -0.4%).
- **Analog (beat):** +15.4% m/m vs our estimate of +14.0% and 10-yr average change of +10.9%. Units were above the 10-yr average (+18.2% vs +16.5%) as well as ASP (-2.4% vs -4.6%).
- **MCU (miss):** +12.6% m/m vs our estimate of +20.0% and 10-yr average change of +19.1%. Units were below the 10-yr average (+9.2% vs +13.5%) as well as ASP (+3.1% vs +5.0%).
- **MPU (beat):** +23.2% m/m vs our estimate of +8.0% and 10-yr average change of +7.7%.

The results reinforce the constructive JunQ company commentary and point to a broadening recovery, particularly in Industrial, where demand continues to move off cyclical lows and extend beyond AI-linked applications into traditional end markets. Pricing remains firm across the supply chain, although increases outside memory continue to largely reflect cost pass-through rather than underlying demand strength. AI remains the most clear source of outperformance, and while the data still does not indicate a conventional replenishment cycle, the improving breadth of demand supports greater confidence in a stronger 2H.

Analog 3-month y/y increased to 16.3% from 14.2% in May, continuing to improve. MCU 3-month y/y increased to 18.0% from 15.5% in May, also continuing to steadily improve.

Exhibit 1: Global Semiconductor Sales

Source: SIA, Morgan Stanley Research

Exhibit 2: Semiconductor Sales by Region

Source: SIA, Morgan Stanley Research

Memory growth moderated in June following a strong May, although both DRAM and NAND sales exceeded our estimates and five-year seasonal averages:

- **DRAM:** In-line with our expectation though above the 5-yr average, coming in at +7.6% m/m vs our estimate of +7.2% and 5-yr average of +6.0%. Bits were below our estimate (3.5% m/m vs 10.0%) and up 26.1% y/y, while ASP was above (4.0% vs -2.5%) and up 275.3% y/y. On a 3-month y/y basis, total DRAM sales reached 367.8%, marking a new historical high, while ASP growth also reached a record 245.3%.
- **NAND:** Above expectation and 5-yr average, coming in at +14.8% m/m vs our estimate of +1.6% and 5-yr average of +11.9%. Bits were above our estimate (10.7% m/m vs 4.0%), as well as ASP (3.7% vs -2.3%). NAND pricing was up 368.4% y/y. On a 3-month y/y basis, revenue reached a record 391.9%, while ASP growth also reached a new record of 328.7%. Volume growth moderated to 13.6% from 23.8% in May.

June data reinforces the core memory thesis, with stronger-than-expected results across both DRAM and NAND despite the inherent volatility of monthly data. The key signal is that pricing remains resilient even as bit growth fluctuates, suggesting that constrained supply and mix - not a conventional inventory replenishment cycle - continue to drive the recovery. DRAM remains the most significant bottleneck as AI demand absorbs leading-edge capacity, while NAND is benefiting from improving supply discipline and a more favorable product mix. The industry's efforts to secure supply and maintain pricing suggest that these conditions could persist longer than investors expect, extending the earnings cycle. We continue to view memory availability as an important constraint on AI infrastructure growth, supporting sustained DRAM pricing, a more durable NAND recovery, and our preference for MU and SNDK.

Changes to our forecast: Our forecast comes up from up 99% to up 117% for the year, mostly due to the stronger memory outlook. Our CY26 memory forecast at \$981bn is higher than our prior forecast and up meaningfully from \$223bn last year. For CY27, we are assuming 29% growth y/y to \$2.22 trillion, mostly due to memory dynamics.

Our take: June SIA data supports the positive broader-market commentary we heard throughout 2q and confirms that the quarter finished on strong footing. Memory remains the most supply-constrained part of the market, particularly

DRAM, where availability continues to limit AI deployments; NAND conditions also remain firmer than we anticipated. Limited supply flexibility and sustained pricing support our continued preference for MU and SNDK. The broad-market recovery is also becoming more visible outside AI, reinforcing our constructive views on NVDA, AVGO, and CBRS in leading-edge logic; LRCX, KLAC, MKSI, and ONTO in cap equipment/supply chain; and ADI and NXP in premium analog/MCU.

Quantinuum Earnings Preview

The company is scheduled to report after the market close on Tuesday, August 11th.

For Quantinuum's first quarter as a public company, we think technical and commercial progress matter more than the quarterly numbers. The company remains in the early stages of commercialization. We are more focused on execution against the technology roadmap, conversion of customer relationships into committed commercial engagements, and further third party validation. That being said, near term revenue visibility is also relatively good for a company at this stage. Roughly 90% of our 2026 revenue estimate of \$27 million is supported by backlog, while approximately half of our 2027 revenue estimate of \$44 million is supported by backlog and committed programs today. We also estimate approximately \$120 million of bookings in 2026. We model 2Q revenue of \$7.8 million, gross margin of 26.0%, and non GAAP EPS of (\$0.27). However, we would not read too much into modest quarterly upside or downside given variability in project timing and revenue recognition.

Technical roadmap progress remains the most important thing we are watching.

Quantinuum is targeting Sol in 2027 with 192 physical qubits and approximately 100 logical qubits, roughly double Helios, and we would look for any update around development milestones or confidence in the timing. Commercial progress is also important, particularly given a pipeline exceeding \$5 billion. We would be interested in whether any advanced stage opportunities have moved into bookings or backlog and whether existing relationships are becoming more committed. Since our initiation, Quantinuum has also announced a new collaboration with Rolls Royce and the UK Government and entered into a letter of intent with the US Department of Commerce, and we would look for more color on how these and other relationships are progressing toward broader commercial adoption.

Cash burn is the other key area to monitor as Quantinuum continues investing well ahead of revenue. We model approximately \$1.65 billion of pro forma cash following the IPO and roughly \$240 million of free cash flow burn in 2H26 as the company funds substantial R&D, cloud infrastructure and next generation hardware development. We expect operating metrics to remain quite variable quarter to quarter, so our focus is less on the exact level of spending in any one period and more on whether investment remains consistent with roadmap execution and whether the current capital base remains sufficient to fund the company through its next major technical and commercial milestones.

Cerebras Earnings Preview

The company is scheduled to report after the market close on Wednesday, August 12th.

We are constructive on the earnings outlook, with execution on the capacity ramp the key determinant and meaningful upside if Cerebras can bring compute online faster.

The bar across AI infrastructure names remains high this earnings period, but we see significant revenue upside if Cerebras can execute ahead of schedule, particularly given how compute constrained customers remain and their likely willingness to absorb additional capacity as it becomes available. We model 2Q core revenue of \$194 million, up 2% q/q, followed by 3Q core revenue of \$206 million, up 6% q/q. Our forecast assumes roughly 25MW of capacity comes online in June and another 16MW in September, bringing Cerebras to approximately 75 active MW by quarter end. Deployment timing remains the key swing factor to these estimates, as even relatively small operational issues can push revenue out by months. While we see upside if capacity comes online ahead of our current schedule, we still have limited visibility into how consistently the company can execute against its buildout plans. With the next lockup release approaching on September 16, we think the near term setup leaves relatively little room for execution misses.

Gross margin is also an area to watch following significant upside versus expectations last quarter. We model core gross margin of 36.8% in June, declining 100bps to 35.8% in the September quarter. The primary headwind remains the G42 rent back arrangements supporting the initial capacity ramp. We expect Cerebras to begin gradually reducing its reliance on these arrangements later this year and transition fully to its own capacity in 2027. If capacity deployment comes in ahead of our expectations, we would expect some of that upside to show through in cloud gross margins as well.

Ultimately, we are confident the demand is there, while the supply side comes down to operational execution, where we still need to build confidence over time. We remain constructive on the architecture and long term opportunity, but for now the investment debate remains centered on execution, where we are cautiously optimistic.

Details on the June quarter: We model core revenue of \$194.3mn, up 1.6% q/q, modestly above the Street at \$190.6mn. Our core gross margin estimate of 36.8% is in line with the Street, while our non GAAP EPS estimate of (\$0.21) compares with consensus at (\$0.17).

September quarter outlook: We model core revenue of \$205.9mn, up 6.0% q/q, modestly below the Street at \$210.2mn. Our core gross margin estimate of 35.8% is in line with the Street at 35.9%, while our non GAAP EPS estimate of (\$0.38) compares with consensus at (\$0.30).

ADI Earnings Preview

The company is scheduled to report before the market open on Wednesday, August 19th. We are previewing early due to travel schedules.

We expect ADI to follow overall strong peer earnings results with another beat-and-raise and above-seasonal quarter, which would mark the 9th consecutive above-seasonal quarter. We continue to prefer ADI as our top pick in analog - the company is both a cyclical and secular story, with an underappreciated rate-of-change story, in our view, as the Industrial business is essentially at or above prior-cycle peaks in its leading sub-markets (ATE, A&D), while the remaining ~60% of Industrial sits ~20% below prior peaks, leaving meaningful room to run as the broader recovery continues. **What we are focused on for earnings:**

1. Broadening Industrial strength beyond ATE/A&D. Prior to last quarter, Industrial strength across the analog group had remained relatively concentrated in A&D and AI-exposed areas such as ATE and Energy. In the MarQ, however, the group began to highlight a broader Industrial recovery, also reflected in our Disti survey, with that momentum continuing this quarter and providing a favorable setup for ADI given that ATE and A&D together represent ~1/3 of Industrial and continue to reach new highs following record results from Advantest and Teradyne. More importantly, the remaining ~2/3 of the segment still sits ~20% below prior-cycle peaks, leaving meaningful room for the recovery to broaden and drive Industrial above last-cycle highs.

2. Channel inventory. ADI's channel inventory has remained at the low end of its 6-7-week target range for several quarters - having structurally moved away from the historical 7-8-week. With peers including STMicro (distribution inventory now below its standard target with book-to-bills close to 2 overall), and MCHP (distribution inventory correction now complete), the read-through is that channel health across the analog group is constructive and that any incremental restocking represents upside rather than a risk.

Details on the July quarter: We model revenue of \$3.911bn, up 7.9% q/q and 35.8% y/y, in-line with the Street at \$3.915bn. By end market, we model Industrial revenue of \$1,961mn, up 9.0% q/q and 51.7% y/y; Automotive revenue of \$924mn, up 6.0% q/q and 8.0% y/y; Consumer revenue of \$382mn, down 4.0% q/q and up 7.3% y/y; and Communications revenue of \$644mn, up 16.0% q/q and 71.2% y/y. Our gross margin and EPS estimates of 72.5% and \$3.33, respectively, are in-line with Street estimates of 72.3% and \$3.34.

October quarter outlook: We model revenue of \$3.999bn, up 2.2% q/q and 30.0% y/y, in-line with the Street at \$4.069bn. By end market, we model Industrial revenue of \$1,981mn, up 1.0% q/q and 39.3% y/y; Automotive revenue of \$934mn, up 1.0% q/q and 7.9% y/y; Consumer revenue of \$409mn, up 7.0% q/q and 4.8% y/y; and Communications revenue of \$676mn, up 5.0% q/q and 69.0% y/y. Our gross margin estimate of 72.5% is in-line with the Street at 72.5%, while our EPS estimate of \$3.41 is below the Street at \$3.54.

Source: FactSet, Morgan Stanley Research

Morgan Stanley is acting as financial advisor to onsemi in connection with its definitive agreement to acquire Synaptics Incorporated ("Synaptics"), as announced on June 25, 2026. The proposed transaction is subject to approval by Synaptics' shareholders, receipt of required regulatory approval and other customary closing conditions. This report and the information provided herein is not intended to (i) provide voting advice, (ii) serve as an endorsement of the proposed transaction, or (iii) result in the procurement, withholding or revocation of a proxy or any other action by a security holder. Onsemi has agreed to pay fees to Morgan Stanley for its financial services. Please refer to the notes at the end of the report.

Valuation Methodology and Risks

Analog Devices Inc. (ADI.O)

We value ADI at 28x CY27e MW EPS of \$15.28, a premium to analog peers given higher GM% and OPM%.

Risks to Upside

- Further margin improvement
- Semi content growth in EVs & share gain
- Industrial recovery stronger than anticipated

Risks to Downside

- Market share loss in Automotive and Industrial
- Increasing competition in auto semi
- Weakness in consumer exposed end-markets

Cerebras Systems (CBRS.O)

13x multiple on our 2028 adjusted revenue of \$6bn. We comp Cerebras to AI semis cohort and 13x is in-line with with smid cap AI names with near 100% AI exposure that are outgrowing the overall market.

Risks to Upside

- Contract Extension
- Additional customer
- Capacity deployment

Risks to Downside

- Capacity deployment/infrastructure risk
- Customer concentration risk
- Competitive risk

Quantinuum (QNT.O)

Discounted 12x 2030 sales of \$2.5bn:

- We value Quantinuum on its long-term revenue potential rather than near-term financial performance. This approach reflects both the scale of the commercial opportunity and the significant technology and execution risk embedded in our forecasts.
- The 12x multiple is informed by the average 2028 EV/sales multiple of AI semiconductor peers, which we believe provides a reasonable valuation anchor

Risks to Upside

- Technology roadmap execution
- Commercial adoption
- Third party validation
- Industry development

Risks to Downside

- Delays in roadmap
- Competition
- Weaker commercial adoption
- Capital intensity

Important Regulatory Disclosures on Subject Companies

As of July 31, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Aeva Technologies Inc, Ambarella Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Aeva Technologies Inc, Broadcom Inc., Cerebras Systems, GlobalFoundries Inc, Intel Corporation, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Quantinuum, Semtech Corp..

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cerebras Systems, Intel Corporation, IonQ Inc, Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Quantinuum, Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan

Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1529	42%	442	47%	29%	750	43%
Equal-weight/Hold	1582	43%	396	42%	25%	773	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	560	15%	97	10%	17%	217	12%
Total	3,674		936			1741	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Analog Devices Inc., Broadcom Inc., Microchip Technology Inc., NVIDIA Corp., Qualcomm Inc.. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those

who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.
