EL strength continues; scope for further M&A

Reiterate Rating: NEUTRAL | PO: 76.00 CHF | Price: 70.96 CHF

Datacenter strength reinforces 2027-28 conversion story

ABB's Q3 results confirm our positive view on Electrification (EL), with continued datacentre order strength underpinning our strong revenue growth expectations into 2027-28. Group orders grew 40% org (cons 28.9%), while revenues were broadly in line and op EBITA beat by 2%. The Mitsubishi JV broadens EL's presence in Japan and comes at an attractive price, though we think the bigger takeaway is the likelihood of further M&A, with mgmt pointing to c.$13-14bn of additional headroom in the balance sheet. We think this is likely to focus on EL and MO, with EL deals likely geared towards grid, or reinforcing ABB's positioning across 800V DC. We adjust for the Q4 real estate gain, add the Rotork (now shareholder approved) and Mitsubishi deals, and raise our EL and MO ests. We also lower our target multiple from 21x to 19x given the likely slowdown in order momentum from this high base. PO down to CHF76 (ADR $93), reit Neutral.

EL orders continue to build visibility; 800V DC progresses

EL orders grew 70% org (cons 46%), driven by another quarter of triple-digit datacentre growth, while revenues increased 21% org (cons 19.3%). Mgmt said it sees no pre ordering, given orders typically relate to specific sites with funding and grid-connection permits that need to be in place. Orders are also backed by significant advance payments or clear cancellation provisions, with lead times for their products remaining in the 12–24-month range. This supports our view that the higher order base should translate into strong revenue conversion in 2027-28, underpinning our high-teens medium-term EL growth forecasts. Infinitus broadens ABB's source-to-rack offering across transitional and native DC architectures, with SSTs available to order in 2H27, supporting its positioning as electrical content shifts towards grey space.

Standout EL margin, with further improvement ahead

EL delivered a 25.6% op EBITA margin, up 110bps YoY and ahead of cons at 25.3%, with op EBITA 2% above expectations. Mgmt expects similar operational gearing as capacity ramps, suggesting strong growth should continue to translate into margin improvement. The US remains below other regions, leaving a further catch-up opportunity as new capacity comes online and operations mature. Alongside ongoing efficiency gains, this supports further EL margin progression from the already strong Q3 level.

Electrical Equipment

Company Description

ABB is a global technology leader in electrification and automation, serving customers across industry, infrastructure, utilities and transport. Following the agreement to divest Robotics, its continuing operations comprise three business areas: Electrification, Motion and Automation.

Investment Rationale

ABB is a global leader in electrification and automation markets across a balanced regional exposure. The expected cost-savings under the ABB Way are considerable, and decentralizing business control underpins the medium-term EBITA margin targets. However, after a strong re-rating, we see valuation as full.

Datacenter orders rebased higher again

Q3 strength supports stronger 2027–28 conversion

ABB's Q3 print reinforces the order-rebasing framework we set out in our September note (see Wired for double-digit growth). We estimate datacenter orders reached $3.3bn in Q3, from $2.6bn in Q2 and $2.1bn in Q1. On an organic basis, EL orders grew 70% in Q3, driven by another quarter of triple-digit datacenter growth. Thus, we raise our datacenter order and revenue forecasts through 2026–29, but continue to assume a marked slowdown in order growth after 2026 as the annual base resets materially higher. Mgmt sees no evidence of pre-ordering, with orders typically linked to funded sites with grid-connection permits and backed by advance payments or clear cancellation provisions. Lead times remain at 12–24 months, supporting visibility into 2027–28. We forecast EL organic revenue growth of 17.9%/17.2% in 2027–28, versus cons of 14.8%/10.8%. We think consensus continues to underestimate the duration of this growth opportunity, even allowing for normalisation in order growth.

Slower order growth can still weigh on multiples

Electricals have de-rated over the past two months amid concerns around slowing second-derivative data across AI and broader enterprise monetisation. ABB's Q3 strength improves earnings visibility but does not remove the risk that normalising order momentum weighs on valuation. We therefore modestly raise estimates while lowering our target multiple from 21x to 19x, retaining our Neutral rating.

Margin progress warrants a premium, but we prefer SU

ABB still trades at a high-teens percentage premium to its pre-ChatGPT valuation on 12-month forward EV/EBIT. We think continued margin progression and improving returns warrant a premium: EL delivered a 25.6% op EBITA margin in Q3, up 110bps YoY, with the US still offering a catch-up opportunity as new capacity comes online and operations mature. However, we see more upside at Schneider, which trades only modestly above its pre-ChatGPT valuation despite similarly strong datacenter demand and continued pricing momentum into 2027. We therefore remain positive on ABB's medium-term earnings outlook but see a more attractive valuation opportunity at Schneider.

New vs Old and BofA vs Cons

We adjust for the Q4 real estate gain, add the Rotork (now shareholder approved) and Mitsubishi deals and slightly raise our EL and MO estimates following Q3 strength. Op EBITA increases 6.0%/3.1%/5.2% in 2026–28, with the 2026 uplift reflecting the real estate gain and the 2027-28 increase reflecting the deals scope impact. Our medium-term upside remains concentrated in EL, where op EBITA is 5%/8% > cons in 27–28.

BofA GLOBAL RESEARCH

Price objective basis & risk

ABB Ltd (ABLZF / ABBNY)

Our price objective of CHF76 (US$93 for the ADR) is derived from applying a target multiple of 19x 2028 EV/EBITA discounted back to 2026, which we think is fair given strong order momentum, continued execution, and re-rating at peers. 19x is in line to our target multiple of Schneider of 19x. We think this is fair because of the strong medium voltage (MV) and grid exposure and solid execution track record

Downside risks: Poor project execution, Rotork acquisition falling through, slowdown in industrial investment & European economy, project deferrals in emerging markets, lack of evidence of sustainable improvement in operational performance.

Coverage Universe	Count	Percent	Inv. Banking Relationships [R1]	Count	Percent
Buy	2057	57.03%	Buy	1386	67.38%
Hold	806	22.35%	Hold	563	69.85%
Sell	744	20.63%	Sell	446	59.95%

[R1] Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are not regulated in a manner similar to U.S. securities markets. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities or digital assets that may have been recommended or discussed in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments recommended or discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein.
