CoreWeave | North America

Fully Connected Conference Takeaways: Showcasing the Breadth of the Full AI Stack

CoreWeave reinforced its AI platform case through improving product breadth and enterprise expansion. Demand and pricing remain strong, with visibility into 2027 and 2028. Greater enterprise traction and higher services attach remain key elements to proving durability beyond supply scarcity.

We attended CoreWeave's Fully Connected conference on Wednesday, September 30th. The Platform Strategy and Roadmap Session featured Michael Intrator, CEO; Nick Robbins, VP Corporate Development; Jon Jones, Chief Revenue Officer; Chen Goldberg, SVP of Engineering and Corey Sanders, SVP of Product.

Expanding The Platform Opportunity. The Fully Connected conference was more about establishing CoreWeave as an AI platform rather than updating the financial story. Management emphasized the company's product breadth and depth as well as an increasingly diversified customer base. Product innovation was encouraging, with Forge bringing together the necessary tools to build, run, and improve models and agentic systems. Moreover, customer presentations from Caterpillar and Capital One illustrated the opportunity beyond the frontier labs, articulating the company's broader platform strategy and the potential to drive increased services attach thereby deepening customer relationships. While commentary was primarily focused on the broader platform strategy, pricing dynamics were a topic of conversation with management highlighting operating leverage from scale efficiencies was already emerging prior to the July price increase. Moreover, demand continues to materially exceed supply, visibility extends into 2027 and even 2028, and customers are accepting pricing even above the July increase. All in, an encouraging event with the platform strategy beginning to take hold, further enhancing the company's positioning in a supply-constrained compute environment.

Key Takeaways:

1. Demand remains well ahead of supply, with pricing dynamics remaining healthy. Management described demand as vastly outstripping available capacity, with visibility into 2027 and 2028 and a growing breadth of customer opportunities. The ~25% price increase implemented across SKUs in July appear to be holding, with management commentary suggesting customers could absorb a further increase from current levels. The latter is evidence of additional pricing acceptance, rather than a separately announced across-the-board increase. Also worth noting that shorter-duration contracts continue to attract substantial premiums.
2. Product expansion gives the AI platform positioning substance. Forge was the centerpiece, integrating inference, agent development, observability, post-training,

and evaluation into a single environment. Capabilities spanning Agent Lens, Model Distillation, and Reinforcement Learning address the challenges of moving agents into production and continuously improving their reliability, performance, and cost. We view the intended differentiation as managing and optimizing the full AI workload, rather than competing solely on GPU availability or hourly pricing, which should support continued expansion into the enterprise.

3. Customer breadth and multi-product adoption support the platform thesis.

Presentations from Caterpillar, Capital One, and Cognition illustrated the range of use cases CoreWeave can support, while management noted that 75% of customers use more than three products — a useful indication that relationships already extend beyond core GPU infrastructure. Additionally, investments in the global enterprise sales force are beginning to bear fruit after roughly a year of development, and the new partner network should help customers bring existing tools and integrations onto the CoreWeave platform. Management nevertheless emphasized that enterprise sales cycles remain longer than the rapid conversion seen with AI-native customers. That said, enterprise adoption broadens the opportunity for multi-product penetration and customer diversification.

4. Key conference announcements. Highlights from the conference included **1)**

Vera Rubin availability. NVIDIA's Vera Rubin NVL72 is now available through CoreWeave with the company announcing Cognition as the first customer that is running production workloads on the systems. **2) Expanding compute portfolio**

with NVIDIA Vera CPU. CoreWeave announced they will be broadening their compute portfolio to include NVIDIA's Vera CPU. In conjunction with the announcement, CoreWeave noted meaningful improvements to performance – *"Through CoreWeave Sandboxes, these agents can be deployed securely and efficiently, fully hardware-isolated, and situated directly alongside the training jobs they support. In testing, CoreWeave achieved more than 3x faster agent sandbox startup times on NVIDIA Vera CPU compared to an x86 CPU"*. **3) Broadening full**

stack capabilities with the launch of CoreWeave Forge. Forge provides a more integrated and efficient environment for developers and teams to build and continuously improve models and agentic systems. The offering spans the "entire AI loop" – running, observing, improving, and evaluating these systems within a single connected environment. In conjunction with the launch, CoreWeave ARIA and Sandboxes are now generally available. **4) Another inference customer agreement.**

CoreWeave announced an agreement with Ennoble Care, a provider of home-based healthcare services. The company will deploy NVIDIA RTX PRO 6000 Blackwell Server nodes on CoreWeave Kubernetes Service (CKS).

EQUAL-WEIGHT THESIS

With a \$361B GenAI Data Center opportunity ahead and the strong domain expertise in efficiently building and operating the GPU clusters, CoreWeave has built a >\$25 billion book of business in under 5-years - a pace of scaling formerly unheard of in software. This is balanced by a lack of meaningful operating and financial history, a high debt load (expected to expand to ~\$38 billion by the end of CY26), and significant customer concentration. We see shares reasonably pricing a wide range of outcomes reflected in our base range.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of September 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.
