

GLOBAL CREDIT TRADER

Completing our IG and HY Supply Outlook

- After remaining resilient for much of September, the tone in the USD and EUR credit markets weakened over the past several sessions. This occurred in response to a combination of factors including elevated rates volatility and a renewed focus on the supply backdrop. With the widening in recent days, IG and HY spread levels in both regions quickly settled near our quarter-end forecasts for 3Q2026.
- Our year-end spread targets reflect levels that are modestly *tighter* vs. today's valuations. But this largely reflects the typical year-end spread tightening which is often visible in late December, as the pace of supply slows. Between now and early December, however, we see scope for a more volatile backdrop and continue to view the risks to our forecasts as tilted towards more widening, with the March 2026 levels as our base case in a moderate downside scenario. While a sharp downturn in growth is likely a necessary catalyst for sustained and material spread widening, we nonetheless see scope for additional weakening in credit if rates volatility increases further.
- The global rates sell-off has left OATs as a clear underperformer within developed markets, with the 10-year OAT-Bund spread now around 130bp—the widest level since the 2011–2012 European sovereign crisis. For EUR credit, the relevant question is how French fiscal risk might affect spreads. Financials tend to be the first segment of credit markets where sovereign concerns become visible, given their larger domestic exposures, stronger links to the local economy, and greater sensitivity to funding conditions. We see further scope for French financials to underperform peers ahead of next year's presidential election. For French corporations, we expect the impact to be more idiosyncratic.
- Over the past few weeks, we have introduced 2027 supply forecasts for leveraged loans and CLOs in the USD and EUR markets. We also raised our full-year 2026 supply forecast for USD IG, while framing a 2027 estimate. This week, we outline our supply forecasts for the remaining IG and HY corporate bond markets that we track: USD HY, EUR IG and EUR HY.

Completing Our IG and HY Supply Outlook

Spreads (finally) reach our targets—risks skewed toward more widening

After remaining resilient for much of September, the tone in the USD and EUR credit markets weakened over the past several sessions in response to a combination of factors including elevated rates volatility, a renewed focus on the supply backdrop (AI-related and otherwise), and the potential for commodity market restrictions in the form of a possible US diesel export ban.

With the widening in recent days, IG and HY spread levels in both regions have quickly approached our quarter-end forecasts for 3Q2026. For example, USD IG spreads reached 82bp on September 29, just shy of our forecast of 85bp. While they finished 3Q2026 at 80bp, the tone as we write on October 1 once again feels skewed towards a weaker backdrop.

Meanwhile, USD HY spreads of 311bp slightly surpassed our 3Q2026 target of 305bp. EUR IG spreads of 90bp were just shy of our forecast of 91bp, while EUR HY spreads of 321bp were just above our target of 320bp.

Our year-end (4Q2026) spread targets reflect levels that are modestly *tighter* vs. today's valuations. But this largely reflects the typical year-end spread tightening which is often visible in late December as the pace of supply slows. Between now and early December, however, we see scope for a more volatile backdrop and continue to view the risks to our forecasts as tilted towards more widening, with the March 2026 levels as our base case in a moderate downside scenario. While a sharp downturn in growth is likely a necessary catalyst for sustained and material spread widening, we nonetheless see scope for additional weakening in credit if rates volatility increases further (Exhibit 1).

Exhibit 1: We see scope for additional weakening in credit spreads if rates volatility increases further

France: Fiscal risk is becoming a credit differentiation story, with financials most exposed

The global rates sell-off has left OATs as a clear underperformer within developed markets, with the 10-year OAT-Bund spread now around 130bp, the widest level since

the 2011-2012 European sovereign crisis. The latest move reflects a combination of higher global term premia and a more France-specific reassessment of fiscal and political risk. Recent polling has added to investor concerns, with first-round polling for the 2027 French presidential election pointing to far-left candidate Jean-Luc Mélenchon as a potential second-round contender against far-right front runner Marine Le Pen.

For France, the key concern for markets remains the path of fiscal consolidation. France already has a high debt burden, at roughly 118% to 119% of GDP. And our economists expect the debt ratio to rise further—toward 125% by the start of 2030—absent a more meaningful fiscal adjustment. They note that stabilizing debt-to-GDP would require France to run a primary surplus of roughly 1% of GDP, compared with a primary deficit of around 2.5%, currently.

For EUR credit, the relevant question is how French fiscal risk will spill over into corporate credit spreads. At the headline level, French corporate spreads have remained relatively resilient. The share of French IG non-financial bonds trading inside similar-maturity OATs has risen to 27%, the highest level since 2011, where they reached 40% for one day in November (Exhibit 2, left panel).

This time, however, the majority of firms trading inside OATs are at the long end of the curve, particularly in the 10-year-plus segment. In 2011-2012, the outperformance of corporations vs. the sovereign was more evenly distributed across maturities (Exhibit 2, right panel). We think this reflects the duration-led nature of the current sell-off in global yields.

Exhibit 2: French corporations are increasingly trading inside OATs, especially at the long end

Source: iBoxx, Goldman Sachs Global Investment Research

The fact that a growing number of French corporations now trade inside OATs suggests the market is differentiating between sovereign and corporate risk, rather than treating the two as identical. Indeed, French non-financials have continued to trade broadly in line with the rest of developed-market credit recently (Exhibit 3, left panel).

That said, risk-adjusted spread differentials tell a more nuanced story. After controlling for rating, duration, and sector differences, French credits still trade tighter than peers—although this premium has compressed significantly in the post-Covid period from roughly 40bp in 2022 to just 3bp today (Exhibit 3, right panel).

Exhibit 3: French non-financials remain resilient, but their risk-adjusted premium has compressed

Source: iBoxx, Goldman Sachs Global Investment Research

The pressure is more visible among financials. French-domiciled banks now trade wider than peers, in contrast to Spanish and German-domiciled banks, which continue to trade significantly tighter than their respective peer groups (left panel, [Exhibit 4](#)). This pattern is consistent with what we have previously observed in Italy and Spain during the 2011-2012 sovereign crisis (right panel, [Exhibit 4](#)).

Financials tend to be the first segment of credit markets where sovereign concerns become visible, given their larger domestic exposures, stronger links to the local economy, and greater sensitivity to funding conditions.

Exhibit 4: French banks are bearing the brunt of sovereign risk repricing

Source: iBoxx, Goldman Sachs Global Investment Research

We see further scope for French financials to continue to underperform peers ahead of next year's presidential election and recommend an underweight. Still, we think the hurdle is high for French senior bank spreads to reach the levels seen among Italian and Spanish banks during the 2011-2012 sovereign crisis. The key difference is the market's awareness of the ECB's perceived backstop, including tools designed to counter unwarranted and disorderly market dynamics that threaten monetary policy transmission.

In addition, we think there will be a point to take the other side of this risk, particularly given that the sector remains fundamentally high quality. While timing is uncertain, we

believe most of the relative underperformance is likely to occur before the election, with scope for some relief afterward.

For French corporations, we expect the impact to be more idiosyncratic. Firms with greater exposure to the domestic French economy, such as supermarkets and other consumer-sensitive issuers, are more likely to underperform than larger corporations with internationally diversified revenue streams.

IG and HY supply forecasts for 2027

In early September, we raised our forecast for full-year gross supply in the USD IG market to \$2.3 trillion (from \$2.1 trillion), as the typical summer slowdown in issuance failed to materialize—driven in part by the swift pace of AI-related issuance. We also introduced a \$2.4 trillion gross supply forecast for 2027. These higher gross issuance numbers equate to a net supply forecast of \$1.0 trillion for 2026, and \$1.15 trillion for 2027.

This week, we outline our supply forecasts for the remaining IG and HY corporate bond markets that we track: USD HY, EUR IG and EUR HY.

USD HY

Year-to-date USD HY gross issuance of \$276 billion leaves 2026 on track to rank as the heaviest volume year since the pandemic-era record of \$462 billion in 2021. Nonetheless, at the current pace, it appears unlikely to meet our current full-year 2026 forecast of \$400 billion. As a result, we are adjusting that forecast downward to \$340 billion. We are expecting \$375 billion of gross USD HY issuance in 2027 (Exhibit 5).

Exhibit 5: We forecast an acceleration in USD HY gross issuance in 2027, largely driven by AI-related financing needs

Year-to-date and forecasted USD HY gross issuance in 4Q2026 and 2027

Note: As of October 1, 2026.

Source: Dealogic (ION Analytics), Goldman Sachs Global Investment Research

The key driver behind our expectation for higher issuance in 2027 is the AI-related financing wave. While higher rates may have postponed some issuance in 2H2026, we believe this supply will eventually make its way through the market given the large backlog of data center construction in progress. We also expect borrowers will proactively begin to address the 2029 maturity wall, which is steep relative to 2028 (Exhibit 6).

Exhibit 6: 11% of the USD HY Corporate Index matures over the course of 2027-2028

Maturity wall (by rating) for the bonds in the Bloomberg USD HY Corporate Index

Note: As of September 30, 2026.

Source: Bloomberg, Goldman Sachs Global Investment Research

Our gross issuance forecasts translate into \$120 billion of USD HY net issuance in 2026 and \$115 billion in 2027.

Notably, the composition of 2026 supply has shifted vs. the pattern of the past few years. For example, the share of USD HY gross supply earmarked for debt repayment or refinancing has dropped to 54%—the lowest level since 2022's 40% ([Exhibit 7](#)). Meanwhile, the share of issuance for AI-related project financing—which largely represents new issuers and new money into the USD HY market—has jumped to 13% (vs. 3% in 2025, and negligible amounts prior to that).

Exhibit 7: The share of USD HY gross supply earmarked for debt repayment has dropped, while issuance for AI-related project finance has grown

USD HY gross issuance by primary use of proceeds

Note: As of September 29, 2026.

Source: Dealogic (ION Analytics), Goldman Sachs Global Investment Research

EUR IG

In the EUR IG market, we continue to expect full-year 2026 gross issuance of €850 billion, which equates to net issuance of €265 billion. As shown in [Exhibit 8](#), we expect issuance to remain elevated in 2027, and call for €900 billion of gross supply (and €310

billion of net).

Exhibit 8: We expect EUR IG issuance to remain elevated through 2027

Year-to-date and forecasted EUR IG gross issuance in 4Q2026 and 2027

Note: As of October 1, 2026.

Source: Dealogic (ION Analytics), Goldman Sachs Global Investment Research

The sharp increase in large-scale strategic M&A in among EMEA-based acquirers is a key driver of our expectation for sustained, elevated supply. As Exhibit 9 illustrates, the share of stock-financed strategic M&A in the region is among the lowest in recent years. This is likely to place upward pressure on issuance in the EUR IG market, in our view. While Banks are likely to remain a dominant sector for issuance, we also expect the EUR market to generate a larger share of AI-related issuance in the years ahead (Exhibit 10).

Exhibit 9: The share of equity-financed strategic M&A by EMEA acquirors is the lowest since 2018

Funding mix for strategic M&A announced by EMEA acquirors. Captures deals valued at €100 million or more, at announcement. Excludes cancelled and withdrawn deals.

EUR IG gross supply by sector (€bn)

Note: As of September 29, 2026.

Source: Dealogic (ION Analytics), Goldman Sachs Global Investment Research

EUR HY

In the EUR HY market, we are revising our full-year 2026 gross issuance forecast lower, to €115 billion from €125 billion (Exhibit 11). We now expect €30 billion of net issuance in 2026. For 2027, we are calling for €130 billion of gross EUR HY supply. This translates into €35 billion of net issuance in 2027.

Exhibit 11: We expect EUR HY issuance to reach €130 billion in 2027

Forecast dashboard: Relative value views

Exhibit 17: Relative value views

Relative value views		
Corporate Credit		
Regional	Overweight USD vs. EUR	We have a slight preference for USD credit vs. its EUR peer, owing to a somewhat more challenging growth-inflation-monetary policy mix in the Euro Area. That said, the lines are blurring between the regional classifications, given the acceleration in cross-border issuance.
	Overweight EUR IG CLO tranches vs. USD IG CLO tranches	EUR IG tranches offer carry pickup relative to USD IG CLO tranches. While the policy and macroeconomic picture is less supportive in Europe, subordination should protect tranches up in the capital structure from a continued idiosyncratic default picture.
USD market	Neutral IG vs. HY	While we previously had a slight preference for IG vs. HY, we now view the case for an outright overweight in IG as less obvious based on valuations, rate sensitivity and supply related technicals.
	Overweight BBBs vs. higher-rated cohorts	We prefer owning BBBs over the higher-rated segments of USD IG (As and AAs), as a way to capture additional spread. We also see scope for balance sheet deterioration at the highest end of the rating spectrum in IG.
	Overweight Bs, Neutral BBs, Underweight CCCs	We expect BBs will continue to encounter a challenging supply technical due to AI-related supply. As a result, we favor the B rated cohort. The CCC universe is highly idiosyncratic and requires careful credit selection, in our view.
	Overweight HY bonds vs. loans	The substantial software sector exposure in the loan market leaves us favoring the HY market, at least until we receive more clarity on the refinancing of the 2028 loan maturity walls. The lower-rated distribution of loans and our economists' base case for no rate hikes in 2026 are also contributing factors.
	Overweight CLO mezz tranches vs. leveraged loans Neutral CLO vs. USD IG Neutral CLO vs. CMOs	For floating rate investors, we prefer CLO mezzanine tranches vs. leveraged loans. Historical data points to low impairment rates for BB and BBB CLO tranches, and current valuations offer attractive carry and a cushion against moderate to elevated default outcomes. Elsewhere, we are neutral between senior CLO tranches and USD IG; we would use spread widening to add exposure in CLOs. We are also neutral between CLO AAA and CMO floaters.
	Prefer Agency MBS vs. IG	Agency MBS offers an attractive diversification benefit vs. a portfolio of IG corporate bonds.
	Overweight Hybrids vs. BBBs	We view the additional spread compensation of hybrids vs. BBBs as moderately attractive in the context of the tight spread environment. We also expect the hybrid spread premium to compress vs. BBBs, as the hybrid market grows further.
	Neutral IG vs. HY	While we previously had a preference for IG vs. HY, we now view the case for an outright overweight in IG as less obvious based on valuations, rate sensitivity and supply related technicals.
EUR market	Overweight BBBs vs. higher-rated cohorts	We recently shifted our view to favor BBBs over both AAs and As in the EUR market, owing to an improved macroeconomic backdrop which now favors a broad-based, down-in-quality stance within IG.
	Overweight HY bonds vs. loans	Similar to the US, we prefer HY bonds given the loan market's weighting toward software (and the potential negative sentiment overhang). The reaction function of the ECB is increasing borrowing costs for floating rate issuers, given the central bank's focus on inflationary pressures.
	Overweight BBs, Neutral Bs, Underweight CCCs	At current valuations and given our expectation for heightened dispersion, we prefer moving up in quality within EUR HY.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Amanda Lynam, CPA Goldman Sachs & Co. LLC, Spencer Rogers, CFA Goldman Sachs & Co. LLC, Sara Grut Goldman Sachs International, Shamshad Ali Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have

been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your

individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
