Presenters: IREN's Co-CEO, Dan Roberts, and Chief Commercial Officer, Kent Draper, presented at the Communacopia + Technology Conference.

Bottom Line: We have 4 key takeaways: (1) IREN sees its 5GW of secured power and execution track record as a strategic advantage; (2) 2GW Sweetwater hub has been conditionally included in ERCOT's Batch Zero process as Base Load, with additional large-scale projects within IREN's broader development pipeline also included in Batch Zero; (3) industry pricing for GPU rentals is robust with 3-year deals in the \$20–\$25 mn per MW range and shorter term deals above that price (e.g., <1 year at \$40 mn/MW); (4) IREN continues to make progress on funding its \$25–\$30 bn capex target for F2027, actively pursuing data center secured financing and other types of corporate financing.

Key Takeaways

Attractive asset portfolio and track-record of execution. IREN expects its execution of capacity deliveries (e.g., Microsoft Horizon 1–4) to serve as a differentiator over the next year, with industry demand for compute continuing to grow. The company has a competitive advantage as it has already secured 5GW of secured power globally. Management also highlighted the delivery of Phase 1 to Microsoft as building its execution track record, which is an additional advantage early in the cycle when there is limited evidence of who is able to successfully execute.

Sweetwater's 2GW was conditionally designated as Base Load in ERCOT's Batch Zero process, which was as expected. Notably, IREN has additional capacity included in Batch Zero beyond the 2GW, though the company will not announce specific projects until binding grid connection agreements are signed, meaning further announcements should be expected over time.

Pricing for GPU leasing is robust. Three-year deals are pricing at \$20–25M/MW, with shorter (<1 year) contracts commanding \$40M+/MW. The acquisition of

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Mirantis has enabled new customer segments for IREN, which should allow it to capture new business opportunities.

Of \$25-30 bn in projected capex, \$14 bn is already secured in cash/committed debt, with a conservative \$8 bn more expected in GPU-backed debt. Remaining capital comes from other types of corporate financing including convertible and corporate debt. The company is exploring debt against data center leases. While the company expects future equity issuance (e.g., ATM), management believes that equity-linked financing will represent a smaller percentage of funding that it has historically.

Valuation/Risks

Valuation. We are Neutral rated on IREN with a 12-month target price of \$50 based on a blended valuation methodology using an 85% fundamental value weight at a 7.0X NTM+1Y EV/EBITDA and a 15% M&A value weight at 21X EBITDA.

Downside risks: (1) construction delays could prevent the company from delivering data center infrastructure and impact revenue ramp assumptions; (2) GPUs could have a shorter useful life than expected, limiting the company's ability to monetize them in follow-on AI cloud services deals; (3) competitive pressure or technological advancement driving non-renewals or renewals with lower pricing; (4) Bitcoin price volatility could create funding uncertainty; (5) elevated customer concentration from its announced Microsoft deal could create revenue volatility and negotiating leverage concerns.

Upside risks: (1) greater-than-expected demand for AI infrastructure could result in stronger pricing power and accelerated contract signings; (2) greater GPU supply constraints could drive premium pricing for IREN's capacity; (3) greater-than-expected Bitcoin pricing appreciation could provide more cash flow to fund AI cloud capex; (4) GPU useful life could extend beyond the initial five-year contract term and potentially improve long-term project IRRs; (5) funding solutions could prove more favorable than expected, including project-level financing at attractive rates and strategic equity investments from hyperscalers.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
