UBS DC Project Delays Tracker; DC World & Legrand CMD expectations; more on 800VDC

UBS Global Data Center Central 4.0

Welcome to our fourth edition of the UBS Global Data Center Central – our new, one-stop shop product bringing together our key research, insights and newsflow on the Data center / AI themes ([DCC 3.0](#) / [DCC 2.0](#) / [DCC 1.0](#)).

What is key in today's piece?

- **Proprietary Data Center project delay/cancellation tracker.** Current affected capacity represents 12%/5% of operational/pipeline capacity in the US and 6%/3% in Europe. Levels remain relatively contained, although the direction of the trend warrants monitoring.
- **Data center World Singapore & Legrand CMD expectations (29-30 Sep).** At DC World, we expect sidecar power distribution units and solid-state transformer offerings launches (eg. ABB launched Infinitus SST on 21 Sept ahead of the event). For Legrand CMD, we see scope for upgrade of mid-term guidance range to 5-7% and potential commentary on likely faster near-term growth while we expect 3-5% acquired growth and stable margin outlook to remain. We see launch of a sidecar offering for upcoming c600KW racks and a clear roadmap to 1MW rack as critical to address market concerns on 800VDC positioning.
- **Discussion on AI Governance & Humanity;**
- **Deep dives on 800VDC from Power Electronics** ([link](#)), **Semis** ([link](#)), and **Battery** ([link](#)) perspectives;
- **Broader UBS Data Centers research and newsflow;**
- **Call with UBS Tech analysts.** We're hosting a call with UBS Semi Analyst Francois-Xavier Bouvignies and UBS Asia Tech Hardware Analyst Randy Abrams on 800VDC and Power Electronics, on Friday 25 Sep and 3pm UKT. [REGISTER HERE](#)
- **Detailed coverage map and valuation by geographies and verticals**

Remain positive on the infra space but increasingly selective. Stock preferences:

- **In our European Capital Goods coverage,** our top picks in this space currently are Schneider, Halma, Prysmian and Siemens Energy (Buy rated). We also rate Siemens, Centiel and Munters Buy while we are Neutral-rated on ABB, Legrand, Belimo, Alfa Laval and Wartsila.
- **With respect to our US Electricals coverage,** we remain positive on most industrial companies exposed to AI infrastructure investment, with our preference reflecting quality of execution on the expected growth. We are Buy rated on Vertiv, GE Vernova, nVent, Eaton and Modine. **In Machinery,** we remain positive on Cummins. **In E&C,** we continue to expect PWR, MTZ, PRIM, and DY to benefit from a tight labor supply market in fiber and electrical work on data centers.
- **In Asia,** we continue to see Delta Electronics as structurally well-positioned.

DATA CENTER WORLD SINGAPORE & LEGRAND CMD

Data center World Singapore

We expect the Data center World Exhibition in Singapore on 29-30 Sep (in conjunction with Legrand CMD) to be the next key catalyst on the Data centers and 800VDC space in particular.

We expected significant announcements around:

- 800VDC power architecture
- Side-car power systems
- Solid-state power infrastructure (transformer & breakers)
- Product launches and commercialization updates from major electrical equipment vendors
- Evidence of competitive positioning across power distribution vendors

For the companies in our core coverage,

- **Legrand** faced questions around rack-level power distribution, and recently said they are working on both hybrid and full 'LVDC' products. We think major product launch is likely at the CMD and will be key to alleviate investor concerns.
- **Schneider** published a detailed 800VDC roadmap at their Q2 results ([link](#)). They are working on Power Rack/side car and sees developing fully industrialised SST solution as key. We think official launch of sidecar is highly likely, along with initial updates on solid-state products.
- **ABB** is seen as strongly positioned in the 800VDC transition has previously flagged the DC World Singapore as the next catalyst in this space. ABB launched [Infinitus SST range](#) this week on 21 Sept 2026 and scheduled an Investor Webinar for 24 Sept 2026 to discuss its positioning in high voltage DC power distribution.

Legrand Capital Markets Day

Legrand currently targets 3-5% organic CAGR and 3-5% M&A CAGR in the mid-term.

We see scope for an upgrade to the organic mid-term ambition as the fast-growing data center segment now accounts for c30% of group sales vs c20% before. We believe an upgrade to 4-6% range is somewhat 'mechanical' without changes to the individual end-markets outlook. We also see scope for a more bullish 5-7% outlook given Legrand's original outlook for Data Centres growth of 'High Single Digit' was rather conservative. Furthermore, beyond mid-cycle growth target, we believe there is some scope for management to comment on the potential for the group or Data Centre's exposure growth in the near term (2027-2030) to be clearly higher than the mid-term outlook. Consensus currently expects c6.5% average organic growth for Legrand for 2027-2030 organic growth (details below).

We expect Legrand to continue targeting 3-5% M&A CAGR and stable profitability from the current levels.

800V - FROM SEMI, POWER ELECTRONICS AND BATTERY MARKET PERSPECTIVE

UBS research: AI Power & Power Semis - View on 800VDC from a semiconductor and power electronics perspective

Our Asia Tech Hardware Analyst published a detailed note on AI power ([Link](#)), with a view on 800V transition from a power electronics perspective.

In his view, **AI power is emerging as the next constraint on compute**—grid availability and hyperscale cash flows could moderate growth later this decade, even as rising power density creates a larger power-electronics content opportunity than chip and rack counts imply. **The team estimate AI power-electronics TAM will grow from US\$6.6bn in 2025 to US\$91bn by 2030 (69% CAGR)**, with growth driven primarily by rising rack power density rather than rack volumes. Importantly, they argue that **strong 2027 growth does not depend on widespread 800V adoption**; instead it is supported by Rubin's higher power requirements, AMD's transition to rack-scale systems and a strong custom ASIC ramp at Google, Amazon and Meta. **Over time, AI architectures are expected to evolve from server PSUs and rack-level power shelves towards dedicated 400V/800V power racks and ultimately solid-state transformer architectures**, expanding demand for switchgear, power distribution, energy storage, controls, cooling and high-voltage conversion. The bigger significance of 800V is that it enables much higher rack power densities by significantly reducing current requirements, copper usage and transmission losses, while shifting more value into high-voltage distribution, protection, controls and power conversion. Importantly, **they view the initial 800V transition as the most content-additive phase**, as dedicated power racks and HVDC infrastructure are added before legacy low-voltage architectures are fully removed.

Among European Cap Goods names, **Schneider Electric** appear the most directly exposed to this trend, with strong positions in switchgear, power distribution and controls, as well as a clear roadmap to 800V infrastructure. **ABB** and **Legrand** should also benefit from rising demand for medium-voltage equipment, busways, distribution infrastructure and power management system.

Alongside the above, UBS Semis team published sector note on the same topic. [\(Link\)](#)

It largely supports the thesis, in addition, they expressed **potential concerns on power availability**. Their semiconductor assumptions imply 51GW of AI capacity additions in 2027 and 105GW by 2030, vs market expectations of c30-50GW annually, increasing the risk of a future digestion period. On 800VDC, they think **a slower transition to 800VDC sidecars could reduce the TAM by approximately \$0.5-1.0bn**. They estimate Rubin Ultra power semis content is c\$153m/GW with a sidecar versus \$108m/

GW with integrated power supply. Rising rack power still makes higher voltage delivery increasingly necessary over time, but intermediate 50V sidecars may extend the transition.

Figure 12: We estimate a delay of 800VDC could lead to >\$1bn impact on the power semis TAM

Source: UBS

In the Battery segment, Asia Battery & Materials team think Rubin moves batteries out of the tray [\(Link\)](#).

They push back against the emerging bear case that NVIDIA's Rubin architecture eliminates rack-level battery demand, arguing instead that higher-voltage (800V) rack designs primarily relocate backup power from the server tray into dedicated power sidecars and power racks. While some hyperscalers may increasingly rely on hall-level UPS systems, they assumes a 40-50% BBU attach rate on Rubin-class deployments and expects BBU content per rack to rise as rack power density increases. As a result, the team forecasts AI server BBU TAM to expand from US\$0.7bn in 2025 to US\$2.5bn in 2026 and US\$12.8bn by 2030, with the combined BBU+CBU opportunity reaching US \$15.9bn by 2030. The conclusion is that Rubin changes battery placement rather than reduces overall battery demand, supporting continued growth across the backup power value chain. From a stock perspective, Panasonic remains leveraged to rack-level cylindrical cells and sidecar backup modules, while Samsung SDI is positioned to benefit from both rack and building-level UPS battery deployments if reserve energy increasingly migrates to facility-level systems.

AI GOVERNANCE, SAFETY AND HUMANITY

Anthropic: "We must pace the frontier"

Anthropic CEO [argued](#) that frontier labs should deliberately slow improvements in model capabilities. His proposed framework include:

- Give independent safety evaluators continuous, employee-like access inside AI labs.
- Establish common safety standards - and potentially limits on unchecked capability development - across democratic countries
- Seek coordination with China and other governments because a unilateral Western slowdown would be ineffective and potentially strategically dangerous

OpenAI: no 2026 IPO - not necessarily no IPO

Sam Altman [confirmed](#) that OpenAI will not list in 2026, calling an IPO now ill-advised given the safety and alignment work required. He argued remaining private allows OpenAI to make decisions that may conflict with shareholders' short-term financial interests. However, in the interview he indicated this is a deferral, not a permanent cancellation.

Wider governance reaction

- Germany [rejected](#) a unilateral halt but supports international standards involving both the US and China.

Implications

This is more significant than ordinary "responsible AI" rhetoric because leaders are explicitly discussing slower capability scaling, external oversight and international coordination. In addition, OpenAI has [introduced](#) a repeatable incidence-reporting process and disclosed concrete examples of model misalignment. But so far the commitments are predominantly voluntary and rely on companies setting their own policies, and it has not yet become a material capex downgrade. The key question would be whether the labs publish measurable capability thresholds, independent evaluators and enforceable commitments.

KEY NEWSFLOW AND RESEARCH

Recent newsflow and themes

Google announced at least €13bn of AI-infrastructure investment in Finland through 2028, including three northern data centers and a 22-year agreement for up to 50% of one Fortum nuclear plant's output—Google's first nuclear-energy deal outside the US. The combination of compute, grid upgrades, batteries and contracted generation reinforces the shift towards power-led campus selection and directly benefits Nordic generation and grid investment. [Link](#)

Qualcomm disclosed a long-term Amazon partnership covering up to \$60bn of AI inference chips, custom silicon and optical-connectivity products, including development of 1.6 Tbps optical solutions. Amazon received warrants potentially worth about \$4bn, vesting with purchases. [Link](#)

AI labs continue to lock in multi-year third-party compute at extraordinary scale. 1/ Anthropic [reportedly](#) signed a \$35bn cloud agreement with Lambda for roughly 350MW at Hut 8's Texas campus on 31 August. 2/ On 8 September, Firmus [announced](#) OpenAI as anchor customer for capacity at two Malaysian data centers, taking contracted capacity across its customers above 900MW, with Nvidia Vera Rubin deployments planned. These agreements extend demand visibility for powered shells and infrastructure suppliers, but deepen financing, customer-concentration and counterparty risks.

Grid operators are starting to screen speculative demand more aggressively. Reuters reported that Texas had frozen new data-center grid connections while investigating project credibility after large-load requests reached more than 474GW, versus about 48GW in 2023. Across selected US regions, requests exceed 700GW, with utilities reducing forecasts after introducing deposits and financial-security requirements. This is incrementally negative for speculative powered-land valuations but constructive for credible developers, established hyperscalers and suppliers attached to funded projects.

Buildout is broadening geographically. Nvidia announced partnerships with Australian cloud and data-center providers targeting up to 2GW of AI capacity by 2027. Separately, AWS disclosed a further \$6bn Louisiana campus on 20 August, lifting its planned investment across three campuses in the state to about \$18bn. The announcements support continued demand for electrical distribution, cooling and construction equipment, although execution increasingly depends on secured generation and transmission.

UBS research: CSE Global - To data centers and beyond ([Link](#))

Our colleagues in Asia initiate coverage of CSE Global with a Buy rating and position the company as a direct beneficiary of US AI infrastructure investment. The company designs and integrates electrical distribution, secure communications and industrial automation systems for mission-critical infrastructure. They highlight CSE's growing role in data-center electrification through electrical distribution systems, modular power solutions and other infrastructure required for hyperscaler campuses. The team sees CSE's relationship with Amazon as a key differentiator, noting that cumulative purchases could reach US\$1.5bn over five years under the commercial arrangement described in the report. They estimate this opportunity can support a 2025-28 earnings CAGR of 21%. More broadly, the note argues that value creation within the AI ecosystem is increasingly shifting beyond chips and servers towards power distribution, electrification and supporting infrastructure. The report reinforces the wider AI thesis that hyperscaler investment remains robust and that suppliers exposed to power delivery and campus infrastructure should continue to benefit as AI workloads expand.

UBS research: ACS - Is US data-center regulation becoming a growing investment risk? ([Link](#))

Our colleagues in European Construction acknowledge that data-center regulation is becoming a more prominent political topic in the US, particularly around electricity costs, grid capacity, land use and environmental impact. However, they believe investors have become overly concerned about the consequences for AI infrastructure growth. The team argues that current and proposed regulation mainly shifts costs, timing and execution risk onto developers and operators rather than preventing economically viable projects from moving ahead. While ACS shares have fallen roughly 25% from their May peak, the analysts estimate that the current valuation implies a much more severe deterioration in backlog conversion and demand than regulatory measures announced so far would justify. They continue to highlight rising hyperscaler capex budgets and the strategic importance of domestic compute capacity for US AI competitiveness. As a result, the team expects project delays, re-phasing and relocation to prove more common than outright cancellations and reiterates its Buy rating. The broader read-across is that regulation may increase volatility and execution risk, but does not materially alter the structural growth outlook for AI infrastructure.

UBS research - Malaysia Data center - Rising data center land sales - a positive signal ([Link](#))

Land sales remain one of the best leading indicators of future data-center activity and investors may be underestimating the next phase of Malaysian build-out. Our colleagues highlight more than 400 acres of data-center-related land sales in 8M26, a level below the exceptional 2024-25 period but still consistent with a sizeable development pipeline. The team notes that direct hyperscaler purchases have become less visible, while operators such as AirTrunk, DayOne and Bridge Data Centers are increasingly securing land. They do not interpret this as weaker demand, as these operators often develop capacity on behalf of hyperscaler customers. The note also points to accelerating downstream activity, with Malaysian data-center contract awards reaching RM14.3bn in the first eight months of 2026, already exceeding the full-year 2025 total. The key takeaway is that the Malaysian data-center ecosystem continues to expand, providing multi-year support for contractors, utilities and grid-investment beneficiaries.

***UBS Evidence Lab** is a sell-side team of experts that work across numerous specialized labs creating insight-ready datasets. The experts turn data into evidence by applying a combination of tools and techniques to harvest, cleanse, and connect billions of data items each month. Since 2014, UBS Research analysts have utilized the expertise of UBS Evidence Lab for insight-ready datasets on companies, sectors, and themes, resulting in the production of thousands of differentiated UBS Research reports. UBS Evidence Lab does not provide investment recommendations or advice but provides insight-ready datasets for further analysis by UBS Research and by clients. All published UBS Evidence Lab content is available via UBS Neo. The amount and type of content available may vary. Please contact your UBS sales representative if you wish to discuss access.

Valuation Method and Risk Statement

The engineering sector is cyclical by nature. Our estimates and the share prices are therefore likely to be sensitive to changes in expectations for global or regional growth and industrial activity. Exchange rate fluctuations contribute additional risk to the sector. We value the stocks in our engineering coverage universe based on the average of cash flow (DCF, residual income and DDM) and static (multiple-based) valuation methodologies.

Required Disclosures

This document has been prepared by UBS AG London Branch, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates, including former Credit Suisse AG and its subsidiaries, branches and affiliates are referred to herein as "UBS".

For information on the ways in which UBS manages conflicts and maintains independence of its UBS Global Research product; historical performance information; certain additional disclosures concerning UBS Global Research recommendations; and terms and conditions for certain third party data used in research report, please visit <https://www.ubs.com/disclosures>. Unless otherwise indicated, information and data in this report are based on company disclosures including but not limited to annual, interim, quarterly reports and other company announcements. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 22 September 2026 03:00 PM GMT. UBS has designated certain UBS Global Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS Global Research publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS Global Research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at <https://neo.ubs.com/quantitative>, or contact your UBS sales representative for access to the report or the Quantitative Research Team on ubs-quant-answers@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Global Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage ¹	IB Services ²
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	40%	21%
Sell	FSR is > 6% below the MRA.	6%	21%

Source: UBS. Rating allocations are as of 30 June 2026.

1:Percentage of companies under coverage globally within the 12-month rating category.

2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:**Forecast Stock Return (FSR)** is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:**UK and European Investment Fund ratings and definitions are:** **Buy:** Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Consultation (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

UBS Global Research Disclaimer

This document has been prepared by UBS AG London Branch, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates, including former Credit Suisse AG and its subsidiaries, branches and affiliates are referred to herein as "UBS".

Any opinions expressed in this document may change without notice and are only current as of the date of publication. Different areas, groups, and personnel within UBS may produce and distribute separate research products independently of each other. For example, research publications from **UBS CIO** are produced by UBS Global Wealth Management. **UBS Global Research** is produced by UBS Investment Bank. Research methodologies and rating systems of each separate research organization may differ, for example, in terms of investment recommendations, investment horizon, model assumptions, and valuation methods. As a consequence, except for certain economic forecasts (for which UBS CIO and UBS Global Research may collaborate), investment recommendations, ratings, price targets, and valuations provided by each of the separate research organizations may be different, or inconsistent. You should refer to each relevant research product for the details as to their methodologies and rating system. Not all clients may have access to all products from every organization. In certain circumstances you may receive UBS Global Research otherwise than in the capacity of a client of UBS and you understand and agree that under these circumstances (i) the UBS Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the UBS Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at <https://www.theocc.com/publications/risks/riskchap1.jsp> or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

UBS notes that no globally accepted framework or definition (legal, regulatory or otherwise) currently exists, nor is there a market consensus as to what constitutes an "ESG" (Environmental, Social or Governance) or an equivalent-label, or as to what precise attributes are required for the Information (as defined below) to be defined as ESG or equivalently-labelled. Any information, data or other content including from a third party source contained, referred to herein or used for whatsoever purpose by UBS or a third party ("Information"), in relation to any actual or potential ESG objective, issue or consideration is not intended to be relied upon for ESG classification, regulatory regime or industry initiative purposes ("ESG Regimes"). Nothing in these materials is intended to convey, suggest or indicate that UBS considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG classification, labelling or similar standards that may exist under the ESG Regimes. UBS has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a

complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

- (i) valuation or accounting purposes;
- (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or
- (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For further information on the ways in which UBS Global Research manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS Global Research recommendations, please visit <https://www.ubs.com/disclosures>.

UBS Global Research will initiate, update and cease coverage solely at the discretion of UBS Global Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

UBS Global Research may utilise artificial intelligence tools ("AI Tools") in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by UBS Global Research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Please note that all transactions conducted by UBS are consistent with sanctions regulations imposed by Switzerland, the European Union, the United Nations, the United Kingdom and the United States, per UBS' global sanctions policy. UBS opinion as to future investment worthiness assumes no new sanctions are imposed.

US persons are prohibited from purchasing or selling securities of certain companies designated as being associated with the Chinese Military in accordance with the amended US Presidential Executive Order 13959.

It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may

adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit <https://www.ubs.com/research-methodology>.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at <https://www.theocc.com/about/publications/character-risks.jsp> or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or sustainable investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio incorporating ESG factors or sustainable investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.
