

Dell Technologies Inc.

Strong quarter and guide; more upside from broad portfolio in C27; PO to \$600

Reiterate Rating: BUY | PO: 600.00 USD | Price: 425.00 USD

Supply constraints create upside for C27

Demand continues to outpace supply (by ~30% in F27, likely higher gap in F28) which is creating a solid pricing environment. Component constraints (DRAM, NAND, CPU, HDD) and customer data center readiness are contributing to longer visibility. With a broad portfolio that benefits from AI (Servers, storage and PCs), we view DELL as solidly positioned to take advantage of AI upside in NeoClouds, Enterprise, Sovereign and at the edge. Strength in F2Q was broad across product categories (ISS +122% y/y, Storage +26% y/y and Commercial PC +22% y/y). Dell raised F27 topline guide (at mid-pt) by \$25bn to \$192bn (\$14bn from higher AI server rev, ~\$1bn from higher CSG) and \$7.60 in EPS to \$25.50. We continue to see Dell as strongly positioned to benefit from having an installed base of 1.2mn servers 14G, or older, that would need to be upgraded, and from the proliferation of AI and agentic workloads. Reiterate Buy on strong execution, early innings of enterprise AI adoption and higher attach of Dell IP in Storage.

AI orders of \$61bn; backlog nearly doubles q/q to \$95bn

Dell delivered AI server revs, orders and backlog much higher than we modeled (\$16.4bn rev/\$60.9bn orders/\$95bn backlog vs. our estimates \$15.6bn/\$25bn/\$61bn). Dell raised F27 AI server rev guide by \$14bn to \$74bn, including ~\$19bn in F3Q, with the full-year outlook implying ~\$22.5bn in F4Q. We see the setup into C27 as favorable given the supply constrained environment and the benefits to rev from agentic AI adoption across NeoClouds and Enterprise. ISG OM grew 620bps y/y to 15.0% on strong demand, better mix of storage with Dell IP, and solid execution.

CSG strength continues; F26 guide raised to +mid-teens%

CSG revs grew +20% y/y, with Commercial growth of +22% y/y (8th consecutive qtr of growth). OM of 7.6% (+120bps y/y) was supported by pricing discipline & scale. We expect modest CSG growth in C27 largely driven by continued pricing increases.

Adjusting estimates; PO to \$600 (from \$505)

Our F27E rev/EPS move to \$197bn/\$26.35 from \$178bn/\$19.56. PO moves to \$600 (from \$505) on 20x (unchanged) C27E EPS of \$30.41 (prior \$24.67).

Company Sector

IT Hardware

Company Description

Dell operates two primary business units: Infrastructure Solutions Group (ISG, provides servers, storage, hyper converged infrastructure, and networking), and Client Solutions Group (CSG, provides desktops, notebooks, workstations and displays). It also reports revenues derived from the external VMware commercial partnership under 'Other' revenues.

Investment Rationale

Our Buy rating is based on broad product portfolio, upside from AI, growth faster than the market, continuing share gains, and opportunity to grow margins over the next several years on higher mix of storage and mix shift to premium configurations in PCs and servers, which offset risks including a slow global economy, and high financial leverage.

Price objective basis & risk

Dell Technologies Inc. (DELL)

Our PO of \$600 is based on approximately 20x our C27E EPS estimate of \$30.41. Our target multiple compares to median 5x of historical range 3x-18x for Dell since it returned to the public markets in 2019. Dell went private in 2013 and prior to that the company had a very different structure. As such, we do not believe earlier historical trading multiples are meaningful. In our opinion, a multiple higher than the historical range is warranted given favorable exposure to AI (across servers, storage and PCs), improved storage portfolio, lower financial leverage and it balances opportunities to invest in core areas of growth, with ongoing weak macro.

Downside risks: faster-than-expected slowdown in the global economy, which could prove to be a headwind to revenue growth, faster-than-expected strengthening of the U.S. dollar, trade war with China, and higher-than-expected tariffs, Dell not being able to source needed processors from Intel, and unexpected share loss to competitors.

Upside risks: faster-than-expected revenue growth and market share gain, faster mix shift to storage and premium PC and server configurations, which can drive upside to margins, faster-than-expected ramp of sales teams, and adoption of AI that can drive upside to cash flow across PCs and servers (negative cash conversion cycle).

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1987	56.11%	Buy	1190	59.89%
Hold	797	22.51%	Hold	496	62.23%
Sell	757	21.38%	Sell	391	51.65%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.
