

# China Industrial Tech: AIDC Power: Asia Leaders Conference 2026

## Takeaways: Focusing on earnings delivery

### Asia Leaders Conference 2026

Aug 31-Sep 2, 2026

[Explore >](#)

We hosted ~40 companies for investor meetings at the GS Asia Leaders Conference 2026 in Hong Kong during Aug 31-Sept 2. In this report, **we summarize highlights from key AIDC power companies:**

- Geopolitical/policy risk has not materially disrupted underlying BTM demand or the LV components/equipment demand so far based on our checks with **Jereh/Megmeet/Kstar**. On the other hand China domestic AIDC demand looks increasingly constructive into 2027-28 with better domestic chip availability;
- 800 VDC remains on the roadmap, but commercialization appears further away than market expectations suggesting a more gradual revenue ramp for related component suppliers;
- Overseas orders remain robust across the gas-turbine supply chain (**Yingliu/Jereh/Impro**) and AIDC electricals (**Kstar**), but capacity execution is increasingly the key constraint; and
- We believe the market focus should shift from AI-exposure TAM and wallet-share narratives to customer certification, capacity delivery and earnings conversion; we prefer **Kstar (Buy)** and remain cautious on **Jianghai (Sell)**.

*The author would like to thank Zhihan Ye and Junfang Zhang for their contributions to this report.*

## Key takeaways

**Geopolitical/policy risk has not materially affected underlying BTM demand or the LV components/equipment demand so far for the companies we talked to during ALC (Jereh, Megmeet, Kstar):** Jereh's existing US projects remain intact given their off-grid nature, local manufacturing and US-sourced core components; Kstar continues to supply to North America via ODM model, reducing policy risk; Megmeet continues to see increasing US CSP orders into 2H26.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to [www.gs.com/research/hedge.html](http://www.gs.com/research/hedge.html). Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

**China AIDC demand looks increasingly constructive into 2027-28.** Honor expects improving domestic GPU/ASIC availability and migration from 2-4kW toward 5.5kW server PSUs, while Megmeet has already been validated by multiple domestic CSPs/server ODMs. Kstar is also running relatively full high-power UPS capacity with strong orders from domestic hyperscalers (especially Bytedance) since May. We see domestic demand becoming a more meaningful earnings driver rather than a drag on the data center product sales growth.

**800 VDC remains on the roadmap, but commercialization appears further away than market expectations.** For example, Sifang sees 34.5kV SST commercialization only from 2H28 with large-scale deployment around 2029, Megmeet expect the transition to 800 VDC architecture will be a gradual one and does not expect volume SST adoption within the next 1-2 years, and Kstar notes its overseas customers are debating on the 800 VDC penetration trajectory given the trade-off between reliability and efficiency. This supports 800 VDC as a medium-term content opportunity but suggests limited SST earnings contribution before 2028-29.

**Overseas orders remain robust across the gas-turbine supply chain (Yingliu, Jerih, Impro) and AIDC electricals (Kstar), but capacity execution is increasingly the key constraint.** For Jerih, the US\$1.465bn gas-turbine order announced on July 22 represented only the first PO under a five-year agreement. Four additional POs lifted cumulative orders over roughly half a month to close to US\$2bn, including nearly US\$0.5bn of ancillary equipment, with better pricing, higher prepayment and broader scope. Capacity is planned at around 3GW in 2027, although achieving full run-rate capacity within the year remains uncertain, rising to at least 4-5GW by 2030. For Yingliu, 1H26 two-engine new orders reached c.Rmb1.5bn, including c.Rmb800mn in 1Q26 and c.Rmb700mn in 2Q26, while backlog stood at c.Rmb2.2bn; management still sees full-year new orders above Rmb3.0bn as achievable. Two additional large furnaces are planned for 1H27, with deposits already paid, followed by further equipment additions in 2H27. If additional capacity is ordered now, most new equipment could be completed by 3Q-4Q27. We therefore see demand as supportive, but await further equipment orders and effective capacity additions to underpin the next leg of earnings delivery.

**Key market focus should shift from AI exposure TAM, wallet share potential to customer certification and earnings delivery.** Jianghai has gained Eaton/Flex adoption for Al aluminum electrolytic capacitors but has yet to qualify at Delta, and we remain conservative versus the company's 25%-40% market-share aspiration. For supercapacitors, Delta has placed an initial EDLC trial order, while LIC samples have been submitted to Delta and Flex but qualification has not yet been confirmed. We therefore believe the company's aggressive capacity expansion plans still require significant customer qualification and volume conversion to be validated, and maintain our Sell thesis.

## Other takeaways by company

---

### Honor Electronic (300870.SZ, not covered)

- **Google programs:** Company expects to see small-volume shipment for a 5kw PSU program from Google in 4Q26 before ramping up in 1H27. Only Honor and Delta Electronics (2308.TW, covered by Chao Wang) is involved in this program and Honor expects this peer to have a larger wallet share. Meanwhile, the company has started to work on other programs for Google but there is no clear timeline on volume products yet. Company has a designed annual capacity of 400~500k 5~5.5kW PSU for its Vietnam factory currently with 2 production lines.
- **NVIDIA ecosystem:** After being included in NVIDIA's MGX ecosystem, Honor is now engaging with potential overseas customers. That said, the company notes they are relatively late vs. peers already in the ecosystem, hoping to catch up on participating on more next-generations programs.
- **Domestic demand:** Company is constructive on domestic server power supply demand in 2027-28 on better domestic GPU and ASIC availability and the upgrade to 5.5kW vs. currently 2-4kW for most domestic projects.

### Impro Precision (1286.HK, not covered)

- **2026 revenue growth** guidance was raised from 15%-20% to 20%-25%, with potential for another review in late October. 2027 growth is currently expected at around 20%-30%, while the company targets group revenue above HK\$10bn by 2030 at the latest, potentially in 2029.
- **2026 capex guidance** was raised from HK\$850mn to around HK\$1.5bn, with around two-thirds of the incremental spend directed to China large-horsepower engine capacity.
- **New products:** Mexico remains a key ramp-up base. Liquid-cooling products started ramping in June 2026, large-horsepower engines should accelerate after major customer certifications in 4Q26, and aerospace production is targeted to begin in 2027 after completing special-process certification in 2H26.

### Jereh (002353.SZ, not covered)

- **Expects limited policy impact:** Existing US projects are currently not expected to be affected by policy, as they are mainly off-grid applications with US local manufacturing, US-sourced core components and local assembly; ownership-related policy tightening remains a residual risk.
- **Order intake:** The US\$1.465bn gas-turbine order announced on July 22 was only the first Purchase Order (PO) under a five-year agreement. Four additional POs brought cumulative orders over roughly half a month to close to US\$2bn, including nearly US\$0.5bn of ancillary equipment, with better pricing, higher prepayment and broader scope.

- **Capacity & delivery:** 2027 deliveries remain above US\$2bn despite changes in customer priority and product mix. Capacity is planned at around 3GW in 2027 (although mgmt believe it is still uncertain whether the company can achieve full run rate in 2027), and at least 4-5GW by 2030.

#### **Jianghai (002484.SZ, Sell)**

- **AI-related aluminum electrolytic capacitor** output reached around 2mn units/month by end-August, with capacity targeted at 3-4mn units/month by end-2026 and 10-12mn units/month by end-2027. The company expects to reach around 25%-40% market share. Eaton and Flex have already adopted the products, while Delta has not yet been qualified. Despite aggressive capacity expansion plan and market share goal, we believe it will likely require concrete customer certification progress to support the company's growth aspirations.
- **Supercapacitor:** Google historically did not require supercapacitors as standard configuration in some solutions, but is gradually increasing adoption, which should create incremental demand for supercapacitors. For EDLC, Delta has already placed an initial trial order. For LIC, samples have been sent to Delta and Flex, but qualification has not yet been confirmed. Despite early stage progress for EDLC and limited qualification progress for LIC, we believe share price has priced in aggressive market share assumptions and therefore remain Sell rated.

**Kstar (002518.SZ, Buy):** Accelerating data center segment growth into 3Q-4Q26 supported by strong overseas and domestic orders with increasing demand from global colocation/integrator customers.

- **Data center segment** growth will remain strong in 3Q26-4Q26 with a relatively full capacity utilization for high-power UPS, and order growth has been strong since May 2026, per mgmt. Revenue contribution from colocation/integrator customers will rise as the company expands its customer portfolio beyond the global electricals companies and these customers increasingly value delivery speed and cost competitiveness.
- **800 VDC architecture:** Kstar plans to send its 800 VDC products for onsite testing for 3-6 months in Europe and Southeast Asia in October 2026. The company notes there is heated debates in the supply chain and among its customers on the penetration trajectory of 800 VDC architecture given the trade-off between reliability and efficiency.
- **Renewable energy segment:** Per management, the energy storage segment will see decent growth in 2H26-2027 with commercial & industrial applications growing faster than the residential business. Solar inverter sales will likely remain subdued in 2H26 impacted by industry weakness.

#### **Megmeet (002851.SZ, Neutral)**

- **Product category:** Demand related to the Vera Rubin platform will likely increase sequentially into 2H26 and 2027, and make a larger contribution to company's AIDC power business in the next 1-2 years per management. In the domestic market, server power supply in the near term will mostly fall around the 5.5kW power range and Megmeet has been

validated by multiple domestic CSPs and server ODMs.

- **US CSP relationship:** Megmeet is continuously working on customized projects with several US CSPs, apart from starting volume shipment to some US CSPs in 1H26. The company is see increasing orders into 2H26 vs. in 1H26 while the delivery pace will be subject to customers' data center construction cadence.
- **800 VDC transition:** Mass adoption of 800 VDC architecture will likely be gradual, while the volume adoption of SST (solid state transformer) will not likely arrive in the next 1-2 years given that reliability tests and component availability take time.

#### **Sifang (601126.SS, not covered)**

- **SST is the key medium-term optionality.** Based on NVIDIA's roadmap, 800V Option C could begin deployment in 2H27, while 34.5kV SST under Option D is expected to commercialize in 2H28 and reach large-scale deployment around 2029.
- **SST competitive landscape:** Sifang mgmt believe Vertiv, Eaton and Delta are better positioned in North America given their power-electronics capabilities and ecosystem access, while traditional distribution players such as Siemens, ABB and GE Vernova may find entry harder. In China, mgmt see Huawei, CATL, Sungrow, XJ Electric and Nari Tech as potential participants, although competition is likely to be intense.
- **Domestic revenue** is expected to maintain around 10%-20% growth, while international orders rose from Rmb350mn in 2024 to Rmb500mn in 2025, with a Rmb1bn target for 2026 and more than Rmb500mn already signed in 1H26; 2027 international orders are expected at around Rmb2bn.

#### **Sinexcel (300693.SZ, not covered)**

- **Medium-voltage UPS** will see <100MW orders from pilot programs in 4Q26 which is scheduled for delivery in 1H27. Company is seeing a 2GW (including redundancy) project pipeline for MV UPS from the US market in 2027, with an ASP of Rmb1bn+/GW. Typical configuration for MV UPS is 2.5MW and 5MW. MV UPS is more useful for data center projects connected to a less stable grid environment.
- **Power quality products** such as APF (Active Power Filter) and SVG (Static Var Generator) generated 50%/50% sales from the domestic/overseas markets with 50%+ GPM, and mgmt noted the growth driver in 2025-27 is coming from the AI data center capex.
- **HVDC/SST:** HVDC products will be sent to a Chinese customer for testing in a SEA data center, while SST is under development.

#### **Wedge (000534.SZ, not covered)**

- **Two-engine revenue** is expected at Rmb600-700mn this year and Rmb1.2-1.3bn next year, including around

Rmb800mn from gas turbines and Rmb350mn from commercial aviation; Siemens and CSIC Longjiang Guanghan-related revenue is expected at around Rmb600mn next year.

- **Capacity** is expected to reach Rmb1.8bn this year, with utilization around 50%, rising to around 60% next year alongside continued yield improvement.
- **Profitability:** The business remains loss-making this year, but targets around 5% net margin for the full year and 12%-15% next year as utilization and yield improve.

#### **Yingliu (603308.SS, Buy)**

- **Two-engine capacity** continues to expand in 2H26, with firmwide revenue targeting at least Rmb360mn/month in Jul-Sep and Rmb380mn/month in Oct-Dec, in line with our forecast; two furnaces will arrive in 1H27 per mgmt, which could raise concern about capacity expansion pace in 1H27.
- **Two-engine orders were in line with their year-beginning goal**, signing Rmb1.5bn in 1H26, vs. 2026 goal of Rmb3bn. But most orders come from Ansaldo, etc., with limited progress on Siemens Energy so far.
- **SpaceX in-house turbine-blade production:** Yingliu mgmt believe that SpaceX output may mainly serve MRO and its own AI-related demand rather than external sales, while building equipment, recruiting talent and ramping effective capacity would likely take years.

## Investment thesis, price targets, risks & methodology

Yingliu is a leading domestic high-end cast component supplier with <1% global share, leaving a long runway for growth. We expect U.S. AIDC to source up to ~60% of power from gas turbines, while global OEMs (Siemens Energy, GE Vernova, MHI) face severe capacity constraints, with turbine blades a key bottleneck due to stringent metallurgical requirements and supply concentration among Western suppliers (e.g., PCC, Howmet), who may be prioritizing aerospace, potentially facing labor shortages. Yingliu is well positioned to capture demand spillover given available capacity, lower ASPs, comparable quality, and strong R&D and customer relationships, reinforced by expanded product development for Siemens Energy and long-term contracts with Baker Hughes, Ansaldo, and GE Aerospace. While still a complementary supplier relative to Western incumbents with single-digit global share by 2030E, improving product mix, scale, and asset turnover should drive GPM, NPM, and ROE expansion through the cycle. We forecast 26%/41% total sales/earnings CAGRs in 2026E-30E and derive a 12m TP of Rmb72.2. We are Buy rated.

### Price Target Risks and Methodology - Yingliu

**Valuation methodology:** Our 12m target price of Rmb72.2 is based on a 2030E P/E of 30x discounted back to 2027E at 10% CoE.

**Key downside risks:** (1) Capacity ramp-up comes in below expectations due to failure to improve yield rate or recruit skilled technicians; (2) Order intake growth below our expectations, potentially due to the long cycle to develop new SKU; (3) AIDC demand weakens with hyperscalers canceling orders for gas turbine manufacturers.

### Investment Thesis - Shenzhen Kstar Science & Tech

Kstar specializes in electric power conversion technology, providing data centers and energy storage systems (ESS) with a constant and stable power supply. It has achieved the largest UPS (uninterruptible power supply) shipments in China for more than 20 years. For Kstar, we expect the company to deliver solid revenue/net income growth, mainly driven by: (1) overseas AIDC customer expansion and product innovation (including high-power UPS, 800 VDC, SST etc.) serving broader regions including the North American market; (2) domestic data center revenue growth pick-up, riding on increased capex from both SOE and POE hyperscalers and expanding customer base in the domestic data center market, and (3) overseas ESS business recovery benefiting from channel inventories normalization and C&I ESS demand. We are Buy rated on the stock considering the attractive P/E valuation on its long-term growth profile and better margin and returns vs. peers.

### Price Target Risks and Methodology - Shenzhen Kstar Science & Tech

**Valuation methodology:** Our 12m target price of Rmb60.0 is based on a 2028E P/E of 26x discounted back to 2027E at 11% CoE.

**Key downside risks:** (1) Lower-than-expected US ODM order growth; (2) Slower new product launches especially 800V DC products; (3) Lower-than-expected overseas ESS growth and margin.

Megmeet is undergoing a structural transformation from an automation & control specialist to a global AI server power supply contender. The company has secured volume orders for 5.5kW PSUs (GB200/GB300) with new orders and shipments to continue through 2026. While its entry into the NVIDIA MGX ecosystem validates its R&D capabilities, a gap remains in its high-efficiency product portfolio compared to tier-1 peers such as Delta Electronics. Moreover, the blurring of supply chain boundaries - with increasing new entrants could intensify competition for next-gen 800 VDC products and potentially higher uncertainties with the adoption of solid-state transformers (SST). At current valuations, we see a balanced risk-reward profile, with upside potential contingent on faster GPU/ASIC order wins or accelerated 800V product validation. Going forward, we will continue to monitor its execution on mass production yields and R&D progress of next-generation products. We are Neutral rated on a sector-relative basis considering earnings growth rate, return profile and P/E valuation.

#### **Price Target Risks and Methodology - Megmeet**

**Valuation methodology:** Our 12-month TP of Rmb120.0 is based on 32x 2028E P/E discounted back to 2027E with 11% CoE.

**Key up/downside risks:** (1) Faster/slower AI server PSU market share gain within NVIDIA ecosystem; (2) Faster/slower product validation progress with ASIC hardware supply chains; (3) Better/worse-than-expected execution on mass production; (4) Shorter/longer R&D cycles on 800VDC power products; (5) Faster/slower industry adoption on 800V DC power distribution architecture; (6) Global AI capex growth sustainability and AIDC supply/demand dynamics.

Jianghai is a top aluminum electrolytic capacitor supplier expanding into film capacitor, supercapacitor, and MLPC products. From a positive standpoint, we note the company's (1) vertical integration of key aluminum electrolytic capacitor manufacturing processes with a c.75% self-sufficiency rate for formed foil (vs. c.30% for Japanese peers), which provides c.18% GPM advantage and closer control of product performance; (2) strong industrial client base in aluminum electrolytic capacitor, which has high entry barriers - with brand recognition the company can leverage into other segments. We expect AIDC-led demand across aluminum electrolytic capacitors, LIC, and MLPC to remain the key earnings driver from 2026E, supported by customer wins, higher per-rack usage, pricing upside, and next-generation power architectures, while EDLC is likely to be a more transitional solution as adoption shifts toward LIC over time. However, after the stock's recent rerating, we believe the current valuation has run ahead of Jianghai's medium-term AIDC potential and already prices in overly aggressive market-share gains across LIC, MLPC, and aluminum electrolytic capacitors, despite still-limited LIC and MLPC customer certification progress and remaining product-quality gaps versus leading peers. We are Sell rated.

#### **Price Target Risks and Methodology - Jianghai**

**Valuation methodology:** Our 12-m TP is Rmb54.4, based on a 30x 2028E P/E discounted back to 2027E with 10.5% CoE.

**Upside risks:** (1) Faster-than-expected LIC and MLPC customer qualification progress; (2) Higher-than-expected market share gains in LIC, MLPC, and aluminum electrolytic

capacitors; (3) Stronger AIDC demand, capacitor content growth, and pricing than our expectations.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

**The rating(s) for Megmeet, Nantong Jianghai Capacitor Co., Shenzhen Kstar Science & Tech and Yingliu is/are relative to the other companies in its/their coverage universe:** Best, Bochu, CRRC Corp. ## Regulatory disclosures

### Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

### Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In

producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not providing as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

**European Union and United Kingdom:** Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

**Japan:** Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied

upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

## Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brasil: 0800 727 5764 and / or [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

**European Economic Area:** Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
