The rapid build-out of data centers and AI infrastructure has created an unprecedented volume of power announcements. Companies are disclosing multi-gigawatt arrangements for nuclear restarts, gas generation, geothermal, fuel cells, solar, storage and other supply sources. But these announcements do not all mean the same thing.

Some are executed power purchase agreements (PPAs) with a defined buyer, seller, capacity and term. Others are master supply agreements, development partnerships, memoranda of understanding, options, equipment reservations or government-supported frameworks that may require future customer commitments, definitive contracts, regulatory approvals, financing, site control, interconnection, construction or equipment delivery.

This note, which tracks deals announced since January 2024, separates those two categories.

Our **PPA tracker** measures the gap between:

Disclosed capacity — MW referenced in publicly announced corporate-power arrangements; and

Binding capacity — MW supported by an executed, capacity-specific agreement that creates a present contractual obligation.

We refer to the difference as "ghost capacity" not because it is fictitious or unimportant, but because it is **not yet equivalent to contracted, deliverable power**. It remains a pipeline. Some of it will become operating generation; some will be resized, delayed, restructured or never converted into a project-level PPA.

The aim is therefore not to dismiss ambitious power-development announcements. It is to apply a consistent contractual lens to them. This makes it easier to compare a 20-year executed PPA with a 3-12 GW framework, a development MOU, or an option that has not yet been exercised. The tier framework used in this note distinguishes executed agreements from frameworks, MOUs, and other arrangements that do not yet create an enforceable capacity obligation.

INVESTMENT IMPLICATIONS

We rate CEG Outperform with a target price of \$296

We rate VST Outperform with a target price of \$181

We rate NEE Outperform with a target price of \$108

We rate BE Market-perform with a target price of \$282

We rate FRVO Outperform with a target price of \$47

We rate ORA Market-perform with a target price of \$112

DETAILS

The tracker's primary focus is **data-center- and AI-linked power procurement**: electricity supply arrangements involving hyperscalers, data-center operators, AI infrastructure developers, and the generators or equipment providers seeking to serve their load.

However, this September edition also includes selected major transactions outside that narrow definition. These include nuclear renewals and restarts, utility-scale renewable and storage PPAs, community-choice and public-power contracts, and other material corporate-power deals. We include them for three reasons:

- They provide a benchmark for what a fully executed, capacity-specific power contract looks like.
- They show how major suppliers are allocating scarce firm power across data-center and non-data-center customers.
- They help distinguish broad AI-related market narratives from actual AI-linked contracted load.

Accordingly, inclusion in the tracker does **not** mean that every deal is driven by AI or data-center demand. Non-data-center/AI arrangements are identified in the underlying deal tables and should be interpreted as commercial context, not as AI demand attribution.

TIER METHODOLOGY

The methodology ranks transactions based on the legal and commercial commitments currently in place, rather than headline size, counterparty credibility, or end-market attractiveness.

EXHIBIT 1: Tier Taxonomy for PPA Deals

Tier	Instrument	What it obliges	Counts as binding?	Example in the index
1	Executed PPA or firm equipment order	Payment obligation, delivery dates, damages for breach. Sits in reported backlog or remaining performance obligation.	Yes – in full	Microsoft – Constellation, 835 MW, 20-year PPA for the Crane restart
2	Cash-secured reservation	No delivery obligation, but capital at risk if canceled	Not counted here; disclosed separately	No examples from our database but on hold for future announcements
3	Master framework with executed tranche	Part signed and binding; the balance is an option on the same terms.	Executed tranche only	Bloom – Oracle: up to 2.8 GW, of which 1.2 GW signed and in deployment
4	Non-binding master agreement	Neither party is obliged to do anything. Establishes terms for future binding agreements.	No	Oklo – Switch, 12 GW through 2044, explicitly non-binding
5	MOU or letter of intent	A statement of intent. Frequently expires unremarked.	No	Amazon – Dominion MOU; multiple Oklo LOIs

Source: Bernstein Analysis

Two principles matter. First, **disclosed MW are not forecasts of delivered MW**. They are capacity referenced in public company disclosures and are retained because those disclosures influence market expectations and capital allocation. Second, **Tier 1 contracts can still face ordinary execution risk** — permitting, construction, interconnection, fuel supply, or plant restart risk. The Tier label asks whether the buyer and seller have a current contractual obligation, not whether physical delivery is risk-free.

RATIO TERMINOLOGY

Binding Ratio (per company): Tier 1 (binding) capacity ÷ Total disclosed capacity, expressed as a percentage. 100% means every disclosed deal in our tracker is a fully executed, binding PPA.

Ghost Ratio (portfolio and per-company): Total disclosed capacity ÷ Tier 1 (binding) capacity, expressed as a multiple (e.g., 600/ 200 ≈ 3.00x). A higher Ghost Ratio indicates a larger amount of disclosed capacity in MOUs, frameworks etc. relative to contractually binding capacity.

EXHIBIT 2: **What's binding and what's not?**

Source: Company filings, Bernstein Analysis

EXHIBIT 3: **Summary by Company and Binding MW in contract**

Ticker	Tier 1 - Binding (MW)	Total disclosed (MW)	Binding Ratio (%)	Ghost ratio (x)
CEG	3484	3484	100%	1.0x
VST	4614	4621	99.8%	1.0x
NEE	6557	25007	26%	3.8x
BE	2200	5719	38%	2.6x
FRVO	1054	4654	23%	4.4x
ORA	663	730	91%	1.1x
Others	2189	28269	8%	12.9x
Portfolio	20761	72484	29%	3.5x

Source: Company filings, Bernstein Analysis

The portfolio's **3.5x ghost ratio** is driven primarily by a handful of large, early-stage announcements that remain outside executed contractual structures. The “Others” group is the clearest example: it holds 28,269 MW of disclosed capacity but only 2,189 MW of Tier 1 binding capacity, producing a 12.9x ratio. This is where the tracker contains many SMR, fuel-cell, gas-to-power, and development-platform announcements that are strategically meaningful but not yet equivalent to a fully executed PPA. **Excluding the “Others” group, the ghost ratio falls to 2.4x and the binding ratio rises to 42%.**

EXHIBIT 4: **Deal summary by company**

Ticker	Company	# of Deals Tracked	Total Disclosed Capacity (approx.)	Repeat Counterparties
CEG	Constellation Energy	6	3,484 MW disclosed / binding — 835 MW Microsoft + 1,121 MW Meta + 175 MW Walmart + 380 MW CyrusOne + 114 MW GSA + 744 MW residual investment-grade-customer tranche + 115 MW Ferrovial/Toyota	Microsoft, Meta, Walmart, CyrusOne
VST	Vistra Corp	5	4,621 MW disclosed — 2,609 MW Meta + 1,200 MW AWS nuclear + 200 MW AWS solar + 405 MW Microsoft + 207 MW New Era Energy & Digital / TCDC	Meta, Amazon Web Services, Microsoft
NEE	NextEra Energy	13	25,007 MW disclosed — includes 2.5 GW Meta, 615 MW Google nuclear restart, 3.5 GW Google framework, 4.5 GW Entergy development program, 1,450 MW Basin Electric, 1.2 GW ExxonMobil, 9.5 GW U.S.–Japan parent program, and signed renewable PPAs	Google / Google Cloud, Meta, Amazon
BE	Bloom Energy	8	5,719 MW disclosed — 2.8 GW Oracle relationship, up to 1.0 GW AEP framework, 100 MW Equinix, 1.8 GW BFC/Crusoe, and 19 MW HPS & IDF first tranche	Oracle, AEP, Equinix, Brookfield, Meta
FRVO	Fervo Energy	6	4,654 MW disclosed — includes Google/NV Energy, SCE, Shell, Clean Power Alliance, the up-to-3 GW Google framework, and the Cape Station Google Energy/Alphabet PPA plus option capacity	Google / Alphabet / Google Energy, Clean Power Alliance
ORA	Ormat Technologies	15	730 MW disclosed — 333 MW electricity supply plus 397 MW storage contracts; includes 163 MW of data-center/AI-linked geothermal capacity and 567 MW of non-data-center utility, CCA, public-power, solar and storage transactions	NV Energy / Google, Hawaiian Electric / HECO, Equilibrium Energy, Clean Power Alliance

Source: Company announcements, Bernstein Analysis

KEY OBSERVATIONS**Binding contracts continue to concentrate among incumbent power providers**

CEG and VST remain the most contracted portfolios in the tracker, with virtually all disclosed capacity supported by executed agreements. Their deal activity demonstrates that large power buyers are willing to enter multi-decade commitments when capacity is identifiable, deliverable, and backed by existing assets or clearly defined expansion projects. The result is a binding ratio of ~100% for both companies, making them the clearest examples of announced demand translating into contracted revenue.

The largest announced opportunities remain the least contracted

NEE continues to hold the largest disclosed capacity in the tracker at ~25 GW, but a significant portion remains associated with frameworks, development programs, and pre-definitive arrangements. These projects may ultimately become important sources of power supply, but their commercial impact depends on future customer commitments, definitive contracts, permitting, financing, and project execution. As a result, NEE's contracted portfolio remains materially smaller than its announced opportunity set.

BE and FRVO demonstrate that platform announcements and contracted capacity can coexist

Both companies combine meaningful contracted projects with larger development frameworks. FRVO's executed Google Energy geothermal agreement provides a tangible example of AI-related demand converting into contracted generation, while the broader Google framework remains an expression of future growth potential. Similarly, Bloom's Oracle, Crusoe, and Equinix relationships validate demand for onsite power solutions, but future expansion still requires additional customer commitments and project-level execution.

ORA remains one of the most contracted portfolios in the tracker

ORA's disclosed-to-binding gap is relatively small compared with peers. The increase in tracked capacity versus prior editions primarily reflects the addition of utility, storage, tolling, and public-power agreements rather than a sudden increase in development-stage announcements. Most disclosed capacity is already supported by executed agreements, with remaining

gaps largely tied to regulatory approvals or contractual options.

The 'Others' category highlights why the Ghost Ratio matters

The Others category contains many of the largest headline announcements in the tracker, including SMR frameworks, AI-campus development platforms, gas-to-power initiatives, and early-stage power agreements. Combined disclosed capacity now exceeds 28 GW, but only a small portion is currently supported by binding contracts. This results in a ghost ratio of 12.9x, illustrating how headline capacity can significantly outpace contracted power. Credible counterparties may improve the probability of conversion, but they do not convert future pipeline into currently contracted, deliverable capacity.

Investors should focus on conversion into binding PPAs, not just announcements

The most important signal for future editions of this tracker is not the volume of new announcements, but the rate at which framework agreements, development partnerships, and MOUs convert into project-level contracts. A declining ghost ratio would indicate increasing revenue visibility and stronger demand validation. A rising ratio would suggest announced capacity is growing faster than executable backlog.

BROADER PPA LANDSCAPE

Corporate power demand remains strong, but procurement preferences are evolving. Global corporate PPA activity continues to run at historically elevated levels, with 34.2 GW of announced volume recorded through August 2026 and cumulative corporate procurement reaching 371 GW since 2015. The Americas remains the largest market, accounting for more than half of global volume, although EMEA and APAC continue to represent a growing share of activity. Strong volumes indicate that corporate buyers remain willing to commit to long-term power contracts despite increasing concerns around transmission constraints, permitting timelines, and generation availability.

The evolution of procurement preferences may be more important than the headline volume itself. Solar remains the largest category within the US corporate PPA market, with 7.0 GW of activity through August 2026. However, **co-located generation and nuclear together now account for roughly 8.0 GW of contracted volume**, highlighting growing demand for solutions that can provide greater reliability, locational certainty, and access to firm power. As data-center power requirements increase, buyers appear increasingly willing to supplement traditional renewable procurement with nuclear, storage, and other dispatchable generation sources.

The buyer rankings reinforce this trend. **Meta remains one of the largest corporate power purchasers globally**, supported by significant nuclear, renewable, and co-located transactions. Google continues to show a strong preference for co-located and firm-power arrangements, reflecting the growing importance of securing generation near large data-center loads. Meanwhile, DayOne Data Centers' appearance among the largest buyers suggests that this shift extends beyond the hyperscalers and is increasingly influencing the broader data-center ecosystem.

Supplier rankings tell a similar story. **VST leads global corporate contracting volumes in 2026 year-to-date**, driven primarily by large-scale nuclear agreements, while developers such as Cypress Creek Renewables, Xcel Energy, and Tenaga Nasional have benefited from growing demand for co-located projects. This suggests the market is no longer defined solely by renewable-energy procurement. Instead, buyers are increasingly seeking combinations of renewable, nuclear, storage, and dispatchable resources that improve power availability and delivery certainty.

Importantly, the BNEF data presented below primarily capture executed corporate PPAs rather than broader development frameworks, strategic partnerships, or MOUs. The continued growth of co-located and nuclear contracting therefore demonstrates that buyers remain willing to sign binding agreements even as the universe of large-scale development announcements expands. This distinction reinforces the purpose of the Ghost PPA framework: separating contracted power from future pipeline and distinguishing declared opportunity from committed capacity.

CONCLUSION

The September update continues to highlight a **two-speed corporate-power market**. At one end are executed, capacity-specific agreements that provide immediate revenue visibility and clearly defined delivery obligations, including nuclear PPAs, geothermal offtake agreements, storage tolling arrangements, and direct data-center power contracts. At the other end are multi-gigawatt frameworks, development programs, and MOUs that may ultimately become important sources of supply but have not yet converted into binding project-level commitments.

Across the portfolio, we now identify **20.6 GW of binding capacity versus 72.4 GW of disclosed capacity**, equivalent to a **29% binding ratio and a 3.5x Ghost Ratio**. The gap should not be viewed as evidence that announced projects lack

value. Rather, it highlights the distinction between strategic opportunity and contracted revenue. The widest gaps remain concentrated in a relatively small number of large development-stage platforms, particularly within the SMR, gas-to-power, and AI-infrastructure ecosystem, where future value depends on customer commitments, regulatory approvals, financing, interconnection, equipment availability, and project execution.

For investors, the most important signal is not the volume of new announcements, but the rate at which those announcements convert into binding contracts. New frameworks can expand the opportunity set, but executed agreements determine backlog quality, revenue visibility, and demand validation. As a result, conversion remains the most important metric to monitor. A declining Ghost Ratio would indicate that announced capacity is increasingly moving toward execution, while a rising ratio would suggest that headline capacity is growing faster than executable backlog. Until conversion occurs, headline gigawatts should be viewed as pipeline capacity: strategically valuable, potentially transformative, and materially less certain than a signed PPA.

APPENDIX - DEAL SUMMARY BY COMPANY

EXHIBIT 10: CEG Deals

Counterparty	Deal Type	Size	Duration / Term	Announced	Status	Tier
Microsoft	PPA (nuclear restart)	835 MW (full plant output)	20-year	Sep 2024	Signed / under construction	1
Meta	PPA (nuclear, virtual)	1,121 MW (full plant output); incl. 30	20-year	Jun 3, 2025	Signed	1
Walmart	PPA (nuclear)	~175 MW (incl. 30 MW expanded)	Two 15-year terms	Jun 23, 2026	Signed	1
CyrusOne	PPA / power supply agreement	380 MW (initial); relationship now	Long-term	First tranche disclosed Feb	Signed	1
GSA (US Gov't)	Gov't contract	~114 MW (1000000 MWh/yr)	10-year	Jan-2025	Signed	1
Ferrovial / Milano Solar; Toyota Motor North America as REC end customer	Long-term solar PPA plus 15-year project-specific REC agreement	More than 115 MW solar; approximately 246,000 MWh annually	Long-term PPA with Ferrovial; Toyota REC arrangement: 15 years	Sep. 21, 2026	Signed	1
Unnamed investment-grade customers (aggregate residual)	Long-term nuclear PPA	~744 MW	15–20 years	Q2'26; disclosed Aug 2026	Signed	1

Source: Company filings, Bernstein Analysis

EXHIBIT 11: VST Deals

Counterparty	Deal Type	Size	Duration / Term	Announced	Status	Tier
Meta	PPA (nuclear, existing + uprates); SMR option	2,609 MW total (2,176 MW existing generation + 433 MW uprates); option for future ~300 MW SMR	20-year	Jan 9, 2026	Signed	1
Amazon Web Services	PPA (nuclear)	Up to 1,200 MW	20-year (option to extend up to additional 20 years)	Sep 29, 2025 (SEC 8-K)	Signed	1
Amazon Web Services	PPA (solar)	200 MW	Not disclosed	Disclosed in Vista FY2025 8-K (year-end results)	Signed / commissioned	1
Microsoft	PPA (solar)	405 MW	Not disclosed	08-Aug-24	Signed	1
New Era Energy & Digital / TCDC PowerCo LLC	PPA (natural gas)	Minimum 200 MW; up to 207 MW	Initial 20-year term; automatic one-year renewals thereafter	Sep. 21, 2026	Signed / executed	1

Source: Company filings, Bernstein Analysis

EXHIBIT 12: NEE Deals

Counterparty	Deal Type	Size	Duration / Term	Announced	Status	Tier
Meta	PPA + ESA (solar + storage portfolio)	~2.5 GW total (2.1 GW solar across 9 projects in ERCOT/SPP/MISO; 190 MW solar + 168 MW storage in NM)	Long-term (individual terms undisclosed)	Dec 8, 2025	Signed	1
Google	PPA (nuclear restart)	615 MW (full plant output)	25-year	Oct 27, 2025	Signed	1
Google Cloud	Development framework (gas + renewables + capacity)	Multi-GW; part of NEE/Google relationship exceeding 3.5 GW in operation or under contract	Not disclosed	Expanded partnership announced Dec 8, 2025	MOU / framework, pre-PPA	5
Entergy	Joint development agreement (solar + storage)	Up to 4.5 GW	5-year development agreement	Jun 7, 2024	Signed (development stage)	1
Comstock Resources / U.S. Department of Commerce / Government of Japan	Gas supply + development collaboration for government-backed power-generation hub	Up to 5.2 GW gas-fired generation; capable of serving up to 5.0 GW of large-load demand	Not disclosed	Mar. 20–23, 2026	Selected development project; subject to negotiation/execution of definitive documents, development, construction, and commissioning	4
Basin Electric Power Cooperative	MOU (gas) + signed ESA (storage)	~1,450 MW gas project (MOU); 400 MWh battery storage (signed ESA)	Gas project: not yet finalized; Storage: 24.5-year Energy Storage Agreement	Gas MOU: Dec 8, 2025; BESS ND siting approval: Apr 2026	Gas: MOU/exploratory; Storage: signed	3
ExxonMobil	Development partnership (gas + carbon capture)	1.2 GW	Not disclosed	Disclosed Dec 8, 2025	Pre-PPA / marketing stage	4
U.S. Department of Commerce / Government of Japan	Government-directed gas-generation development framework	9.5 GW total: 5.2 GW Anderson County, Texas + 4.3 GW southwest Pennsylvania	Not disclosed	Mar. 20–24, 2026	Selected / pre-definitive; subject to negotiation and execution of definitive documents, development, construction, and commissioning	4
Amazon	PPA	610 MW	Not disclosed	Dec-25	Signed	1
Sysco	PPA	335 MW	Not disclosed	Dec-25	Signed	1
Amazon	PPA	268 MW	Not disclosed	Dec-24	Signed	1
Adventist	PPA	327.6 MW	Not disclosed	Aug-24	Signed	1
Davidson Dickinson Elon Haverford Lafayette Lehigh Muhlenberg Swarthmore Wake	PPA	201 MW	20 years	Apr-24	Signed	1

Source: Company filings, Bernstein Analysis

EXHIBIT 13: **BE Deals**

Counterparty	Deal Type	Size	Duration / Term	Announced	Status	Tier
Oracle	Master Services Agreement (on-site fuel cells)	Up to 2.8 GW (1.2 GW already contracted/deploying; 1.6 GW remaining expansion)	Underlying supply deals cited at up to 20-year offtakes	Apr-26	Signed / actively deploying	3
American Electric Power (AEP)	Framework supply agreement (off-grid fuel cells)	Up to 1 GW (initial order 100 MW)	Long-term supply agreement	Nov 2024	Signed / deploying	3
Equinix	Supply/deployment agreement	>100 MW across 19 U.S. data centers	10-year (expanded)	Initial 2024–2025; expanded Feb 2025	Signed / deploying	1
Brookfield	Financing / deployment partnership (not a PPA)	Up to \$25B in financing capacity (expanded from initial \$5B)	Multi-year investment partnership	Initial \$5B deal ~Jun 2026; expanded to \$25B ~Jun 24, 2026	Signed	3
BFC Power (Tallgrass/Blackstone subsidiary) — for Crusoe 'Cheyenne AI Factory'	Definitive supply agreement (on-site fuel cells)	900 MW (Phase 1 of a 1.8 GW campus)	Not disclosed	Definitive agreement Jan 8, 2026 (following Sept 2025 initial filing)	Signed	1
Quanta Computer	Supply/partnership agreement (AI hardware manufacturing power)	Not disclosed	Not disclosed	Nov 2024 (expanded)	Signed	1
Intel	Additional Capacity	Not disclosed	Not disclosed	May-2024	Announced	4
HPS & IDF	Project financing partnership	19 MW (first tranche)	Not disclosed	Dec-2024	Announced	3

Source: Company filings, Bernstein Analysis

EXHIBIT 14: **FRVO Deals**

Counterparty	Deal Type	Size	Duration / Term	Announced	Status	Tier
Google / NV Energy	PPA (portfolio, via Clean Transition Tariff)	115 MW	Not disclosed	Signed Jun 2024 (announced); PUCN-approved May 2025	Signed / approved	1
Southern California Edison (SCE)	PPA (two agreements)	320 MW total	15-year each	Jun 25, 2024	Signed	1
Shell Energy North America	PPA	31 MW	15-year	Apr 15, 2025	Signed	1
Clean Power Alliance	PPA (expansion of existing agreement)	18 MW (add-on)	Not disclosed	Feb-25	Signed	1
Google	Geothermal Framework Agreement (development framework, not a conventional PPA)	Up to 3 GW through 2033 (1 GW proposed in first two years)	Framework through 2033	Mar 2026	Signed framework	5
Google Energy LLC / Alphabet Inc.	Executed PPA — enhanced geothermal energy	396 MW; option to expand by 600 MW	15-year delivery term	Sep. 1, 2026	Signed / executed; subject to project development, regulatory, permitting and interconnection approvals	1

Source: Company filings, Bernstein Analysis

EXHIBIT 15: **ORA Deals**

Counterparty	Deal Type	Size	Announced	Delivery / COD	Status	Tier
Electricité de France (EDF)	PPA (new plant build)	10 MW	30-year	Mar 4, 2024	Signed	1
Central Coast Community Energy (3CE) & Silicon Valley Clean Energy (SVCE)	PPA amendment ('blend-and-extend')	15 MW combined (up from 14 MW; 7.5 MW each, from 7 MW each)	5-year extension to original 2022 PPAs (now through 2037, from 2032)	Mar 10, 2026	Signed / approved	1
Southern California Public Power Authority (SCPPA)	PPA extension	52 MW	25-year extension	Aug 25, 2025	Signed / approved	1
Switch	PPA (first direct data-center PPA for Ormat)	~13 MW (+ option to add ~7 MW solar PV)	20-year	Jan 12, 2026	Signed	1
NV Energy (for Google)	PPA (multi-project portfolio, via Clean Transition Tariff)	Up to 150 MW	Runs from first project's COD to 15 years past the final project's COD	Feb 17, 2026	Signed, pending PUCN approval (expected H2 2026)	1
Calpine Energy Solutions	PPA (geothermal)	Up to 15 MW	10-year	Jan 22 2025	Signed	1
PLN	Two geothermal exploration and energy conversion agreements / BOT offtake	Up to 40 MW (2 x 20 MW)	23-year BOT operating structure	2025	Signed	1
Hawaiian Electric / HECO	PPA acquired with Hoku solar-plus-storage asset	30 MW solar	25-year fixed-price PPA	Asset acquired Jan 2026	Signed / acquired	1
Hawaiian Electric / HELCO	PPA amendment / capacity increase	8 MW incremental	Existing PPA amended; term not disclosed	Feb 12 2024	Signed / approved	1
City of Riverside	Resource adequacy purchase and sale agreement	80 MW / 320 MWh	15-year	Jul 23 2024	Signed / operational	1
Equilibrium Energy	Tolling agreement	60 MW / 120 MWh	7-year	Aug 15 2024	Signed / operational	1
Equilibrium Energy	Tolling agreement	60 MW / 120 MWh	7-year	Aug 15 2024	Signed	1
Hawaiian Electric / HECO	PPA acquired with Hoku solar-plus-storage asset	30 MW / 120 MWh battery storage	25-year fixed-price PPA	Asset acquired Jan 2026	Signed / acquired	1
Clean Power Alliance	Tolling agreement	100 MW / 400 MWh	20-year	2026	Signed / released for construction	1
NV Energy	Solar + storage PPA	67 MW solar + 67 MW / 268 MWh battery storage	Long-term fixed-price PPA; exact term not disclosed	Q2 2026; Aug 2026	Signed, subject to Nevada PUC (PUCN) approval	2

EXHIBIT 16: **Other Deals**

Company	Counterparty	Deal Type	Size	Announced	Delivery / COD	Status	Tier
Oklo	Switch	Master Power Agreement (non-binding, framework for PPAs)	Up to 12 GW through 2044	17-Dec-2024	Initial deployments could begin 2029	Signed (non-binding framework)	4
NuScale (via ENTRAI)	TVA	Collaborative development & deployment agreement (non-binding; framework for future PPAs)	Up to 6 GW (six SMR power plants)	02-Sep-2025	TBD (multi-year construction)	Signed (agreement to collaborate)	4
X-energy	Amazon	Strategic partnership + investment; SMR deployment (Energy Northwest / Cascade project)	Initial 320 MW, expandable to 960 MW (12 Xe-100 units); KHNP/Doosan deal targets 5+ GW nationally	Oct 15, 2024 (initial); expanded Aug 25, 2025 (KHNP/Doosan)	Early 2030s	Signed	2
TerraPower	Meta	Forward power agreement (SMR offtake)	Up to 690 MW (two Natrium units); option on six more units for 2.1 GW	09-Jan-2026	As early as 2032 (first units); 2035 (optioned units)	Signed (forward agreement)	3
Oklo	All other (aggregate, excl. Switch)	Various offtake/MOUs (CoreWeave, Equinix, Prometheus Hyperscale, US Air Force, etc.)	~120 MW (CoreWeave) plus additional MOUs, cumulative pipeline in GW range	2024-2026 (various)	Aurora-INL targeted ~2027-2028	Mix of signed offtake agreements and MOUs	5
Kairos Power	Google	Master Plant Development Agreement (PPA framework)	Up to 500 MW by 2035; first unit (Hermes 2) 50 MWe	Oct 14, 2024 (framework); Mar 2026 (TVA PPA for Hermes 2)	First deployment 2030	Signed	3
Talen Energy	Amazon	Restructured/expanded PPA (front-of-the-meter)	1,920 MW (up from original 300 MW co-location arrangement)	10-Jun-2025	Full delivery of the power is expected by 2032	Signed	1
Dominion Energy	Amazon	SMR development agreement (MoU)	Undisclosed target capacity (multiple SMR units envisioned)	01-Oct-2024	Study/siting phase; construction timeline TBD	Signed (study/development agreement)	5
Standard Power	NuScale Power / ENTRAI	Term sheet / agreement for SMR power supply	Up to ~2 GW (multiple modules across sites)	2023 (initial); reaffirmed/expanded 2024-2025	Targeted early-to-mid 2030s	Signed (term sheet, non-binding elements)	5
Equinix	Oklo	PPA, originating from a Letter of Intent	Upto 500 MW	20-year term, with right to renew for additional 20-year terms	Feb 2024 (LOI); Apr 2024 (\$25M pre-payment disclosed); reaffirmed Aug 14, 2025	Signed agreement; binding PPA pricing still pending	2
XOS Energy	Meta	Development agreement for advanced/enhanced geothermal power	150 MW, in two phases (initial smaller phase + larger second phase)	12-Jun-2025	Both phases targeted operational by 2030	Signed	4
Oklo	Wyoming Hyperscale	Non-binding LOI (framework for future PPA)	100 MW	22-May-2024	Not disclosed	Signed (non-binding LOI)	5
NRG Energy	Unnamed leading global cloud and AI hyperscaler	BYOP / preliminary long-term capacity agreement for new CCGT	1,200 MW initial phase; expansion potential up to 2,400 MW not included in disclosed MW	Aug. 4, 2026	Late 2029 targeted COD	Commercial framework agreed; subject to final negotiations	5
Blue Energy	GE Vernova Hitachi Nuclear Energy	Development / engineering, licensing and safety-analysis agreement for gas-plus-nuclear data-center power project	Up to 2.5 GW; ~1.0 GW gas initially + up to 1.5 GW SHRs	Aug. 13, 2026	Gas phase targeted 2030; SMRs beginning 2032	Signed development agreement; subject to FID expected 2027	4
Headwater Energy	Meta Platforms, Inc.	Solar PPA	125 MW	Sep. 7, 2026	Construction expected to begin Q3 2026; targeted COD Nov. 2027	Signed / closed	1
Apex Clean Energy	Meta Platforms, Inc.	Solar PPA / environmental-attributes offtake	144 MW	Sep. 16, 2026	Targeted 2027	Signed	1
Generac Holdings	Amazon	Long-term equipment supply agreement — backup generators	0	Sep. 16, 2026	Initial deliveries 2027–28	Signed	1

DISCLOSURE APPENDIX

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社) and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY**Constellation Energy Corporation**

We use an SOTP valuation running a 14x multiple on 2027-28E Nuclear EBITDA of \$5.7B and a 10x multiple on 2027-28E rest of group EBITDA of \$3.5B to arrive at our target price of \$296/sh.

Vistra Corporation

We use a 8.7x multiple on 2027-28 estimated adjusted EBITDA of \$8.7B to arrive at our target price of \$181

NextEra Energy Inc

We blend a DCF valuation on FPL using a 2% growth rate and 6% discount rate on FPL's regulated earnings, with a 14x EV/EBITDA multiple on NEER 2027-28 EBITDA of \$12.1B to arrive at a combined target price of \$108/sh.

Bloom Energy Corporation

We switch our valuation methodology to utilizing an EV/ EBITDA multiple with this note and model, and arrive at our unchanged price target of \$282/share - we apply a 41x EV/EBITDA multiple to our blended 2H27/1H28 Adj. EBITDA.

Fervo Energy Company

EV to EBITDA. We use 2035 Adjusted EBITDA and an EV/EBITDA multiple of 10.5x and discount it back to 2027 for a price target of \$47

Ormat Technologies, Inc.

We use a 14.2x multiple on blended 2027-28 estimated adjusted EBITDA of \$706MM to arrive at our target price of \$112/sh.

RISKS**Constellation Energy Corporation**

Key downside risks to our price target include the inability to contract open capacity at attractive terms after the phase out of tax credits, delays in adding new nuclear generation capacity, and meaningful moderation in PJM capacity prices following the RBP.

Vistra Corporation

Key downside risks to our price target include lower than expected power demand growth from data centers in the ERCOT and PJM regions, high natural gas prices impacting margins, and unfavorable hedging outcomes.

NextEra Energy Inc

Key downside risks to our price target include FPL returns falling short of the midpoint of guidance, lower overall power demand growth dampening NEER generation, and supply chain risks from higher than expected tariff exposure.

Bloom Energy Corporation

Key downside risks to our price target include grid upgrades limiting demand for Bloom's onsite power solution, and lower than expected data center demand. Higher than expected demand for onsite power and contracting activity are upside risks.

Fervo Energy Company

Downside risks to our price target include: Lack of power demand growth, or weaker than anticipated power prices for future PPAs Competing technologies → Fuel cells, Solar plus battery storage Permitting challenges and changes to overall government support Unexpected operational challenges as phase I project ramps Capital project over runs on future phases Inability to drive down future project costs Heat transfer/ faster than expected cooling

Ormat Technologies, Inc.

Upside risks to our price target include 1) the inability of competitors to prove and scale enhanced geothermal technology; 2) greater than anticipating PPA contracting for behind the meter power with hyperscalers for the long term; 3) the faster development and commercialization of EGS by Ormat themselves before competitors; and 4) significant sustained upside from storage margins

Downside risks to our price target include 1) a muted demand in the US resulting in lower PPA pricing than expected; 2) Curtailment resulting in lower revenue in the Electricity segment

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION**EQUITY RATINGS DEFINITIONS****Bernstein brand**

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIA) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/- 15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

- **Credit Neutral (C-N):** The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- **Credit Underperform (C-UP):** The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	51.2%	15.3%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	35.8%	16.2%
Underperform	SELL	13.1%	13.6%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.

As of June 30, 2026. All figures are updated quarterly.

PRICE CHARTS / RATINGS AND PRICE TARGET HISTORY

Vistra Corporation (VST) Rating History for Bernstein as of 09/25/2026**NextEra Energy Inc (NEE) Rating History for Bernstein as of 09/25/2026****Bloom Energy Corporation (BE) Rating History for Bernstein as of 09/25/2026**

Fervo Energy Company (FRVO) Rating History for Bernstein as of 09/25/2026**Ormat Technologies, Inc. (ORA) Rating History for Bernstein as of 09/25/2026**

All price target and closing price data in the chart(s) above are denominated in the currency noted in the Ticker Table of this report.

CONFLICTS OF INTEREST

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for “Bernstein” and “Autonomous” research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the “Autonomous” and “Bernstein” brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.
- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to “Autonomous” branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation (“MAR”) and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission (“SEC”) and a member of the U.S. Financial Industry Regulatory Authority, Inc. (“FINRA”) is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as “permitted client” as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. (“BTG”) is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “Financial Promotion Order”), (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations, etc.”) of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (<https://www.sfc.hk/publicregWeb/corp/AXC846/details>). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;
- making a market for a financial product; and
- providing a custodial or depository service.

To our readers in India: This publication is being distributed in India by Sanford C. Bernstein (India) Private Limited (SCB India) which is licensed and regulated by Securities and Exchange Board of India ("SEBI") as a research analyst entity under the SEBI (Research Analyst) Regulations, 2014, having registration no. LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are "eligible counterparties", "professional clients", "institutional investors" and/or "professional investors" as defined by the aforementioned regulators, and must not be redistributed to retail clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/ authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein's express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein's express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein's research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)' current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

Any references to Societe Generale herein are purely factual, based upon publicly available information, and included for comparative purposes only. They do not constitute an opinion or recommendation with respect to the securities of Societe

Generale.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
