2Q26 Review: Record order booking clears path for 2H27E EBITDA acceleration despite renewal repricing; Buy

GDS	12m Price Target: \$49.00	Price: \$34.41	Upside: 42.4%
9698.HK	12m Price Target: HK\$48.00	Price: HK\$34.24	Upside: 40.2%

Order outlook to drive accelerated EBITDA growth from 2H27E, despite drag from contract renewal repricing; Buy

The **strong order outlook**, supported by GDS management's comments on healthy AI and non-AI demand at the 2Q26 results call ([First Take](#)), should **enhance EBITDA visibility** over the coming years. As these orders convert into revenue and EBITDA—typically with a 12–18 month lag between order intake and P&L recognition—we expect the **earnings growth acceleration trajectory to become increasingly evident in 2H27E and beyond** (GSe 2027/28E adj. EBITDA yoy growth at 8%/19% excluding one-off items), which could support a **valuation re-rating vs. 9x+ 2027E EV/EBITDA implied for GDS China** as of last close, excluding valuation attributable from **DayOne** of which GDS owns 19.9% equity stake.

In order to better triangulate EBITDA expansion over next 3 years, we **break down yoy EBITDA change into two major drivers** ([Exhibit 3](#)), i.e. **1) EBITDA contribution from net move-ins**, assuming Rmb2.2mn/MW EBITDA on an annualized basis as indicated by management; **2) EBITDA loss from repricing upon existing contract renewals**, which may be 20–30% lower than original prices due to the market price drop in 2021–23 in particular though the market price has been stabilized over the past couple of years; we estimate EBITDA loss from contract renewals will drag 2026–28E adj. EBITDA growth by c. 2pp/2.5pp/1pp.

We continue to **stay Buy rated on GDS/9698.HK with 12m SOTP-based target prices raised to US\$49/HK\$48**, primarily on our updated FX assumptions (USD/CNY at 6.8, CNY/HKD at 1.15 vs 7.15/1.09 prior). Despite higher utilized capacity assumptions in 2027–28E driven by order move-ins, **we keep 2026–28E adj. EBITDA forecasts largely unchanged and stay 6–7% below Visible**

DayOne

While GDS did not disclose DayOne's financial and operating performance for 2Q26, we note its **solid capacity expansion in Southeast Asia and Europe:**

- **Spain:** DayOne announced to build a 300MW data center campus in Spain in the Aragon region. The project costs €3bn, and aims to become one of the largest AI campuses in Southern Europe. Ignis, a renewable energy firm, is cooperating with DayOne to build the campus.
- **Malaysia:** DayOne signed agreement in June to secure 1.5GWp of solar capacity and 2.2GWh of battery energy storage with TNB, the largest electric utility company in Malaysia.
- **Batam:** DayOne is cooperating with Firmus to build the Batam campus. Firmus recently announced a strategic compute partnership with NVIDIA, which covers 170k NVIDIA AI accelerators across Grace-Blackwell, Vera-Rubin, and Vera platforms through 2027 and 2028, developing Batam campus to become one of the largest AI infrastructures in APAC.

Forecast revisions and valuation

Reflecting GDS' 2Q26 results, we slightly raise our 2026E revenue and adj. EBITDA forecasts for GDS China by 1-2% on better-than-expected 2Q26 move-in (our revised 2026E revenue/EBITDA forecasts are -0.5%/1.5% vs. company guidance at mid-points). We raise 2027-28E revenue by 2%/9% yet keep adj. EBITDA largely unchanged, to factor in higher assumptions of move-ins in 2027E/2028E but partially offset by EBITDA loss from repricing upon existing contract renewals. While for DayOne, we raise 2026-28E revenue forecasts by 1-6% and adj. EBITDA forecasts by 2-7% on higher assumptions for capacity committed.

Our target prices for GDS/9698.HK are raised to **US\$49/HK\$48** (from US\$46/HK\$45 prior), primarily on our updated FX assumptions (USD/CNY at 6.8, CNY/HKD at 1.15 vs 7.15/1.09 prior). The target prices are based on SOTP valuation in which we apply: 1) 13.5x target EV/EBITDA to GDS China's 2027E EBITDA (unchanged); 2) 23x target EV/EBITDA to DayOne's 2027E EBITDA (unchanged), adjusted by the 19.9% stake owned by GDS (unchanged); 3) 10% holdco. discount (unchanged). Stay **Buy** with 42%/40% upside potential for GDS/9698.HK.

Investment Thesis - GDS Holdings

GDS is the leader in China's carrier-neutral data center market with a wholesale-centric business model. We see GDS has established a clear leadership as the largest data center platform in China in terms of developable capacity via resource expansion in key computing clusters, and fortified its balance sheet via financial discipline and capital recycling, and hence is poised to capture demand from key customers including China's top hyperscalers. For DayOne, as it becomes a standalone business with a different growth/profitability profile, we see strong contract move-in visibility in the near-term and continued capacity expansion in the mid-term.

Price Target Risks and Methodology - GDS Holdings

Our 12m target prices of **US\$49/HK\$48** for GDS/9698.HK are based on a SOTP valuation for GDS China and DayOne, with a 10% holdco discount. Key downside risks: Below-expected move-in demand and utilization improvement, slower overseas revenue/profitability ramp-up, lower-than-expected pricing trend in China and overseas markets, customer churn, slower deleveraging process.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied

upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
