

Asia Pacific Monthly Wrap

August 2026: Yields in focus

- MSCI Asia Pacific and MXASJ both recovered 3.3% in August**, following July's slump. While the AI theme received some endorsement from earnings by large players (e.g., Nvidia), markets grew increasingly focused on bond yields over the month as global bond yields soared to decades highs (the 10yr JGB yield reached 3% at the time of writing - a 30yr high). The combination of U.S. government interventions related to JPY and U.S. Treasuries, together with the Fed's stance on inflation, drove moves across the U.S. Treasury yield curve, the U.S. dollar, and commodities. Materials (+9.9%) was therefore the best-performing sector in the region last month, supported by both a surge in gold and copper prices (e.g., Zijin Mining). Note that copper prices broke record-highs amid tariff concerns and strong earnings (e.g., Nanya Plastics). While less strong than Materials, IT (+4.8%) also contributed positively to Asia's performance, with Tech Hardware outperforming Semiconductors. By market, tech-heavy markets (KR: +6.9%; TW: +6.5%; JP: +3.4%) led the recovery, though still not fully recovering from June highs. All three markets also saw significant upward revisions to FTM EPS. Despite weak economic activity data and disappointing performance in Internet stocks, China (-0.3%) did not lose much in August, supported by info- and bio-tech industries which reported upbeat results and responded positively to mRNA cancer vaccine breakthrough. India (-0.2%) recorded a second consecutive FII inflow and the highest earnings growth since Jun-2024. ASEAN markets went up by 2.7% m/m, slightly underperforming North Asia, with performance diverging across the region. Australia (+2.6%) delivered a positive return, supported by strength in Materials.
- FTM EPS forecasts were revised upward in Korea, Taiwan, and Japan.** China Communications (e.g., Tencent) saw significant downgrades. Korea is expected to deliver the largest EPS CAGR in 2026 and 2027 (+138.1%).
- Korea (-2.9z) and Indonesia (-2.8z) are trading well below their historical averages, while China and India are trading close to their historical averages.** Korea still has the lowest FTM PE in the region (FTM PE: 4.8x). Taiwan (19.0x, -1.6z) is trading below its historical average.
- FIIs keep selling Korea for four consecutive months.** Taiwan and India saw foreign equity inflows in August. In China, the size of Southbound flows dropped sharply from US\$8.0bn in July to US\$1.3bn in August.
- Style performance.** Momentum and Growth regained in August, while Low Vol and Value lagged. YTD, Growth, Quality, and Momentum are the best performing factors, while Low Vol and Value factors posted negative returns.
- Global macro.** The US 10yr Treasury yield fluctuated in August and finally rose by 2bps to 4.75%. Copper broke fresh highs amid tariff concerns. Gold (+9.7%) also rallied, supported by the downbeat NFP, US Treasury interventions, and CB's purchases of gold. The US dollar declined by 0.5%. Most Asian currencies except JPY and PHP appreciated vs. the US dollar (JPY: -1.5%; PHP: -1.7%), with KRW (+4.9%) leading the gains.

Equity Review: August 2026

China/Hong Kong SAR

- **Market beta:** China saw downward FTM EPS revisions in Communications. The market is trading slightly below 10-yr historical average PE. Despite weak economic activity data and disappointing performance in internet stocks, China (-0.3%) did not lose much in August, supported by info- and bio-tech industries which reported upbeat results and responded positively to mRNA cancer vaccine breakthrough.
- **Sector/Security alpha:** 2Q26 strengthens [Tencent](#)'s core earnings floor (profit excluding new AI products +19% YoY on consistent disclosure), while making the AI bill clearer—AI losses absorbed the sequential core improvement and reported free cash flow turned negative as capex ramped in line with an ~RMB200bn frame. WorkBuddy shows strong traction and willingness to pay, and Xiaowei (Weixin agent) has started limited prototype testing, but AI monetization is not yet auditable and we assign no value to Xiaowei in the base case. Key concerns are softer international games and the capex-driven net cash drawdown, though adjusted FCF excluding compute prepayments was positive and excess-compute resale offers downside protection.
- **Notable policy/data/events:** 1) China's inflation (CPI down 0.4% m/m sa) and credit [data](#) (a record contraction in new loans: -340bn yuan net) softened more than expected, underscoring weak domestic demand and only limited fiscal lift, which raises downside risk to the call for a sharp 3Q growth acceleration (to ~4.3% q/q saar) even as exports remain the key support. 2) China's July [activity](#) data showed broad-based domestic weakness, with softer production, weaker retail sales, and deeper investment contraction, prompting a cut to the 2026 GDP growth to 4.5% y/y. Housing stayed weak, and recent Beijing/Shanghai easing measures are seen as incremental rather than transformative. Fiscal execution remains the key policy focus, as spending slowed despite stronger revenue, leaving room for catch-up later in 2026 and into 1Q27.

India

- **Market beta:** India saw a second consecutive FII inflows in August. FY27 [earnings](#) in India started strong: MSCI India posted 19% YoY revenue growth and 16% YoY PAT growth in 1Q with solid breadth (58% beats vs 24% misses), and mid/small caps saw particularly strong profit growth (~42%/~39% YoY). Management tone emphasized resilient domestic demand despite geopolitical, crude/logistics, and trade uncertainty, with monsoon progress the key swing factor.
- **Notable policy/data/events:** 1) 2Q [GDP](#) growth came in strong at 7.8% oya, printing close to expectations and much above Consensus (J.P. Morgan: 8.0%; consensus: 7.3%); 2) Industrial [activity](#) remained strong in July, printing above expectations at 6.7%oya (J.P. Morgan: 5.6%, consensus: 6.0%). The July upside surprise was driven largely by a sharp upward revision to June, with growth revised up to a booming 8.8%oya (previously 7.3%). 3) July's [trade](#) deficit printed slightly above expectations, at \$32bn (J.P. Morgan: \$31bn; consensus: \$30.5bn), widening from \$30.4bn in June. The upside surprise was driven largely by stronger NoNG imports.

Taiwan

- **Market beta:** Taiwan saw strong foreign inflows in August, with a significant upward revision in FTM EPS. The market is trading 1.6 standard deviations above the historical FTM P/E ratio.
- **Sector/Security alpha:** [TSMC](#)'s July revenue hit NT\$467.6bn (+45% YoY, +6% MoM), supporting a 3Q26 result at the mid- to high-end of guidance on durable datacenter AI demand and strong leading-edge utilization. Near-term margin upside is limited by N2 ramp dilution (3Q26 GM ~66.5%), but gross margins are still expected to hold in the mid- to high-60s and improve over time with pricing and better yields. The AI compute capex cycle is viewed as intact into 2027+, with TSMC investing aggressively to close the supply/demand gap.
- **Notable policy/data/events:** 1) Taiwan's July [CPI](#) matched expectations and moderated slightly, supporting a 2H26 easing trend. Inflation was mainly driven by food, tourism, and housing, while lower energy costs provided relief. AI-related memory chip inflation has passed through to computer and software prices, but its CPI impact remains limited due to a small basket weight. 2) Taiwan's July [trade](#) missed expectations as export and import volumes corrected, but underlying momentum remained solid. Exports fell as AI-tech shipments dropped sharply, while imports softened on weaker capital goods and semiconductor equipment after prior gains. Elevated semi-equipment imports and upbeat tech-sector guidance still indicate a durable AI upcycle, supporting continued export resilience. 3) Taiwan's July [IP](#) rose 2.9% m/m sa, led by tech, reinforcing a durable AI upcycle and upside risks to 3Q GDP growth.

Korea

- **Market beta:** The KOSPI recovered 3.4% in August after falling 22% in July. The heavy-weighted sectors, IT and Industrials, did not lead the recovery; instead, the light-weighted sectors, Staples and Energy, posted stronger returns. Momentum and Growth rebounded to some extent, but not nearly enough to recoup the losses from July's unwind.
- **Sector/Security alpha:** [Samsung Life](#)'s 2Q26 net profit missed at W690B (-9% YoY) versus JPMe/consensus of W769B/W721B, mainly from weaker insurance profit (variable annuity hedging losses/negative variances) and one-offs. While the call added little on shareholder returns, management reiterated SEC-related dividends and disposal gains are part of distributable earnings. Despite the miss, the read-through is more positive given (1) strong positioning for Korea's retirement/wealth opportunity via differentiated whole-life products, (2) controlled lapse and liquidity risks, and (3) active hedging to reduce IFRS 17/9 volatility and support steadier DPS. Capital and mix are supportive (K-ICS 208%, core capital 177%, whole life 31% of new business CSM; CSM balance W13.7T, +4% YTD), while the main overhang is unclear value-up/profit-sharing on SEC gains; the 3Q26 call is seen as the key catalyst.
- **Notable policy/data/events:** 1) The Bank of Korea raised [rates](#) by 25bp to 3.0%, its second straight hike, aligning with expectations but resolving divided market views toward tightening. Hawkish factors included stronger GDP forecasts, higher core inflation, and financial-stability concerns, while dovish elements — calls to assess prior hikes, one hold dissent, and a 3.25% six-month median rate projection — suggest no urgent October hike. The baseline remains gradual tightening, with hikes expected in November, February, and May to a 3.75% terminal rate. 2) Korea's August [exports](#) beat expectations at US \$98.3bn; seasonally adjusted exports rose 4.2% m/m and the 3-month trend remains very strong (71.1% saar), led by tech

(+7.7% m/m; semis +8.1%). Non-tech was flat (+0.1%) as autos fell on seasonal shutdown effects, offset by petroleum.

ASEAN

- **Market beta:** ASEAN markets went up by 2.7% m/m, slightly underperforming MSCI AxJ North Asian markets that stabilized after a sharp correction in July. There was strong divergence among individual countries. Philippines (-7.2% m/m) dropped significantly while Singapore's STI extended the rally (+5.6% m/m).
- **Sector/Security alpha:** Synchronized global liquidity tightening is a key risk in the near term. Historically, Indonesia and Philippines equity/FX have the highest negative correlation with US bond yield. That said, ultra-light positioning (US \$4.5bn outflows YTD) and ongoing negative earnings revisions (-6% YTD) suggest that investors have turned cautious and expectations remain low for the near-term. We downgraded the Real Estate sector from OW to Neutral as the interest rate outlook rises. We reiterate our cautious [view](#) on ASEAN equities going into 2H26: OW Singapore and Malaysia; Neutral Thailand, Vietnam and Indonesia; and UW Philippines equities.
- **Notable policy/data/events:** BI and BOT held rates while BSP delivered a third straight 25bp hike as expected by JPM economists. The Indonesian government announced the 2027 Budget with a 2.4% fiscal deficit target, signally prudent spending. Thailand's GDP growth fell to 1.9%ooya in 2Q26 from 2.8% in 1Q26, as private consumption slowed amid the energy price shock. MAS unexpectedly tightened its FX policy by raising the slope of the policy band.

Japan

- **Market beta:** The 10yr JGB yield reached multi-decade year highs. Japan saw large FII outflows, but analysts keep raising their forecasts on FTM EPS.
- **Sector/security alpha:** [Japan](#)'s rate rise toward a ~3% 10-year JGB yield is being driven mainly by term-premium/fiscal concerns and may persist near term due to the FY2027 budget/political calendar, but Japanese equities can likely coexist with higher yields until around ~4% (often ~4–5% by different methods) before valuations turn meaningfully negative. The corporate profit hit from higher interest expense may be limited (under ~1ppt drag on operating profit growth at the FY2026–27 peak).
- **Notable policy/data/events:** JPM pull forward the next BoJ [hike](#) call from October to September (with markets largely priced for it), add a December hike, and still see three hikes in 2027 (Apr/Jul/Dec), taking the policy rate to 1.5% by end-2026 and 2.25% by end-2027. Growth momentum looks intact despite a softer 2Q GDP print, while July CPI shows oil-related cost pass-through firming inflation pressures; this leaves the BoJ in a communication bind—hiking sooner may look FX-driven, but waiting risks falling behind the curve.

Australia

- **Market beta:** Australia rose +2.6% in August, with Healthcare, IT, and Materials leading the way, while Discretionary, Real Estate, and Financials lagged. Analysts cut their FTM EPS forecasts on Mateirlas in August.
- **Notable policy/data/events:** CPI was 3.5%/y/y in July, lower than the prior (3.8%). The unemployment rate was 4.5% in July, slightly larger than the prior (4.4%).

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Digital assets, which may also be referred to as virtual or crypto assets or crypto currencies (e.g. bitcoin), discussed in this research report are subject to a rapidly changing regulatory landscape. The application of relevant laws in respect of such assets may be unsettled, and the legality of any digital asset investment may be unclear. Prior to making any investment decision regarding any digital asset, investors should seek their own legal advice and be aware of any legal considerations regarding the purchase, holding or selling of such an investment. For relevant regulatory advisories on digital assets, including bitcoin and ethereum, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Notification for Credit Ratings: If this material includes credit ratings, such credit ratings provided by Japan Credit Rating Agency, Ltd. (JCR) and Rating and Investment Information, Inc. (R&I), are credit ratings provided by Registered Credit Rating Agencies (credit rating agencies registered under the Financial Instruments and Exchange Law of Japan (FIEL)). With respect to credit ratings that are provided by credit rating agencies other than JCR and R&I and have no stipulation that such credit ratings are provided by Registered Credit Rating Agencies, this means that such credit ratings are Non Registered Ratings (credit ratings provided by credit rating agencies not registered under the FIEL). Among the Non Registered Ratings, with respect to those credit ratings provided by S&P Global Ratings (S&P), Moody's Investors Service (Moody's), or Fitch Ratings (Fitch), prior to making investment decision based on such Non Registered Ratings, please carefully read the "Explanation Letter regarding Non Registered Ratings" for the corresponding credit rating agency, which we separately have sent or will send.

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its

subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law.
