

Europe Multi-Industry

China Trade Tracker and what it foretells for European Capital Goods

In our China Import/Export Tracker, we examine 43 specific capital goods product categories relevant to our coverage. We monitor for signs of competitive risk for our companies at a granular, product level. While Europe still leads in exports of capital goods within our tracked products, accounting for 43% of global volumes, its share has decreased from 54% in 2005 (Exhibit 5). Meanwhile, China is steadily increasing its export presence in the global marketplace, gaining 16pp of market share, from 7% in 2005 to 24% in 2025. While most of this share has been captured in Emerging Markets, this presents increased competition for our covered companies. Europe's relative size in the global exports market, vs. China, is the highest in commercial vehicle engines, dairy machinery and rail brakes; however, China has made the fastest gains exactly in those areas over the last five years (Exhibit 3).

Inside, we analyze the latest trends product by product, both over the long run and over the last few months. We also look at trade defense investigations initiated in Europe. In this edition, we also include a competitive landscape in terms of patents filed, which shows China has been the top patent filer, overtaking Europe in 2025.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Looking broadly at China's headline export data for June 2026 specifically, export growth accelerated sharply and was above consensus expectation +27% yoy (vs. +19.4% in May) on the back of AI-related products and automobiles. By region, China's exports growth to the EU accelerated substantially +18.5% yoy (vs. +7.6% in May), albeit the trend was also matched by imports growth from the EU also rising +9.2% yoy (vs. -1.3% in May). China's exports to the US increased 13.9% yoy (vs. 35.4% in May), while imports from the US increased 25.9% yoy (vs. 20.4% in May). See our economists' note [here](#). **For our 43 product categories, we have seen better exports and imports performance out of China.** In the latest granular data by category for June 2026 (all metrics are 3m rolling and exclude Russia for comparability), global export values continued to move higher, and the pace of growth has accelerated, with rising momentum at +15.4% yoy in aggregate for the categories we track (vs. +9.6% in May); similarly, import values growth accelerated, increasing +13.4% yoy (vs. +13.2% in May). **By product**, most categories displayed a growth trend in exports, with the top-5 yoy Chinese export growth categories being **Tungsten** (powders and tools; refer to the product section for more analysis on this) (>>+100%, Sandvik, Weir, FLSmidth), **fibre cable** (+58%, Prysmian), **marine engines** (+75%, Wartsila), **heat pumps** (+60%, Nibe) and **LCV** (+60%, Traton); see [Exhibit 19](#). The pace of change in imports has been more balanced, with the largest yoy Chinese import declines in **cranes** (-51%, Konecranes), **heat pumps** (-37%, NIBE, Ariston, Carel), **coffee machines** (-36%, De' Longhi), **basins and toilets** (-34%, Geberit) and **air pumps** (-26%, Atlas Copco); see [Exhibit 20](#).

In terms of exports to regions for the products we track, the June data shows a meaningful yoy increase in Chinese exports to Europe for **cranes** (>>+100%), **fibre cables** (>>+100%) and **industrial robots**, while Chinese exports were down the most in **basins and toilets** (-51%), **steel pipes** and **dairy machinery** (-23%, GEA, Alfa Laval); see [Exhibit 21](#). In the US, where market trends are still likely to be materially impacted by the fluid tariff situation, China's most material export value yoy growth came in **tungsten** (powders and tools) (>>+100%), **fibre cable** (>>+100%) and **switchgear** (>>+100%, ABB, Legrand, Schneider Electric, Siemens); Chinese exports were down the most in **commercial vehicle engines** (-95%), **aluminium wire** (-65%, Prysmian, Nexans, NKT) and **cranes** (-63%, Konecranes); see [Exhibit 22](#).

In terms of trade balance (net exports) for the products we track, LTM compared to FY15, we see the highest growth in trade balance in **food equipment** (>>100%, GEA, Alfa Laval), **excavators** (>>100%, CNH, Sandvik, Volvo) and **heat exchangers** (>>100%, Alfa Laval); see [Exhibit 23](#). For L3M compared to the same period last year, the highest trade balance growth is seen in **Tungsten** (powders and tools) (>>+100%), fibre cable (>>+100%) and **ultrasonic scanning apparatus** (+61%, Siemens); see [Exhibit 24](#).

The European Commission initiated 33 new trade defense investigations in 2024, marking a considerable increase versus 2023 (12 new investigations) and a historical 10Y average of 14 ([Exhibit 25](#)). Definitive trade defense measures currently in force may have reached over 200 in 2025 ([Exhibit 25](#)). These new investigations and measures span a variety of products related to our capital goods coverage, including mobile cranes, welding wire, tyres, steel products, copper tubes, aluminum flat rolled products and optical fibre cables ([Exhibit 26](#)).

What is new in this edition?

New Product category – coffee machines (De' Longhi) has been added.

And for a recap of the long-run trends...

China's reliance on European capital goods product imports in the 43 categories we track has not changed much over the last decade, but the exports of these products to Europe have grown faster than to RoW, albeit from a significantly lower base. Looking at LTM data vs. a decade ago, we look to assess the level of Chinese competition by comparing Chinese exports' value growth vs. imports' value slowdown. As seen in [Exhibit 1](#), this has been most noticeable for **LED lighting** (Signify), **excavators** (CNH, Sandvik, Volvo), **heat pumps** (NIBE, Ariston, Carel), **heavy duty trucks** (HDT – Daimler, Traton, Volvo), **tractors** (CNH) and **copper wire** (Prysmian, Nexans, NKT). The share of China's exports to Europe in the last decade vs. to other regions has grown the most for **rail** (Alstom, Siemens), **construction equipment** (excavators and shovel loaders), **LED lighting**, and **ultrasonic scanning apparatus** (Siemens); see [Exhibit 16](#); while in the L12M ([Exhibit 17](#)), we have seen the most step-up in **industrial robots**, **LCV** (Traton), **ultrasonic scanning apparatus** (Siemens), **rail** and **bearings** (SKF).

In terms of the shift in wallet share of exports globally, comparing 2025 to 2019, China has gained share in most of the product categories, while at the same time, Europe has been losing. **LCV**, **shovel loaders** (CNH, Volvo), **HDT**, **cranes** (Konecranes) and **marine engines** (Wartsila) are the categories where Europe has lost the most wallet share vs. China gaining in global export markets, with **basins and toilets** (Geberit) the only category where Europe's wallet share has increased and China's has decreased; see [Exhibit 2](#).

What we are reading from China trade in capital goods

Exhibit 1: LED lighting, excavators and heat pumps have shown the most growth in Chinese exports globally (ex Russia) and greatest slowdown in imports over the last decade

Snapshot of competitive intensity - China

Exhibit 20: In L3M, we saw the largest YoY China import decline in cranes (-51%), heat pumps (-37%), coffee machines (-36%), basins and toilets (-34%) and air pumps (-26%).
China import value 3m rolling growth YoY by category - globally (ex Russia)

Median is June 2026 data

Source: General Administration of Customs People's Republic of China, Data compiled by Goldman Sachs Global Investment Research

Exhibit 21: For Europe, the June data indicates a meaningful yoy increase in China exports of cranes (>>+100%), fibre cables (>>+100%) and industrial robots (>>+100%), whereas it reduced the most for exports of basins and toilets (-51%), steel pipes (-49%) and dairy machinery (-23%)

China export value 3m rolling growth YoY by category - Europe

Median is June 2026 data

Source: General Administration of Customs People's Republic of China, Data compiled by Goldman Sachs Global Investment Research

Exhibit 22: For the US, we observe continued China export value yoy growth in tungsten (>>+100%), fibre cable (>>+100%) and switchgear (>>+100%), whereas demand reduced the most for commercial vehicle engines (-95%), aluminium wire (-65%) and and cranes (-63%)

China export value 3m rolling growth YoY by category - US

Median is June 2026 data

Source: General Administration of Customs People's Republic of China, Data compiled by Goldman Sachs Global Investment Research

Exhibit 23: Compared to FY15, food equipment, excavators and heat exchangers have shown the highest growth in China's trade balance; China turned to a net exporter in medium voltage equipment, ultrasonic scanning apparatus, turbogears and superchargers, central heating boilers and dairy machinery; the categories where net imports expanded were valves and marine engines

China export and import value by category, L12M vs. FY15 - globally ex Russia (US\$bn)

Note: The "[+]" sign indicates categories in which China turned from net importer to net exporter; the "[-]" sign indicates categories in which China's net imports expanded.

European Capital Goods China Import/Export Tracker

Methodology

We look at the monthly import/exports volumes of 43 key cap goods products quantitatively in our ongoing analysis of China exports and imports from the US to Europe (for the full list, see [Exhibit 15](#)). We take these products as proxies for China's progress towards self-sufficiency and increased capabilities in producing these items. Using data from the Chinese Customs and International Trade Centre, we track monthly import USD values at the 6-8 digit HS code level since 2015, allowing for granular comparison across time by category. We believe this should allow us to identify structural changes in trading patterns and the impact of US-China tariffs. Further, we include the read-across companies (based on revenue exposure) in brackets.

It is important to caveat that the exports out of China include equipment produced by domestic Chinese firms and international OEMs. For our view on the imbalance in Chinese local operations between costs and revenues locally for our coverage, see [here](#).

These trends suggest that China may be making steady progress in reducing reliance on foreign supplies, consistent with its broader industrial upgrading and dual circulation strategy. This development carries notable implications for our coverage, particularly those companies with significant exposure to the Chinese market. As domestic substitution accelerates, the structural downshift in demand from China may be a concern for exporters of mid- to high-value cap goods. The incremental impact of tariffs or resultant regulatory preferences for domestic alternatives may further erode the competitiveness of foreign exporters, even in categories where they historically held a technological advantage, with industrial robots being the most notable example.

Please note that the import and export value do not necessarily indicate a comparable technological positioning of the product for DM vs. Chinese companies. For example, the industrial robots imported by China are mostly high-end/6 axis robots while exports from China to the world are mostly low-to-mid end/4 or 5 axis robots.

Tungsten Share of Export (%) by Region

Source: International Trade Centre, Data compiled by Goldman Sachs Global Investment Research

How much of the tungsten tools rise in China exports is driven by price inflation?

In February 2025, China added tungsten powder, tungsten carbide, and other critical tungsten derivatives to its formal export control list. Under this policy, exporters are stripped of shipping rights and must apply for individual, specialized government permits for every overseas shipment. When comparing the tungsten price move in China ([Exhibit 222](#)) with volume exports (which we assume are almost entirely tools as powder currently faces restrictions and, in 2025, China turned into a powder net importer according to Tungsten West, [Exhibit 223](#)), we still conclude that export volumes have grown significantly ([Exhibit 224](#)).

Exhibit 222: Tungsten APT prices are down c.30% since April 2026 ATH

Appendix 2: Our Chinese competition medium-term framework

In our Europe Capital Goods 2025 Outlook note “[Picturing 2025: China competition, US tariffs and portfolio events](#)”, we introduced a qualitative framework ([Exhibit 257](#)) to assess end markets where we see characteristics that might attract more Chinese competition (first locally in China, then in other EMs and with a longer timeline potentially in Europe) based on:

- Level of domestic Chinese competitors being technologically already closer to DM players
- Sizable local Chinese competitors already exist
- The relevance of aftermarket and post sale services is less significant
- Distributors do not play the role of gatekeeper of OEMs in the market
- Cost of failure of equipment (downtime) is negligible compared to total cost of the product
- Chinese players have already started taking share domestically
- Market size is large
- Margin level is high
- Customer concentration is high, so customers can exert pressure on pricing
- Upfront costs are high compared to total cost of ownership

Finally, we view certain product categories that are considered to be of national interest as potentially having strong barriers to entry for Chinese players, even when the conditions above are met.

Overall, we see more reasons to be aware of market share risks in automotive bearings, energy storage, construction equipment, buses, discrete automation, HVAC, robotics and lighting.

This framework is based on a qualitative view for all metrics except market size (1<€25mn, 3> €100mn) and margin (1<12%, 3>17%), and the ranking is based on the aggregate of all individual columns. The “National Security” column is looked at as a separate lens to illustrate that this is a separate overlay to the rank of the metrics (i.e., some areas would be higher up in the rank according to the sum of their metrics, but this is then offset due to this metric making them an unlikely area of competition, in our view).

Exhibit 257: We attempt to assess the threat of Chinese competition based on a product-by-product analysis

Exposure to China competition by product and company exposure to each product (% 2025 Sales)

	China's Tech Competitiveness	Sizeable local chinese industry leaders	Importance of aftermarket	Importance of distribution	Downtime cost	Evidence of China taking share domestically	Market size	Margin level	Customer concentration	Upfront cost vs TCO	Risk to European national security	Total Score	Stocks Exposed

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: IVECO GROUP N.V.

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: KONE CORP

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution				Investment Banking Relationships		
	Buy	Hold	Sell		Buy	Hold	Sell
Global	50%	34%	16%		65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a

principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or

other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global

Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
