

Weekly: Earnings Week 7 (AVGO, AMBA), SWKS Tech Day

Expect strong AI spending to remain the key theme through off cycle earnings this week, with AVGO and AMBA both positioned for strong data results and outlooks. We also attended Skyworks Tech day last week and add some context.

AVGO (OW, reporting after market closes on Wednesday, September 2nd): Strong AI momentum continues, but expectations remain the key risk. We expect another solid quarter, with strength across both custom ASICs and AI networking, though the bigger question is whether the results can clear a very high investor bar. We model AI revenue of \$16.0bn in the July quarter, up 48% sequentially, driven by \$10.8bn of custom ASIC revenue and \$5.2bn of AI networking revenue. For the October quarter, we expect AI revenue to increase another 32% sequentially to \$21.2bn, including \$14.9bn of custom ASIC revenue and \$6.2bn of AI networking. We see decent room for upside to these numbers as TPU demand remains strong and networking continues to benefit from the broader buildout of AI infrastructure.

The bigger story remains 2027, where we continue to see potential for upside to our roughly \$120bn AI revenue estimate. Broadcom previously guided to AI revenue "well above" \$100bn next year, and management sounded increasingly confident on the trajectory last quarter, including indicating that growth should persist well into 2028. We are not sure management will provide a more formal update to the 2027 framework this quarter, and do not think one is necessary for the fundamental story to remain intact. TPU should remain the majority of Broadcom's custom ASIC revenue this year and next, but we will also be listening closely for updates on newer custom programs, several of which are expected to become more meaningful as we move through 2027.

The main risk into the print is expectations rather than fundamentals. Last quarter was a good reminder that very strong results are not necessarily enough when the bar is high. Some expectations assume Broadcom will generate more than \$150bn of AI revenue next year. We think that is possible, but would not view it as a certainty versus our roughly \$120bn estimate. The underlying business can continue to perform exceptionally well without necessarily exceeding the most aggressive expectations. We would also be cautious about reading too much into recent supply chain noise. Reports of downward revisions to certain CoWoS forecasts have created some concern, but these checks can be noisy. We continue to expect very strong growth.

TPU share remains the other major investor debate, but our view has not changed: supplier diversification is real, but AVGO's incumbency is very strong.

North America	Attractive
Industry View	

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.

As discussed in our recent note ([In Defense of AVGO's ASIC Share](#)), we believe MediaTek (covered by Charlie Chan) participation is credible, but continue to expect Broadcom to retain roughly 80% of its longer term TPU opportunity. Recent reports around AMD involvement in TPU v10, along with [Marvell's warrant agreement with Google](#), reinforce that Google (covered by Brian Nowak) is broadening its supplier ecosystem. We acknowledge that diversification, but do not think Broadcom's core TPU opportunity is at risk. If anything, the number of semiconductor companies positioning around TPU underscores the scale of the opportunity.

AVGO remains one of our preferred AI compute names and a close number two behind NVIDIA, which remains our Top Pick. We continue to view Broadcom as one of the strongest growth stories in semiconductors, supported by its custom ASIC leadership, strong networking franchise, increasing customer diversification, and a management team we trust to execute. Expectations create some near term risk, and the TPU supplier debate will likely remain an overhang, but we think the market continues to overstate the risk to Broadcom's longer term AI growth trajectory.

AMBA (OW, reporting after market close on Thursday, September 3rd):
Expecting another solid quarter, with July revenue up 7.9% q/q and continued strength in Automotive. We model July quarter revenue to grow 7.9% sequentially, followed by 12% growth in October, as Automotive momentum continues to build and Edge AI demand remains healthy. We expect Automotive to be the stronger growth driver this year, with revenue increasing approximately 20% and outpacing IoT, supported by continued traction in fleet telematics, AI video and safety applications, and increasing AI content per vehicle. IoT trends appear more mixed, with enterprise security remaining relatively healthy while consumer oriented markets could face incremental pressure in 2H from higher memory and storage costs. We view this as the primary near term risk, though the magnitude of any downstream demand impact remains uncertain.

Looking beyond the next few quarters, we continue to view AMBA as well positioned for a broader multiyear buildout in Edge AI. Drones appear to be one of the most compelling near term opportunities, with growing activity across both prosumer and commercial applications, while the upcoming CV7 ramp should provide another source of growth and support the company's favorable ASP trajectory. Automotive also remains an important longer term opportunity, though there were no major updates around a broader CV3 autonomy ramp last quarter. Overall, the story is shifting from a sharp product cycle upswing toward steadier execution, but we remain constructive on AMBA's technology positioning in low power AI inference at the edge and continue to see attractive longer term opportunities across Automotive, drones, robotics, and broader physical AI infrastructure.

On the [unconfirmed M&A reports](#), the strategic value of AMBA has long been one element of our OW thesis, although our conviction has primarily been driven by the strength of the underlying technology. While we have no validation of the reported NXP discussions or whether any such transaction might occur, we can see the potential rationale for such a combination. AMBA would bring differentiated Edge AI

and computer vision capabilities, while NXP's scale, deep automotive relationships, and trusted position with OEMs could help accelerate commercialization, particularly in Automotive where AMBA has historically faced challenges competing against significantly larger suppliers.

Skyworks Tech Day overview

We attended Skyworks' Tech Day in San Jose this past week, where the company highlighted the breadth of its technology portfolio across Mobile and Broad Markets. In Mobile, the focus was on the Google Pixel win - Skyworks now has essentially 100% of RF front-end content after winning the mid-band position for the first time in Google's ~2-year re-compete cycle, with the agreement extended through 2030 and expected to generate over \$1bn in cumulative revenue. The company also highlighted its close partnership with MediaTek and early visibility into next-generation RF requirements.

Outside of mobile, the demos centered on how Skyworks can leverage its RF, timing, isolation, sensing, and power capabilities into faster-growing markets. In Precision Timing, the focus was on integrating network synchronization, jitter attenuation, clock generation, and software in a single IC. In Data Center, the focus was on higher-voltage power architectures and opportunities across isolation, gate drivers, and sensing, with Skyworks positioned anywhere 800V touches across the grid-to-rack stack. The company also discussed opportunities in Automotive, WiFi/Broadband, Drones, and other edge connectivity applications.

We come away incrementally positive from the event on Skyworks' longer-term opportunity; that said, near-term Broad Markets remains mixed, with strength in data center and auto offset by softer IoT, while the smartphone environment continues to hold up despite memory headwinds. Longer term, we see an opportunity for Broad Markets to become a larger part of the business and help diversify Skyworks away from mobile, particularly given ongoing share loss at Apple. The Qorvo deal and integration remain the key catalysts to watch. We continue to see value for patient investors, but the remaining business pressures keep us EW.

Broadcom Earnings Preview

The company is scheduled to report after the market close on Wednesday, September 2nd.

Strong AI Momentum Continues, but Expectations Remain the Key Risk. We expect another solid quarter, with strength across both custom ASICs and AI networking, though the bigger question is whether the results can clear a very high investor bar. We model AI revenue of \$16.0bn in the July quarter, up 48% sequentially, driven by \$10.8bn of custom ASIC revenue and \$5.2bn of AI networking revenue. For the October quarter, we expect AI revenue to increase another 32% sequentially to \$21.2bn, including \$14.9bn of custom ASIC revenue and \$6.2bn of AI networking. We see decent room for upside to these numbers as TPU demand remains strong and networking continues to benefit from the broader buildout of AI infrastructure.

The bigger story remains 2027, where we continue to see upside to our roughly \$120bn AI revenue estimate. Broadcom previously guided to AI revenue "well above" \$100bn next year, and management sounded increasingly confident on the trajectory last quarter, including indicating that growth should persist well into 2028. We are not sure management will provide a more formal update to the 2027 framework this quarter, and do not think one is necessary for the fundamental story to remain intact. TPU should remain the majority of Broadcom's custom ASIC revenue this year and next, but we will also be listening closely for updates on newer custom programs, several of which are expected to become more meaningful as we move through 2027.

The main risk into the print is expectations rather than fundamentals. Last quarter was a good reminder that very strong results are not necessarily enough when the bar is high. Some expectations assumes Broadcom will generate more than \$150bn of AI revenue next year. We think that is possible, but would not view it as a certainty versus our roughly \$120bn estimate. The underlying business can continue to perform exceptionally well without necessarily exceeding the most aggressive expectations. We would also be cautious about reading too much into recent supply chain noise. Reports of downward revisions to certain CoWoS forecasts have created some concern, but these checks can be noisy. We continue to expect very strong growth.

TPU share remains the other major investor debate, but our view has not changed: supplier diversification is real, displacement is not. As discussed in our recent note ([In Defense of AVGO's ASIC Share](#)), we believe MediaTek participation is credible, but continue to expect Broadcom to retain roughly 80% of its longer term TPU opportunity. Recent reports around AMD involvement in TPU v10, along with [Marvell's warrant agreement with Google](#), reinforce that Google is broadening its supplier ecosystem. We acknowledge that diversification, but do not think Broadcom's core TPU opportunity is at risk. If anything, the number of semiconductor companies positioning around TPU underscores the scale of the opportunity.

AVGO remains one of our preferred AI compute names and a close number two behind NVIDIA, which remains our Top Pick. We continue to view Broadcom as one of the strongest growth stories in semiconductors, supported by its custom ASIC leadership, strong networking franchise, increasing customer diversification, and a management team

we trust to execute. Expectations create some near term risk, and the TPU supplier debate will likely remain an overhang, but we think the market continues to overstate the risk to Broadcom's longer term AI growth trajectory.

Details on the July quarter: We model revenue of \$29.4 bn (up 32.5% q/q and up 84.3% y/y), in-line with the Street at \$29.2bn. By segment, we model Semiconductor Solutions revenue of \$20.5bn (36.6% q/q and 123.6% y/y) and Infrastructure Software revenue of \$8.9bn (up 24.1% q/q and up 31.3% y/y). Our gross margin estimate of 74.0% is slightly above the Street at 73.5% and our EPS estimate of \$3.24 is slightly ahead of the Street at \$3.22.

Outlook on October quarter: We model revenue of \$34.8bn (up 18.5% q/q and 93.4% y/y), slightly above the Street at \$34.7bn. By segment, we model Semiconductor Solutions revenue of \$25.9bn (up 26.5% q/q and 134.3% y/y) and Infrastructure Software revenue of \$8.9bn (flat q/q and up 28.3% y/y). Our gross margin estimate of 72.9% is in-line with the Street and our EPS estimate of \$3.85 is slightly ahead of the Street at \$3.84.

Risk Reward – Broadcom Inc. (AVGO.O)

Overweight on growth in AI, recovery in core semis, and potential VMW upside.

PRICE TARGET \$502.00

We value AVGO at 28X CY2027e ModelWare EPS of \$17.92. This is roughly 26x non-GAAP EPS of \$19.59, which is broadly in-line or below their AI peer group.

RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 28 Aug 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

OVERWEIGHT THESIS

- AVGO has the second largest AI exposure (in absolute dollars) in our coverage and is poised to grow as hyperscale capex increases. We see the company maintaining their premium multiple as networking and ASIC businesses continue to grow.
- We expect non-AI semis to have a cyclical rebound late next year after a period of high excess inventory in the networking and storage markets.
- We expect VMware to successfully integrate into the portfolio and focus operations, cut costs, and drive stable cash flows.

Consensus Rating Distribution

Risk Reward – Ambarella Inc (AMBA.O)

Long term prospects with CV3 are exciting, but L2+ autonomy development is slow.

PRICE TARGET \$96.00

EV/sales of 9x CY26, 9x sales is a slight premium to small cap semiconductors

Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

RISK REWARD CHART

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research

OVERWEIGHT THESIS

- We like Ambarella's fundamental position and think that bears generally underestimate the company's technology leadership. We think that the company's computer vision (CV) products are unique and expect CV to drive transformative growth
- Home security and automotive applications will add growth on top of existing core market growth (core markets include surveillance, dash mounted autos and OEM auto surround view/digital rear view mirrors)
- Sensor fusion beginning with radar and camera begins to materialize, though we do not yet base material revenue growth on this market

Consensus Rating Distribution

MS Rating

Source: Refinitiv, Morgan Stanley Research

Risk Reward Themes

Electric Vehicles: *Positive*
Secular Growth: *Positive*

View descriptions of Risk Rewards Themes [here](#)

BULL CASE

\$136.00

10X CY26e Revenue of \$537mm

CV products take auto market share, consumer grows more than expected, and sensor fusion business materializes

- CV solution begins to overcome auto incumbents; further relationships with tier one suppliers, surveillance growth continues
- Design win momentum accelerates, including some in sensor fusion products, and later robotics
- Core business grows more meaningfully, as adoption of CV drives strong growth across all segments

BASE CASE

\$96.00

~9X CY26e Revenue of \$410mm

Incremental growth in security camera opportunities combines with a burgeoning automotive segment

- Increasing CV penetration leads to improved ASPs and larger SAM
- Current pace of EV and AV adoption drives automotive revenue
- Design win momentum continues

BEAR CASE

\$36.00

3.5X CY26e Revenue of \$352mm

Automotive revenue takes longer than expected to ramp; Security camera growth stalls

- AMBA design wins and market share gains in the automotive segment result in smaller revenue opportunities than expected, leading to slower growth and lower multiple
- CV penetration rate decelerates in security camera market
- Computer vision products fail to make any real impact beyond initial surveillance wins.

Risk Reward – Ambarella Inc (AMBA.O)

KEY EARNINGS INPUTS

Drivers	2025	2026e	2027e	2028e
GAAP Revenue (\$, mm)	285	381	410	469

Morgan Stanley is acting as financial advisor to onsemi in connection with its definitive agreement to acquire Synaptics Incorporated ("Synaptics"), as announced on June 25, 2026. The proposed transaction is subject to approval by Synaptics' shareholders, receipt of required regulatory approval and other customary closing conditions. This report and the information provided herein is not intended to (i) provide voting advice, (ii) serve as an endorsement of the proposed transaction, or (iii) result in the procurement, withholding or revocation of a proxy or any other action by a security holder. Onsemi has agreed to pay fees to Morgan Stanley for its financial services. Please refer to the notes at the end of the report.

Valuation Methodology and Risks

NVIDIA Corp. (NVDA.O)

~20 our MW CY27 EPS estimate of \$15.01, in-line with the broader market and a discount to compute semis peers (AMD/AVGO/INTC) as high marketshare and gross margins leave limited levers for multiple expansion in the near term.

Risks to Upside

- Growth in inference and training propel data center revenue
- Gaming sales accelerate as GPU based AI PCs gain traction
- Nvidia can recapture lost revenue in China

Risks to Downside

- AI end markets don't materialize as expected, customers sharply reduce GPU purchases
- AMD reemerges as a viable GPU competitor
- Cloud customers outside of Google are able to develop competitive custom hardware

Skyworks Solutions Inc (SWKS.O)

With the deal synergies, we believe that combined CY27 EPS would be about \$7, vs. our standalone \$5.31, so this would be about ~13x the combined entity. Given some deal risk and synergy uncertainties, we would prefer to value on standalone EPS with a 13.5x multiple.

Risks to Upside

- SWKS/QRVO acquisition approved
- Captures greater \$ content in 5G smartphones
- Potential to regain share in China after a weak period
- Increased expansion of Broad Markets portfolio

Risks to Downside

- SWKS/QRVO acquisition canceled
- Increasing competition and China localization efforts in RF
- Customer concentration and potential pricing pressure from Apple (~60% of total sales)
- If GM fails to recover to near-term target

Morgan Stanley Research has been published in accordance with our conflict management policy, which is available at www.morganstanley.com/institutional/research/conflictolicies. A Portuguese version of the policy can be found at www.morganstanley.com.br

Important Regulatory Disclosures on Subject Companies

As of July 31, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Aeva Technologies Inc, Ambarella Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Advanced Micro Devices, Aeva Technologies Inc, Broadcom Inc., Cerebras Systems, GlobalFoundries Inc, Intel Corporation, NVIDIA Corp., ON Semiconductor Corp., Quantinuum, Semtech Corp.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cerebras Systems, Intel Corporation, IonQ Inc, Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Quantinuum, Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Quantinuum, SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, Cerebras Systems, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., NVIDIA Corp., NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan

Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of July 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1529	42%	442	47%	29%	750	43%
Equal-weight/Hold	1582	43%	396	42%	25%	773	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	560	15%	97	10%	17%	217	12%
Total	3,674		936			1741	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Analog Devices Inc., Broadcom Inc., Microchip Technology Inc., NVIDIA Corp., Qualcomm Inc. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/MSICPL_Morgan_Stanley_Research_Audit_Report.pdf).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the

appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
